AGRICULTURE DEPARTMENT: Page

*See Animal Industry Bureau.*
*Commodity Credit Corporation.*
*Commodity Exchange Authority.*
*Entomology and Plant Quarantine Bureau.*
*Farm Credit Administration.*
*Federal Crop Insurance Corporation.*
*Forest Service.*
*Rural Electrification Administration.*

Agricultural adjustment:
- Conservation program, national. *See* Conservation program.
- Marketing quotas, for various commodities:
  - Referendum on marketing quotas, holding of; applicability of regulations to Puerto Rico — 7507
  - Review of marketing quotas; hearings, review, etc., applicability of regulations to Puerto Rico — 7507
  - Various commodities. *See* Corn *and* Cotton.

Agricultural conservation. *See* Conservation program.

Almonds:
- *See also* Nuts.
- Standards:
  - Almonds in shell — 7148
  - Shelled almonds — 7149

Apples:
- *See also* Fruits and berries.
- Standards, for fresh apples:
  - Apples, for processing — 7081
  - Extra fancy apples — 7078

Authority, delegations of:
- Production and Marketing Administrator, to State Production and Marketing Administration Committees; redelegation of final authority with respect to marketing quota regulations for 1953 crop of peanuts:
  - Alabama State PMA Committee — 7571
  - Arkansas State PMA Committee — 7179
  - Florida State PMA Committee — 7000
  - Georgia State PMA Committee — 7178
  - New Mexico State PMA Committee — 7483
- Secretary of Agriculture; delegation of authority to Under Secretary and each Assistant Secretary of Agriculture — 7498

Beans, lima:
- *See also* Vegetables.
- Standards; fresh shelled lima beans for processing — 7081

Beets:
- *See also* Vegetables.
- Standards, bunched beets — 7082

Berries. *See* Fruits and berries.

Blackberries and similar berries (Boysenberries, dewberries, Loganberries, Youngberries, etc.):
- *See also* Fruits and berries.
- Standards; fresh berries for processing — 7101

AGRICULTURE DEPARTMENT—Continued Page

Blueberries:
- *See also* Fruits and berries.
- Standards; blueberries for processing — 7147

Boysenberries. *See* Blackberries and similar berries.

Broccoli:
- *See also* Vegetables.
- Standards:
  - Broccoli, for processing — 7083
  - Italian, sprouting broccoli; consumer standards — 7082

Broccoli greens. *See* Greens.

Brussels sprouts:
- *See also* Vegetables.
- Standards, consumer — 7148

Bulbs, flower. *See* Flowers and flower bulbs.

Cabbage:
- *See also* Vegetables.
- Standards — 7084

Cantaloups:
- *See also* Fruits and berries.
- Standards — 7084

Carrots:
- *See also* Vegetables.
- Standards, for fresh carrots; consumer standards — 7085

Cauliflower:
- *See also* Vegetables.
- Standards — 7086

Celery:
- *See also* Vegetables.
- Standards — 7087
  - Consumer standards for celery stalks — 7089

Chickens. *See* Poultry.

Christmas trees and greens; inspection and certification — 7065

Citrus fruits (grapefruit, lemons, limes, oranges, and tangerines):
- *See also* Fruits and berries.
- Marketing of citrus fruits grown in various States:
  - Arizona:
    - Grapefruit — 7161
    - Lemons; limitation of shipments — 7023, 7229, 7381, 7584
    - Oranges:
      - Navel oranges — 7195, 7539
      - Limitation of shipments — 7005, 7054, 7223, 7379, 7580
      - Valencia oranges — 7358
  - California:
    - Grapefruit (Imperial and Riverside Counties) — 7161
    - Lemons; limitation of shipments — 7023, 7223, 7381, 7584
    - Oranges:
      - Navel oranges — 7195, 7539
      - Limitation of shipments — 7005, 7054, 7223, 7379, 7580
      - Valencia oranges — 7358
  - Florida:
    - Grapefruit; limitation of shipments — 7228, 7582
    - Oranges; limitation of shipments — 7228, 7380, 7582
    - Tangerines; limitation of shipments — 7229, 7381, 7583

40000——1

**AGRICULTURE DEPARTMENT—Continued** Page

Citrus fruits (grapefruit, lemons, limes, oranges, and tangerines)—Continued
Standards:
Grapefruit 7090
Grapefruit (California and Arizona) 7104
Grapefruit (Florida) 7097
Lemonade, frozen concentrate 7292
Limes, Persian (Tahiti) 7106
Orange juice:
Canned concentrated 7156
Concentrated, for manufacturing 7155
Oranges 7093
Oranges (California and Arizona) 7110
Oranges (common sweet) 7096, 7116
Oranges (Florida) 7112
Tangerines 7138
Tangerines (Florida) 7140
Collard greens. *See* Greens.
Committee, Interdepartmental Materials Advisory; representation on 7239
Conservation program, National agricultural, 1954; State funds 7027
Corn:
*See also* Grains.
Farm acreage allotments, for 1954 crop 7507
Corn, sweet:
*See also* Vegetables.
Standards:
Corn on cob, husked; consumer standards 7100
Green corn 7100
Cotton; marketing quotas, acreage allotments, etc.:
Extra long staple cotton, 1954; proposed 7196
Referendum among producers 7519
Upland cotton, 1954 7527
Referendum among producers 7519
Cottonseed, sold or offered for sale for crushing purposes; inspection sampling, and certification, fees for review of grading of cottonseed, revision 7014
Cucumbers:
*See also* Vegetables.
Standards 7154
Currants:
*See also* Fruits and berries.
Standards; currants for processing 7146
Dairy products (milk, cream, and byproducts), marketing of. *See* Milk, cream, and byproducts.
Dewberries. *See* Blackberries and similar berries.
Disaster areas; designation of counties in various States as areas having need for agricultural credit:
Arkansas 6972, 7617
Florida 7616
Kentucky 6972
Missouri 6972
North Carolina 6972
Tennessee 6973
Virginia 6973, 7616
West Virginia 7617
Ducks. *See* Poultry.
Eggplant:
*See also* Vegetables.
Standards 7153
Eggs and egg products; sampling, grading, labeling, and supervision of packaging 6908
Forms and instructions, governing official plants processing and packaging egg products 6908
Regulations respecting 6908
Filberts:
*See also* Nuts.
Marketing of filberts grown in Oregon and Washington 7382, 7556
Standards, for filberts in shell 7147
Flowers, and flower bulbs; inspection and certification 7065
Food:
*See also specific commodities.*
Disposal of food commodities acquired through price support operations. *See main heading* Commodity Credit Corporation.
Fruits and berries:
Grading, inspection, and certification, of fresh fruits and berries 7065
Marketing of various fruits and berries. *See* Citrus fruits; *and* Grapes.

**AGRICULTURE DEPARTMENT—Continued** Page

Fruits and berries—Continued
Standards, for various fresh and processed fruits and berries. *See* Apples; Blackberries and similar berries; Blueberries; Cantaloups; Citrus fruits; Currants; Grapes; Peaches Pears; Pineapples; Plums; Prunes; Raspberries; *and* Watermelons.
Geese. *See* Poultry.
Grains:
Standards; fees and charges, proposed rule making 7495
Support prices, for various grains. *See main heading* Commodity Credit Corporation.
Grapefruit. *See* Citrus fruits.
Grapes:
*See also* Fruits and berries.
Marketing of Tokay grapes grown in California (San Joaquin and Sacramento Counties) 7520
Standards, for grapes (European or Vinifera type):
Sawdust pack grapes 7151
Table grapes 7101
Greens:
*See also* Vegetables.
Standards:
Collard green and broccoli greens 7086
Mustard greens and turnip greens 7108
Guineas. *See* Poultry.
Hops grown in Oregon, California, Washington, and Idaho, and hop products produced therefrom, marketing of; order discharging trustees for liquidation 7329
Kale:
*See also* Vegetables.
Standards, consumer 7106
Lemons. *See* Citrus fruits.
Limes. *See* Citrus fruits.
Loganberries. *See* Blackberries and similar berries.
Marketing orders, for various agricultural commodities. *See* Fruits and berries; Milk, cream, byproducts; Nuts; *and* Vegetables.
Marketing quotas, for various agricultural commodities. *See* Corn; *and* Cotton.
Milk, cream, and byproducts; marketing in various marketing and sales areas:
Kansas; Wichita 7547
Kentucky; Ashland (Tri-State) 6933
Massachusetts:
Boston (Greater) 7850
Fall River 7584
Lowell-Lawrence 7583
Springfield 7585
Worcester 7585
Michigan; Detroit 7540
Missouri:
Kansas City (Greater) 6997
Neosha Valley 7318
St. Louis 6943, 7513, 7577
Springfield 7249
New York; New York metropolitan area 7224, 7249, 7546, 7581
Ohio:
Cincinnati 7514
Marietta, Ironton, Gallipolis, etc. (Tri-State) 6933
Toledo 7319
Oklahoma; Tulsa-Muskogee 7195
West Virginia; Huntington and Parkersburg (Tri-State) 6933
Minerals, reserved, disposition of; designation of counties in various States as areas in which mineral interests may be sold, revised area designations:
Fair market value areas (Schedule A); list, addition of counties in various States:
Alabama 7369
Nebraska 7178
South Dakota 7178
One dollar areas (Schedule B); list, deletion of counties in various States:
Alabama 7369
Nebraska 7178
South Dakota 7178
Mustard greens. *See* Greens.
Nuts:
Inspection and certification of raw nuts 7065
Marketing of nuts grown in various States. *See* Filberts; *and* Pecans.

**AGRICULTURE DEPARTMENT—Continued** Page

Nuts—Continued
Standards, for certain nuts. *See* Almonds; Filberts; Peanuts; *and* Pecans.
Onion sets; inspection and certification 7065
Onions:
*See also* Vegetables.
Standards, for common green onions 7109
Oranges. *See* Citrus fruits.
Packers and Stockyards Division, rules and regulations under Packers and Stockyards Act; revision, proposed 7027
Peaches:
*See also* Fruits and berries.
Standards 7116
Peanuts:
*See also* Nuts.
Standards, for peanuts in shell (cleaned Virginia type) 7117
Pears:
*See also* Fruits and berries.
Standards:
Pears, for canning 7122
Summer and fall pears 7118
Winter pears 7120
Peas, fresh:
*See also* Vegetables.
Standards 7123
Pecans:
*See also* Nuts.
Marketing of pecans grown in Georgia, Alabama, Florida, Mississippi and South Carolina 7300
Grade and size regulation 7162
Standards:
Pecans in shell 7123
Shelled pecans 7125
Peppers:
*See also* Vegetables.
Standards; sweet peppers for processing 7127
Pigeons. *See* Poultry.
Pineapples:
*See also* Fruits and berries.
Standards 7127
Plums:
*See also* Fruits and berries.
Standards, for fresh plums 7178
Potatoes, Irish:
*See also* Vegetables.
Marketing of Irish potatoes grown in various States:
California (Modoc and Siskiyou Counties) 7323
Limitation of shipments 7055
Oregon (Crook, Deschutes, Jefferson, Klamath, and Lake Counties) 7323
Limitation of shipments 7055
Standards 7129
Consumer standards 7132
Poultry and edible products thereof; grading and inspection, standards, etc 6911
Forms, instructions, and applications 6930
Grading and inspection 6912
Standards, classes, and grades 6926
Prunes:
*See also* Fruits and berries.
Standards, for fresh prunes 7128
Puerto Rico:
Marketing quotas, for various commodities; review of, and holding referenda of, applicability of regulations to Puerto Rico 7507
Sugar requirements and quotas, etc. *See* Sugar.
Rabbits, domestic, and edible products thereof; grading and inspection, standards, etc 6895
Grading and inspection 6898
Standard, for classes 6907
Raspberries:
*See also* Fruits and berries.
Standards, raspberries for processing 7137
Shallots:
*See also* Vegetables.
Standards, for bunched shallots 7134
Spinach:
*See also* Vegetables.
Standards, fresh spinach leaves 7137
Consumer standards 7137

**AGRICULTURE DEPARTMENT—Continued** Page

Standards, for various agricultural commodities. *See* Fruits and berries; Grains; Poultry; Rabbits; *and* Vegetables.
Sugar:
Farms, proportionate shares for. *See* Proportionate shares for sugarcane farms.
Proportionate shares for sugarcane farms; Puerto Rico, 1953–54 crop 7159
Sugar requirements and quotas:
Continental United States; consumption requirements and quotas:
*See also* Quotas, *below.*
1953 quota for cane sugar area, allotment of; proposed rule making 7300
Mainland. *See* Continental United States.
Puerto Rico; consumption requirements and quotas:
*See also* Quotas, *below.*
Allotment of sugar quotas, 1953 7510
Direct-consumption portion 7510
Quotas and proration of quota deficits; determination and proration of deficits, for domestic beet sugar area, 1953 7159
Wage rates; sugar beets, regions other than California, Southwestern Arizona, Southern Oregon, and Western Nevada, for 1954 crop 7281, 7571
Sweetpotatoes:
*See also* Vegetables.
Standards 7133
For canning 7136
For dicing and pulping 7136
Tomatoes:
*See also* Vegetables.
Standards, fresh tomatoes 7142
Consumer standards 7144
Green tomatoes, for processing 7145
Turkeys. *See* Poultry.
Turnip greens. *See* Greens.
Vegetables:
Grading, inspection, and certification of fresh vegetables 7065
Marketing of potatoes. *See* Potatoes.
Standards, for various fresh vegetables. *See* Beans, lima; Beets; Broccoli; Brussels sprouts; Cabbage; Carrots; Cauliflower; Celery; Corn; Cucumbers; Eggplant; Greens; Kale; Onions; Peas; Peppers; Potatoes; Shallots; Spinach; Sweetpotatoes; *and* Tomatoes.
Watermelons:
*See also* Fruits and berries.
Standards 7146
Youngberries. *See* Blackberries and similar berries.

**AIR FORCE DEPARTMENT:**

Aircraft danger areas over military installations, designation in coordination with Air Force. *See main heading* Civil Aeronautics Administration.
Armed Services Patent Advisory Board, membership on 7329
Claims against United States; reimbursement to owners and tenants of land acquired by Department, delegation respecting 6940
Emergency Facilities Depreciation Board; Appendix A, list of contractor information on true depreciation, note 6940
Enlistment in Regular Air Force:
Ineligible persons, overseas 7317
Qualifications:
Enlistment of persons with dependents 7317
Police clearance 7317
Officers' Reserve. *See* Reserve forces.
Procurement:
Air Force procurement procedure:
Contract forms and clauses, approved contract forms (Standard, Defense, and Air Force):
Abstract of bid forms 7027
Abstract of bids (long form); deletion 7027
Abstract of bids (long form-continuation sheet); deletion 7027
Emergency Facilities Depreciation Board; Appendix A, list of contractor information on true depreciation, note 6940
Armed services procurement regulations. *See main heading* Defense Department.

**AIR FORCE DEPARTMENT—Continued** Page

Reserve Forces:
Officers' Reserve:
Inactive duty training pay and allowances:
Definitions, training period and unit training assembly 7317
Methods of qualifying, officers 7317
Mobilization assignees, number of training periods authorized 7317
Paid training periods or unit training assemblies, maximum number of; training category C 7817
Purpose and policy 7316
Rations in kind for airmen 7317
Specialist training units, eligibility 7317
Uniform maintenance allowance 7317
Mobilization and training:
Definitions, mobilization assignee 7493
General 7493
Mobilization assignment, eligibility 7493
Mobilization designation, eligibility 7493
Training:
Active duty training of mobilization assignees 7494
Training requirements for mobilization assignees 7494
Waivers of training requirements for mobilization designees 7494
Point-gaining activities:
Basis for award and supporting evidence, credit for active duty 7027
Definitions:
Training period 7027
Unit training assembly 7027
Reserve Officers' Training Corps; training camps, revocation 7317
Survivor's benefits under Uniform Services Contingency Option Act of 1953, regulations governing; functions of Secretary respecting (Executive Order 10499) 7003
Uniform Code of Military Justice, remission or suspension of unexecuted portion of sentence that has been commuted to less punishment pursuant to; authority of Secretary respecting (Executive Order 10498) 7003

**ALIEN PROPERTY, OFFICE OF:**
Claims, debt, filing of, in respect of Riichiro Hori; time for filing extended from July 1, 1949, to January 25, 1954 7308
Return of vested property, notices respecting. *See* Vesting orders.
Vesting orders, etc.:
Behrends, Rudolph and Emma 7616
Busch, Adolphus, trust under will of, vesting order respecting; addition of name of Lilly Gronewaldt 7178
Koster, Helen, Martha, and Wilhemine 7616
Neimier, Emilie 7616
Peinemann, Carl 7616
Rademacher, Heinrich 7616
Rademacher, John H 7616
Rademacher, Marie 7616
Return of vested property, notices respecting:
Beckman, Emil 7047
Cantieri Reuniti Dell' Adriatico 7375
Dobler, Christina Marlies, Herdith, and Reinold Dobler 7616
Fasching, Anna 7047
Frankel, Ella 7374
Franklin, Alex S. and Fred F 7374
Hoch, Agatha 7616
Lattes, Giorgio and Edilia Verga 7375
Mayer, Theresia (nee Fasching) 7047
Obey, Andre 7047
Roubitschek, Pauline 7047
Schweyer, Ida 7047
Verga, Edilia (ved. Lattes) 7375
Vodeb, Mrs. Antonija 7375

**ANIMAL INDUSTRY BUREAU:**
Animal diseases:
Cooperative control and eradication:
Brucellosis (Bang's disease), tuberculosis, or paratuberculosis, cattle destroyed because of; redesignation 7489
Subchapter, redesignation of 7489

**ANIMAL INDUSTRY BUREAU—Continued** Page

Animal diseases—Continued
Quarantine of various areas, and prohibition of movement of animals infected with vesicular exanthema. *See* Interstate transportation of animals and poultry.
Exportation and importation of animals and animal products; importation of horses from Canada 7339
Interstate transportation of animals and poultry; prohibition of movement of animals infected with various diseases, from quarantined areas:
Hog cholera, swine plague, and other communicable diseases; vesicular exanthema:
Cleaning and disinfecting vehicles and facilities, used in connection with feeding, watering and resting swine moved interstate 7366
Designation of States or areas in which swine are affected with disease 6993, 7511
Vesicular exanthema. *See* Hog cholera, swine plague, etc.
Meat inspection regulations:
Definitions and standards of identity, beef fat 7536
Identifying products:
Labeling products:
False or deceptive names, established trade names, etc 7536
Labeling products prepared with artificial coloring, flavor, or preservative 7536
Marking, branding, and identifying products:
Marking of meat food products in casings 7535
Tank cars and tank trucks of edible products 7535
Inspection; reinspection and preparation of products:
Chemicals, preservatives, etc., use in preparation of meat food products 7536
Prescribed treatment of pork and products containing pork to destroy trichinae 7536
Stamps and certificates, export; uninspected tallow, stearin, oleo oil, etc., not to be exported unless exporter certifies as inedible 7536
Tanking and denaturing of condemned carcasses and parts:
Condemned carcasses and products, disposition of, by tanking, sealing of tanks, etc 7535
Official establishments having no tanking facilities, disposition of condemned meat and products at 7535

**ARMED SERVICES PATENT ADVISORY BOARD:**
Organization and functions 7329

ARMISTICE DAY, 1953 (Proclamation 3035) 7049

ARMS, AMMUNITION, AND IMPLEMENTS OF WAR, enumeration of (Proclamation 3038) 7505

**ARMY DEPARTMENT:**
*See Engineers, Corps of.*
Aircraft danger areas over military installations, designation in coordination with Army. *See main heading* Civil Aeronautics Administration.
Armed Services Patent Advisory Board, membership on 7329
National Guard regulations; medical attendance and burials:
Pay and allowances 6941
To whom applicable 6940
Procurement:
Armed services procurement regulations. *See main heading* Defense Department.
Army procurement procedure:
Contract clauses and forms:
Approved contract forms; construction contract, sample of form 7059
Clauses required for fixed-price supply contracts; assignment of claims:
Acknowledgment of notice of assignment 7059
Assignor's statement 7059
Information to be furnished to assignees 7059
Foreign purchases; duty and customs 7058
Emergency purchases 7058
General provisions, administrative procedures:
Approval of awards of contracts for employment of experts or consultants 7058
Execution of contracts with partnerships 7057
Government property in possession of contractors, implementation of manual for control of; property shipped out for repair 7059

**ARMY DEPARTMENT—Continued** Page

St. Lawrence River Joint Board of Engineers, United States Section of; designation of Secretary as member (Executive Order 10500) 7005
Survivor's benefits under Uniformed Services Contingency Option Act of 1953, regulations governing; functions of Secretary respecting (Executive Order 10499) 7003
Uniform Code of Military Justice, remission or suspension of unexecuted portion of sentence that has been commuted to less punishment pursuant to; authority of Secretary respecting (Executive Order 10498) 7003

**ATOMIC ENERGY COMMISSION:**
Cancer support program for fiscal year 1954; credit for shipments of radioisotopes by suppliers 7280
Fissionable materials, control of facilities for production of; address for communications respecting 7356
Radioisotope distribution:
Applications for radioisotopes; requirements for approval of applications 7038
Authority for radioisotope procurement:
Expiration 7039
Issuance of authorizations 7039
Cancer support program, radioisotopes for. *See* Cancer support program for fiscal year 1954, *above.*
Definitions: "general authorization," "human use," "research and development" 7038
Exemptions from regulation of items and quantities listed in Schedules A and B 7038
Inspections and tests 7039
Source material, control of:
Applications for licenses, petitions, and other communications; change of address 7355
Schedule III; general licenses for transfers, deliveries, receipts of possession of source materials, etc.:
By sub-contractors 7355
For analytical purposes 7355

**B**

**BUSINESS AND DEFENSE SERVICES ADMINISTRATION:**
Scarce and critical materials:
Control of general distribution in civilian market, Schedule A; titanium sponge and titanium metal (ingot and mill products) 7329
Designation of scarce materials (DSM–1); revocation 6966

**C**

**CANAL ZONE GOVERNMENT:**
Sanitation, health, and quarantine; designation of countries where foot-and-mouth disease or rinderpest exists:
Canada, deletion 7192
Channel Islands 7192
Jersey, Island of; deletion 7192
Martinique, Island of 7192
Mexico 7177
Norway, deletion 7192

CANCER SUPPORT PROGRAM, radioisotope distribution in connection with. *See* Atomic Energy Commission.

**CIVIL AERONAUTICS ADMINISTRATION:**
Accidents and missing aircraft; delegation of certain accident investigation functions to Administrator, from Civil Aeronautics Board 7499
Altitudes, instrument. *See* Instrument flight rules.
Approach procedures, standard instrument. *See* Instrument flight rules.
Certification procedures; issuance of certificate to crew member 6994
Civil airways, designation of; colored civil airways:
Blue civil airways 7055, 7476
Red civil airways 7476

**CIVIL AERONAUTICS ADMINISTRATION—Con.** Page

Control areas, zones, and reporting points, designation of:
Control areas:
Colored civil airways:
Blue civil airways 7056
Red civil airways 7476
Extension of control areas 7476
Reporting points:
Colored civil airways:
Blue civil airways 7056, 7477
Green civil airways 7477
Red civil airways 7477
VOR reporting points; domestic 7477
Danger areas over Army, Navy, and Air Force installations in various States:
California 7056
Massachusetts 7104
Nevada 7056
North Carolina 7056
South Dakota 7492
Texas 7492
Washington 7056
Instrument flight rules:
Instrument altitudes, minimum en route; particular routes:
Colored civil airways:
Amber civil airways 7025, 7164, 7537
Blue civil airways 7025, 7165, 7337, 7538
Green civil airways 7025
Red civil airways 7025, 7165, 7537
Direct routes; United States 7025, 7538
VOR civil airways 7025, 7026, 7027, 7165, 7538
Instrument approach procedures, standard:
Automatic direction finding procedures 6963, 7234, 7342
Ground controlled approach procedures 7349
Instrument landing system procedures 6958, 6963, 7236, 7347
Omnirange procedures, very high frequency 7236, 7238, 7351
Radio range procedures:
High frequency range procedures 7341
Low frequency range procedures 6962, 7233, 7340
Organization and functions; Regional offices:
International Region, field establishments; addition of San Juan, Puerto Rico, to list 7016
Regions 1–6:
Airport Division, Airport District Offices; locations and areas served, Region 2, establishment of office at Miami, Fla 7000
Aviation Safety Division, Aviation Safety District Offices; locations and specialties:
Region 1; Pittsburgh, Pennsylvania office, change of address 7260

**CIVIL AERONAUTICS BOARD:**
Accidents and missing aircraft:
Delegation of certain accident investigation functions to Administrator of Civil Aeronautics 7499
Investigation of accidents occurring at or near certain cities:
Half Moon Bay, Calif 7306
New York International Airport, Jamaica, N. Y. 7062
Standiford Field, Louisville, Ky 7331
Air agencies; ratings. *See* Certificates and ratings.
Air carriers:
Accidents and missing aircraft, investigation of. *See* Accidents and missing aircraft.
Irregular air carriers. *See* Irregular air carriers and off-route rules.
Scheduled. *See* Scheduled air carriers.
Air traffic rules:
General flight rules (GFR); anti-collision lights for large aircraft operating at night, proposed rule making 7274
Visual flight rules (VFR), cruising altitudes within control zones and control areas 7055
Airmen; certificates. *See* Certificates and ratings.
Airworthiness, airplane, normal, utility, and acrobatic categories; anti-collision light 7339
Authority, delegation of, to Administrator of Civil Aeronautics:
Accident investigation, certain; delegation of functions respecting 7499

**CIVIL AERONAUTICS BOARD—Continued** — Page

Authority, delegation of, to Administrator of Civil Aeronautics—Continued
Military services; authority to permit air carriers under contract to military services to deviate from certain provisions of regulations (SR–385B) — 6957
Revision and extension of authority, proposed — 6998
Certificates and ratings:
Air agencies; ground instructor rating, airman and other identification cards, requirements respecting availability for display, etc — 7364
Airmen:
Airline transport pilot rating; airman and other identification cards, requirement respecting personal possession of — 7364
Air-traffic control-tower operator certificates:
Airman and other identification cards, requirement respecting availability for display — 7364
Qualifications for certificate; examination — 7536
Dispatcher, flight, certificates; airman and other identification cards, requirement respecting availability for display — 7364
Engineer, flight, certificates; airman and other identification cards, requirements respecting personal possession of — 7364
Lighter-than-air pilot certificates; airman and other identification cards, requirements respecting personal possession of — 7364
Navigator, flight, certificates; airman and other identification cards, requirement respecting personal possession of — 7364
Parachute rigger certificates; airman and other identification cards, requirement respecting availability for display — 7364
Pilot certificates; airman and other identification cards, requirements, respecting personal possession of — 7364
Radio operator, flight, certificates; airman and other identification cards, requirements respecting personal possession of — 7364
Commercial operators certification and operation rules; delegation of authority to Administrator to permit air carriers under contract to military services to deviate from certain provisions of regulations (SR–385B) — 6957
Revision and extension of authority, proposed — 6998
Economic regulations:
Mail, transportation of; postal employees to be carried free, requests to be filed — 7232
Reports, filing of, by irregular air carriers and noncertificated cargo carriers; elimination of requirements for air taxi operators — 7267
Tariffs of air carriers:
Free and reduced rate transportation, tariffs respecting; passes, issuance of, lists of authorized issuing officials and affiliates — 7266
Preparation of; liability rules for personal injury and death, clarification to indicate filing of such rules not required, proposed rule making — 6999
Irregular air carrier and off-route rules:
Large aircraft operating at night, anti-collision lights for; proposed rule making — 7274
Maintenance requirements, additional, for large aircraft — 7537
Military services; delegation of authority to Administrator to permit air carriers under contract to military services to deviate from certain provisions of regulations (SR–385B) — 6957
Revision and extension of authority, proposed — 6998
Operating limitations for large passenger-carrying airplanes, not certificated in the transport category — 7613
Weights, landing, for nontransport category airplanes; proposed rule making — 7611
Maintenance, repair, and alteration of airframes, powerplants, propellers, and appliances, for aircraft for which airworthiness certificates have been issued — 7386
Aircraft operating limitations — 7390
Applicability — 7386
Definitions — 7386
Flight tests — 7390
Performance rules; standards of performance — 7391

Maintenance, repair, and alteration of airframes, powerplants, propellers, and appliances, for aircraft for which airworthiness certificates have been issued—Continued
Persons authorized to perform or approve maintenance, repairs, and alterations — 7389
Records, maintenance, repair, and alterations — 7390
Operation rules, for various types of aircraft:
*See also* Commercial operators; Irregular air carriers; *and* Scheduled air carriers.
Air traffic rules; flight rules, etc. *See* Air traffic rules.
General operation rules; large aircraft operating at night, anti-collision lights for, proposed rule making — 7274
Ratings. *See* Certificates and ratings.
Repair, and alteration, of airframes, powerplants, propellers, and appliances. *See* Maintenance, repair, and alteration.
Scheduled air carriers:
General operation rules. *See* Operation rules, for various types of aircraft.
Interstate air carrier certification and operation rules (amendments proposed and/or adopted):
Airmen:
Airmen and crew member requirements — 7324
Flight crew and dispatcher qualifications — 7324
Flight time limitations — 7324
Training program — 7324
Airplane performance operation limitations:
Nontransport category — 7324
Landing distance limitations; alternate airports — 7324
Transport category — 7162
Definitions; dispatch release — 7324
Dispatcher, duty time — 7324
Dispatching rules — 7324
Flight operations — 7324
Instrument and equipment:
All operations — 7324
Radio equipment — 7324
Large aircraft operating at night, anti-collision lights for — 7274
Maintenance and inspection personnel duty time limitations — 7324
Manual requirements; contents of manual — 7324
Military services; delegation of authority to Administrator to permit air carriers under contract to military services to deviate from certain provisions of regulations (SR–385B) — 6957
Revision and extension of authority, proposed — 6998
Records and reports — 7324
Services and facilities; communications facilities — 7324
Weights, landing, for nontransport category airplanes — 7611
Operating certification; authority of Administrator to issue air carrier operating certificate, applicable to helicopter operations, proposed special regulation — 7495
Operations outside continental limits of United States; amendments proposed and/or adopted:
Large aircraft operating at night, anti-collision lights for — 7274
Military services; delegation of authority to Administrator to permit air carriers under contract to military services to deviate from certain provisions of regulations (SR–385B) — 6957
Revision and extension of authority, proposed — 6998
Passenger operations rules:
Aircraft requirements:
Instruments and equipment; required for continuance of flight, fuel quantity indicator — 7606
Limitations:
Aircraft certification limitations; deletion of provision respecting aircraft used after December 31, 1953 — 7611
Nontransport category airplane; operating limitations; take-off, en route, landing, etc — 7611
Weights, landing, for nontransport category airplanes — 7611

Trans-Texas Airways, service to Fayetteville, Ark — 7330

**CIVIL SERVICE COMMISSION:**
Annual and sick leave regulations, general provisions; non-pay status — 7337
Appointment to positions excepted from competitive service. *See* Exceptions from competitive service.
Exceptions from competitive service, Civil Service Rule VI:
Schedule A, positions other than confidential or policy-determining for which an examination is not practicable; agencies with positions revoked from Schedule A:
Air Force Department — 7219
Labor Department — 7337
National Railroad Adjustment Board — 6895
Schedule C, confidential or policy-determining positions; agencies with positions in Schedule C:
Agriculture Department — 7265
Army Department — 7219
Commerce Department — 7162, 7507
Health, Education, and Welfare — 7162
Interior Department — 7577
Justice Department — 7337
Labor Department — 7337
National Mediation Board — 6895
Railroad Retirement Board — 7162
State Department — 7337
Territories, Office of — 7577
Treasury Department — 7337
Sick leave. *See* Annual and sick leave regulations.

**COAST AND GEODETIC SURVEY:**
Survivor's benefits under Uniformed Services Contingency Option Act of 1953, regulations governing, functions of Secretary of Commerce respecting (Executive Order 10499) — 7003

**COAST GUARD:** — Page

Authority, delegation of, to Commandant, with respect to functions of Secretary of Treasury in regard to certain statutory rules for preventing marine collisions applicable to Coast Guard vessels — 7571
Certificates, acceptance of, issued pursuant to International Conventions for Safety of Life at Sea:
1929 Convention, denunciation of, and determinations regarding certificates — 6946
1948 Convention; acceptance of certificates issued pursuant to, providing for inspection by United States Coast Guard to satisfy marine inspectors that vessel, boilers; lifesaving and firefighting equipment, etc., are as stated in certificates held by such vessel — 6945
International Conventions for Safety of Life at Sea; acceptance of certificates issued pursuant to. *See* Certificates.
Navigation requirements, for St. Marys River, Michigan; speed limits of vessels in St. Marys River Channel from Frying Pan Island to Pipe Island Shoal, proposed rule making — 7273
Safety of Life at Sea, International Conventions for; acceptance of certificates issued pursuant to. *See* Certificates.
Security and protection of vessels, harbors, and waterfront facilities:
Identification of persons; credentials for persons requiring access to waterfront facilities or vessels, right of appeal — 6942
Merchant Marine personnel:
*See also* Identification of persons.
Security check and clearance of:
Chairman of the Board, duties and responsibilities — 6942
Issuance of documents bearing security clearance indorsement; denial or revocation of clearance — 6941
Survivor's benefits under Uniformed Services Contingency Option Act of 1953, regulations governing; functions of Secretary of Treasury respecting (Executive Order 10499) — 7003
Uniform Code of Military Justice, remission or suspension of unexecuted portion of sentence that has been commuted to less punishment pursuant to; authority of Secretary of Treasury respecting (Executive Order 10498) — 7003
Vessels; International Conventions for Safety of Life at Sea, acceptance of certificates issued pursuant to. *See* Certificates.

**COMMERCE DEPARTMENT:**
Interdepartmental Materials Advisory Committee; representation on — 7239
Manpower surplus; procurement in areas of current or imminent labor surplus, assignment of responsibilities respecting, by Office of Defense Mobilization — 6996
Survivor's benefits under Uniformed Services Contingency Option Act of 1953 for members of the Coast and Geodetic Survey, functions of Secretary respecting (Executive Order 10499) — 7003

COMMITTEES AND BOARDS:
Board of Actuaries provided for by Uniformed Services Contingency Option Act of 1953; selection of member by President (Executive Order 10498) — 7003
Defense Mobilization Committee, Regional; responsibilities. *See* Defense Mobilization, Office of.
Materials Advisory Committee, Interdepartmental; establishment and functions. *See* Defense Mobilization, Office of.
Munitions Control Board, National; recommendations respecting enumeration of arms, ammunition, and implements of war (Proclamation 3038) — 7505
Patent Advisory Board, Armed Services. *See* Armed Services Patent Advisory Board.
Patent Compensation Board, Atomic Energy Commission; applications for awards. *See* Patent Compensation Board.
Rubber Producing Facilities Disposal Commission. *See* Rubber Producing Facilities Disposal Commission.

COMMITTEES AND BOARDS—Continued Page
St. Lawrence River Joint Board of Engineers, United States Section of; establishment, membership, duties, etc. (Executive Order 10500) 7005
Surplus Manpower Committee, functions of. *See* Defense Mobilization, Office of.

**COMMODITY CREDIT CORPORATION:**
Corn:
Loan and purchase agreement program, 1953; support rates 6983
Reseal loan program, 1952; storage and trackloading payments 7377
Food commodities acquired through price support operations, disposal of; sales of certain commodities at fixed prices, 1953:
Domestic price list; November 7482
Export price list; November 7482
Grain sorghums, loan and purchase agreement program, 1953; support rates 7377
Oats, reseal loan program, 1952; storage and trackloading payments 7379
Oilseeds. *See* Soybeans; *and* Tung nuts.
Rice, loan and purchase agreement program, 1953; availability of price support, eligible rice in Tennessee 7287
Soybeans, loan and purchase agreement program, 1953; basic support rates for South Dakota 7287
Tobacco loan program, 1953; advance rates to growers, schedules of:
Burley tobacco, type 31 7219
Dark air-cured tobacco, types 35 and 36 7219
Tennessee and Kentucky fire-cured tobacco:
Type 22 7219
Type 23 7219
Virginia:
Fire-cured tobacco, type 21 7219
Sun-cured tobacco, type 37 7219
Tung nuts; price support program, 1953 7289
Wheat, reseal loan program, 1952; storage and trackloading payments, support rates 7378

**COMMODITY EXCHANGE AUTHORITY (including Commodity Exchange Commission):**
Orders of Commodity Exchange Commission; limits on position and daily trading for future delivery of soybeans 7230

CONTINENTAL SHELF, mineral leasing of submerged lands. *See* Interior Department.
COPYRIGHT PROTECTION, extension of, to works of authors who are citizens of Japan (Proclamation 3037) 7263

**CUSTOMS BUREAU:**
Accounting procedure. *See* Financial and accounting procedure.
Authority, delegations of:
By Commissioner to collectors of customs; refunding excess deposits of internal-revenue tax, and paying interest in connection with refunds 7177
From Secretary of Treasury to Commissioner; refunding of certain excess deposits of internal-revenue tax previously collected by customs collectors 7177
Contiguous foreign territory, customs relations with:
Examination of baggage in foreign territory; sticker labels in lieu of sealing 6994
Imports from contiguous countries, manifests; sticker labels in lieu of sealing 6994
Merchandise in transit through United States between ports of Canada or Mexico, documentation of certain shipments of in-transit merchandise 6994
Drawback of duties and taxes; flavoring extracts and medicinal or toilet preparations manufactured from domestic taxpaid alcohol:
Collector's statement of drawback due 7493
Internal revenue certificates and extracts from such certificates 7493
Duties:
Drawback of duties. *See* Drawback of duties and taxes.
Refunds of excessive duties. *See* Financial and accounting procedure.
Financial and accounting procedure; refunds of excessive duties, taxes, etc., without filing claims 7065

**D**

**DEFENSE DEPARTMENT:** Page
*See Air Force Department.*
*Army Department.*
*Navy Department.*
Authority, delegation of, from General Services Administrator; disposal of portion of water distribution system, Robins Air Force Base, Georgia 7020
Committees, boards, etc.:
Armed Services Patent Advisory Board, continuance within Department 7329
Interdepartmental Materials Advisory Committee; representation on 7239
Joint regulations of armed forces; armed services procurement regulations:
Bonds and insurance:
Casualty insurance rating plans, special 7176
Facilities contracts, insurance in connection with 7176
General 7175
Under cost-reimbursement type contracts 7176
Under fixed-price contracts 7175
Contract clauses and forms:
Clauses for cost-reimbursement type supply contracts 7311
Clauses for fixed-price supply contracts:
Military security requirements 7174
Small business concerns, utilization of 7174
Termination of contracts, settlement of contracts terminated for convenience; subcontract claims, authorization for settlement of subcontractors termination proposals under $1,000 without approval 7175
Robins Air Force Base, Georgia, disposal of portion of water distribution system of; authority delegation to Secretary respecting 7020
Survivor's benefits under Uniformed Services Contingency Option Act of 1953 for members of uniformed services, functions of Secretary of Defense respecting (Executive Order 10499) 7003

**DEFENSE MINERALS EXPLORATION ADMINISTRATION:**
Government aid in defense exploration projects; ratio of contributions for certain minerals (DMEA Order 1) 6941

**DEFENSE MOBILIZATION, OFFICE OF:**
*See Defense Rental Areas Division.*
Committees:
Interdepartmental Materials Advisory Committee; establishment and functions 7239
Regional Defense Mobilization Committees; responsibility with respect to coordination of field activities of member agencies in carrying out policy respecting procurement in labor surplus areas 6996
Surplus Manpower Committee:
Chairman; designation of Assistant Director for Manpower of ODM 6996
Functions and representation of agencies; revision 6996
Critical defense housing areas, finding and determination under Defense Housing and Community Facilities and Service Act of 1951; North Carolina, Edenton 6951
Defense Production Act; certain administrative proceedings in connection with economic stabilization under sections 405, 407, and 408 of act, administrative order to provide for conduct and orderly completion of, revision 6966
Manpower surpluses:
Policy respecting placement of procurement in areas of current or imminent labor surplus; revision 6995
Surplus Manpower Committee. *See* Committees.
Organization and functions; establishment of certain positions:
Assistant Director for Financial Policy 7620
Assistant Director for Manpower 7621
Assistant Director for Materials 7621
Assistant Director for Non-Military Defense 7622
Assistant Director for Production Requirements and Programs 7622
Assistant Director for Stabilization 7623
Assistant Director for Telecommunications 7624

**DEFENSE MOBILIZATION, OFFICE OF—Continued** Page
Procurement in areas and industries of manpower surplus. *See* Manpower surpluses.
Scarce and critical materials authorized for use in civilian market, order respecting; revocation 7335
Voluntary plans and agreements, and participating companies:
Defense Warehousemen's Association of Philadelphia 6980
Ordnance Corps Integration Committee on Burster Casings 6980

**DEFENSE RENTAL AREAS DIVISION:**
Organization:
Area Rent Director, designation as; Leonard A. Skubal 7214
Certifying officer, designation as; Leonard A. Skubal 7500
Rent control regulations under Housing and Rent Act of 1947, as amended:
Hotel regulation (RR 3):

Chlortetracycline. *See* Drugs.
Coumarin; definitions and standards of identity, proposed rule making 6945
Definitions and standards of identity:
Coumarin; proposed rule making 6945
Oysters, Pacific, raw; proposed rule making 7323
Dietary uses, special, for certain foods, representations respecting; label statements. *See* Label statements.
Drugs, antibiotic and antibiotic-containing:
Certification of batches:
Bacitracin 7383
Chlortetracycline 7311
Penicillin 7294
Tests and methods of assay:
Bacitracin 7383
Chlortetracycline 7309
Penicillin 7294

FOOD AND DRUG ADMINISTRATION—Continued
Label statements:
Dietary properties of food purporting to be or represented for special dietary uses; label statements as to various properties, etc., proposed rule making:
Foods, certain, used as a means of regulating intake of sodium, for dietary management with respect to disease 7249
Minerals 7249
Notice to manufacturers, packers, etc., of frozen vegetables. *See* Statements of general policy or interpretation.
Oysters, Pacific, raw; definitions and standards of identity, proposed rule making 7323
Penicillin. *See* Drugs.
Shellfish. *See* Oysters.
Statement of general policy or interpretation:
Antibiotic drugs, shipment of, packaged in bulk containers; notice to manufacturers 6895
Salt in frozen vegetables, label declaration of 7232

FOREIGN COMMERCE BUREAU:
Export control:
Amendments, extensions, transfers:
Amendments or alterations of licenses, amendment requests on which field offices may not take action:
Hong Kong, deletion 7609
Iron and steel scrap, aluminum scrap, copper scrap and copper-base alloy scrap 7609
Transfer of license, information from transferor and form of request 7608
Licenses:
General licenses:
General in-transit license GIT; shipments originating in Canada 7607
General license GHK, exportation of certain listed commodities to Hong Kong 7267
Return of certain commodities imported into United States GLR:
Containers 7267
Entry number and port of entry to be shown on export declaration 7267
Individual and other validated licenses:
Documents accompanying applications for validated licenses; copies may be submitted 7608
Issuance and use of export licenses; unit-process licenses, note 7608
Ship stores, plane stores, supplies and equipment; redesignation 7607
Vessels and aircraft, exportation of commodities for use in construction or operation of:
Exportations requiring validated license 7607
Preparation of license application 7607
Licensing policies and related special provisions:
Individual commodity group provisions:
Commodity group 0:
Applicability of multiple commodity group provisions to commodity group 0 commodities; deletion 7270
Cattle hides, wet; deletion 7270
Commodity group 6, nonferrous commodities, including ores, concentrates, or unrefined products; copper and copper-base alloy scrap 7317
Commodity group 7, vessels to be scrapped abroad; shipper's export declaration 7270
Time schedules, supplement 1, for submission of applications for export licenses 7271, 7318, 7493
Positive List of Commodities and related matters:
Appendix A, Positive List 7270, 7271
Additions or deletions of commodities in listed categories:
Abrasive products; iron and steel shot, chilled 7271
Buildings, prefabricated and knockdown; iron and steel 7271
Pig iron 7271
Pillow blocks assembled with bearings 7271
Pipe valve parts 7270
Steel bars, carbon; cold finished or hot rolled 7271
Steel ingots and billets, carbon 7271
Steel products, certain, fabricated 7271
Structural shapes and piling, carbon steel 7271
Wire rods, carbon steel 7271

# FEDERAL REGISTER

VOLUME 18 NUMBER 215

*Washington, Tuesday, November 3, 1953*

## TITLE 5—ADMINISTRATIVE PERSONNEL

### Chapter I—Civil Service Commission

PART 6—EXCEPTIONS FROM THE COMPETITIVE SERVICE

NATIONAL MEDIATION BOARD

Effective upon publication in the FEDERAL REGISTER, paragraphs (a) and (b) of § 6.127 are revoked, and § 6.327 (a) is added to Schedule C as set out below.

§ 6.327 *National Mediation Board.* (a) One private secretary to each member of the National Railroad Adjustment Board.

(R. S. 1753, sec. 2, 22 Stat. 403; 5 U. S. C. 631, 633. E. O. 10440, Mar. 31, 1953, 18 F. R. 1823)

UNITED STATES CIVIL SERVICE COMMISSION,
[SEAL] WM. C. HULL,
*Executive Assistant.*

## TITLE 21—FOOD AND DRUGS

### Chapter I—Food and Drug Administration, Department of Health, Education, and Welfare

PART 3—STATEMENTS OF GENERAL POLICY OR INTERPRETATION

NOTICE TO MANUFACTURERS OF ANTIBIOTIC AND ANTIBIOTIC-CONTAINING DRUGS

Pursuant to section 3 of the Administrative Procedure Act (60 Stat. 237, 238; 5 U. S. C. 1002), the following statement of interpretation is issued:

§ 3.30 *Shipment of antibiotic drugs packaged in bulk containers.* (a) The Food and Drug Administration has received inquiries from certain interested manufacturers concerning their shipment of certified antibiotics, packaged in bulk containers, to hospitals and pharmacies for repacking or for use in the manufacture of another drug on the order or prescription of a physician. The regulations promulgated under section 507 of the Federal Food, Drug, and Cosmetic Act (21 U. S. C. 357) do not prohibit the shipment of certified bulk containers of antibiotics to such persons. However, under the provisions of § 146.4 (b) (2) (i) of this chapter, certification should be requested of each repacked batch and of each batch of another drug manufactured from such bulk drug, unless the repackaged drug or other drug has been made exempt from the certification requirements by regulation. The fact that the drug is to be repacked or manufactured on the order or prescription of a physician does not exempt it from the certification requirements of the act. Under the provisions of § 146.4 (b) (2) (ii) of this chapter, it is only when the drug used to compound a prescription is in a container packaged for dispensing that certification of the drug so compounded is not required.

(b) In the light of these provisions, unless the manufacturer and shipper of bulk containers of antibiotics has, with the consignee, an effective permit issued under § 146.21 of this chapter, if the drug is to be repacked, or under § 146.22 of this chapter if it is to be used in the manufacture of another drug, the shipper has the responsibility of seeing that certification is requested of each repacked batch and of each batch of another drug manufactured from such drug.

(Sec. 701, 52 Stat. 1055; 21 U. S. C. 371. Interprets or applies sec. 507, 59 Stat. 463, as amended, 67 Stat. 389; 21 U. S. C. 357, 371)

Dated: October 28, 1953.

[SEAL] NELSON A. ROCKEFELLER,
*Acting Secretary.*

[F. R. Doc. 53-9251; Filed, Nov. 2, 1953; 8:48 a. m.]

Part 132 — 6942

Agriculture and in accordance with the revised Federal Register regulations, the format of the regulations (7 CFR Part 54) governing the grading and inspection of domestic rabbits and edible products thereof and United States specifications for classes, standards, and grades with respect thereto, which are currently operative pursuant to the applicable provisions of the Agricultural Marketing Act of 1946 (60 Stat. 1087; 7 U. S. C. 1621 et seq.) and the Department of Agriculture Appropriation Act, 1954 (Pub. Law 156, 83d Cong., approved July 28, 1953), is recodified as hereinafter set forth.

The recasting of the format due to such recodification is not intended, nor shall it be deemed, to make any substantive change in said regulations. Since the services and programs provided by the regulations are currently in effect, the regulations as presented in recodified form shall become effective upon publication in the FEDERAL REGISTER so as to avoid any interruption to the continuity of such services and programs.

The recodification is set forth below.

Issued at Washington, D. C., this 29th day of October 1953.

[SEAL] ROY W. LENNARTSON,
*Assistant Administrator, Production and Marketing Administration.*

SUBPART A—GRADING AND INSPECTION OF DOMESTIC RABBITS AND EDIBLE PRODUCTS THEREOF

GENERAL

Sec.

U. S. SPECIFICATIONS FOR STANDARDS OF QUALITY FOR INDIVIDUAL READY-TO-COOK DOMESTIC RABBITS

*General*

54.270 General.

*Standards of quality*

54.275 A Quality.
54.276 B Quality.
54.277 C Quality.

AUTHORITY: §§ 54.1 to 54.277 issued under sec. 205, 60 Stat. 1090, Pub. Law 156, 83d Cong.; 7 U. S. C. 1624.

SUBPART A—GRADING AND INSPECTION OF DOMESTIC RABBITS AND EDIBLE PRODUCTS THEREOF

GENERAL

§ 54.1 *Definitions.* Unless the context otherwise requires, the following terms shall have the following meaning:

"ACT" means the following provisions of the Agricultural Marketing Act of 1946 (60 Stat. 1087; 7 U. S. C. 1621 et seq.) and of the Department of Agriculture Appropriation Act, 1954 (Pub. Law 156, 83d Cong., approved July 28, 1953), or any other act of Congress conferring like authority:

AGRICULTURAL MARKETING ACT OF 1946

• • • to develop and improve standards of quality, condition, quantity, grade, and packaging, and recommend and demonstrate such standards in order to encourage uniformity and consistency in commercial practices • • •

To inspect, certify and identify the class, quality, quantity, and condition of agricultural products when shipped or received in interstate commerce under such rules and regulations as the Secretary of Agriculture may prescribe, including assessment and collection of such fees as will be reasonable and as nearly as may be to cover the cost of the service rendered, to the end that agricultural products may be marketed to the best advantage, that trading may be facilitated, and that consumers may be able to obtain the quality product which they desire. • • •

DEPARTMENT OF AGRICULTURE APPROPRIATION ACT, 1954

For expenses necessary for acquiring and diffusing market information on agricultural commodities, food products and byproducts, the standardization, classification, grading, handling, storage, and marketing thereof, including the demonstration and promotion of the use of uniform standards of classification of American farm and food products throughout the world • • •

• • • for investigating and certifying, in one or more jurisdictions, to shippers and other interested parties the class, quality, and condition of any agricultural commodity or food product, whether raw or processed, and any product containing an agricultural commodity or derivative thereof when offered for interstate shipment or when received at such important central markets as the Secretary may from time to time designate, or at points which may be conveniently reached therefrom under such rules and regulations as he may prescribe including the collection of such fees as are reasonable and as nearly as may cover the cost of the service rendered, • • •

"Acceptable" means suitable for the purpose intended and acceptable to the Administration.

"Administration" means the Production and Marketing Administration of the Department.

"Administrator" means the Administrator of the Production and Marketing Administration of the Department, or any other officer or employee of the Department to whom there has heretofore been delegated, or to whom there may hereafter be delegated, the authority to act in his stead.

"Applicant" means any interested party who requests any inspection service or grading service.

"Carcass" means any domestic rabbit carcass.

"Class" means any subdivision of a product based on essential physical characteristics that differentiate between major groups of the same kind.

"Condition" means any condition, including, but not being limited to, the state of preservation, cleanliness, or soundness of any product and the processing, handling or packaging which may affect such product.

"Condition and wholesomeness" means the condition of any product, its healthfulness and fitness for human food.

"Department" means the United States Department of Agriculture.

"Domestic rabbit grading and inspection service" means the personnel who are engaged in the administration, application, and direction of domestic rabbit grading and inspection programs and services pursuant to the regulations in this part.

"Edible product" means any product other than live domestic rabbits.

"Grader" means any employee of the Department authorized by the Secretary, or any other individual to whom a license has been issued by the Secretary, to investigate and certify in accordance with the regulations in this part, the class quality, quantity, and condition of products.

"Grading" or "grading service" means (1) the act whereby a grader determines, according to the regulations in this part, the class, quality, quantity, or condition of any product by examining each unit thereof, or each unit of the representative sample thereof drawn by a grader, and issues a grading certificate with respect thereto; (2) in addition to the foregoing the act whereby the grader identifies, according to the regulations in this part, the graded product; and (3) any regrading or any appeal grading of a previously graded product.

"Grading certificate" means a statement, either written or printed, issued by a grader, pursuant to the regulations in this part, relative to the class, quality, quantity, or condition of a product.

"Identify" means to apply official identification to products or to containers thereof.

"Inspected and certified" or "certified" means, with respect to any product, that it has undergone an inspection and was found, at the time of such inspection, to be sound, wholesome, and fit for human food.

"Inspection," "inspection service" or "inspection of products for condition and wholesomeness" means any inspection by an inspector to determine, in accordance with the regulations in this part, (1) the condition and wholesomeness of domestic rabbits, or (2) the condition and wholesomeness of any edible product at any stage of the preparation or packaging thereof in the official plant where inspected and certified, or (3) the condition and wholesomeness of any previously inspected and certified product if such product has not lost its identity as an inspected and certified product.

"Inspection certificate" means a statement either written or printed, issued by an inspector, pursuant to the regulations in this part, relative to the condition and wholesomeness of products.

"Inspector" means any person who is licensed by the Secretary to investigate and certify, in accordance with the regulations in this part, the condition and wholesomeness of products. An inspector is an employee of the Department or of a State; he may be a graduate veterinarian or a layman.

"Interested party" means any person financially interested in a transaction involving any inspection or grading.

"National supervisor" means (1) the officer in charge of domestic rabbit inspection service of the Administration, (2) the officer in charge of domestic rabbit grading service of the administration, and (3) such other officers or employees of the Department who may be so designated by the officer in charge of the domestic rabbit grading and inspection service of the Administration.

"Office of grading" means the office of any grader.

"Official identification" means the symbol represented by a stamp, label, seal, or other device approved by the Administrator and affixed to any product, or to any container thereof, stating that the product was graded or inspected, or both; and the class, quality, or condition of such product as determined by a grader may be indicated.

"Official plant" means one or more buildings or parts thereof, comprising a single plant in which the facilities and methods of operation therein have been approved by the Administrator as suitable and adequate for operation under inspection or grading service and in which inspection or grading is carried on in accordance with the regulations in this part.

"Person" means any individual, partnership, association, business trust, corporation, or any organized group of persons, whether incorporated or not.

"Potable water" means water which complies with the U. S. Public Health Service drinking water standards.

"Product" means ready-to-cook domestic rabbits and, with respect to grading service only, live domestic rabbits.

"Quality" means the inherent properties of any product which determine its relative degree of excellence.

"Ready-to-cook domestic rabbit" means any domestic rabbit which has been slaughtered for human food, from which the head, blood, skin, feet, and inedible viscera have been removed, that is ready to cook without need of further processing or any cut-up or disjointed portion of such domestic rabbit.

"Regional supervisor" means any regional supervisor of the Administration in charge of domestic rabbit grading service or domestic rabbit inspection service in a designated geographical area.

"Regulations" means the provisions of this entire part and such United States specifications for classes, standards, and grades for products as may be in effect at the time grading or inspection is performed.

"Secretary" means the Secretary of the Department, or any other officer or employee of the Department to whom there has heretofore been delegated, or to whom there may hereafter be delegated, the authority to act in his stead.

"State supervisor" means any authorized and designated individual who is in charge of domestic rabbit grading service or domestic rabbit inspection service in a State. A State supervisor of domestic rabbit inspection service shall be a veterinarian and he is either a Federal-State employee or a Federal employee.

"Station supervisor" means any authorized individual who is designated to supervise domestic rabbit grading service or domestic rabbit inspection service in a large official plant or in a group of several small plants.

§ 54.2 *Administration.* The Administrator shall perform for and under the supervision of the Secretary, such duties as are prescribed in the regulations in this part and as the Secretary may require in the administration of the regulations in this part.

§ 54.3 *Grading and inspection services available.* The regulations in this part provide for the following kinds of services; and any one or more of the different services, applicable to official plants, may be rendered in an official plant.

(a) Grading of live domestic rabbits.

(b) Inspection of ready-to-cook domestic rabbits.

(c) Grading of ready-to-cook domestic rabbits.

(1) In an official plant.

(2) At terminal markets and other receiving points other than official plants.

BASIS OF SERVICE

§ 54.10 *Inspection service.* Any inspection service in accordance with the regulations in this part shall be for condition and wholesomeness.

§ 54.11 *Grading service.* Any grading service in accordance with the regulations in this part shall be for class, quality, quantity, or condition or any combination thereof. Grading service with respect to determination of quality of products shall be on the basis of United States specifications for classes, standards, and grades as contained in Subpart B of the regulations in this part. However, grading service may be rendered with respect to products which are bought and sold on the basis of institutional contract specifications and such service, when approved by the Administrator, shall be rendered on the basis of the specifications of such contract.

§ 54.12 *Eligibility.* (a) Only domestic rabbits which are processed in official plants in accordance with the regulations in this part may be graded or inspected; and only domestic rabbits which are inspected pursuant to the regulations in this part or inspected and passed by any other official inspection system acceptable to the Administration may be graded.

(b) All domestic rabbits that are eviscerated in an official plant where inspection service is maintained, shall be inspected for condition and wholesomeness and no uninspected edible products shall be brought into such official plant.

§ 54.13 *Supervision.* All grading service and all inspection service shall be subject to supervision at all times by the applicable station supervisor, State supervisor, regional supervisor, and national supervisor. Such service shall be rendered where the facilities and conditions are satisfactory for the conduct of the service and the requisite graders and inspectors are available.

PERFORMANCE OF SERVICES

§ 54.20 *Licensed graders and inspectors.* (a) Any person who is a Federal or State employee possessing proper qualifications as determined by an examination for competency, and who is to perform grading service or inspection service may be licensed by the Secretary as a grader or an inspector.

(b) Any prospective grader, other than a Federal or State employee, possessing proper qualifications as determined by an examination for competency and who is to perform grading service may be licensed by the Secretary as a grader. However, prior to granting of the license, he shall procure and deliver to the Administration a surety bond, issued by such surety as may be approved by the Administrator, in the amount of $1,000 for the proper performance of the duties of such licensee under the regulations in this part.

(c) All licenses issued by the Secretary shall be countersigned by the officer in charge of the domestic rabbit grading and inspection service of the Administration or any other designated official of such service.

§ 54.21 *Suspension of license or authority; revocation.* Pending final action by the Secretary, the aforesaid officer in charge of the domestic rabbit grading and inspection service may, whenever he deems such action necessary, suspend any license or authority effective pursuant to the regulations in this part, by giving notice of such suspension to the respective individual involved, accompanied by a statement of the reasons therefor. Within seven days after the receipt of the aforesaid notice and statement of reasons by such individual, he may file an appeal, in writing, with the Secretary supported by any argument or evidence that he may wish to offer as to why his license or authority should not be suspended or revoked. After the expiration of the aforesaid seven-day period and consideration of such argument and evidence, the Secretary will take such action as he deems appropriate with respect to such suspension or revocation. When no appeal is filed within the prescribed seven days the license is revoked.

§ 54.22 *Surrender of license.* Each license which is suspended or revoked, or has expired, shall promptly be surrendered by the licensee to his immediate superior. Upon termination of the services of a licensed grader, the licensee shall promptly surrender his license to his immediate superior for cancellation.

§ 54.23 *Identification.* Each grader and inspector shall have in his possession at all times, and present upon request while on duty, the means of identification furnished by the Department to such person.

§ 54.24 *Financial interest of inspectors and graders.* No inspector shall inspect and no grader shall grade any product in which he is financially interested.

§ 54.25 *Political activity.* All graders and inspectors who are employees of the Department are forbidden during the period of their respective appointments or licenses, to take an active part in political management or in political campaigns. Political activity in city, county, State, or national elections, whether primary or regular, or in behalf of any party or candidate, or any measure to be voted upon, is prohibited. This applies to all appointees, including, but not being limited to, temporary and cooperative employees and employees on leave of absence with or without pay. Wilful violation of §§ 54.20 to 54.25 will constitute grounds for dismissal in the case of appointees and revocation of licenses in the case of licensees.

APPLICATION FOR GRADING SERVICE OR INSPECTION SERVICE

§ 54.30 *Who may obtain grading service or inspection service.* An application for grading service or inspection service may be made by any interested person, including but not being limited to, the United States, any State, county, municipality, or common carrier, and any authorized agent of the foregoing.

§ 54.31 *How application may be made.* (a) An application for inspection service shall be made in writing and filed with the Administrator.

(b) An application for grading service to be rendered in an official plant shall be made in writing and filed with the Administrator.

(c) An application for any grading service to be rendered other than in an official plant may be made in any office of grading or with any grader at or nearest the place where the service is desired. Such application may be made orally, in writing, or by telegraph. If the application for grading service is made orally, the office of grading, grader with whom the application is made, or the Administrator may require that the application be confirmed in writing.

(d) Each application for grading service or inspection service shall include such information as may be required by the Administrator in regard to the products and premises where the service is to be rendered.

§ 54.32 *Filing of application.* An application for grading service or inspection service shall be regarded as filed only

when made pursuant to the regulations in this part.

§ 54.33 *Authority of applicant.* Proof of the authority of any person applying for grading service or inspection service may be required at the discretion of the Administrator.

§ 54.34 *Application for inspection service or grading service in official plants; approval.* Any person desiring to process and pack products in a plant under grading service or inspection service, or both, must receive approval of such plant as an official plant prior to the rendition of such service. An application for grading service or inspection service to be rendered in an official plant shall be approved according to the following procedure:

(a) *Initial survey.* When application has been filed for grading service or inspection service, as aforesaid, an examination of the plant and premises shall be made by the regional supervisor, or his assistant, and the necessary facilities specified for the service. Appeals with respect to any such specification may be made to the national supervisor.

(b) *Drawings and specifications to be furnished.* Four copies of drawings, consisting of floor plans of space to be included in the official plant, showing the locations of such features as the principal pieces of equipment, floor drains, hand washing facilities, hose connections for clean-up purposes, cardinal points of the compass, and the routes of edible and inedible products through the plant, properly drawn to scale, shall be submitted to the regional supervisor. The official plant shall include toilet and dressing rooms, office space for the inspector and grader, store rooms for supplies used in the operations under inspection or grading, feeding rooms, and all rooms, compartments or passageways where products or any ingredients to be used in the preparation of products under inspection service or grading service will be handled or kept, and may include other rooms or compartments located in the building or buildings comprising the official plant. If rooms or compartments shown on the drawings are not to be included as part of the official plant, this should be clearly indicated thereon. Specifications covering the height of ceilings, types of principal pieces of equipment, character of floors, walls, and ceilings, lighting, ventilation, water supply, and drainage, and such other notations as may be required, shall accompany the drawings. Construction or remodeling of buildings, facilities, or premises should not be initiated without prior approval of the drawings. Upon approval of drawings and specifications the application for grading service or inspection service may be approved.

(c) *Final survey and plant approval.* Prior to the inauguration of the grading service or inspection service, a final survey of the plant and premises shall be made by the regional supervisor or his assistant to determine if the plant is constructed and facilities are installed in accordance with the approved drawings and the regulations in this part. The plant may be approved only when these requirements have been met, except that conditional approval for a specified limited time may be granted only under emergency conditions of restricted availability of facilities and construction materials, provided practices suitable to the Administrator are employed to effect adequate sanitary conditions in the plant.

§ 54.35 *Rejection of application.* Any application for grading service or inspection service may be rejected by the Administrator (a) for noncompliance, by the applicant, with the act or the regulations in this part, or (b) whenever the product involved is owned by, or located on the premises of, a person currently denied the benefits of the act. Each such applicant shall be notified immediately of the reasons for the rejection.

§ 54.36 *Withdrawal of application.* Any application for grading or inspection service may be withdrawn by the applicant at any time before the service is performed upon payment, by the applicant, of all expenses incurred by the Administration in connection with such application.

§ 54.37 *Order of service.* Grading service or inspection service shall be performed, insofar as practicable, in the order in which application therefor is made except that precedence may be given to any application for an appeal inspection or appeal grading.

§ 54.38 *Suspension of plant approval.* (a) Any plant approval given pursuant to the regulations may be suspended for (1) failure to maintain plant and equipment in a satisfactory state of repairs; (2) the use of operating procedures which are not in accordance with the regulations; or (3) alterations of buildings, facilities, or equipment which cannot be approved in accordance with the regulations.

(b) During such period of suspension, inspection and grading service shall not be rendered. However, the other provisions of the contract for service will remain in effect unless terminated in accordance with the terms thereof. If the plant facilities or methods of operation are not brought into compliance within a reasonable period of time, to be specified by the Administrator, the contract shall be terminated. Upon termination of any contract providing for inspection or grading service in an official plant pursuant to the regulations, the plant approval shall also become terminated, and all labels, seals, tags or packaging material bearing official identification shall, under the supervision of a person designated by the Administration, either be destroyed, or the official identification completely obliterated, or sealed in a manner acceptable to the Administration.

VIOLATIONS

§ 54.45 *Fraud or misrepresentation.* Any wilful violation of the regulations in this part, the use of the terms "Government graded," Federal-State graded," or terms of similar import in the labeling or advertising of any product without stating in conjunction therewith the U. S. grade of the product, or any wilful misrepresentation or deceptive or fraudulent practice found to be made or committed by any person in connection with:

(a) The making or filing of an application for any grading service or inspection service;

(b) The use of any grading certificate or inspection certificate issued pursuant to the regulations in this part, or the use of any official identification;

(c) The use of the terms "United States" or "U. S." in conjunction with the grade of the product;

(d) The use of any of the aforesaid terms or an official identification in the labeling or advertising of any product; or

(e) The use, in connection with any product, of a facsimile form which simulates in whole or in part any official identification; may be deemed sufficient cause for debarring such person from any or all benefits of the act after opportunity for hearing has been accorded him; and, pending investigation and hearing, the Administrator may, without hearing, direct that such person shall be denied the benefits of the act.

§ 54.46 *Interfering with a grader or inspector.* Any further benefits of the act and the regulations in this part may be denied any applicant who either personally or through an agent or representative interferes with or obstructs, by intimidation, threats, ridicule, or assault, or in any other manner, a grader or inspector in the performance of his official duties.

OTHER APPLICABLE REGULATIONS

§ 54.50 *Other applicable regulations.* Compliance with the regulations in this part shall not excuse failure to comply with any other applicable Federal, State, or municipal laws or regulations.

PUBLICATIONS

§ 54.55 *Publications.* Publications under the act and the regulations in this part shall be made in the FEDERAL REGISTER, the Service and Regulatory Announcements of the Department, and such other media as the Administrator may approve for the purpose.

IDENTIFYING AND MARKING PRODUCTS

§ 54.60 *Approval of official identification.* (a) Any label or packaging material which bears any official identification shall be used only in such manner as the Administrator may prescribe. No label or packaging material bearing official identification may be used unless finished copies or samples of such labels and packaging material have been approved by the Administrator. No label bearing official identification shall be printed for use until the printer's final proof has been approved by the Administrator; and no label, other than labels for shipping containers or containers for institutional packs, bearing any official identification shall be used until finished copies or samples of such labels have been approved by the Administrator. Final approval may be given to printer's final proof or photostatic copies of labels for shipping containers or containers for institutional packs, and no such labels shall be used until such proofs or copies have been approved by the Administrator. A label which bears official identification shall not bear any statement that is false or misleading, and if labels in the name of the same packer or distributor, or bearing the same brand name, are used on the same or similar products which are prepared from product which are not inspected, the diameter of the inspection mark, or combination inspection and grading mark, used on labels for inspected products shall be equal to at least one-tenth of the length of the label, plus at least one-tenth of the width of the label. If the labeling is printed or otherwise applied directly to the container, the principal display panel of such container shall, for this purpose, be considered as the label.

(b) Any present supply of labels approved, pursuant to the applicable provisions of Part 70 of this chapter, prior to the effective time of the regulations in this part may continue to be used until such present supply is exhausted.

§ 54.61 *Products that may be individually grade marked; information required on grade mark.* Only ready-to-cook domestic rabbits which are of A Quality or B Quality may be individually identified with a grade mark. Except as otherwise authorized each grade mark which is to be used shall conspicuously indicate the U. S. grade and class of the product it identifies and shall include one of the following phrases: "Federal-State Graded," or "Government Graded," or a phrase of similar import. Such grade mark shall be contained within the outline of a shield of such design as may be prescribed or approved by the Administrator.

§ 54.62 *Use of grade mark and inspection mark with respect to the same product.* The Administrator is authorized to prescribe and approve the form of the grade mark and inspection mark that may be used individually or in combination with respect to the same product.

§ 54.63 *Marking inspected products—(a) Wording and form of the inspection mark.* Except as otherwise authorized the inspection mark permitted to be used with respect to inspected and certified edible products shall include wording as follows: "Inspected for wholesomeness by U. S. Department of Agriculture." This wording, in such form as the Administrator may prescribe or approve, shall be contained within a circle. The Administrator may approve the use of abbreviations of such inspection mark; and such approved abbreviations shall have the same force and effect as the inspection mark. The inspection mark or approved abbreviation thereof, as the case may be, may be applied to the inspected and certified edible product or to the packaging material of such product. The inspection mark, or the approved abbreviation thereof, shall, when used on packaging material, be printed on such material or on a label to be affixed to the packaging material, and the name of the packer or distributor of such product must be legibly printed on the packaging material or label, as the case may be.

(b) *Wording on labels.* Each trade label to be approved for use pursuant to §§ 54.60 to 54.63 with respect to any inspected and certified edible product shall bear the true name of the edible product, the name and address of the packer or distributor thereof, and in prominent letters and figures of uniform size, the inspection mark, as aforesaid; and the label shall also bear, in such manner as may be prescribed or approved by the Administrator, the plant number, if any, of the official plant in which such product was inspected and certified.

(c) *Labels in foreign languages.* Any trade label to be affixed to a container of any edible products for foreign commerce may be printed in a foreign language. However, the inspection mark shall appear on the label in English, but, in addition, may be literally translated into such foreign language. Each such trade label which is to be printed in a foreign language must be approved pursuant to §§ 54.60 to 54.63.

(d) *Use of approved labels.* Trade labels approved for use pursuant to §§ 54.60 to 54.63 shall be used only for the purpose for which approved.

SUPERVISION OF MARKING AND PACKAGING

§ 54.70 *Evidence of label approval.* No grader or inspector shall authorize the use of official identification for any graded or inspected product unless he has on file evidence that such official identification or packaging material bearing such official identification has been approved in accordance with the provisions of §§ 54.60 to 54.63.

§ 54.71 *Affixing of official identification.* (a) No official identification or any abbreviation, copy or representation thereof may be affixed to or placed on or caused to be affixed to or placed on any product or container thereof except by a grader or an inspector or under the supervision of a grader or an inspector or other person authorized by the Administrator. All such products shall have been inspected and certified, or graded, or both. The grader or inspector shall have supervision over the use and handling of all material bearing any official identification.

(b) Each container of inspected and certified edible products to be shipped from one official plant to another official plant for further processing shall be marked for identification and shall show the following information:

(1) The name of the inspected and certified edible products in the container;

(2) The name and address of the packer or distributor of such product;

(3) The net weight of the container;

(4) The inspection mark permitted to be used pursuant to the regulations in this part, unless the containers are sealed or otherwise identified in such manner as may be approved by the Administrator; and

(5) The plant number of the official plant where the products were packed.

§ 54.72 *Packaging.* No container which bears or may bear any official identification or any abbreviation or copy or representation thereof may be filled in whole or in part except with edible products which were inspected and certified or graded or both and are at the time of such filling, sound, wholesome and fit for human food. All such filling of containers shall be under the supervision of an inspector or grader.

§ 54.73 *Retention labels.* An inspector or grader may use such labels, devices and methods as may be approved by the Administrator for the identification (a) of products which are held for further examination, and (b) all equipment and utensils which are to be held for proper cleaning.

§ 54.74 *Prerequisites to grading and inspection.* Grading and inspection of products shall be rendered pursuant to the regulations in this part and under such conditions and in accordance with such methods as may be prescribed or approved by the Administrator.

§ 54.75 *Accessibility of products.* Each product for which grading service or inspection service is requested shall be so arranged so as to permit adequate determination of its class, quality, quantity, and condition as the circumstances may warrant.

§ 54.76 *Time of grading or inspection in an official plant.* The grader or inspector who is to perform the grading or inspection in an official plant shall be informed, in advance, by the applicant of the hours when such grading or inspection is desired. Graders and inspectors shall have access at all times to every part of any official plant to which they are assigned.

REPORTS

§ 54.90 *Report of inspection work and grading work.* Reports of the work of inspection and grading carried on within official plants shall be forwarded to the Administrator by the inspector and grader in such manner as may be specified by the Administrator.

§ 54.91 *Information to be furnished to inspectors and graders.* When inspection service or grading service is performed within an official plant, the applicant for such inspection or grading shall furnish to the inspector or grader rendering such service such information as may be required for the purposes of §§ 54.90 to 54.92.

§ 54.92 *Reports of violations.* Each inspector and each grader shall report, in the manner prescribed by the Administrator, all violations of and noncompliance with the act and the regulations in this part of which he has knowledge.

FEES AND CHARGES

§ 54.100 *Payment of fees and charges.* (a) Fees and charges for any grading or inspection shall be paid by the applicant for the service in accordance with the applicable provisions of §§ 54.100 to 54.109 and, if so required by the Administrator, such fees and charges shall be paid in advance.

(b) Fees and charges for any grading or inspection performed by any grader

or inspector who is a salaried employee of the Department shall, unless otherwise required pursuant to paragraph (c) of this section, be paid by check, draft, or money order payable to the Treasurer of the United States and remitted promptly to the Administration.

(c) Fees and charges for any grading or inspection pursuant to a cooperative agreement with any State or person shall be paid in accordance with the terms of such cooperative agreement.

§ 54.101 *Grading service on a fee basis.* (a) Unless otherwise provided in this part the fees to be charged and collected for any grading service (other than for an appeal grading) on a fee basis shall be based on the applicable rates specified in § 54.103.

(b) In the event the aforesaid applicable rates specified in § 54.103 are deemed by the Administrator to be inadequate fully to reimburse the Administration for all costs and other items paid or incurred by the Administration in connection with such service, the fees for such service shall not be based on the rates specified in § 54.103, but shall be based on the time required to perform such service and the travel of each grader at the rate of $3.60 per hour for the time actually required.

(c) If an applicant requests that any grading service be performed on a holiday or a non-work day, he may be charged for such service at a rate one and one-half times the rate which would otherwise be applicable for such service if performed on a day other than on a holiday or non-work day.

§ 54.102 *Fees for appeal grading.* The fees to be charged for any appeal grading shall be double the fee specified in the grading certificate from which the appeal is taken: *Provided*, That the fee for any appeal grading requested by the United States, or any agency or instrumentality thereof, shall be not more than that set forth in the grading certificate from which the appeal is taken. If the fee on the certificate from which the appeal is taken is based on a contract, then the fee for such appeal grading shall be double the amount specified in § 54.103 for the applicable volume of product appeal graded. If the result of any appeal grading discloses that a material error was made in the grading appealed from, no fee shall be required.

§ 54.103 *Domestic rabbits grading fees.* For each grading of any lot of domestic rabbits, whether live or ready-to-cook, the following fees shall be applicable:

| | |
|---|---|
| For 500 pounds or less | $1.50 |
| For 501 to 1,500 pounds, inclusive | 2.25 |
| For 1,501 to 3,000 pounds, inclusive | 3.00 |
| For 3,001 to 6,000 pounds, inclusive | 4.00 |
| For 6,001 to 10,000 pounds, inclusive | 6.00 |
| For 10,001 to 20,000 pounds, inclusive | 10.00 |
| For each additional 10,000 pounds, or fraction thereof, in excess of 20,000 pounds | 3.00 |

§ 54.104 *Inspection service on a fee basis.* Fees to be charged and collected for inspection services furnished on a fee basis shall be based on the time required to render such services including, but not being limited to, the time required for the travel of the inspector or inspectors in connection therewith, at the rate of $3.60 per hour for each inspector for the time actually required.

§ 54.105 *Fees for additional copies of grading certificates and inspection certificates.* Additional copies, other than those provided for in §§ 54.141 and 54.171, of any grading certificates or inspection certificates, may be supplied to any interested party upon payment of a fee of $1.00 for each set of five or fewer copies.

§ 54.106 *Traveling expenses and other charges.* Charges may be made to cover the cost of traveling and other expenses incurred by the Administration in connection with the performance of any grading service or inspection service.

§ 54.107 *On a contract basis.* Fees to be charged and collected for any grading service or inspection service, other than for an appeal grading, on a contract basis shall be those provided for in such contract. The fees to be charged for any appeal grading shall be as provided in § 54.102.

§ 54.108 *Fees for grading service or inspection service performed under cooperative agreement.* The fees to be charged and collected for any grading service or inspection service performed under cooperative agreement shall be those provided for by such agreement.

§ 54.109 *Disposition of fees for inspection made under cooperative agreement.* Fees for inspection under a cooperative agreement with any State or person shall be disposed of in accordance with the terms of such agreement. Such portion of the fees collected under a cooperative agreement as may be due the United States shall be remitted to the Administration.

INSPECTION

§ 54.120 *Manner of handling products in an official plant.* Unless otherwise specified in the regulations in this part or by the Administrator, products which are to be further processed under inspection in an official plant shall be prepared and handled in such official plant under the supervision of an inspector.

§ 54.121 *Ante-mortem inspection.* Ante-mortem examination of domestic rabbits is required as a prerequisite to any inspection; and such ante-mortem examination shall be carried out under such conditions and in accordance with such methods as may be prescribed or approved by the Administrator.

§ 54.122 *Evisceration.* No viscera or any part thereof shall be removed from any domestic rabbits which are to be processed under inspection in any official plant, except at the time of evisceration and inspection. Each carcass to be eviscerated shall be opened so as to expose the organs and the body cavity for proper examination by the inspector and shall be prepared immediately after inspection as ready-to-cook domestic rabbit.

§ 54.123 *Carcasses held for further examination.* Each carcass, including all parts thereof, in which there is any lesion of disease, or other condition, which might render such carcass or any part thereof unfit for human food, and with respect to which a final decision cannot be made on first examination by the inspector, shall be held for further examination. The identity of each such carcass, including all parts thereof, shall be maintained until a final examination has been completed.

§ 54.124 *Condemnation and treatment of carcasses.* Each carcass, or any part thereof, which is found to be unsound, unwholesome, or otherwise unfit for human food shall be condemned by the inspector and shall receive such treatment, under the supervision of the inspector as will prevent its use for human food and preclude dissemination of disease through consumption by animals.

§ 54.125 *Certification of carcasses.* Each carcass and all parts and organs thereof which are found by the inspector to be sound, wholesome, and fit for human food shall be certified as provided in this part.

§ 54.126 *Reinspection of edible products.* (a) Any inspected and certified edible product may be brought into an official plant only if the container of such product is marked for identification in the manner prescribed in § 54.71 (b) and the product is reinspected by an inspector at the time it is brought into such plant. Upon reinspection, if any such product or portion thereof is found to be unsound, unwholesome, or otherwise unfit for human food, such product, or portion thereof, shall be condemned and shall receive such treatment as that provided in § 54.124.

(b) Any product which is prepared under inspection in an official plant shall be inspected in such plant as often as the inspector deems it necessary in order to ascertain whether such product is sound, wholesome, and fit for human food at the time such product leaves such plant. Upon any such inspection, if any such product or portion thereof is found to be unsound, unwholesome, or otherwise unfit for human food, such product or portion thereof shall be condemned and shall receive such treatment as that provided in § 54.124.

(c) All substances and ingredients used in the manufacture or preparation of any edible product shall be clean, sound, wholesome, and fit for human food.

§ 54.127 *Appeal inspection; how made.* Any interested party may, if dissatisfied with any decision of an inspector relating to any inspection, file an appeal from such decision. Any such appeal from a decision of an inspector shall be made to his immediate superior having jurisdiction over the subject matter of the appeal. Review of such appeal findings, when requested, shall be made by the immediate superior of the employee of the Department making the appeal inspection.

*Inspection Certificates*

§ 54.140 *Forms of inspection certificates.* Each inspection certificate issued pursuant to the regulations in this part shall be approved by the Administrator as to form, and:

(a) Each domestic rabbit inspection certificate shall show the class or classes of domestic rabbits, the quantity of product contained in the respective lot, and all pertinent information concerning the condition and wholesomeness thereof;

(b) Each food product inspection certificate shall show the names of the edible products covered by such certificate, the quantity of each such product, such shipping marks as are necessary to identify such products, and all pertinent information concerning the condition and wholesomeness thereof;

(c) Each export certificate shall show the respective names of the exporter and the consignee, the destination, the shipping marks, the numbers of the export stamps attached to the edible products to be exported and covered by the certificate, and the names of such products and the total net weight thereof.

§ 54.141 *Issuance and disposition of domestic rabbits inspection certificates.* (a) Upon the request of an interested party, any inspector is authorized to issue a domestic rabbit inspection certificate with respect to any lot of dressed domestic rabbits inspected by him. Each certificate shall be signed by the inspector who made the inspection covered by the certificate, and if more than one inspector participated in the inspection of the lot of domestic rabbits, each such inspector shall sign the certificate with respect to such lot.

(b) The original of each inspection certificate, issued pursuant to §§ 54.140 to 54.144, and not to exceed three copies thereof, shall, immediately upon issuance, be delivered or mailed to the applicant or person designated by him. One copy shall be filed in the office of the regional supervisor serving the area in which the inspection was performed, and the remaining copies to be disposed of in such manner as the Administrator may approve. Additional copies of any such certificate may be furnished to any interested party as provided in § 54.105.

§ 54.142 *Food product inspection certificates; issuance and disposition.* (a) Upon the request of an interested party, any inspector is authorized to issue a food product inspection certificate with respect to any inspected and certified edible product after suitable examination of the product has been made by the inspector.

(b) The original of each food product inspection certificate, and not to exceed two copies thereof, if requested, shall, immediately upon issuance, be delivered or mailed to the applicant or person designated by him. Another copy shall be filed in the office of the regional supervisor serving the area in which such certificate was issued, and one copy shall be forwarded to the Administrator. The last named two copies shall be retained until otherwise ordered by the Administrator.

§ 54.143 *Export certificates; issuance and disposition.* (a) Upon the request of an exporter, any inspector is authorized to issue an export certificate with respect to the shipment to any foreign country of any inspected and certified edible product after suitable examination of the product has been made by the inspector.

(b) Each export certificate shall be issued in quintuplicate; the original shall be delivered to the exporter who requested such certificate; and the duplicate copy shall be delivered to the agent of the railroad or other carrier transporting such products from the United States. The triplicate copy of such export certificate shall be forwarded to the Administrator; the quadruplicate copy shall be filed in the office of the regional supervisor serving the area in which such export certificate was issued and the memorandum copy shall be retained by the inspector for filing. The last named three copies shall be retained until otherwise ordered by the Administrator.

§ 54.144 *Advance information.* Upon the request of an applicant, all or part of the contents of any inspection certificate issued to such applicant may be telephoned or telegraphed to him, or to any person designated by him, at his expense.

GRADING

§ 54.150 *General.* Grading service performed with respect to any quantity of products shall, as the case may require, be on the basis of an examination, pursuant to the regulations in this part, of each unit thereof or of each unit in the representative sample thereof drawn by a grader. Whenever the grading service is performed on a representative sample basis, such sample shall be drawn and consist of not less than the minimum number of containers as indicated in the following table:

[Minimum number of containers comprising a representative sample]

| Containers in lot: | *Containers in samples* |
|---|---|
| 3 containers, or less | (1) |
| 4 to 10, inclusive | 3 |
| 11 to 20, inclusive | 4 |
| 21 to 50, inclusive | 7 |
| 51 to 100, inclusive | 10 |
| In excess of 100 containers | (2) |

[1] All containers.
[2] 10 percent of the number of containers in the lot.

§ 54.151 *Live domestic rabbits.* Grading service performed with respect to any quantity of live domestic rabbits shall, as the case may require, be on the basis of an examination, pursuant to regulations in this part, of each unit thereof or of each unit in the representative sample thereof drawn by a grader. Such domestic rabbits may be identified with official identification on a lot basis only.

§ 54.152 *Ready-to-cook domestic rabbits*—(a) *In an official plant.* Grading service performed in an official plant with respect to ready-to-cook domestic rabbits shall, as the case may require, be on the basis of each individual carcass or on a representative sample basis.

(1) Only such ready-to-cook domestic rabbits which have been inspected and certified, pursuant to the regulations in this part, or have been inspected and passed by any other official inspection system which is acceptable to the Administrator, may be graded.

(2) Only such ready-to-cook domestic rabbits which were graded on an individual carcass basis and are of A Quality or B Quality may be individually identified with the appropriate grade mark, and any container of such ready-to-cook domestic rabbits may also be so identified. The grading of ready-to-cook domestic rabbits shall be performed prior to the disjointing or cutting up of the respective carcass.

(3) If the ready-to-cook domestic rabbits are of C Quality only the bulk container of such ready-to-cook domestic rabbits may be identified with the appropriate grade mark even though the grading may have been performed on an individual carcass basis.

(b) *At terminal markets and other receiving points.* Grading service performed with respect to ready-to-cook domestic rabbits at terminal markets and other receiving points may be on a representative sample basis. Only such ready-to-cook domestic rabbits which were processed in an official plant and are graded on an individual carcass basis may be individually identified with a grade mark. Only ready-to-cook domestic rabbits which were inspected and certified and are marked with the inspection mark or in accordance with the provisions of § 54.71 (b) may be graded.

*Basis of Acceptability of Other Official Inspection Systems*

§ 54.160 *General.* Any domestic rabbit inspection system may be deemed to be acceptable to the Administrator which (a) is conducted under the authority of laws, ordinances, or similar enactments of the State, county, city, or other political subdivision in which is located the official plant at which the ready-to-cook domestic rabbits are prepared and submitted for grading service; and (b) imposes at least the requirements set forth in § 54.161: *Provided*, That no such inspection shall be deemed acceptable to the Administrator with respect to any official plant in which ready-to-cook domestic rabbits are prepared if he finds at any time that such requirements are not adequately enforced.

§ 54.161 *Requirements as to manner of inspection.* (a) The inspection shall be conducted by an inspector who is a qualified veterinarian or under the supervision of a qualified veterinarian. All such inspectors shall be employed by the State, county, city, or other political subdivision in which the official plant is located.

(b) The inspection shall include post-mortem examination of each domestic rabbit carcass during the evisceration operation.

(c) All carcasses which show evidence of disease or any other condition which may render them unwholesome or unfit for food shall be condemned and shall be destroyed for food purposes under the supervision of an inspector. Each carcass and part thereof which has been inspected and passed or containers of carcasses or parts thereof shall bear the identifying inspection symbol of the

other official inspection system and the marking devices or labels shall be in the custody of the inspector at all times.

§ 54.162 *Determining compliance with § 54.161.* A qualified veterinary supervisor of the domestic rabbit grading service of the Administration shall investigate the manner of operation of the inspection system to determine the adequacy of the postmortem examination and the compliance with the requirements contained in §§ 54.160 to 54.162 prior to approving the official plant for the grading of ready-to-cook domestic rabbits. This supervisor as well as any official graders who may be stationed in the official plant shall periodically observe the inspection operations in the official plant to determine that the requirements of §§ 54.160 to 54.162 are being met. If at any time the inspector fails to enforce the requirements as set forth in the inspection system, grading service may be withdrawn from the official plant.

*Grading Certificates*

§ 54.170 *Forms.* Grading certificates (including appeal grading certificates and regrading certificates) shall be issued on forms approved by the Administrator.

§ 54.171 *Issuance and disposition.* (a) Each grader shall issue a grading certificate covering each product graded.

(b) The original of each grading certificate, issued pursuant to §§ 54.170 to 54.172, and not to exceed three of the copies thereof, shall, immediately upon issuance, be delivered or mailed to the applicant or person designated by him. One copy shall be filed in the office of grading serving the area in which the grading service was performed, and the remaining copies shall be disposed of in such manner as the Administrator may approve. Additional copies of any such certificate may be furnished to any interested party as provided in § 54.105.

§ 54.172 *Advance information.* Upon the request of an applicant, all or part of the contents of any grading certificate issued to such applicant may be telephoned or telegraphed to him, or to any person designated by him, at his expense.

*Regrading*

§ 54.180 *Application for regrading of a graded product.* An application for a regrading of any previously graded product may be made at any time by any interested party, and such application shall clearly state the reasons for requesting the regrading. The provisions of the regulations relative to grading service shall apply to regrading service.

§ 54.181 *Regrading certificates.* Immediately after a regrading has been completed, a regrading certificate shall be issued showing the results of such regrading; and such certificate shall thereupon supersede, as of the time of issuance of the regrading certificate, the grading certificate previously issued for the product involved. Each regrading certificate shall clearly set forth the number and date of the grading certificate which it supersedes. The provisions of §§ 54.170 to 54.172 shall, whenever applicable, also apply to regrading certificates except that copies of such regrading certificates shall be furnished each interested party of record.

*Appeal Grading*

§ 54.190 *Application for appeal grading.* An application for an appeal grading may be made by any interested party who is dissatisfied with any determination stated in any grading certificate only if the identity of the product, or representative sample thereof, on the basis of which a determination was made has not been lost, and such application for the appeal grading is made within two days following the day on which the grading was performed. Upon approval by the Administrator, the time within which an application for an appeal grading may be made may be extended.

§ 54.191 *How to obtain appeal grading.* Appeal grading may be obtained by filing a request therefor (a) with the Administrator, (b) with the grader who issued the grading certificate with respect to which the appeal grading is requested, (c) with the immediate superior of such grader, or (d) with the officer in charge of any office of grading. The application for appeal grading shall clearly state the reasons therefor and may be accompanied by a copy of the aforesaid grading certificate or any other information the applicant may have secured regarding the product, at the time of grading, from which the appeal is requested. Such application may be made orally (in person or by telephone), in writing, or by telegraph. If made orally, written confirmation may be required.

§ 54.192 *Record of filing time.* A record showing the date and hour when each such application for appeal grading is received shall be maintained in such manner as the Administrator may prescribe.

§ 54.193 *When an application for an appeal grading may be refused.* Notwithstanding the provisions of § 54.190, if it appears to the Administrator that the reasons for an appeal grading are frivolous or not substantial, or that the quality or condition of the products has undergone a material change since the grading from which the appeal is made, or the identical products that were examined to ascertain the grade thereof cannot be made accessible for reexamination, or the act or regulations in this part have not been complied with, the Administrator may refuse the applicant's request for the appeal grading, and such applicant shall be promptly notified of the reason for such refusal.

§ 54.194 *When an application for appeal grading may be withdrawn.* An application for appeal grading may be withdrawn by the applicant at any time before the appeal grading is made upon payment, by the applicant, of all expenses incurred by the Administration in connection with such application.

§ 54.195 *Who shall perform the appeal grading.* An appeal grading of any graded product shall be made by any grader (other than the one from whose grading the appeal is made) designated for this purpose by the Administrator and, whenever practical, such appeal grading shall be conducted jointly by two such graders.

§ 54.196 *Appeal grading by immediate superior.* Notwithstanding the provisions of §§ 54.190 to 54.198, whenever the immediate superior of a grader has evidence that such grader incorrectly graded a product, such superior shall immediately make a regrading of the product.

§ 54.197 *Order of performance of appeal gradings.* Appeal gradings shall be performed, insofar as practical, in the order in which applications therefor are received; but any such application may be given precedence pursuant to § 54.37.

§ 54.198 *Appeal grading certificates.* Immediately after an appeal grading has been completed, an appeal grading certificate shall be issued showing the results of such appeal grading. Such certificate shall thereupon supersede the grading certificate for the product involved and such supersedure shall be effective as of the time of issuance of the grading certificate with respect to which the appeal is made. Each appeal grading certificate shall clearly set forth the number and the date of the grading certificate which it supersedes. The provisions of §§ 54.170 to 54.172 shall, whenever applicable, also apply to appeal grading certificates except that copies of such appeal grading certificates shall be furnished each interested party of record.

*Superseded Certificates*

§ 54.205 *Superseded certificates.* Whenever any grading certificate is superseded in accordance with the regulations in this part such certificate shall become null and void as of the effective time of supersedure. If the original and all copies of such superseded certificate are not delivered to the person issuing the regrading certificate or appeal grading certificate, he shall notify such persons as he considers necessary to prevent fraudulent use of the superseded certificate.

SANITARY REQUIREMENTS

*General*

§ 54.210 *Minimum standards for sanitation, facilities, and operating procedures in official plants.* The provisions of §§ 54.210 to 54.247 shall apply with respect to grading service and inspection service in all official plants. The table set forth in § 54.247 indicates some of the types of material which may be used in the construction of equipment, utensils and facilities for use in the plant.

§ 54.211 *Authority of Administrator to amend minimum standards for sanitation, facilities, and operating procedures in official plants.* The Administrator is authorized to amend the provisions in §§ 54.210 to 54.247 and such amended provisions shall be applicable to official plants.

*Buildings and Plant Facilities*

§ 54.220 *Buildings.* The buildings shall be of sound construction and kept in good repair, and shall be of such construction as to prevent the entrance or harboring of vermin.

(a) *Outside openings.* (1) The doors, windows, skylights and other outside openings of the plant, except receiving rooms and live rabbit holding rooms, shall be protected by properly fitted screens or other suitable devices against the entrance of flies and other insects.

(2) Outside doors, except in receiving rooms and live rabbit holding rooms shall be self-closing and so hung that not over ¼ inch clearance remains when closed. Screen doors shall open toward the outside of the building.

§ 54.221 *Rooms and compartments.* Rooms and compartments used for edible products shall be separate and distinct from inedible products departments and from rooms where rabbits are slaughtered and skinned. Separate rooms shall be provided when required for conducting processing operations in a sanitary manner; and all rooms shall be of sufficient size to permit the installation of the necessary equipment for processing operations and the conduct of such operations in a sanitary manner.

(a) *Rooms for separate operation.* The official plant should have separate rooms for each of the following operations depending upon the various types of operations conducted; but in no case shall the receiving or holding of live rabbits or killing operations be permitted in rooms in which eviscerating operations are performed:

(1) The receiving and feeding of live rabbits.

(2) Killing and skinning operations.

(3) Eviscerating, chilling, and packing operations for ready-to-cook rabbits.

(4) Inedible products departments.

(5) Refuse room.

(b) *Rooms for holding carcasses for further inspection.* Rooms and compartments in which carcasses or parts thereof are held for further inspection shall be in such number and such location as the needs of the inspection in the plant may require. They shall be equipped with locks and keys and the keys shall not leave the custody of the inspector in charge of the plant. All such rooms and compartments shall be marked conspicuously with the word "retained" in letters not less than 2 inches high.

(c) *Coolers and freezers.* Coolers and freezers of adequate size and capacity shall be provided to reduce the internal temperature of ready-to-cook domestic rabbits prepared and otherwise handled in the plant to 36° F. within 24 hours unless other cooling facilities are available.

(d) *Refuse rooms.* Refuse rooms shall be entirely separate from other rooms in the plant, and shall have tight fitting doors and be properly ventilated.

(e) *Storage and supply rooms.* The storage and supply rooms shall be in good repair, kept dry, and maintained in a sanitary condition.

(f) *Boiler room.* The boiler room shall be a separate room, if necessary, to prevent its being a source of dirt and objectionable odors entering any room where ready-to-cook rabbits are prepared, processed, handled and stored.

(g) *Inspector's office.* Furnished office space, including, but not being limited to, light, heat and janitor service shall be provided rent free in the official plant, for the exclusive use for official purposes of the inspector or grader and the Administration. The room or rooms set apart for this purpose must meet with the approval of the regional supervisor and be conveniently located, properly ventilated and provided with lockers or cabinets suitable for the protection and storage of supplies and with facilities suitable for inspectors and graders to change clothing.

(h) *Toilet rooms.* Toilet rooms opening directly into rooms where domestic rabbit products are exposed shall have self-closing doors and shall be ventilated to the outside of the building.

§ 54.222 *Floors, walls, ceilings, etc.* The floors, walls, ceilings, partitions, posts, doors and other parts of all compartments shall be of such material, construction, and finish as will make them susceptible of being readily and thoroughly cleaned.

(a) *Floors.* (1) All floors, except those which are kept dry, shall be constructed of hardened concrete, or of tile laid closely together with impervious joint material, or of other similar impervious material and kept in good repair.

(2) All floors except those which are kept dry shall be graded to permit run-off with no standing water and in new construction and renovated plants the pitch shall be not less than ¼ inch per foot to drains.

(b) *Ceilings and walls.* (1) Ceilings and walls in rooms and compartments where exposed edible products are processed, handled, or stored shall have tiled, enameled, or other smooth surface impervious to moisture.

(2) Cooler and freezer rooms shall have interior surfaces as are impervious to moisture and permit thorough cleaning.

(c) *Blood disposal.* (1) Adequate facilities shall be provided for the disposal of blood in a sanitary manner.

(2) When bleeding troughs are used they shall be long enough to catch the blood during the bleeding process and shall be cleaned daily. Such troughs shall be installed so as to pitch at least ½ inch per foot toward a smooth metal catch basin or basins, of sufficient capacity for a day's operation at peak production, or shall be flushed continuously.

§ 54.223 *Drainage and plumbing.* There shall be an efficient drainage and plumbing system for the plant and premises.

(a) *Drains and gutters.* All drains and gutters shall be properly installed with approved traps and vents. The drainage and plumbing system must permit the quick run-off of all water from plant buildings, and surface water around the plant and on the premises; and all such water shall be disposed of in such a manner as to prevent a nuisance or health hazard.

(b) *Sewage and plant wastes.* (1) The sewerage system shall have adequate slope and capacity to remove readily all waste from the various processing operations and to minimize, and if possible to prevent, stoppage and surcharging of the system.

(2) Grease traps which are connected with the sewerage system shall be suitably located but not near any edible products department or in any area where products are unloaded from, or loaded into, vehicles. To facilitate cleaning, such traps shall have inclined bottoms and be provided with suitable covers.

(3) In new construction toilet soil lines shall be separate from house drainage lines to a point outside the buildings; and drainage from toilet bowls and urinals shall not be discharged into a grease catch basin.

(4) All floor drains shall be equipped with traps, constructed so as to minimize clogging; and the plumbing shall be so installed as to prevent sewerage from backing up and from flooding the floor.

(5) Floor drainage lines should be of metal and at least 4 inches in diameter and open into main drains of at least 6 inches in diameter and shall be properly vented to outside air.

(6) Where refrigerators are equipped with drains, such drains should be properly trapped and should discharge through an air gap into the sewer system. All new installations, and all replacements, of refrigerators equipped with drains shall meet these requirements.

§ 54.224 *Water supply.* The water supply shall be ample, clean, and potable with adequate facilities for its distribution in the plant, and its protection against contamination and pollution.

(a) Hot water at a temperature not less than 180° F. shall be available for sanitation purposes.

(b) Hose connections with steam and water mixing valves or hot water hose connections shall be provided at convenient locations throughout the plant for cleaning purposes.

(c) The refuse rooms shall be provided with adequate facilities for washing refuse cans and other equipment in the rooms; and the rooms, cans, and equipment shall be cleaned after each day's use.

§ 54.225 *Lavatory accommodations.* Modern lavatory accommodations, and properly located facilities for cleaning utensils and hands shall be provided.

(a) Adequate lavatory and toilet accommodations, including, but not being limited to, running hot water and cold water, soap, and towels, shall be provided. Such accommodations shall be in or near toilet and locker rooms and also at such other places in the plant as may be essential to the cleanliness of all personnel handling products.

(b) Sufficient metal containers shall be provided for used towels and other wastes.

(c) The water supply in all hand washing facilities serving areas where edible products are prepared shall be operated by other than hand operated controls or shall be of a continuous-flow type.

(d) Durable signs shall be posted conspicuously in each toilet room and locker room directing employees to wash their hands before returning to work.

(e) Toilet facilities shall be provided according to the following formula:

| Persons of same sex: | *Toilet bowls required* |
|---|---|
| 1 to 15, inclusive | 1 |
| 16 to 35, inclusive | 2 |
| 36 to 55, inclusive | [1]3 |
| 56 to 80, inclusive | [1]4 |
| For each additional 30 persons in excess of 80 | [1]1 |

[1] Urinals may be substituted for toilet bowls but only to the extent of ⅓ of the total number of bowls stated.

§ 54.226 *Lighting and ventilation.* There shall be ample light, either natural or artificial or both, of good quality and well distributed, and sufficient ventilation for all rooms and compartments to insure sanitary conditions.

(a) All rooms in which domestic rabbits are killed, eviscerated, or otherwise processed shall have at least 10 foot candles of light intensity on all working surfaces except that at the grading and inspection stations such light intensity shall be 50 foot candles. In all other rooms there shall be provided at least 4 foot candles of light intensity when measured at a distance of 30 inches from the floor.

(b) All rooms shall be adequately ventilated to eliminate objectionable odors and minimize moisture condensation.

*Equipment and Utensils*

§ 54.230 *Equipment and utensils.* Equipment and utensils used for the preparation, processing, or otherwise handling any product in the plant shall be suitable for the purpose intended and shall be of such material and construction as will facilitate their thorough cleaning and insure cleanliness in the preparation and handling of products.

(a) Live rabbit holding pens shall be so constructed as to allow satisfactory ante-mortem examination and to permit proper cleaning.

(b) Metal refuse containers shall be provided; and such containers shall be kept covered.

(c) Insofar as it is practical, equipment and utensils shall be made of metal or other impervious material. Trucks and receptacles used for handling inedible products shall be of similar construction and shall be conspicuously and distinctly marked and shall not be used for handling any edible products.

(d) Chilling vats. Chilling vats or tanks used for chilling ready-to-cook domestic rabbits shall be made of metal or other hard-surfaced impervious material.

(e) Grading and packing bins. Where grading bins are used for ready-to-cook domestic rabbits they shall be of sufficient number and capacity to handle the grading adequately without the use of makeshift bins and all ready-to-cook domestic rabbits shall be kept off the floor. Grading bins may be made of metal or enameled wood and shall be constructed and maintained in such a manner as to allow easy and thorough cleaning. All replacements of such bins shall, however, be of metal.

(f) Except as otherwise provided herein, all equipment and utensils used in the killing, skinning, and the eviscerating, chilling, and packing rooms shall be of metal or other impervious material and constructed so as to permit proper and complete cleaning.

(g) Conveyors. (1) Conveyors used in the preparation of ready-to-cook domestic rabbits shall be of metal or other acceptable material and of such construction as to permit thorough and ready cleaning and easy identification of viscera with its carcass.

(2) Overhead conveyors shall be so constructed and maintained that they do not allow grease, oil, or dirt to accumulate on the drop chain or shackle, which shall be of noncorrosive metal.

(3) Non-metallic belt-type conveyors used in moving edible products shall be of water-proof composition.

(h) Inspection, eviscerating, and cutting tables shall be made of metal and have coved corners and be so constructed and placed to permit thorough cleaning.

(i) In plants where no conveyors are used, each carcass shall be eviscerated in an individual metal tray of seamless construction.

(j) Water spray washing equipment shall be used for washing carcasses inside and out.

(k) Watertight metal receptacles shall be used for entrails and other waste resulting from preparation of ready-to-cook domestic rabbits.

(l) Watertight trucks and receptacles for holding or handling diseased carcasses and diseased parts of carcasses shall be so constructed as to be readily and thoroughly cleaned; such trucks and receptacles shall be marked in a conspicuous manner with the word "condemned" in letters not less than 2 inches high and, when required by the inspector in charge, shall be equipped with facilities for locking and sealing.

(m) Freezing rooms should be adequately equipped to freeze ready-to-cook domestic rabbits solid in less than 48 hours. Ready-to-cook domestic rabbits should be frozen at temperatures of —10° F. to —40 F. and should be stored at 0° F. or below, with the temperature maintained as constant as possible. Freezing rooms should be equipped with floor racks or pallets and fans to insure air circulation.

(n) Cooling racks should be made of metal and be readily accessible for thorough washing and cleaning. All replacements of cooling racks shall be made of metal.

(o) Trucks and receptacles in which carcasses or parts thereof are held for further inspection shall be in such number and such location as the needs of the inspection in the plant may require. They shall be equipped for locking by means of lock and key and the key shall not leave the custody of the inspector in charge of the plant. Such trucks and receptacles shall be marked conspicuously with the word "retained" in letters not less than 2 inches high.

§ 54.231 *Accessibility.* All equipment shall be so placed as to be readily accessible for all processing and cleaning operations.

§ 54.232 *Restrictions on use.* Equipment and utensils used in the official plant shall not be used outside the official plant except under such conditions as may be prescribed or approved by the national supervisor, and equipment used in the preparation of any article (including, but not being limited to, animal food), from inedible material shall not be used outside of the inedible products department except under such conditions as may be prescribed or approved by the national supervisor.

*Maintenance of Sanitary Conditions and Precautions Against Contamination of Products*

§ 54.240 *General.* The premises shall be kept free from refuse, waste materials, and all other sources of objectionable odors and conditions.

§ 54.241 *Cleaning of rooms and compartments.* Rooms, compartments, or other parts of the official plant shall be kept clean and in sanitary condition.

(a) All blood, offal, rabbits or parts of rabbits too severely damaged to be salvaged and all discarded containers and other materials shall be completely disposed of daily.

(b) All windows, doors, and light fixtures in the official plant shall be kept clean.

(c) All docks and rooms shall be kept clean and free from debris and unused equipment and utensils.

(d) Live rabbit receiving docks and receiving rooms shall be of such construction as readily to permit their thorough cleaning; and such docks and rooms should be kept clean at all times.

(e) Floors in live rabbit holding rooms shall be cleaned with such regularity as may be necessary to maintain them in a sanitary condition.

(f) The killing and skinning room shall be kept clean and free from offensive odors at all times.

(g) The walls, floors, and all equipment and utensils used in the killing and skinning room shall be thoroughly washed and cleaned after each day's operation.

(h) The floors in the killing and skinning room shall be cleaned frequently during killing and skinning operations and be kept reasonably free from accumulated blood, offal, water and dirt.

(i) All equipment in the toilet room and locker room, as well as the room itself, shall be kept clean, sanitary, and in good repair.

(j) Cooler and freezer rooms shall be free from objectionable odors of any kind and shall be maintained in a sanitary condition (including, but not being limited to, the prevention of drippings from refrigerating coils onto products).

§ 54.242 *Cleaning of equipment and utensils.* Equipment and utensils used for preparing or otherwise handling any product shall be kept clean and in a sanitary condition and in good repair.

(a) Pens shall be cleaned regularly and the manure removed from the plant daily.

(b) All equipment and utensils used in the killing and skinning rooms shall be thoroughly washed and cleaned after each day's operation. The eviscerating, chilling, and packing room and equipment and utensils used therein shall be maintained in a clean and sanitary condition.

(c) Graders' and packers' gloves and grading bins shall be washed daily and used only for grading or packing, as the case may be.

(d) All crates or pens used for transporting live domestic rabbits to the plant shall be cleaned regularly.

(e) Chilling vats or tanks, if practicable, shall be emptied after each use. They shall be thoroughly cleaned once daily, and after each cleaning operation they shall be sanitized with such compounds or by such methods as may be approved or prescribed by the Administrator.

(f) When synchronized overhead conveyors and tray conveyors are used, the trays shall be completely washed and sanitized after being automatically emptied of inedible viscera.

(g) When a conveyor tray operation is used, each carcass shall be eviscerated in an individual metal tray of seamless construction; and such trays shall be completely washed and sanitized after each use.

(h) Tables, shelves, bins, trays, pans, knives, and all other tools and equipment used in the preparation of ready-to-cook domestic rabbits shall be kept clean and sanitary at all times. Cleaned equipment and utensils shall be drained on racks and shall not be nested.

(i) Drums, cans, tanks, vats, and other receptacles used to hold or transport ready-to-cook domestic rabbits shall be kept in a clean and sanitary condition.

§ 54.243 *Operations and procedures.* Operations and procedures involving the preparation, storing, or handling of any product shall be strictly in accord with clean and sanitary methods.

(a) There shall be no handling or storing of materials which create an objectionable condition in rooms, compartments, or other places in the plant where any product is prepared, stored, or otherwise handled.

(b) Blood from the killing operation shall be confined to a relatively small area and kept from being splashed about the room.

(c) In the final washing, the carcass shall be passed through a system of sprays providing an abundant supply of fresh clean water.

(d) The floors in the eviscerating room shall be kept clean and reasonably dry during eviscerating operations and free of all refuse.

(e) Conveyors shall be operated at such speeds as will permit a sanitary eviscerating operation and will permit adequate inspection for condition and wholesomeness.

(f) Mechanized packaging equipment shall be maintained in good sanitary condition.

(g) All offal resulting from the eviscerating operation shall be removed as often as necessary to prevent the development of a nuisance.

(h) Paper and other material used for lining containers in which products are packaged shall be of such kinds as do not tear readily during use, but remain intact when moistened by the product.

(i) Protective coverings shall be used for the product in the plant and as it is distributed from the plant, as will afford adequate protection for the product against contamination by any foreign substance (including, but not being limited to, dust, dirt, and insects), considering the means intended to be employed in transporting the product from the plant.

(j) Refuse may be moved directly to loading docks only for prompt removal.

(k) Cleanliness and hygiene of personnel. (1) All employees coming in contact with exposed edible products or edible products handling equipment shall wear clean garments and should wear caps or hair nets, and shall keep their hands clean at all times while thus engaged.

(2) Hands of employees handling edible products or edible products handling equipment shall be free of infected cuts, boils, and open sores at all times while thus engaged.

(3) Every person after each use of toilet or change of garments shall wash his hands thoroughly before returning to duties that require the handling of edible products, or containers therefor, or edible products handling equipment.

(4) Neither smoking nor chewing of tobacco shall be permitted in any room where exposed edible products are prepared, processed, or otherwise handled.

§ 54.244 *Temperatures and cooling and freezing procedures.* Temperatures and procedures which are necessary for cooling and freezing of domestic rabbits in accordance with sound commercial practice shall be maintained in the coolers and freezers, and chilling temperatures and procedures shall also be in accordance with sound commerial practice.

(a) *Cooling.* Immediately after evisceration and washing of the carcass, it shall be placed in a cooling tank containing running cold tap water to remove the animal heat from the carcass. Carcasses shall not be allowed to remain in the cooling tank for longer than one hour.

(b *Air chilling.* Immediately after the initial water chilling, the carcasses shall be placed in cooling racks and thereupon placed in a refrigerated cooler with moderate air movements and a temperature which will reduce the internal temperature of the carcasses to from 36° F. to 40° F., both inclusive, within 24 hours.

(c) *Freezing.* (1) When ready-to-cook domestic rabbits are packaged in bulk or shipping containers, the carcasses should be individually wrapped or packaged in water-vapor resistant cartons or the containers should be lined with heavy water-vapor resistant paper so as to assure adequate overlapping of the lining to completely surround the carcasses and to permit unsealed closure or sealing in such a manner that water-vapor loss from the product is considerably retarded or prevented. The rabbit carcasses should receive an initial rapid freezing under such packaging, temperature, air circulation, and stacking conditions which will result in freezing the carcasses solid in less than 48 hours.

(2) Frozen ready-to-cook rabbits should be stored at 0° F., or below, with temperatures maintained as constant as possible.

(d) *Refrigeration.* Immediately after packaging, all ready-to-cook domestic rabbits, other than those which are shipped from the plant in a refrigerated carrier, should be moved into the freezer, except that a period not exceeding 72 hours will be permitted for transportation and temporary holding before placing in the freezer provided such rabbits are held at not above 36° F.

§ 54.245 *Vermin.* Every practicable precaution shall be taken to exclude flies, rats, mice, and other vermin from the official plant. Dogs, cats, and other pets shall be excluded from rooms where edible products are processed, handled, or stored.

§ 54.246 *Exclusion of diseased persons.* No person affected with any communicable disease (including, but not being limited to, tuberculosis) in a transmissible stage shall be permitted in any room or compartment where exposed or unpacked edible products are prepared, processed, or otherwise handled.

§ 54.247 *Table showing types of materials.*

| Equipment, utensils, and facilities | Iron | Stainless steel and monel metal | Aluminum | Galvanized iron |
|---|---|---|---|---|
| Hobble pens | A | A | A | A |
| Overhead conveyor | A | A | A | A |

## SUBPART B—UNITED STATES STANDARDS FOR DOMESTIC RABBITS AND EDIBLE PRODUCTS THEREOF

### U. S. SPECIFICATIONS FOR CLASSES OF READY-TO-COOK DOMESTIC RABBITS

§ 54.260 *General.* For the purpose of §§ 54.260 to 54.262, the classes of ready-to-cook domestic rabbits are fryer rabbits and roaster rabbits. The flesh of a fryer domestic rabbit is tender and fine-grained, and of a bright pearly white color. The flesh of a roaster domestic rabbit is more firm and coarse-grained; the muscle fiber is slightly darker in color and less tender than that of a fryer domestic rabbit; and the fat may be more creamy in color than that of a fryer domestic rabbit.

§ 54.261 *Fryer.* A fryer is a young domestic rabbit carcass weighing not less than 1½ pounds and rarely more than

3½ pounds; and processed from a rabbit usually less than 12 weeks of age.

§ 54.262 *Roaster.* A roaster is a mature or old domestic rabbit carcass of any weight but usually over 4 pounds; and processed from a rabbit over 12 weeks of age, usually 8 months old or older.

U. S. SPECIFICATIONS FOR STANDARDS OF QUALITY FOR INDIVIDUAL READY-TO-COOK DOMESTIC RABBITS

§ 54.270 *General.* Carcasses found to be unsound, unwholesome, or unfit for food shall not be included in any of the quality designations specified in §§ 54.275 to 54.277.

*Standards of Quality*

§ 54.275 *A Quality.* To be of A Quality the carcass:

(a) Is short, thick, well-rounded, and full-fleshed.

(b) Has a broad back, broad hips, and broad, deep fleshed shoulders, and firm muscle texture.

(c) Has well-developed strips of fat extending from the neck part-way down the back, and some exterior fat well distributed over loins, shoulders, and back, and a plentiful amount of interior fat in the crotch and over the inner walls of the carcass, the kidneys being practically surrounded by thick layers of firm white fat.

(d) Shows no evidence of coagulated blood in the veins and is free from any evidence of reddening of the flesh due to blood in the connective tissues.

(e) Is free from all foreign material (including, but not being limited to, hair, dirt, and bone particles) and from crushed bones caused by removing the head or the feet.

(f) Is free from broken bones, flesh bruises, defects, and deformities. Ends of leg bones may be broken due to removing the feet.

§ 54.276 *B Quality.* To be of B Quality the carcass:

(a) Is short, thick, fairly well-rounded and fairly well-fleshed.

(b) Has a fairly broad back, fairly broad hips, and fairly broad and deep-fleshed shoulders, and fairly firm muscle texture.

(c) Has fairly well developed strips of fat extending from the neck part-way down the back and some evidence of fat fairly well distributed over loins and shoulders; has interior fat that is fairly plentiful in the crotch and over the inner walls of the carcass; and has a considerable quantity of interior fat around the kidneys.

(d) Shows no evidence of coagulated blood in the veins and is free from any evidence of reddening of the flesh due to blood in the connective tissues.

(e) Is free from all foreign material (including, but not being limited to, hair, dirt, and bone particles) and from crushed bones caused by removing the head or the feet.

(f) Is free from broken bones and practically free from bruises, defects, and deformities. Ends of leg bones may be broken due to removing the feet.

§ 54.277 *C Quality.* A carcass that does not meet the requirements of B Quality may be of C Quality and such carcass:

(a) May be long, rangy, and fairly well fleshed.

(b) May have thin, narrow back and hips, and soft flabby muscle texture.

(c) May show very little evidence of exterior fat.

(d) May show very slight evidence of reddening of the flesh due to blood in the connective tissues.

(e) Is free from all foreign material (including, but not being limited to, hair, dirt, and bone particles) and from crushed bones caused by removing the head or feet.

(f) May have moderate bruises of the flesh, moderate defects, and moderate deformities; have not more than one broken bone; and may have a small portion of the carcass removed because of serious bruises.

## PART 55—SAMPLING, GRADING, GRADE LABELING, AND SUPERVISION OF PACKAGING OF EGGS AND EGG PRODUCTS

RECODIFICATION

By virtue of the authority (18 F. R. 4839) vested in me by the Secretary of Agriculture and in accordance with the revised Federal Register regulations, the format of the regulations (7 CFR Part 55) governing the sampling, grading, grade labeling, and supervision of packaging of eggs and egg products, which are currently operative pursuant to the applicable provisions of the Department of Agriculture Appropriation Act, 1954 (Pub. Law 156, 83d Cong., approved July 28, 1953), is recodified as hereinafter set forth.

The recasting of the format due to such recodification is not intended, nor shall it be deemed, to make any substantive change in the regulations. The designation "Subpart A—Regulations" is added to cover §§ 55.1 to 55.61 (16 F. R. 10193; 18 F. R. 1463), and the center heading preceding § 55.102 (17 F. R. 2605) is changed to "Subpart B—Forms and Instructions," and the provisions of § 55.102 are recodified as §§ 55.100 to 55.115.

Since the services and programs provided by the regulations are currently in effect, the regulations as presented in recodified form shall become effective upon publication in the FEDERAL REGISTER so as to avoid any interruption to the continuity of the services and programs.

The recodification is set forth below.

Issued at Washington, D. C., this 29th day of October 1953.

[SEAL] ROY W. LENNARTSON,
*Assistant Administrator, Production and Marketing Administration.*

AUTHORITY: §§ 55.100 to 55.115 issued under sec. 205, 60 Stat. 1090, Pub. Law 156, 83d Cong., 7 U. S. C. 1624.

SUBPART B—FORMS AND INSTRUCTIONS

INSTRUCTIONS GOVERNING PLANTS OPERATING AS OFFICIAL PLANTS PROCESSING AND PACKAGING EGG PRODUCTS

§ 55.100 *Definitions.* (a) "Egg products" means each of the following products prepared from shell eggs with or without the addition of any other edible substance or ingredient: Liquid eggs; frozen eggs; dried eggs; liquid, frozen, or dried egg whites; and liquid, frozen, or dried egg yolks.

(b) "Eggs of current production" means shell eggs which have moved through usual marketing channels since the time they were laid, and have not been held in refrigerated storage in excess of 60 days.

(c) "Regional supervisor" means any employee of the Department in charge of poultry grading service in a designated geographical area.

(d) "Regulations in this part" means the regulations governing the sampling, grading, grade labeling, and supervision of packaging of eggs and egg products (§§ 55.1 to 55.61).

(e) "Sanitize" means to subject to an acceptable germicidal agent.

(f) "Shell eggs" means shell eggs of domesticated chickens.

(g) All other terms which are used herein shall have the meaning applicable to such terms when used in the regulations in this part.

§ 55.101 *Plant surveys*—(a) *Initial survey.* When an application for continuous inspection in a plant has been filed, the regional supervisor or his assistant serving the area in which the plant is located will make a survey and inspection of the premises and plant to determine whether the facilities and methods of operation therein are suitable and adequate for service in accordance with (1) the regulations in this part, (2) the instructions and requirements contained in this section, and (3) such further instructions and requirements based upon the aforesaid instructions which may hereafter be issued with respect to minimum requirements for facilities, operating procedures, and sanitation in egg breaking and egg drying plants and which are in effect at the time of the aforesaid survey and inspection.

(b) *Drawings and specifications to be furnished.* Four copies of drawings properly drawn to scale shall be submitted to the regional supervisor. The drawings shall consist of floor plans of space to be included in the official plant, the locations of such features as the principal pieces of equipment, floor drains, hand washing facilities, hose connections for clean-up purposes, and the cardinal points of the compass.

(1) The official plant shall include the breaking room, equipment washing and sanitizing rooms, shell egg washing room, shell egg storage rooms, toilet and dressing rooms, store rooms for supplies used in the operation under this service, and all other rooms, compartments, or passageways where products or any ingredients to be used in the preparation of products under this service will be handled or kept and may include other rooms located in the buildings comprising the official plant.

(2) If rooms shown on the drawings are not to be included as part of the official plant, this should be clearly indicated thereon.

(3) Specifications covering the height of ceilings, types of principal pieces of equipment, character of walls, floors, and ceilings, lighting, ventilation including intake and exhaust facilities, water supply and drainage, and such other notations as may be required shall accompany the drawings. Upon approval of the drawings and specifications the application for service may be approved.

(c) *Final survey and plant approval.* Prior to the inauguration of continuous inspection service, a final survey of the plant and premises shall be made by the regional supervisor or his assistant to determine if the plant is constructed and facilities are installed in accordance with the approved drawings and the regulations in this part. The plant may be approved only when these requirements have been met.

§ 55.102 *Suspension of plant approval.* (a) Any plant approval pursuant to the regulations in this part may be supended for (1) failure to maintain plant and equipment in a satisfactory state of repair; (2) the use of operating procedures which are not in accordance with the regulations and instructions set forth in this part; or (3) alterations of buildings, facilities or equipment which cannot be approved in accordance with the aforesaid regulations and instructions.

(b) During such period of suspension, inspection service shall not be rendered. However, the other provisions of the contract for service shall remain in effect unless terminated in accordance with the terms thereof. If the plant facilities or methods of operation are not brought into compliance within a reasonable period of time to be specified by the Administrator, the contract shall be terminated. Upon termination of any contract providing for inspection service in an official plant pursuant to the regulations in this part, the plant approval shall also become terminated, and all labels, seals, tags or packaging material bearing official identification shall, under the supervision of a person designated by the Administration, either be destroyed, or the official identification completely obliterated, or sealed in a manner acceptable to the Administration.

§ 55.103 *Raw materials.* (a) Egg products which are to bear the inspection mark shall be processed in an official plant from edible shell eggs of current production and may contain other edible ingredients. The following categories of edible shell eggs and egg products may be used to prepare egg products which are to bear the inspection mark: (1) Clean shell eggs; (2) stained shell eggs; (3) shell eggs with adhering dirt on the shells: *Provided*, That prior to processing, such eggs are properly cleaned or washed and dried in such a manner as will avoid contamination of the egg meat; (4) shell eggs containing blood spots (localized clots of blood which can be readily removed), provided such spots are removed; and (5) other egg products which were processed in an official plant and which bear the inspection mark.

(b) Egg products may be produced in an official plant from edible shell eggs other than of current production and edible shell eggs which are (1) leakers; (2) checks with adhering dirt; and (3) shell eggs containing blood spots (localized clots of blood which can be readily removed), provided such spots are removed. None of such egg products shall, however, be identified with the inspection mark, but may bear an official identification of the design and wording set forth in § 55.115 (b): *Provided*, That after freezing but prior to shipping such egg products are drilled and inspected organoleptically and found to be in satisfactory condition by a grader of frozen eggs.

(c) Edible turkey, guinea, duck, and goose eggs may be processed in the official plant if such eggs are processed separately and properly labeled. The resultant egg products may be officially identified.

(d) Eggs containing diffused blood in the albumen or on the yolk shall not be used and such eggs shall be denatured.

(e) Shell eggs or egg products which are not fit for human food shall be placed in a conspicuously marked container which contains a denaturant of such character as will prevent such products from being used as human food or in the case of shell eggs they shall be treated in such manner as will preclude their use as human food.

§ 55.104 *Premises and plant*—(a) *Building.* The building, or portion thereof, in which any egg processing operation is conducted, shall be maintained in a sanitary condition, including, but not being limited to, the following requirements:

(1) There shall be abundant light (whether natural or artificial, or both) which is well distributed, and sufficient ventilation for each room and compartment to insure sanitary and suitable processing and operating conditions.

(2) There shall be an efficient drainage and plumbing system for the plant and premises. All drains and gutters shall be properly installed with approved traps and vents, and shall be maintained in good repair and in proper working order.

(3) The water supply (both hot and cold) shall be ample, clean, and potable, with adequate facilities for its distribution throughout the plant, or portion thereof utilized for egg processing and handling operations, and for protection against contamination and pollution.

(4) The floors, walls, ceilings, partitions, posts, doors, and other parts of all structures shall be of such materials, construction, and finish to permit their ready and thorough cleaning. The floors and curbing shall be watertight.

(5) Each room and each compartment in which any shell eggs or egg products are handled or processed shall be so designed and constructed as to insure processing and operating conditions of a clean and orderly character, free from objectionable odors and vapors, and maintained in a clean and sanitary condition.

(6) Every practicable precaution shall be taken to exclude dogs, cats, and vermin (including, but not being limited to, rodents and insects) from the plant, or portion thereof utilized, as aforesaid, in which shell eggs or egg products are handled or stored. The use of poisons for any purpose in any room or compartment where any shell eggs or egg products are stored or handled is forbidden, except under such restrictions and precautions as the Chief, or Acting Chief, of the Poultry Inspection and Grading Division of the Administration may prescribe.

(b) *Facilities.* Each plant shall be equipped with adequate sanitary facilities and accommodations, including, but not being limited to, the following:

(1) There shall be a sufficient number of adequately lighted dressing rooms and toilet rooms, ample in size, conveniently located, and separated from the rooms and compartments in which shell eggs or egg products are handled, processed, or stored. The dressing rooms and toilet rooms shall be separately ventilated, and shall meet all requirements as to sanitary construction and equipment.

(2) Lavatory accommodations (including, but not being limited to, hot and cold running water, soap, and towels) shall be placed at such locations in the plant as may be essential to assure cleanliness of each person handling any shell eggs or egg products.

(3) Clean outer garments shall be worn by all persons who are in any room or compartment where any breaking, drying, or packaging operation is conducted.

(4) No product or material which creates an objectionable condition shall be processed, stored, or handled in any room, compartment, or place where any shell eggs or egg products are processed, stored, or handled.

(5) Suitable facilities for cleaning and sanitizing utensils and equipment shall be provided at convenient locations throughout the plant.

§ 55.105 *Equipment and utensils.* Equipment used for candling, breaking, straining, clarifying, packaging, hold-

ing, drying, storing, or otherwise processing any shell eggs or egg products shall be of such design, material, and construction as will (a) enable the examination, segregation, or other processing of such eggs or egg products in an efficient, clean, and satisfactory manner, and (b) permit easy access to all parts to insure thorough cleaning and sanitizing. So far as is practicable, all such equipment shall be made of metal or other impervious material, if the metal or other material will not affect the product by chemical action or physical contact. Receptacles and packages used for shell eggs or egg products which are not fit for human food shall bear some conspicuous and distinctive identification.

§ 55.106 *Operations and operating procedures.* (a) All operations involving processing, storing, and handling of shell eggs and egg products shall be strictly in accord with clean and sanitary methods, and shall be conducted as rapidly as is practicable and, except as necessary in preparing egg products by the fermentation process, at temperatures that will tend to cause no material increase in bacterial growth, or no deterioration or break-down of the original quality of the egg meat.

(b) All shell eggs and egg products shall be subjected to constant and continuous inspection throughout each and every processing operation. Any shell egg or egg product which was not processed in accordance with the instructions contained in §§ 55.100 to 55.115 or is not fit for human food shall be removed and segregated prior to any further processing operation in connection with the production of egg products to be identified by official identification.

(c) All utensils and equipment which are contaminated during the course of processing any shell eggs or egg products shall be removed from use immediately and shall not be used again until cleaned and sanitized.

(d) Any substance or ingredient added in the processing of any egg products shall be clean and fit for human food.

§ 55.107 *Sorting shell eggs.* (a) Shell eggs shall be adequately sorted prior to delivery to the breaking room so as to comply with the requirements of § 55.103 applicable to raw material.

(b) Shell eggs shall be sorted in such manner as to avoid breakage or contamination. When shell eggs are candled, they shall be so handled as to avoid breakage and contamination.

§ 55.108 *Breaking shell eggs.* (a) Each shell egg must be broken in a satisfactory and sanitary manner and inspected for wholesomeness by smelling the shell or the egg meat, and by visual examination at the time of breaking. Egg meat fit for human food shall be placed in proper containers and subsequently examined by an inspector. Egg meat which is not fit for human food shall be placed in containers provided for the purpose bearing some conspicuous and distinctive identification; and such containers shall contain a denaturant suitable for decharacterizing the product to prevent its use for human food.

(b) Egg meat which is examined and passed by an inspector shall be processed in such manner as to insure the removal of meat spots, shell particles, and foreign materials.

(c) Each person who is to handle any exposed or unpacked egg products shall wash his hands immediately prior to handling any such products or any utensils which contain, or are to contain, such products and shall maintain clean hands while handling any exposed or unpacked egg products.

(d) Whenever any breaker breaks a shell egg which is not fit for human food he shall not use any utensil which is contaminated by such shell egg. Each such contaminated utensil shall be exchanged for a clean one, and the breaker shall wash his hands immediately prior to receiving the clean utensil.

(e) In addition to the other requirements contained in this section, all utensils and equipment shall be clean and sanitary at the start of each day's processing operations and at the resumption of processing operations following any cessation of such operations for 30 minutes or longer.

§ 55.109 *Drying.* All pumps, liquid egg lines, drying equipment, and dried egg conveyors shall be operated and maintained in a sanitary manner. All dried egg powder shall be sifted, but not forced, through a screen so as to remove all foreign materials and all lumpy particles of dried eggs. No egg product which is to be identified with official identification shall have incorporated therein any screenings collected from any screening operation, any badly scorched powder, or any dusthouse powder.

§ 55.110 *Packages.* Packages or containers for egg products shall be clean when being filled with any egg products; and all reasonable precautions shall be taken to avoid soiling or contaminating the surface of any package or container liner which is, or will be, in direct contact with such egg products.

§ 55.111 *Final inspection of egg products.* All egg products shall, at the completion of the processing operation, be inspected by an inspector to ascertain the condition of the finished product.

§ 55.112 *Personnel; health.* (a) No person affected with any communicable disease (including, but not being limited to, tuberculosis) in a transmissible stage shall be permitted in any room or compartment where exposed or unpacked egg products are prepared, processed, or otherwise handled.

(b) Spitting or smoking is prohibited in each room and in each compartment where any exposed or unpacked egg products are prepared, processed, or otherwise handled.

(c) All necessary precautions shall be taken to prevent the contamination of egg products with any foreign substance (including, but not being limited to, perspiration, hair, cosmetics, and medicaments).

§ 55.113 *Facilities to be furnished by official plant.* (a) Facilities for the proper sampling, weighing, and examination of shell eggs and egg products shall be furnished by the official plant for use by inspectors and frozen egg graders.

(b) A locker or desk (equipped with a satisfactory locking device), in which labels with official identification, marking devices, samples, certificates, seals, and reports of inspectors will be kept, shall be furnished by the official plant for use by inspectors.

§ 55.114 *Authority and duties of inspectors.* (a) Each inspector is authorized:

(1) To make such observations and inspections as he deems necessary to enable him to certify that egg products have been prepared, processed, stored and otherwise handled in conformity with the regulations in this part and the instructions contained in this section;

(2) To supervise the marking of packages containing egg products which are eligible to be identified with official identification;

(3) To retain in his custody, or under his supervision, labels with official identification, marking devices, samples, certificates, seals, and reports of inspectors;

(4) To deface or remove, or cause to be defaced or removed under his personal supervision, any official identification from any package containing egg products whenever he determines that such products were not processed in accordance with the instructions contained in this section or are not fit for human food; and

(5) To issue a certificate covering all products processed in the official plant.

(b) Each inspector shall prepare such reports and records as may be prescribed by the Chief or Acting Chief of the Poultry Inspection and Grading Division, of the Administration, which shall contain, in addition to all other required data, a daily record of:

(1) The sanitary condition of the official plant and all processing operations therein in connection with the production of egg products;

(2) All processing, holding, and storing temperatures;

(3) The selection of all raw material used in the production of egg products;

(4) The handling and condition of the finished egg products;

(5) The total quantity of egg products identified with the inspection mark;

(6) The total quantity of egg products officially identified in accordance with § 55.115 (b); and

(7) The total quantity of egg products not fit for human food.

§ 55.115 *Official identification*—(a) *Inspection mark.* The inspection mark which is permitted to be used on egg products, other than those prepared in accordance with § 55.103 (b), shall be contained within the outline of a shield of the wording and design set forth in Figure 1 of paragraph (b) of this section.

(b) *Other identification.* Egg products prepared in accordance with § 55.103 (b) may be identified with an official identification of the wording and design set forth in Figure 2 of this paragraph.

FIGURE 1.

FIGURE 2

(c) *Products not eligible for official identification.* Egg products which were prepared in nonofficial plants shall not be officially identified, but such products may be inspected organoleptically and covering certificates issued setting forth the results of the inspection.

(d) *Use of presently approved labels.* Containers or labels which bear an official identification which was approved prior to the effective date of the instructions under this section may be used until the supply now on hand is exhausted.

PART 70—GRADING AND INSPECTION OF POULTRY AND EDIBLE PRODUCTS THEREOF; AND UNITED STATES CLASSES, STANDARDS, AND GRADES WITH RESPECT THERETO

RECODIFICATION

By virtue of the authority (18 F. R. 4839) vested in me by the Secretary of Agriculture and in accordance with the revised Federal Register regulations, the format of the regulations (7 CFR Part 70) governing the grading and inspection of poultry and edible products thereof, and United States classes, standards, and grades with respect thereto, which are currently operative pursuant to the applicable provisions of the Agricultural Marketing Act of 1946 (60 Stat. 1087; 7 U. S. C. 1621 et seq.) and the Department of Agriculture Appropriation Act, 1954 (Pub. Law 156, 83d Cong., approved July 28, 1953), is recodified as hereinafter set forth.

The recasting of the format due to such recodification is not intended, nor shall it be deemed, to make any substantive change in the regulations. However, several editorial changes have been made in the provisions of some of the sections as they existed prior to this recodification (i. e., §§ 70.11, 70.33, and 70.201) and which, by their own terms, have been inapplicable since June 30, 1953. In addition, conforming changes have been made in the designations (as listed in Table II—Turkeys, of § 70.105 (c) prior to this recodification) of some of the classes of turkeys in view of the amendment (17 F. R. 3631) of April 24, 1952, prescribing new class designations. The recodified sections that are affected by the editorial changes are §§ 70.91, 70.182, and 70.381. The recodified section affected by the conforming change is § 70.370.

Since the services and programs provided by the regulations are currently in effect, the regulations as presented in recodified form shall become effective upon publication in the FEDERAL REGISTER so as to avoid any interruption to the continuity of such services and programs.

The recodification is set forth below.

Issued at Washington, D. C., this 29th day of October 1953.

[SEAL] ROY W. LENNARTSON,
*Assistant Administrator, Production and Marketing Administration.*

SUBPART A—GRADING AND INSPECTION OF POULTRY AND EDIBLE PRODUCTS THEREOF

GENERAL

70.1 Definitions.
70.2 Administration.
70.3 Grading and inspection services available.

BASIS OF SERVICE

70.10 Inspection service.
70.11 Grading service.
70.12 Continuous grading service.
70.13 Supervision.
70.14 Dressed poultry eligibility.
70.15 Inspection in official plants; extent required.
70.16 Certification of dressed poultry produced under sanitary requirements.
70.17 Examination of ready-to-cook poultry which was not processed in official plants.
70.18 Authority to waive provisions of §§ 70.14 and 70.15.

PERFORMANCE OF SERVICES

70.30 Licensed graders and inspectors.
70.31 Suspension of license or authority; revocation.
70.32 Surrender of license.
70.33 Identification.
70.34 Financial interest of inspectors and graders.
70.35 Political activity.

APPLICATION FOR GRADING SERVICE OR INSPECTION SERVICE

70.40 Who may obtain grading service or inspection service.
70.41 How application may be made.
70.42 Filing of application.
70.43 Authority of applicant.
70.44 Application for inspection service or grading service in official plants; approval.
70.45 Rejection of application.
70.46 Withdrawal of application.
70.47 Order of service.
70.48 Suspension of plant approval.

VIOLATIONS

70.60 Denial of service.
70.61 Misrepresentation, deceptive, or fraudulent acts or practices.
70.62 Use of facsimile forms.
70.63 Willful violation of the regulations.
70.64 Interfering with a grader or inspector.
70.65 Misleading labeling.
70.66 Miscellaneous.

OTHER APPLICABLE REGULATIONS

70.80 Other applicable regulations.

PUBLICATIONS

70.85 Publications.

IDENTIFYING AND MARKING PRODUCTS

70.90 Approval of official identification.
70.91 Products that may be individually grade marked; information required on grade mark.
70.92 Use of grade mark and inspection mark with respect to the same product.
70.93 Marking inspected products.
70.94 Marking dressed poultry which was certified as having been prepared under sanitary requirements.

SUPERVISION OF MARKING AND PACKAGING

70.100 Evidence of label approval.
70.101 Affixing of official identification.
70.102 Removal of official identification.
70.103 Packaging.
70.104 Retention labels.
70.105 Prerequisites to grading and inspection.
70.106 Accessibility of products.
70.107 Time of grading or inspection in an official plant.

REPORTS

70.120 Report of inspection work and grading work.
70.121 Information to be furnished to inspectors and graders.
70.122 Reports of violations.

FEES AND CHARGES

70.130 Payment of fees and charges.
70.131 Grading service on a fee basis.
70.132 Fees for appeal grading.
70.133 Poultry grading fee.
70.134 Inspection service on a fee basis.
70.135 Fees for additional copies of grading certificates and inspection certificates.
70.136 Traveling expenses and other charges.
70.137 Additional charges.
70.138 On a contract basis.
70.139 Fees for grading service or inspection service performed under cooperative agreement.
70.140 Disposition of fees for inspections made under cooperative agreement.

INSPECTION

70.150 Manner of handling products in an official plant.
70.151 Ante-mortem inspection.
70.152 Evisceration.
70.153 Carcasses held for further examination.
70.154 Condemnation and treatment of carcasses.
70.155 Certification of carcasses.
70.156 Reinspection of edible products.
70.157 Edible products for canning.
70.158 Products contaminated by polluted water; procedure for handling.
70.159 Preparation of animal food or similar uninspected articles in an official plant.
70.160 Appeal inspections; how made.

*Inspection Certificates*

70.170 Forms of inspection certificates.
70.171 Issuance and disposition of dressed poultry inspection certificates.
70.172 Food product inspection certificates; issuance and disposition.
70.173 Export certificates; issuance and disposition.
70.174 Advance information.

GRADING

Sec.
70.180 General.
70.181 Live poultry.
70.182 Dressed poultry and ready-to-cook poultry.

*Basis of Acceptability of Other Official Inspection Systems*

70.190 General.
70.191 Requirements as to manner of inspection.
70.192 Determining compliance with § 70.191.

*Grading Certificates*

70.200 Forms.
70.201 Issuance and disposition.
70.202 Advance information.

*Regrading*

70.210 Application for regrading of a graded product.
70.211 Regrading certificates.

*Appeal Grading*

70.220 Application for appeal grading.
70.221 How to obtain appeal grading.
70.222 Record of filing time.
70.223 When an application for an appeal grading may be refused.
70.224 When an application for appeal grading may be withdrawn.
70.225 Who shall perform the appeal grading.
70.226 Appeal grading by immediate superior.
70.227 Order of performance of appeal gradings.
70.228 Appeal grading certificates.

*Superseded Certificates*

70.235 Superseded certificates.

SANITARY REQUIREMENTS

*General*

70.240 Minimum standards for sanitation, facilities, and operating procedures in official plants.
70.241 Authority of Administrator to amend minimum standards for sanitation, facilities, and operating procedures in official plants.

*Buildings and Plant Facilities*

70.250 Buildings.
70.251 Rooms and compartments.
70.252 Floors, walls, ceilings, etc.
70.253 Drainage and plumbing.
70.254 Water supply.
70.255 Lavatory accommodations.
70.256 Lighting and ventilation.

*Equipment and Utensils*

70.270 Equipment and utensils.
70.271 Accessibility.
70.272 Restrictions on use.

*Maintenance of Sanitary Conditions and Precautions Against Contamination of Products*

70.280 General.
70.281 Cleaning of rooms and compartments.
70.282 Cleaning of equipment and utensils.
70.283 Operations and procedure.
70.284 Temperatures and cooling and freezing procedures.
70.285 Vermin.
70.286 Exclusion of diseased persons.
70.287 Table showing types of materials.

SUBPART B—UNITED STATES CLASSES, STANDARDS, AND GRADES FOR POULTRY

UNITED STATES CLASSES OF LIVE POULTRY, DRESSED POULTRY AND READY-TO-COOK POULTRY

70.300 General.
70.301 Chickens.
70.302 Turkeys.
70.303 Ducks.
70.304 Geese.
70.305 Guineas.
70.306 Pigeons.

UNITED STATES STANDARDS FOR QUALITY OF LIVE POULTRY

*General*

70.320 General.

*Standards of Quality*

70.325 A Quality or No. 1 Quality.
70.326 B Quality or No. 2 Quality.
70.327 C Quality or No. 3 Quality.
70.328 "Reject."

UNITED STATES GRADES FOR LIVE POULTRY

70.330 General.

*Grades*

70.335 U. S. Grade A or U. S. No. 1.
70.336 U. S. Grade B or U. S. No. 2.
70.337 U. S. Grade C or U. S. No. 3.
70.338 "No Grade".

UNITED STATES STANDARDS FOR QUALITY OF DRESSED POULTRY AND READY-TO-COOK POULTRY

*General*

70.350 General.

*Standards of Quality*

70.355 A Quality.
70.356 B Quality.
70.357 C Quality.

UNITED STATES GRADES FOR DRESSED POULTRY AND READY-TO-COOK POULTRY

*General*

70.360 General.

*Grades*

70.365 U. S. Grade A.
70.366 U. S. Grade B.
70.367 U. S. Grade C.

*Weight Specifications*

70.370 Suggested weight specifications for dressed poultry and ready-to-cook poultry.

SUBPART C—FORMS, INSTRUCTIONS, AND APPLICATIONS

FORMS OF OFFICIAL IDENTIFICATION

70.380 Forms of official identification.
70.381 Form of grade mark.
70.382 Form of inspection mark.
70.383 Combined form of grade mark and inspection mark.
70.384 Identification of certain dressed poultry.

INSTRUCTIONS GOVERNING THE ADMINISTRATION OF POULTRY INSPECTION WHERE A FEDERAL-STATE SERVICE IS DESIRED

*Basis; Supervision*

70.390 Basis of providing Federal-State inspection service.
70.391 Supervision.

*Conditions*

70.395 Regulations.
70.396 Qualifications of Federal-State supervisor.
70.397 Duties of the Federal-State supervisor.
70.398 Employment and licensing of State inspectors.
70.399 Duties of State-employed inspectors.
70.400 Replacement of Federal inspectors.
70.401 Collection of fees.
70.402 Reimbursement of PMA by State cooperating agency.
70.403 Reimbursement of cooperating State agency by FMA.
70.404 Additional provisions.

APPLICATION FOR GRADING SERVICE

Sec.
70.410 Application for grading service with respect to live poultry, dressed poultry, and ready-to-cook poultry.

AUTHORITY: §§ 70.1 to 70.410 issued under sec. 205, 60 Stat. 1090, Pub. Law 156, 83d Cong.; 7 U. S. C. 1624.

SUBPART A—GRADING AND INSPECTION OF POULTRY AND EDIBLE PRODUCTS THEREOF

GENERAL

§ 70.1 *Definitions.* Unless the context otherwise requires, the following terms shall have the following meanings:

"Act" means the following provisions of the Agricultural Marketing Act of 1946 (60 Stat. 1087; 7 U. S. C. 1621 et seq.) and the Department of Agriculture Appropriation Act of 1954 (Pub. Law 156, 83rd Cong., approved July 28, 1953), or any other act of Congress conferring like authority:

AGRICULTURAL MARKETING ACT OF 1946

• • • to develop and improve standards of quality, condition, quantity, grade, and packaging, and recommend and demonstrate such standards in order to encourage uniformity and consistency in commercial practices • • •

To inspect, certify, and identify the class, quality, quantity, and condition of agricultural products when shipped or received in interstate commerce under such rules and regulations as the Secretary of Agriculture may prescribe, including assessment and collection of such fees as will be reasonable and as nearly as may be to cover the cost of the service rendered, to the end that agricultural products may be marketed to the best advantage, that trading may be facilitated, and that consumers may be able to obtain the quality products which they desire. • • •

DEPARTMENT OF AGRICULTURE APPROPRIATION ACT, 1954

For expenses necessary for acquiring and diffusing market information on agricultural commodities, food products and byproducts, the standardization, classification, grading, handling, storage, and marketing thereof, including the demonstration and promotion of the use of uniform standards of classification of American farm and food products throughout the world. • • •

• • • for investigating and certifying in one or more jurisdictions, to shippers and other interested parties the class, quality and condition of any agricultural commodity or food product, whether raw or processed and any product containing an agricultural commodity or derivative thereof when offered for interstate shipment or when received at such important central markets as the Secretary may from time to time designate, or at points which may be conveniently reached therefrom under such rules and regulations as he may prescribe, including the collection of such fees as are reasonable and as nearly as may cover the cost of the service rendered; • • •

"Acceptable" means suitable for the purpose intended and acceptable to the Administration.

"Administration" means the Production and Marketing Administration of the Department.

"Administrator" means the Administrator of the Production and Marketing Administration of the Department, or any other officer or employee of the Department to whom there has heretofore been delegated, or to whom there may hereafter be delegated, the authority to act in his stead.

"Applicant" means any interested party who requests any inspection service or grading service.

"Carcass" means any poultry carcass.

"Circuit supervisor" means the officer in charge of the poultry inspection service in a circuit consisting of a group of stations within an area.

"Class" means any subdivision of a product based on essential physical characteristics that differentiate between major groups of the same kind or between species.

"Condition" means any condition, including but not being limited to, the state of preservation, cleanliness, or soundness of any product; or any condition, including but not limited to, the processing, handling, or packaging which affects such product.

"Condition and wholesomeness" means the condition of any product and its healthfulness and fitness for human food.

"Department" means the United States Department of Agriculture.

"Dressed poultry" means poultry which has been slaughtered for human food with head, feet, and viscera intact and from which the blood and feathers have been removed.

"Edible poultry byproduct" means any giblets or any edible part of dressed poultry other than eviscerated poultry.

"Edible product" means any product other than live poultry and dressed poultry.

"Food product containing poultry product" means any article of food for human consumption which is prepared in part from any edible portion of dressed poultry or from any product derived wholly from such edible portion, if such edible portion or product does not comprise a substantial portion of such article of food.

"Free from protruding pinfeathers" means that the carcass is free from protruding pinfeathers which are visible to an inspector or grader during an examination of the carcass at normal operating speeds. However, a carcass may be considered as being free from protruding pinfeathers if it has a generally clean appearance and if not more than an occasional pinfeather is in evidence (other than on the breast) during a more careful examination of the carcass.

"Giblets" means the liver from which the bile sac has been removed, the heart from which the pericardial sac has been removed, and the gizzard from which the lining and contents have been removed; *Provided*, That each such organ has been properly trimmed and washed.

"Grader" means any employee of the Department authorized by the Secretary, or any other individual to whom a license has been issued by the Secretary, to investigate and certify, in accordance with the regulations in this part, the class, quality, quantity, and condition of products.

"Grading" or "grading service" means: (1) The act whereby a grader determines, according to the regulations in this part, the class, quality, quantity, or condition of any product by examining each unit thereof, or each unit of the representative sample thereof drawn by a grader, and issues a grading certificate with respect thereto; (2) in addition to the foregoing, the act whereby the grader identifies, according to the regulations in this part, the graded product; (3) with respect to an official plant, the act whereby a grader determines that the products in such plant are processed, handled, and packaged in accordance with §§ 70.240 to 70.287; and (4) any regrading or any appeal grading of a previously graded product.

"Grading certificate" means a statement, either written or printed, issued by a grader, pursuant to the regulations in this part, relative to the class, quality, quantity, or condition of a product.

"Identify" means to apply official identification to products or the containers thereof.

"Inspected and certified" or "certified" means, with respect to any product, that it has undergone an inspection and was found, at the time of such inspection, to be sound, wholesome, and fit for human food.

"Inspection", "inspection service", or "inspection of products for condition and wholesomeness" means any inspection by an inspector to determine, in accordance with the regulations in this part, (1) the condition and wholesomeness of dressed poultry, or (2) the condition and wholesomeness of any edible product at any stage of the preparation or packaging thereof in the official plant where inspected and certified, or (3) the condition and wholesomeness of any previously inspected and certified product if such product has not lost its identity as an inspected and certified product. In addition to the foregoing, the terms "inspection" and "inspection service" shall each mean any inspection by an inspector to determine, in accordance with the regulations in this part, (4) the condition of dressed poultry as it applies to the processing, handling or packaging of such product, or (5) any antemortem examination of poultry.

"Inspection certificate" means a statement, either written or printed, issued by an inspector, pursuant to the regulations in this part, relative to the condition and wholesomeness of products.

"Inspector" means any person who is licensed by the Secretary to investigate and certify in accordance with the regulations in this part, the condition and wholesomeness of products or the condition of dressed poultry. An inspector is an employee of the Department or of a State; he may be a graduate veterinarian or a layman.

"Interested party" means any person financially interested in a transaction involving any inspection or grading.

"National supervisor" means (1) the officer in charge of the poultry inspection service of the Administration, (2) the officer in charge of the poultry grading service of the Administration, and (3) such other officers or employees of the Department who may be so designated by the officer in charge of the poultry inspection and grading service of the Administration.

"Office of grading" means the office of any grader.

"Official identification" means the symbol represented by a stamp, label, seal, or other device approved by the Administrator and affixed to any product, or to any container thereof, stating that the product was inspected or graded or both. The class, quality or condition of such product as determined by a grader may be indicated in the "official identification".

"Official plant" means one or more buildings, or parts thereof, comprising a single plant in which the facilities and methods of operation therein have been approved by the Administrator as suitable and adequate for operation under inspection or grading service and in which inspection or grading is carried on in accordance with the regulations in this part.

"Person" means any individual, partnership, association, business trust, corporation, or any organized group of persons, whether incorporated or not.

"Potable water" means water which complies with the U. S. Public Health Service drinking water standards.

"Poultry" means any kind of domesticated bird, including, but not being limited to chickens, turkeys, ducks, geese, pigeons, and guineas.

"Poultry food product" means any article of human food or any article intended for or capable of being so used which is prepared or derived in whole or in substantial part, from any edible portion of dressed poultry.

"Poultry grading and inspection service" means the personnel who are actively engaged in the administration, application, and direction of poultry grading and inspection programs and services pursuant to the regulations in this part.

"Product" means each of the following: (1) Dressed poultry; (2) ready-to-cook poultry; (3) edible poultry byproduct; (4) poultry food product; and (5) with respect to grading service only, live poultry.

"Quality" means the inherent properties of any product which determine its relative degree of excellence.

"Ready-to-cook poultry" means any dressed poultry from which the protruding pinfeathers, vestigial feathers (hair or down as the case may be), head, shanks, crop, oil gland, trachea, esophagus, entrails, reproductive organs and lungs have been removed, and with or without the giblets, is ready to cook without need of further processing. Ready-to-cook poultry also means any cut-up or disjointed portion of poultry prepared as described in this paragraph.

"Regional supervisor" means any employee of the Department in charge of poultry grading service or poultry inspection service in a designated geographical area.

"Regulations" means the provisions of this entire part and such United States classes, standards, and grades for products as may be in effect at the time grading or inspection is performed.

"Secretary" means the Secretary of the Department, or any other officer or employee of the Department to whom there has heretofore been delegated or to whom there may hereafter be delegated, the authority to act in his stead.

"Soundness" means freedom from external evidence of any disease or condition which may render a carcass unfit for food.

"State supervisor" means any authorized and designated individual who is in charge of the poultry grading service or the poultry inspection service in a State. A State supervisor of poultry inspection service shall be a veterinarian and he is either a Federal-State employee or a Federal employee.

"Station supervisor" means any authorized individual who is designated to supervise the poultry grading service or the poultry inspection service in a large official plant or in a group of several smaller plants.

§ 70.2 *Administration.* The Administrator shall perform for and under the supervision of the Secretary, such duties as are prescribed in the regulations in this part and as the Secretary may require in the administration of the regulations in this part.

§ 70.3 *Grading and inspection services available.* The regulations in this part provide for the following kinds of service; and any one or more of the different services, applicable to official plants, may be rendered in an official plant:

(a) Grading of live poultry.

(b) Certification of dressed poultry produced under sanitary requirements in official plants.

(c) Grading of dressed poultry. (1) In an official plant.

(2) At terminal markets and other receiving points.

(d) Inspection of dressed poultry in official plants for processing as ready-to-cook poultry.

(e) Grading of ready-to-cook poultry. (1) In an official plant.

(2) At terminal markets and other receiving points.

(f) Inspection service in official canning plants.

BASIS OF SERVICE

§ 70.10 *Inspection service.* Any inspection service in accordance with the regulations in this part shall be for condition and wholesomeness but, with respect to dressed poultry, as such, the inspection may be for condition only.

§ 70.11 *Grading service.* Any grading service in accordance with the regulations in this part shall be for class, quality, quantity, or condition or any combination thereof. Grading service with respect to determination of quality of products shall be on the basis of United States classes, standards, and grades as contained in Subpart B of the regulations in this part. However, grading service may be rendered with respect to products which are bought and sold on the basis of institutional contract specifications and such service, when approved by the Administrator, shall be rendered on the basis of the specifications of such contract.

§ 70.12 *Continuous grading service.* Continuous grading service in an official plant other than the service provided in § 70.3 (b) may be rendered only when a majority of the graders' time each month is utilized in performing grading for quality on the basis of the United States standards set forth in Subpart B of the regulations in this part.

§ 70.13 *Supervision.* All grading service and all inspection service shall be subject to supervision at all times by the applicable station supervisor, State supervisor, circuit supervisor, regional supervisor, and national supervisor. Such services shall be rendered where the facilities and conditions are satisfactory for the conduct of the service and the requisite graders and inspectors are available.

§ 70.14 *Dressed poultry; eligibility.* Dressed poultry to be eligible for grading or inspection service shall have been processed in official plants. Except as otherwise provided in this section, only dressed poultry which was processed in an official plant in accordance with the regulations in this part, and dressed poultry which was processed in Canadian registered poultry dressing stations operated in accordance with such methods and procedures as are acceptable to the Administrator, may be graded or inspected in an official plant. Squabs and domesticated game birds (including, but not being limited to, quail, grouse, pheasants, and wild ducks and geese) which were not dressed in an official plant may be brought into an official plant for grading or inspection. In order to facilitate distribution thereof, dressed poultry from other than official plants may be brought into an official plant only in instances where the Administration can determine that such dressed poultry will be adequately segregated and its form and identity maintained until it is shipped from the official plant.

§ 70.15 *Inspection in official plants; extent required.* All dressed poultry that is eviscerated in an official plant where inspection service is maintained shall be processed in a sanitary manner. Dressed poultry may be eviscerated in such plant without inspection for condition and wholesomeness but uninspected and inspected operations may not be carried on simultaneously except in plants where processing rooms (including packing rooms) are separate and effective segregation of inspected and uninspected products is maintained. Evisceration without inspection may be conducted only if an inspector or governmentally employed grader is on duty, at all times when such operations are carried on, for the purpose of (a) effecting adequate segregation of inspected and uninspected products, (b) control of official inspection marks and grade marks, and (c) supervision of sanitation in the official plant. No uninspected edible products or uninspected slaughtered rabbits shall be brought into such plant except as may be specifically approved by the Administrator upon written request and only for the purpose of rehandling, reconditioning, packaging, freezing, marking, and further distribution and only if an inspector or governmentally employed grader is on duty, at all times when such operations are carried on, for the purpose of effecting adequate segregation of uninspected and inspected products and control of official inspection marks and grade marks.

§ 70.16 *Certification of dressed poultry produced under sanitary requirements.* With respect to any official plant, dressed poultry, as such, may be certified by a grader as having been processed, handled and packed in accordance with the minimum standards for sanitation, facilities, and operating procedures in official plants. However, in official plants which have available the services of an inspector who is authorized to inspect for condition and wholesomeness, such inspector is also authorized to certify dressed poultry, as such, as having been processed, handled, and packed in accordance with the minimum standards for sanitation, facilities, and operating procedures in official plants. Appropriate grading or inspection processing reports shall be issued with respect thereto as required by the regulations in this part. The bulk containers of such dressed poultry which has been certified as aforesaid, if to be officially identified, shall be marked for identification purposes as provided in § 70.94. All of the poultry that is processed in such official plant as dressed poultry, shall be prepared in accordance with the regulations in this part and under the supervision of a grader or inspector.

§ 70.17 *Examination of ready-to-cook poultry which was not processed in official plants.* When approved by the Administrator, ready-to-cook poultry which was not processed in an official plant may be examined by a grader or inspector at terminal markets and other receiving points to determine (a) the type and condition of the containers of such poultry, (b) whether or not such poultry is in a frozen or fresh state, (c) the extent of visible damage in instances where the product has been subjected to rough and improper handling, and (d) the class and quantity of the product involved. Such poultry shall not be officially identified as a graded or inspected product.

§ 70.18 *Authority to waive provisions of §§ 70.14 and 70.15.* The Administrator is authorized to waive the provisions of §§ 70.14 and 70.15 which pertain to the entry of uninspected edible products into official plants, in specific instances where poultry is to be brought into compliance with a law under the provisions of a court order. Such poultry shall be handled in an official plant in accordance with such procedures as the Administrator may prescribe to insure proper segregation and identity of the poultry until it is shipped from the official plant.

PERFORMANCE OF SERVICES

§ 70.30 *Licensed graders and inspectors.* (a) Any person who is a Federal or State employee possessing proper qualifications as determined by an examination for competency, and who is to perform grading service or inspection service may be licensed by the Secretary as a grader or an inspector.

(b) Any prospective grader, other than a Federal or State employee possessing proper qualifications as determined by an examination for competency and who is to perform grading service may be licensed by the Secretary as a grader. However, prior to granting of the license, he shall procure and deliver to the Administration a surety bond, issued by such surety as may be approved by the Administrator, in the amount of $1,000 for the proper performance of the duties of such licensee under the regulations in this part.

(c) All licenses issued by the Secretary shall be countersigned by the officer in charge of the poultry grading and inspection service of the Administration or any other designated official of such service.

§ 70.31 *Suspension of license or authority; revocation.* Pending final action by the Secretary, the officer in charge of the poultry grading and inspection service may, whenever he deems such action necessary, suspend any license or authority effective pursuant to the regulations in this part, by giving notice of such suspension to the respective individual involved, accompanied by a statement of the reasons therefor. Within seven days after the receipt of the aforesaid notice and statement of reasons by such individual, he may file an appeal, in writing, with the Secretary supported by any argument or evidence that he may wish to offer as to why his license or authority should not be suspended or revoked. After the expiration of the aforesaid seven-day period and consideration of such argument and evidence, the Secretary will take such action as he deems appropriate with respect to such suspension or revocation. When no appeal is filed within the prescribed seven days the license is revoked.

§ 70.32 *Surrender of license.* Each license which is suspended, or revoked, or has expired shall promptly be surrendered by the licensee to his immediate superior. Upon termination of the services of a licensed grader or inspector the licensee shall promptly surrender his license to his immediate superior.

§ 70.33 *Identification.* Each grader and inspector shall have in his possession at all times, and present upon request while on duty, the means of identification furnished by the Department to such person.

§ 70.34 *Financial interest of inspectors and graders.* No inspector shall inspect and no grader shall grade for quality any product in which he is financially interested.

§ 70.35 *Political activity.* All graders and inspectors who are employees of the Department are forbidden during the period of their respective appointments, or licenses, to take an active part in political management or in political campaigns. Political activity in city, county, State, or national elections, whether primary or regular, or in behalf of any party or candidate, or any measure to be voted upon, is prohibited. This applies to all appointees, including, but not being limited to, temporary and cooperative employees and employees on leave of absence with or without pay. Willful violation of §§ 70.30 to 70.35 will constitute grounds for dismissal in the case of appointees and revocation of licenses in the case of licensees.

APPLICATION FOR GRADING SERVICE OR INSPECTION SERVICE

§ 70.40 *Who may obtain grading service or inspection service.* An application for grading service or inspection service may be made by any interested person, including, but not being limited to, the United States, any State, county, municipality, or common carrier, and any authorized agent of the foregoing.

§ 70.41 *How application may be made.* (a) An application for inspection service must be made in writing and filed with the Administrator.

(b) An application for grading service to be rendered in an official plant must be made in writing and filed with the Administrator.

(c) An application for any grading service to be rendered other than in an official plant may be made in any office of grading, or with any grader at or nearest the place where the service is desired. Such application may be made orally, in writing, or by telegraph. If the application for grading service is made orally, the office of grading or the grader with whom the application is made, or the Administrator may require that the application be confirmed in writing.

(d) Each application for grading service or inspection service shall include such information as may be required by the Administrator in regard to the products and premises where the service is to be rendered.

§ 70.42 *Filing of application.* An application for grading service or inspection service shall be regarded as filed only when made pursuant to the regulations in this part.

§ 70.43 *Authority of applicant.* Proof of the authority of any person applying for grading service or inspection service may be required at the discretion of the Administrator.

§ 70.44 *Application for inspection service or grading service in official plants; approval.* Any person desiring to process and pack products in a plant under grading service or inspection service, or both, must receive approval of such plant and facilities as an official plant prior to the rendition of such service. An application for grading service or inspection service to be rendered in an official plant shall be approved according to the following procedure:

(a) *Initial survey.* When application has been filed for grading service or inspection service, as aforesaid, the regional supervisor, or his assistant, shall examine the plant, premises, and facilities and shall specify any additional or necessary facilities required for the service. Appeals with respect to any such specification may be made to the national supervisor.

(b) *Drawings and specifications to be furnished in advance of construction or alterations.* Four copies of drawings, consisting of floor plans of space to be included in the official plant, showing the locations of such features as the principal pieces of equipment, floor drains, hand washing facilities, hose connections for clean-up purposes, cardinal points of the compass, and the routes of dressed poultry, and edible and inedible products through the plant, properly drawn to scale, shall be submitted to the regional supervisor. The official plant shall include toilet and dressing rooms, office space for the inspector and grader, store rooms for supplies used in the operations under inspection or grading, feeding rooms, and all rooms, compartments or passageways where products or any ingredients to be used in the preparation of products under inspection service or grading service will be handled or kept, and may include other rooms or compartments located in the buildings comprising the official plant. If rooms or compartments shown on the drawings are not to be included as part of the official plant this should be clearly indicated thereon. Specifications covering the height of ceilings, types of principal pieces of equipment, character of floors, walls, and ceilings, lighting, ventilation, water supply, and drainage, and such other notations as may be required, shall accompany the drawings. Construction or remodeling of buildings, facilities, or premises should not be initiated without prior approval of the drawings. Upon approval of drawings and specifications the application for grading service or inspection service may be approved.

(c) *Final survey and plant approval.* Prior to the inauguration of the grading service, or inspection service, a final survey of the plant and premises shall be made by the regional supervisor or his assistant to determine if the plant is constructed and facilities are installed in accordance with the approved drawings, and the regulations in this part. The plant may be approved by the Administrator only when these requirements have been met, except that conditional approval for a specified limited time may be granted only under emergency conditions of restricted availability of facilities and construction materials, provided practices suitable to the Administrator are employed to effect adequate sanitary conditions in the plant.

§ 70.45 *Rejection of application.* Any application for grading or inspection service may be rejected by the Administrator (a) whenever the applicant fails to meet the requirements of the regulations prescribing the conditions under which the service is made available; (b) whenever the product is owned by or located on the premises of a person currently denied the benefits of the act; (c) where any individual holding office or a responsible position with or having a substantial financial interest or share in the applicant is currently denied the benefits of the act or was responsible in whole or in part for the current denial of the benefits of the act to any person; or (d) where he determines that the application is an attempt on the part of a person currently denied the benefits of the act to obtain grading or inspection service. Each such applicant shall be notified promptly of the reasons for the rejection. A written petition for recon-

sideration of such rejection may be filed by the applicant with the Administrator within 10 days after notice of the rejection. Such petition shall state specifically the errors alleged to have been made by the Administrator in rejecting the application. Within 20 days following the receipt of such a petition for reconsideration, the Administrator shall approve the application or notify the applicant of the reasons for the rejection thereof.

§ 70.46 *Withdrawal of application.* Any application for grading or inspection service may be withdrawn by the applicant at any time before the service is performed upon payment by the applicant, of all expenses incurred by the Administration in connection with such application.

§ 70.47 *Order of service.* Grading service or inspection service shall be performed, insofar as practicable, in the order in which application therefor is made except that precedence may be given to any application for an appeal inspection or appeal grading.

§ 70.48 *Suspension of plant approval.* (a) Any plant approval given pursuant to the regulations in this part may be suspended by the Administrator for (1) failure to maintain plant and equipment in a satisfactory state of repair; (2) the use of operating procedures which are not in accordance with the regulations in this part; or (3) alterations of buildings, facilities, or equipment which cannot be approved in accordance with the regulations in this part.

(b) During such period of suspension Inspection and grading service shall not be rendered. However, the other provisions of the contract for service will remain in effect unless terminated in accordance with the terms thereof. If the plant facilities or methods of operation are not brought into compliance within a reasonable period of time, to be specified by the Administrator, the contract shall be terminated. Upon termination of any contract providing for inspection or grading service in an official plant pursuant to the regulations in this part, the plant approval shall also become terminated, and all labels, seals, tags or packaging material bearing official identification shall, under the supervision of a person designated by the Administration, either be destroyed, or the official identification completely obliterated, or sealed in a manner acceptable to the Administration.

VIOLATIONS

§ 70.60 *Denial of service.* (a) The acts or practices set forth in §§ 70.61 to 70.66 may be deemed sufficient cause for the debarment of any person by the Administrator from any or all benefits of the act for a specified period after notice and opportunity for hearing has been accorded him.

(b) Whenever the Administrator has reason to believe that any person, or his employee, agent, or representative has flagrantly or repeatedly committed any of the acts or practices specified in §§ 70.61 to 70.66, he may without hearing, direct that the benefits of the act be denied such person pending investigation and hearing. A written petition for reconsideration of such interim denial may be filed with the Administrator by any person so denied the benefits of the act within 10 days after notice of the interim denial. Such petition shall state specifically the errors alleged to have been made by the Administrator in denying the benefits of the act pending investigation and hearing. Within 20 days following the receipt of such a petition for reconsideration, the Administrator shall reinstate the benfits of the act or notify the petitioner of the reasons for continued interim denial.

§ 70.61 *Misrepresentation, deceptive, or fraudulent acts or practices.* Any wilful misrepresentation or any deceptive or fraudulent act or practice found to be made or committed by any person in connection with:

(a) The making or filing of any application for any grading service or inspection service, appeal or regrading service;

(b) The making of the product accessible for grading or inspection;

(c) The use of any grading certificate or inspection certificate issued pursuant to the regulations in this part or the use of any official stamp, label, or identification;

(d) The use of the terms "United States," or "U. S." in conjunction with the grade of the product;

(e) The use of any of the aforesaid terms or an official stamp, label, or identification in the labeling or advertising of any product; or

(f) The use of the terms "Government graded," "Federal-State graded," "U. S. inspected," "Government inspected," or terms of similar import in the labeling or advertising of any product.

§ 70.62 *Use of facsimile forms.* The unauthorized use of a form which simulates in whole or in part any official certificate, stamp, label, or identification authorized to be issued or used under the regulations in this part to evidence the inspection or grade of any product.

§ 70.63 *Wilful violation of the regulations.* Any wilful violation of the regulations in this part.

§ 70.64 *Interfering with a grader or inspector.* Any interference with or obstruction of any grader or inspector in the performance of his duties by intimidation, threat, bribery, assault or any other improper means.

§ 70.65 *Misleading labeling.* The use of the terms "Government graded," "Federal-State graded," or terms of similar import in the labeling of any product without stating in the label the U. S. grade of the product as determined by an authorized grader.

§ 70.66 *Miscellaneous.* The existence of any of the conditions set forth in § 70.45 constituting a basis for the rejection of an application for grading or inspection service.

OTHER APPLICABLE REGULATIONS

§ 70.80 *Other applicable regulations.* Compliance with the regulations in this part shall not excuse failure to comply with any other Federal, or any State or municipal, applicable laws or regulations.

PUBLICATIONS

§ 70.85 *Publications.* Publications under the act and the regulations in this part shall be made in the FEDERAL REGISTER, the Service and Regulatory Announcements of the Department, and such other media as the Administrator may approve for the purpose.

IDENTIFYING AND MARKING PRODUCTS

§ 70.90 *Approval of official identification.* Any label or packaging material which bears any official identification shall be used only in such manner as the Administrator may prescribe. No label or packaging material bearing official identification may be used unless finished copies or samples of such labels and packaging material have been approved by the Administrator. No label bearing the official identification shall be printed for use until the printer's final proof has been approved by the Administrator; and no label, other than labels for shipping containers or institutional packs, bearing any official identification shall be used until finished copies or samples of such labels have been approved by the Administrator. Final approval may be given to printer's final proof or photostatic copies of labels for shipping containers or containers for institutional packs, and no such labels shall be used until such proofs or copies have been approved by the Administrator. A label which bears official identification shall not bear any statement that is false or misleading, and if labels in the name of the same packer or distributor, or bearing the same brand name, are used on the same or similar products which are prepared from products which are not inspected, the diameter of the inspection mark, or combination inspection and grading mark, used on labels for inspected products shall be equal to at least one-tenth of the length of the label, plus at least one-tenth of the width of the label. If the labeling is printed or otherwise applied directly on the container, the principal display panel of such container shall, for this purpose, be considered as the label.

§ 70.91 *Products that may be individually grade marked; information required on grade mark.* (a) Only ready-to-cook poultry of A, B, or C quality may be individually identified with a grade mark.

(b) Except as otherwise authorized each grade mark which is to be used shall conspicuously indicate the U. S. grade of the product it identifies, and shall indicate the class or whether the bird is "young," or "mature" or "old," and shall include one of the following phrases: "Federal-State graded," "Government graded" or any other similar phrase approved by the Administrator. Such grade mark shall be contained within the outline of a shield of such design as may be approved by the Administrator.

§ 70.92 *Use of grade mark and inspection mark with respect to the same product.* The Administrator is authorized to prescribe and approve the form of the grade mark and inspection mark that may be used individually or in combination with respect to the same product.

§ 70.93 *Marking inspected products—(a) Wording and form of the inspection mark.* Except as otherwise authorized, the inspection mark permitted to be used with respect to inspected and certified edible products shall include wording as follows: "Inspected for wholesomeness by U. S. Department of Agriculture." This wording, in such form as the Administrator may prescribe or approve, shall be contained within a circle. The Administrator may approve the use of abbreviations of such inspection mark; and such approved abbreviations shall have the same force and effect as the inspection mark. The inspection mark or approved abbreviation thereof, as the case may be, may be applied to the inspected and certified edible product or to the packaging material of such product. The inspection mark, or the approved abbreviation thereof, shall, when used on packaging material, be printed on such material or on a label to be affixed to the packaging material, and the name of the packer or distributor of such product must be legibly printed on the packaging material or label, as the case may be, excepting that on shipping containers and containers for institutional packs the inspection marks may be stenciled on the container and when the inspection mark is so stenciled, the name and address of the packer or distributor may be applied by the use of a stencil or a rubber stamp.

(b) *Wording on labels.* Each trade label to be approved for use pursuant to §§ 70.90 to 70.94 with respect to any inspected and certified edible product shall bear the true name of the edible product, the name and address of the packer or distributor thereof, and, in prominent letters and figures of uniform size, the inspection mark, as aforesaid; and the label shall also bear, in such manner as may be prescribed or approved by the Administrator, the plant number, if any, of the official plant in which such product was inspected and certified.

(c) *Formulas required.* Copies of each trade label submitted for approval pursuant to §§ 70.90 to 70.94 shall, when the Administrator requires, be accompanied by a statement showing the kinds and percentages of the ingredients comprising the edible product with respect to which the label is to be used. Approximate percentages may be given in cases where the percentages of ingredients may vary from time to time, if the limits of variation are stated.

(d) *Wording permitted on food products containing poultry products.* Any trade label which is to be affixed to a container of any food product containing poultry product which is packed under the supervision of an inspector in any official plant may bear the phrase: "The poultry product contained herein has been inspected and certified at a plant where Federal inspection is maintained." Each such trade label shall also be subject to the applicable provisions of §§ 70.90 to 70.94.

(e) *Labels in foreign languages.* Any trade label to be affixed to a container of any edible products for foreign commerce may be printed in a foreign language. However, the inspection mark shall appear on the label in English, but, in addition, may be literally translated into such foreign language. Each such trade label which is to be printed in a foreign language must be approved pursuant to §§ 70.90 to 70.94.

(f) *Use of approved labels.* Trade labels approved for use pursuant to §§ 70.90 to 70.94 shall be used only for the purpose for which approved.

§ 70.94 *Marking dressed poultry which was certified as having been produced under sanitary requirements.* The Administrator is authorized to prescribe and approve the manner in which dressed poultry which was processed in accordance with minimum standards for sanitation, facilities, and operating procedures in official plants may be marked for identification purposes.

SUPERVISION OF MARKING AND PACKAGING

§ 70.100 *Evidence of label approval.* No grader or inspector shall authorize the use of official identification for any graded or inspected product unless he has on file evidence that such official identification or packaging material bearing such official identification has been approved in accordance with the provisions of §§ 70.90 to 70.94.

§ 70.101 *Affixing of official identification.* (a) No official identification or any abbreviation, copy or representation thereof may be affixed to or placed on or caused to be affixed to or placed on any product or container thereof except by a grader or an inspector or under the supervision of a grader or an inspector or other person authorized by the Administrator. All such products shall have been inspected and certified or graded or both. The grader or inspector shall have supervision over the use and handling of all material bearing any official identification.

(b) Each container of inspected and certified edible products to be shipped from one official plant to another official plant for further processing shall be marked for identification and shall show the following information:

(1) The name of the inspected and certified edible products in the container;

(2) The name and address of the packer or distributor of such product;

(3) The net weight of the container;

(4) The inspection mark permitted to be used pursuant to the regulations in this part, unless the containers are sealed or otherwise identified in such manner as may be approved by the Administrator; and

(5) The plant number of the official plant where the products were packed.

§ 70.102 *Removal of official identification.* Official plants which receive dressed poultry or ready-to-cook poultry in containers which bear any official identification shall remove or deface such official identification upon removal of such poultry from the containers.

§ 70.103 *Packaging.* No container which bears or may bear an inspection mark or any abbreviation or copy or representation thereof may be filled in whole or in part except with edible products which were inspected and certified and are at the time of such filling, sound, wholesome and fit for human food. All such filling of containers shall be under the supervision of an inspector or grader.

§ 70.104 *Retention labels.* An inspector or grader may use such labels, devices and methods as may be approved by the Administrator for the identification (a) of products which are held for further examination, and (b) all equipment and utensils which are to be held for proper cleaning.

§ 70.105 *Prerequisites to grading and inspection.* Grading and inspection of products shall be rendered pursuant to the regulations in this part and under such conditions and in accordance with such methods as may be prescribed or approved by the Administrator.

§ 70.106 *Accessibility of products.* Each product for which grading service or inspection service is requested shall be so placed as to disclose fully its class, quality, quantity, and condition as the circumstances may warrant.

§ 70.107 *Time of grading or inspection in an official plant.* The grader or inspector who is to perform the grading or inspection in an official plant shall be informed, in advance, of the hours when such grading or inspection will be required. Graders and inspectors shall have access at all times to every part of any official plant to which they are assigned.

REPORTS

§ 70.120 *Report of inspection work and grading work.* Reports of the work of inspection and grading carried on within official plants shall be forwarded to the Administrator by the inspector and grader in such manner as may be specified by the Administrator.

§ 70.121 *Information to be furnished to inspectors and graders.* When inspection service or grading service is performed within an official plant, the applicant for such inspection or grading shall furnish to the inspector or grader rendering such service such information as may be required for the purposes of §§ 70.120 to 70.122.

§ 70.122 *Reports of violations.* Each inspector and each grader shall report, in the manner prescribed by the Administrator, all violations of and noncompliance with the act and the regulations in this part of which he has knowledge.

FEES AND CHARGES

§ 70.130 *Payment of fees and charges.* (a) Fees and charges for any grading or inspection shall be paid by the applicant for the service in accordance with the applicable provisions of §§ 70.130 to 70.140 and, if so required by the Administrator, such fees and charges shall be paid in advance.

(b) Fees and charges for any grading or inspection performed by any grader or inspector who is a salaried employee

of the Department shall, unless otherwise required pursuant to paragraph (c) of this section, be paid by check, draft, or money order payable to the Treasurer of the United States and remitted promptly to the Administration.

(c) Fees and charges for any grading or inspection pursuant to a cooperative agreement with any State or person shall be paid in accordance with the terms of such cooperative agreement.

§ 70.131 *Grading service on a fee basis.* (a) Unless otherwise provided the fees to be charged and collected for any grading service (other than for an appeal grading) on a fee basis shall be based on the applicable rates specified in § 70.133.

(b) In the event the aforesaid applicable rates specified in § 70.133 are deemed by the Administrator to be inadequate fully to reimburse the Administration for all costs and other items paid or incurred by the Administration in connection with such service, the fees for such service shall not be based on the rates specified in § 70.133, but shall be based on the time required to perform such service and the travel of each grader at the rate of $3.60 per hour for the time actually required.

(c) If an applicant requests that any grading service be performed on a holiday or a non-work day, he may be charged for such service at a rate one and one-half times the rate which would be applicable for such service if performed on a day other than a holiday or non-work day.

§ 70.132 *Fees for appeal grading.* The fees to be charged for any appeal grading shall be double the fee specified in the grading certificate from which the appeal is taken: *Provided*, That the fee for any appeal grading requested by the United States, or any agency or instrumentality thereof, shall be not more than that set forth in the grading certificate from which the appeal is taken. If the fee on the certificate from which the appeal is taken is based on a contract, then the fee for such appeal grading shall be double the amount specified in § 70.133 for the applicable volume of product appeal graded. If the result of any appeal grading discloses that a material error was made in the grading appealed from, no fee shall be required.

§ 70.133 *Poultry grading fees.* For each grading of any lot of poultry, whether live, dressed, or ready-to-cook, the following fees shall be applicable:

| | |
|---|---|
| For 500 pounds or less | $1.50 |
| For 501 to 1,500 pounds, inclusive | 2.25 |
| For 1,501 to 3,000 pounds, inclusive | 3.00 |
| For 3,001 to 6,000 pounds, inclusive | 4.00 |
| For 6,001 to 10,000 pounds, inclusive | 6.00 |
| For 10,001 to 20,000 pounds, inclusive | 10.00 |
| For each additional 10,000 pounds or fraction thereof, in excess of 20,000 pounds | 3.00 |

§ 70.134 *Inspection service on a fee basis.* Fees to be charged and collected for inspection services furnished on a fee basis shall be based on the time required to render such services including, but not being limited to, the time required for the travel of the inspector or inspectors in connection therewith, at the rate of $3.60 per hour for each inspector for the time actually required.

§ 70.135 *Fees for additional copies of grading certificates and inspection certificates.* Additional copies, other than those provided for in §§ 70.171 to 70.173, 70.201 and 70.211, of any grading certificates or inspection certificates may be supplied to any interested party upon payment of a fee of $1.00 for each set of five or fewer copies.

§ 70.136 *Traveling expenses and other charges.* Charges may be made to cover the cost of traveling and other expenses incurred by the Administration in connection with the performance of any grading service or inspection service.

§ 70.137 *Additional charges.* With respect to any grading service performed in a freight or express car or any other place where the entire lot of the product is not readily accessible to the grader, a charge of $5.00 shall be made in addition to the applicable rates specified in § 70.133.

§ 70.138 *On a contract basis.* Fees to be charged and collected for any grading service or inspection service, other than for an appeal grading, on a contract basis shall be those provided for in such contract. The fees to be charged for any appeal grading shall be as provided in § 70.132.

§ 70.139 *Fees for grading service or inspection service performed under cooperative agreement.* The fees to be charged and collected for any grading service or inspection service performed under cooperative agreement shall be those provided for by such agreement.

§ 70.140 *Disposition of fees for inspections made under cooperative agreement.* Fees for inspection under a cooperative agreement with any State or person shall be disposed of in accordance with the terms of such agreement. Such portion of the fees collected under a cooperative agreement as may be due the United States shall be remitted to the Administration.

INSPECTION

§ 70.150 *Manner of handling products in an official plant.* Unless otherwise specified in the regulations in this part or by the Administrator, products which are to be further processed under inspection in an official plant shall be prepared and handled in such official plant under the supervision of an inspector.

§ 70.151 *Ante-mortem inspection.* Ante-mortem examination of poultry may be required by the Administrator as a prerequisite to any inspection; and such ante-mortem examination shall be carried out under such conditions and in accordance with such methods as may be prescribed or approved by the Administrator.

§ 70.152 *Evisceration.* No viscera or any part thereof shall be removed from any dressed poultry which is to be processed under inspection in any official plant, except at the time of evisceration and inspection. Each carcass to be eviscerated shall be opened so as to expose the organs and the body cavity for proper examination by the inspector and shall be prepared immediately after inspection as ready-to-cook poultry. If a carcass is frozen, it shall be thoroughly thawed before being opened for examination by the inspector. Each carcass, or all parts comprising such carcass, shall be examined by the inspector: *Provided*, That the Administrator may, whenever he deems it advisable and under such conditions as he may prescribe, authorize the removal from such carcass or parts as aforesaid, of any part thereof prior to such inspection if such part will not be used in the preparation of any edible product.

§ 70.153 *Carcasses held for further examination.* Each carcass, including all parts thereof, in which there is any lesion of disease, or other condition, which might render such carcass or any part thereof unfit for human food, and with respect to which a final decision cannot be made on first examination by the inspector, shall be held for further examination. The identity of each such carcass, including all parts thereof, shall be maintained until a final examination has been completed.

§ 70.154 *Condemnation and treatment of carcasses.* At the time of evisceration under inspection service each carcass, or any part thereof, which is found to be unsound, unwholesome, or otherwise unfit for human food shall be condemned by the inspector and shall receive such treatment, under the supervision of the inspector as will prevent its use for human food and preclude dissemination of disease through consumption by animals.

§ 70.155 *Certification of carcasses.* Each carcass and all parts and organs thereof which are found by the inspector to be sound, wholesome, and fit for human food shall be certified as provided in this part.[4]

§ 70.156 *Reinspection of edible products.* (a) Any inspected and certified edible product may be brought into an official plant only if the container of such product is marked for identification in the manner prescribed in § 70.101 (c) and the product is reinspected by an inspector at the time it is brought into such plant. Upon reinspection, if any such product or portion thereof is found to be unsound, unwholesome, or otherwise unfit for human food, such product or portion thereof, shall be condemned and shall receive such treatment as that provided in § 70.154.

(b) Any product which is prepared under inspection in an official plant shall be inspected in such plant as often as the inspector deems it necessary in order to ascertain whether such product is sound, wholesome, and fit for human food at the time such product leaves such plant. Upon any such inspection, if any such product or portion thereof is found to be unsound, unwholesome, or otherwise unfit for human food, such product or portion thereof shall be condemned and shall receive such treatment as that provided in § 70.154.

(c) All substances and ingredients used in the manufacture or preparation of any edible product shall be clean, sound, wholesome, and fit for human food.

§ 70.157 *Edible products for canning.* Only inspected and certified edible products may be canned in an official plant; and such edible products shall be processed and handled in compliance with the following requirements:

(a) Immediate containers (whether of metal, glass, or other material) shall be cleaned thoroughly by washing in an inverted position with running water of a temperature of at least 180° F. prior to filling with edible products; and precaution shall be taken to avoid any subsequent soiling of the inner surfaces of such containers.

(b) Only perfect closure is acceptable for hermetically sealed containers; and heat processing of the products in such containers shall follow immediately after closing.

(1) Except as provided in paragraph (c) of this section, such products shall be so processed at such temperature and for such period of time as will insure preservation of the products under usual conditions of storage and transportation.

(2) Immediately after closing, and again after the containers have cooled sufficiently for handling after heat processing, careful examination shall be made by competent plant employees of all containers to ascertain whether such containers are perfectly sealed. The edible products in such containers as are defectively closed or sealed shall, as promptly as practicable, be filled into other containers, hermetically sealed, and heat processed unless the containers are promptly placed in a cooler at a temperature not exceeding 36° F. under conditions that will promptly and effectively chill them. Such chilled containers of products shall be opened and the contents removed and reprocessed immediately after removal from the cooler: *Provided*, That if such containers remained in the cooler for a period of 24 hours or longer, the contents shall be inspected by an inspector prior to the reprocessing thereof. Failure to comply with the provisions of this paragraph shall subject the edible products to condemnation.

(c) After heat processing, and after the containers have cooled sufficiently for handling, the containers shall be examined by competent plant employees and shall not be passed unless showing the external characteristics of sound containers, that is, there is no bulging or slack or loose tin.

(d) After heat processing, any containers of edible products showing characteristics of short vacuum or overstuffed containers shall, when an inspector deems it necessary in order to determine whether spoilage of the product has taken place, be incubated under the supervision of an inspector, after which the containers shall be opened and sound products passed for food and spoiled products condemned.

(e) Edible products may, when authorized by the national supervisor, and under such conditions as he may prescribe or approve, be canned without steam-pressure cooking, and such products shall be labeled "Perishable, keep under refrigeration."

(f) Each lot of canned edible products shall be identified, during the handling preparatory to heat processing, by tagging the baskets, cases, or containers with a tag which will change color on going through the heat processing or by other effective means which will positively prevent failure to heat process.

(g) Facilities shall be provided to incubate at least representative samples of fully processed canned edible products. The incubation shall consist of holding the samples for at least 10 days at about 98° F. The extent to which incubation tests shall be required will depend on conditions such as the efficiency of the plant in conducting canning operations, the kind of equipment used, and the degree of efficiency at which such equipment is maintained.

(1) In the event the official plant fails to provide suitable facilities for incubation of test samples of any lot of fully processed canned edible products, the inspector in charge may require holding of the entire lot under such conditions and for such period of time as will, in his discretion, be necessary to ascertain the stability of the product.

(2) The inspector in charge may, prior to completion of any required incubation of a representative sample, permit lots of fully processed canned edible products to be shipped from the official plant when he has no reason to suspect unsoundness of such products; however, such shipments shall be made under circumstances which will assure the return of the products to the plant for reinspection should such action be indicated by the incubation results.

(h) All canned products, excepting those in glass, shall be plainly and permanently marked, by code or otherwise, on the containers, with the identity of the contents and date of canning. If the marking is by code, its meaning shall be on record in the office of the inspector in charge.

§ 70.158 *Products contaminated by polluted water; procedure for handling.* (a) In the event there is polluted water (including, but not being limited to, flood water and harbor water) in an official plant, all edible products that have been contaminated by the water shall be condemned.

(b) After the polluted water has receded, all walls, ceilings, posts, and floors of the rooms and compartments involved, including the equipment therein, shall, under the supervision of an inspector, be cleansed thoroughly. An adequate supply of hot water, under pressure, is essential for effective cleansing. After cleansing, a solution of sodium hypochlorite containing approximately $\frac{1}{2}$ of 1 percent of available chlorine (5,000 parts per million), or other disinfectant approved by the national supervisor, shall be applied; and all metal surfaces shall be rinsed thoroughly with water to prevent corrosion. Any such equipment that will afterwards be used in connection with any edible product shall be rinsed thoroughly with clean water before being used.

(c) Hermetically sealed containers of edible products which have been submerged in, or otherwise contaminated by, the polluted water shall be rehandled promptly under supervision of an inspector as follows:

(1) Such of the containers as are swollen or leaky or otherwise do not show the external characteristics of sound containers shall be segregated and the contents thereof condemned.

(2) Paper labels, if any, attached or affixed to the remaining containers shall be removed and the containers washed in warm soapy water; and, if necessary to remove rust and other foreign material, a brush shall be used.

(3) Thereafter, such containers shall be immersed in a solution of sodium hypochlorite containing not less than 100 parts per million of available chlorine, or other disinfectant approved specifically for this purpose by the national supervisor, and rinsed in clean fresh water and dried thoroughly. Any such containers which show extensive rusting or corrosion, such as might materially weaken the container, shall be opened under the supervision of an inspector. The edible products from such containers that are found by the inspector to be sound and wholesome shall be passed for human food.

(4) The remaining containers may be relacquered, if necessary, and then relabeled with approved labels applicable to the edible products therein.

(5) The identity of the canned edible products shall be maintained throughout all stages of the rehandling operation to insure correct labeling of the containers.

§ 70.159 *Preparation of animal food or similar uninspected articles in an official plant.* (a) When an article (including, but not being limited to, animal food) that will not be prepared for use as human food is prepared in any room or compartment in an official plant where edible products are prepared or handled (such room or compartments being herein referred to as "edible products department"), there shall be sufficient space allotted, and adequate equipment provided so that the preparation of the article in no way interferes with the preparation or handling of the edible products. Where necessary, separate equipment shall be provided for the preparation of the article. To assure the maintenance of the requisite sanitary conditions in the edible products department, the operations incident to the preparation of the article shall be subject to the same sanitary requirements as apply to the edible products department. Preparation of the article shall be limited to those hours during which the official plant operates under the supervision of an inspector. The ingredients used in the preparation of the article shall, unless otherwise approved by the national supervisor, be such as may be used in the preparation of an edible product. The article may be stored in, and distributed from, the edible products department if the article is properly identified.

(b) When any article (including, but not being limited to, animal food) that will not be prepared for use as human

food, is prepared in any part of an official plant other than an edible products department (such part of the plant being herein referred to as "inedible products department"), the area in which such article is prepared shall be distinctly separated from all edible products departments. Edible products and inedible products may be brought from any edible products department into any inedible products department, but no edible product or inedible product from an inedible products department may be brought into an edible products department except under such conditions as may be prescribed or approved by the national supervisor. Any such articles as are in sealed containers or are handled in the manner prescribed or approved by the national supervisor may be brought into an edible products department. Diseased carcasses or diseased parts of any carcass shall not be used in the preparation of any animal food. Trucks or containers used for the transportation of edible products or inedible products into an inedible products department shall be cleaned before being returned to or brought into an edible products department. Sufficient space shall be allotted and adequate equipment and facilities provided so that the preparation of the article does not interfere with the preparation of edible products in the plant or the maintenance of the requisite sanitary conditions in the official plant. The preparation of any article shall be subject to supervision by an inspector.

(c) The immediate container of any such article that is prepared in an official plant shall be conspicuously labeled so as to distinguish it from human food.

§ 70.160 *Appeal inspections; how made.* Any interested party may, if dissatisfied with any decision of an inspector relating to any inspection, file an appeal from such decision. Any such appeal from a decision of an inspector shall be made to his immediate superior having jurisdiction over the subject matter of the appeal. Review of such appeal findings, when requested, shall be made by the immediate superior of the employee of the Department making the appeal inspection.

*Inspection Certificates*

§ 70.170 *Forms of inspection certificates.* Each inspection certificate issued pursuant to the regulations in this part shall be approved by the Administrator as to form, and:

(a) Each dressed poultry inspection certificate shall show the class or classes of poultry, the quantity of product contained in the respective lot, and all pertinent information concerning the condition and wholesomeness thereof;

(b) Each food product inspection certificate shall show the names of the edible products covered by such certificate, the quantity of each such product, such shipping marks as are necessary to identify such products, and all pertinent information concerning the condition and wholesomeness thereof;

(c) Each export certificate shall show the respective names of the exporter and the consignee, the destination, the shipping marks, the numbers of the export stamps attached to the edible products to be exported and covered by the certificate, and the names of such products and the total net weight thereof.

§ 70.171 *Issuance and disposition of dressed poultry inspection certificates.* (a) Upon the request of an interested party, any inspector is authorized to issue a dressed poultry inspection certificate with respect to any lot of dressed poultry inspected by him. Each certificate shall be signed by the inspector who made the inspection covered by the certificate, and if more than one inspector participated in the inspection of the lot of poultry, each such inspector shall sign the certificate with respect to such lot.

(b) The original of each inspection certificate, issued pursuant to §§ 70.170 to 70.174, and not to exceed three copies thereof, shall, immediately upon issuance, be delivered or mailed to the applicant or person designated by him. One copy shall be filed in the office of the regional supervisor serving the area in which the inspection was performed, and the remaining copies to be disposed of in such manner as the Administrator may approve. Additional copies of any such certificate may be furnished to any interested party as provided in § 70.135.

§ 70.172 *Food product inspection certificates; issuance and disposition.* (a) Upon the request of an interested party, any inspector is authorized to issue a food product inspection certificate with respect to any inspected and certified edible product after suitable examination of the product has been made by the inspector.

(b) The original of each food product inspection certificate, and not to exceed two copies thereof, if requested, shall, immediately upon issuance, be delivered or mailed to the applicant or person designated by him. Another copy shall be filed in the office of the regional supervisor serving the area in which such certificate was issued, and one copy shall be forwarded to the Administrator. The last named two copies shall be retained until otherwise ordered by the Administrator.

§ 70.173 *Export certificates; issuance and disposition.* (a) Upon the request of an exporter, any inspector is authorized to issue an export certificate with respect to the shipment to any foreign country of any inspected and certified edible product after suitable examination of the product has been made by the inspector.

(b) Each export certificate shall be issued in quintuplicate; the original shall be delivered to the exporter who requested such certificate; and the duplicate copy shall be delivered to the agent of the railroad or other carrier transporting such products from the United States. The triplicate copy of such export certificate shall be forwarded to the Administrator; the quadruplicate copy shall be filed in the office of the regional supervisor serving the area in which such export certificate was issued; and the memorandum copy shall be retained by the inspector for filing. The last named three copies shall be retained until otherwise ordered by the Administrator.

§ 70.174 *Advance information.* Upon the request of an applicant, all or part of the contents of any inspection certificate issued to such applicant may be telephoned or telegraphed to him, or to any person designated by him, at his expense.

GRADING

§ 70.180 *General.* Grading service performed with respect to any quantity of products shall, as the case may require, be on the basis of an examination, pursuant to the regulations in this part, of each unit thereof or of each unit in the representative sample thereof drawn by a grader. Whenever the grading service is performed on a representative sample basis, such sample shall be drawn and consist of not less than the minimum number of containers as indicated in the following table:

[Minimum number of containers comprising a representative sample]

| Containers in lot: | Containers in sample |
|---|---|
| 3 containers, or less | (1) |
| 4 to 20, inclusive | 3 |
| 21 to 50, inclusive | 5 |
| 51 to 140, inclusive | 7 |
| In excess of 140 containers | (2) |

[1] All containers.
[2] Five percent of the number of containers in the lot.

§ 70.181 *Live poultry.* Grading service performed with respect to any quantity of live poultry shall, as the case may require, be on the basis of an examination, pursuant to regulations in this part, of each unit thereof or of each unit in the representative sample thereof drawn by a grader. Such poultry may be identified with official identification on a lot basis only.

§ 70.182 *Dressed poultry and ready-to-cook poultry*—(a) *In an official plant.* Grading service performed in an official plant with respect to dressed poultry or ready-to-cook poultry shall, as the case may require, be on the basis of each individual carcass or on a representative sample basis.

(1) Only such ready-to-cook poultry which has been inspected and certified pursuant to the regulations in this part or which has been inspected and passed by any other inspection system which is acceptable to the Administrator, may be graded.

(2) Only such ready-to-cook poultry which has been graded on an individual carcass basis may be individually identified with the appropriate grade mark, and any container of such ready-to-cook poultry may also be so identified. The grading of ready-to-cook poultry shall be performed prior to the disjointing or cutting up of the carcass.

(3) Only the bulk containers of dressed poultry may be identified with the appropriate grade mark even though the grading may have been performed on an individual carcass basis.

(b) *At terminal markets and other receiving points.* Grading service performed with respect to dressed poultry or ready-to-cook poultry at terminal markets or other receiving points may be on a representative sample basis. Only such dressed poultry which was processed in an official plant may be identified with a grade mark. Except as otherwise provided for in institutional contract specifications pursuant to § 70.11 only ready-to-cook poultry which was inspected and certified and is marked with the inspection mark or in accordance with the provisions of § 70.101 (b) may be graded. The grade mark shall not be applied to uninspected ready-to-cook poultry.

*Basis of Acceptability of Other Official Inspection Systems*

§ 70.190 *General.* Any poultry inspection system may be deemed to be acceptable to the Administrator which (a) is conducted under the authority of laws, ordinances, or similar enactments of the State, county, city, or other political subdivision in which is located the official plant at which the ready-to-cook poultry is prepared and submitted for grading service; and (b) imposes at least the requirements set forth in § 70.191: *Provided*, That no such inspection system shall be deemed acceptable to the Administrator with respect to any official plant in which ready-to-cook poultry is prepared if he finds at any time that such requirements are not adequately enforced.

§ 70.191 *Requirements as to manner of inspection.* (a) The inspection shall be made by a State, county or city inspector who is a qualified veterinarian or under the supervision of a qualified veterinarian. All such inspectors shall be employed by the State, county, city, or other political subdivision in which the official plant is located.

(b) The inspection shall include postmortem examination of each poultry carcass during the evisceration operation.

(c) All carcasses which show evidence of disease or any other condition which may render them unwholesome or unfit for food shall be condemned and shall be destroyed for food purposes under the supervision of an inspector. Each carcass and part thereof which has been inspected and passed or containers of carcasses or parts thereof shall bear the identifying inspection symbol of the other official inspection system and the marking devices or labels shall be in the custody of the inspector at all times.

§ 70.192 *Determining compliance with § 70.191.* A qualified veterinary supervisor of the poultry grading service of the Administration shall investigate the manner of operation of the inspection system to determine the adequacy of the post-mortem examination and the compliance with the requirements contained in §§ 70.190 to 70.192 prior to approving the official plant for the grading of ready-to-cook poultry. This supervisor as well as any official graders who may be stationed in the official plant shall periodically observe the inspection operations in the official plant to determine whether the requirements of §§ 70.190 to 70.192 are being met. If at any time the inspector fails to enforce the requirements as set forth in the inspection system, grading service may be withdrawn from the official plant.

*Grading Certificates*

§ 70.200 *Forms.* Grading certificates (including appeal grading certificates and regrading certificates) shall be issued on forms approved by the Administrator.

§ 70.201 *Issuance and disposition.* (a) Each grader shall issue a grading certificate covering each product graded.

(b) The original of each grading certificate, issued pursuant to §§ 70.200 to 70.202, and not to exceed three of the copies thereof, shall, immediately upon issuance, be delivered or mailed to the applicant or person designated by him. One copy shall be filed in the office of grading which serves the area in which the grading service was performed, and the remaining copies shall be disposed of in such manner as the Administrator may approve. Additional copies of any such certificate may be furnished to any interested party as provided in § 70.135.

§ 70.202 *Advance information.* Upon the request of an applicant, all or part of the contents of any grading certificate issued to such applicant may be telephoned or telegraphed to him, or to any person designated by him, at his expense.

*Regrading*

§ 70.210 *Application for regrading of a graded product.* An application for a regrading of any previously graded product may be made at any time by any interested party, and such application shall clearly state the reason for requesting the regrading. The provisions of the regulations relative to grading service shall apply to regrading service.

§ 70.211 *Regrading certificates.* Immediately after a regrading has been completed, a regrading certificate shall be issued showing the results of such regrading; and such certificate shall thereupon supersede, as of the time of issuance of the regrading certificate, the grading certificate previously issued for the product involved. Each regrading certificate shall clearly set forth the number and date of the grading certificate which it supersedes. The provisions of §§ 70.200 to 70.202 shall, whenever applicable, also apply to regrading certificates except that copies of such regrading certificates shall be furnished each interested party of record.

*Appeal Grading*

§ 70.220 *Application for appeal grading.* An application for an appeal grading may be made by any interested party who is dissatisfied with any determination stated in any grading or regrading certificate only if the identity of the product, or representative sample thereof, on the basis of which a determination was made has not been lost, and such application for the appeal grading is made within two days following the day on which the grading was performed. Upon approval by the Administrator, the time within which an application for an appeal grading may be made may be extended.

§ 70.221 *How to obtain appeal grading.* Appeal grading may be obtained by filing a request therefor (a) with the Administrator, (b) with the grader who issued the grading certificate with respect to which the appeal grading is requested, (c) with the immediate superior of such grader, or (d) with the officer in charge of any office of grading. The application for appeal grading shall clearly state the reasons therefor and may be accompanied by a copy of the aforesaid grading certificate or any other information the applicant may have secured regarding the product, at the time of grading, from which the appeal is requested. Such application may be made orally (in person or by telephone), in writing, or by telegraph. If made orally, written confirmation may be required.

§ 70.222 *Record of filing time.* A record showing the date and hour when each such application for appeal grading is received shall be maintained in such manner as the Administrator may prescribe.

§ 70.223 *When an application for an appeal grading may be refused.* Notwithstanding the provisions of § 70.220, if it appears to the Administrator that the reasons for an appeal grading are frivolous or not substantial, or that the quality or condition of the products has undergone a material change since the grading from which the appeal is made, or the identical products that were examined to ascertain the grade thereof cannot be made accessible for reexamination, or the act or regulations in this part have not been complied with, the Administrator may refuse the applicant's request for the appeal grading; and such applicant shall be promptly notified of the reason for such refusal.

§ 70.224 *When an application for appeal grading may be withdrawn.* An application for appeal grading may be withdrawn by the applicant at any time before the appeal grading is made upon payment, by the applicant, of all expenses incurred by the Administration in connection with such application.

§ 70.225 *Who shall perform the appeal grading.* An appeal grading of any graded product shall be made by any grader (other than the one from whose grading the appeal is made) designated for this purpose by the Administrator; and, whenever practicable, such appeal grading shall be conducted jointly by two such graders.

§ 70.226 *Appeal grading by immediate superior.* Notwithstanding the provisions of §§ 70.220 to 70.228, whenever the immediate superior of a grader has evidence that such grader incorrectly graded a product, such superior shall immediately make a regrading of the product.

§ 70.227 *Order of performance of appeal gradings.* Appeal gradings shall be performed, insofar as practicable, in the order in which applications therefor are received; and any such application may be given precedence pursuant to § 70.47.

§ 70.228 *Appeal grading certificates.* Immediately after an appeal grading has been completed, an appeal grading cer-

tificate shall be issued showing the results of such appeal grading. Such certificate shall thereupon supersede the grading certificate for the product involved and such supersedure shall be effective as of the time of issuance of the grading certificate with respect to which the appeal is made. Each appeal grading certificate shall clearly set forth the number and the date of the grading certificate which it supersedes. The provisions of §§ 70.200 to 70.202 shall, whenever applicable, also apply to appeal grading certificates except that copies of such appeal grading certificates shall be furnished each interested party of record.

*Superseded Certificates*

§ 70.235 *Superseded certificates.* Whenever any grading certificate is superseded in accordance with the regulations in this part such certificate shall become null and void as of the effective time of supersedure. If the original and all copies of such superseded certificate are not delivered to the person issuing the regrading certificate or appeal grading certificate, he shall notify such persons as he considers necessary to prevent fraudulent use of the superseded certificate.

SANITARY REQUIREMENTS

*General*

§ 70.240 *Minimum standards for sanitation, facilities, and operating procedures in official plants.* Except as otherwise provided in this part the provisions of §§ 70.240 to 70.287 shall apply with respect to grading service and inspection service in all official plants other than with respect to the grading of live poultry. The table set forth in § 70.237 indicates some of the types of material which may be used in the construction of equipment, utensils and facilities for use in the plant.

§ 70.241 *Authority of Administrator to amend minimum standards for sanitation, facilities, and operating procedures in official plants.* The Administrator is authorized to amend the provisions in §§ 70.240 to 70.287; and such amended provisions shall be applicable to official plants.

*Buildings and Plant Facilities*

§ 70.250 *Buildings.* The building shall be of sound construction and kept in good repair, and shall be of such construction as to prevent the entrance or harboring of vermin.

(a) *Outside openings.* (1) The doors, windows, skylights and other outside openings of the plant, except receiving rooms and feeding rooms, shall be protected by properly fitted screens or other suitable devices, against the entrance of flies and other insects.

(2) Outside doors, except in receiving rooms and feeding rooms, shall be so hung that not over $\frac{1}{4}$ inch clearance remains when closed. Screen doors shall open toward the outside of the building. Doors shall be provided with self-closing devices where necessary to prevent the entry of vermin into processing and storage rooms.

§ 70.251 *Rooms and compartments.* Rooms and compartments used for edible products shall be separate and distinct from inedible products departments and from rooms where live poultry is held or slaughtered. Separate rooms shall be provided when required for conducting processing operations in a sanitary manner; and all rooms shall be of sufficient size to permit the installation of the necessary equipment for processing operations and the conduct of such operations in a sanitary manner.

(a) *Rooms for separate operations.* The official plant should have separate rooms for each of the following operations depending upon the various types of operations conducted; but in no case shall the receiving or feeding of live poultry or killing operations be permitted in rooms in which eviscerating operations are performed:

(1) The receiving and feeding of live poultry.

(2) Killing, scalding, and roughing operations.

(3) Pinning, finishing, and chilling and packing operations for dressed poultry.

(4) Evisceration operations. Final pinning of dressed poultry and chilling and packaging of edible products may be performed in this room. Openings in walls for conveyor lines are permissible.

(5) Inedible products departments.

(6) Refuse rooms. Separate refuse room, or other equally adequate facilities, shall be required in eviscerating plants and in other plants where accumulations of refuse occur.

(b) *Rooms for holding carcasses for further inspection.* Rooms and compartments in which carcasses or parts thereof are held for further inspection shall be in such numbers and such locations as the needs of the inspection in the plant may require. These rooms and compartments shall be equipped with locks and keys and the keys shall not leave the custody of the inspector in charge of the plant. All such rooms and compartments shall be marked conspicuously with the word "retained" in letters not less than 2 inches high.

(c) *Coolers and freezers.* Coolers and freezers of adequate size and capacity shall be provided to reduce the internal temperature of dressed poultry and ready-to-cook poultry prepared and otherwise handled in the plant to 36° F. within 24 hours unless other cooling facilities are available.

(d) *Refuse rooms.* Refuse rooms shall be entirely separate from other rooms in the plant, shall have tight fitting doors and be properly ventilated.

(e) *Storage and supply rooms.* The storage and supply rooms shall be in good repair, kept dry, and maintained in a sanitary condition.

(f) *Boiler room.* The boiler room shall be a separate room, if necessary, to prevent its being a source of dirt and objectionable odors entering any room where dressed poultry or edible products are prepared, processed, handled, and stored.

(g) *Inspector's office.* Furnished office space, including, but not being limited to, light, heat and janitor service shall be provided rent free in the official plant, for the exclusive use for official purposes of the inspector or grader and the Administration. The room or rooms set apart for this purpose must meet the approval of the regional supervisor and be conveniently located, properly ventilated and provided with lockers or cabinets suitable for the protection and storage of supplies and with facilities suitable for inspectors and graders to change clothing.

(h) *Toilet rooms.* Toilet rooms, opening directly into rooms where poultry products are exposed shall have self-closing doors and shall be ventilated to the outside of the building.

§ 70.252 *Floors, walls, ceilings, etc.* The floors, walls, ceilings, partitions, posts, doors and other parts of all compartments shall be of such material, construction, and finish as will make them susceptible of being readily and thoroughly cleaned.

(a) *Floors.* (1) All floors, except those in receiving rooms and feeding rooms and floors which are kept dry, shall be constructed of hardened concrete, or of tile laid closely together with impervious joint material, or of other similar impervious material and kept in good repair.

(2) The floors in killing, ice-cooling, ice-packing, and eviscerating rooms shall be graded to permit run-off with no standing water and in new construction and renovated plants the pitch shall be not less than $\frac{1}{4}$ inch per foot to drains.

(3) In new construction the junction of the wall with the floor shall be coved on a radius of not less than 2 inches and the window ledges shall be set at an angle of approximately 45°, and all upper horizontal surfaces shall be kept to a minimum.

(b) *Ceilings and walls.* (1) Ceilings and walls in rooms and compartments where exposed edible products are processed, handled or stored shall have tiled, enameled or other smooth surface impervious to moisture.

(2) Cooler and freezer rooms shall have interior surfaces impervious to moisture so as to permit thorough cleaning.

(c) *Blood disposal.* (1) Adequate facilities shall be provided for the disposal of blood in a sanitary manner.

(2) When bleeding troughs are used they shall be long enough to catch the blood during the bleeding process and shall be installed so as to pitch at least $\frac{1}{2}$ inch per foot toward a smooth metal catch basin or basins, of sufficient capacity for a day's operation at peak production, or shall be flushed continuously.

§ 70.253 *Draining and plumbing.* There shall be an efficient draining and plumbing system for the plant and premises.

(a) *Drains and gutters.* All drains and gutters shall be properly installed with approved traps and vents. The drainage and plumbing system must permit the quick run-off of all water from plant buildings, and surface water around the plant and on the premises, and all such water shall be disposed of in such a manner as to prevent a nuisance or health hazard.

(b) *Sewerage and plant wastes.* (1) The sewerage system shall have adequate slope and capacity to remove readily all waste from the various processing operations and to minimize, and if possible to prevent stoppage and surcharging of the system.

(2) Grease traps which are connected with the sewerage system shall be suitably located but not near any edible products department or in any area where products are unloaded from, or loaded into, vehicles. To facilitate cleaning such traps shall have inclined bottoms and be provided with suitable covers.

(3) In new construction, toilet soil lines shall be separate from house drainage lines to a point outside the buildings; and drainage from toilet bowls and urinals shall not be discharged into a grease catch basin.

(4) All floor drains shall be equipped with traps, constructed so as to minimize clogging; and the plumbing shall be installed so as to prevent sewerage from backing up and from flooding the floor.

(5) Floor drainage lines should be of metal and at least 4 inches in diameter and open into main drains of at least 6 inches in diameter and shall be properly vented to the outside air.

(6) In new construction, valley or gutter drains shall have concave bottoms or the junctions of the sides and the bottoms shall be coved.

(7) Where refrigerators are equipped with drains, such drains should be properly trapped and should discharge through an air gap into the sewer system. All new installations and all replacement of refrigerators equipped with drains shall meet these requirements.

§ 70.254 *Water supply.* The water supply shall be ample, clean, and potable with adequate pressure and facilities for its distribution in the plant, and its protection against contamination and pollution.

(a) Hot water at a temperature not less than 180° F. shall be available for sanitation purposes.

(b) Hose connections with steam and water mixing valves or hot water hose connections shall be provided at convenient locations throughout the plant for cleaning purposes.

(c) The refuse rooms shall be provided with adequate facilities for washing refuse cans and other equipment in the rooms; and the rooms, cans, and equipment shall be cleaned after each day's use.

§ 70.255 *Lavatory accommodations.* Modern lavatory accommodations, and properly located facilities for cleaning utensils and hands shall be provided.

(a) Adequate lavatory and toilet accommodations, including, but not being limited to, running hot water and cold water, soap, and towels, shall be provided. Such accommodations shall be in or near toilet and locker rooms and also at such other places in the plant as may be essential to the cleanliness of all personnel handling products.

(b) Sufficient metal containers shall be provided for used towels and other wastes.

(c) The water supply in all hand washing facilities serving areas where dressed poultry and edible products are prepared shall be operated by other than hand operated controls or shall be of a continuous flow type.

(d) Durable signs shall be posted conspicuously in each toilet room and locker room directing employees to wash their hands before returning to work.

(e) Adequate toilet facilities shall be provided and the following formula shall serve as a basis for determining the adequacy of such facilities:

| Persons of same sex: | Toilet bowls required |
|---|---|
| 1 to 15, inclusive | 1 |
| 16 to 35, inclusive | 2 |
| 36 to 55, inclusive | [1] 3 |
| 56 to 80, inclusive | [1] 4 |
| For each additional 30 persons in excess of 80 | [1] 1 |

[1] Urinals may be substituted for toilet bowls but only to the extent of one-third of the total number of bowls stated.

§ 70.256 *Lighting and ventilation.* There shall be ample light, either natural or artificial or both, of good quality and well distributed, and sufficient ventilation for all rooms and compartments to insure sanitary conditions.

(a) All rooms in which poultry is killed, eviscerated, or otherwise processed shall have at least 10 foot candles of light intensity on all working surfaces except that at the grading and inspection stations such light intensity shall be of 50 foot candles. In all other rooms there shall be provided at least 4 foot candles of light intensity when measured at a distance of 30 inches from the floor.

(b) All rooms shall be adequately ventilated to eliminate objectionable odors and minimize moisture condensation.

*Equipment and Utensils*

§ 70.270 *Equipment and utensils.* Equipment and utensils used for the preparation, processing, or otherwise handling any product in the plant shall be suitable for the purpose intended and shall be of such material and construction as will facilitate their thorough cleaning and insure cleanliness in the preparation and handling of products. Insofar as it is practical, equipment and utensils shall be made of metal or other impervious material. Trucks and receptacles used for handling inedible products shall be of similar construction and shall be conspicuously and distinctly marked and shall not be used for handling any edible products.

(a) *Batteries.* Batteries should be constructed entirely of metal and have metal dropping pans so as to permit proper and complete washing and cleaning. Batteries that are not made entirely of metal shall be replaced with metal batteries whenever replacement becomes necessary.

(b) *Refuse containers.* Metal refuse containers with covers shall be provided; and such containers shall be kept covered.

(c) *Scalding equipment.* (1) Scalding equipment, tank or spray type, shall be made of metal and have smooth surfaces, and be of such construction as to permit proper and complete washing and cleaning.

(2) The scalding tanks, when used, shall be so constructed as to prevent contamination of potable water lines and to permit water to enter continuously at the rate of $\frac{1}{4}$ gallon per bird per minute and to flow out through an overflow.

(3) The overflow outlets in scalding equipment shall be of sufficient size to permit feathers and water to be carried off.

(4) The overflow, draw-off valves, and sediment basin drain shall discharge into a floor or valley drain, or onto the floor in close proximity to a floor or valley drain.

(d) *Mechanical pickers.* When necessary, safety guards shall be installed around moving machine parts of mechanical pickers, and such guards shall be of such construction as not to be difficult or laborious to remove or to keep clean. Sheet metal or metal grills fastened down with sufficient bolts and wing nuts are preferable.

(e) *Wax finishing.* When wax dipping is used, metal troughs shall be provided to catch the wax removed from the dipped poultry. Acceptable facilities and methods shall be employed in reclaiming the wax.

(f) *Ice chilling vats.* (1) Chilling vats or tanks used for chilling dressed poultry should be, and all replacements thereof and all chilling vats or tanks used for chilling ready-to-cook poultry shall be, made of metal or other hard-surfaced impervious material.

(2) Ice shovels shall be smooth surfaced and made of metal.

(g) *Grading and packing bins.* Where grading bins are used for poultry, they shall be of sufficient number and capacity to handle the grading adequately without the use of makeshift bins; and all dressed poultry shall be kept off the floor. Grading bins may be made of metal or enameled wood and shall be constructed and maintained in such a manner as to allow easy and thorough cleaning. All replacements of such bins shall, however, be of metal.

(h) *Rooms.* Except as otherwise provided herein, all equipment and utensils used in the killing, roughing, pinning, chilling and packing rooms shall be of metal or other impervious material and constructed so as to permit proper and complete cleaning.

(i) *Conveyors.* (1) Conveyors used in the preparation of ready-to-cook poultry shall be of metal or other acceptable material and of such construction as to permit thorough and ready cleaning and easy identification of viscera with its carcass and so designed as will present each carcass or all parts thereof in a way that will permit adequate and efficient inspection.

(2) Overhead conveyors shall be so constructed and maintained that they will not allow grease, oil, or dirt to accumulate on the drop chain or shackle which shall be of non-corrosive metal.

(3) Non-metallic belt-type conveyors used in moving edible products shall be of water-proof composition.

(4) When individual trays or other acceptable equipment are not used during eviscerating operations, each carcass shall be suspended and a metal trough shall be provided beneath the conveyor to extend from the point where the carcass is opended to the point where the viscera has been completely removed, and such troughs shall be flushed continuously by a water spray.

(j) *Tables.* Inspection, eviscerating, and cutting tables shall be made of metal and have coved corners and be so constructed and placed to permit thorough cleaning.

(k) *Plants lacking conveyors.* In plants where no conveyors are used, each carcass shall be eviscerated in an individual metal tray of seamless construction.

(l) *Water spray washing equipment.* Water spray washing equipment with sufficient water pressure to thoroughly and efficiently wash carcasses shall be used for washing carcasses inside and out.

(m) *Waste receptacles.* Watertight metal receptacles shall be used for entrails and other waste resulting from preparation of eviscerated poultry.

(n) *Trucks and receptacles for diseased carcasses.* Watertight trucks and receptacles for holding or handling diseased carcasses and diseased parts of carcasses shall be so constructed as to be readily and thoroughly cleaned; such trucks and receptacles shall be marked in a conspicuous manner with the word "condemned" in letters not less than 2 inches high and, when required by the inspector in charge, shall be equipped with facilities for locking and sealing.

(o) *Freezing rooms.* Freezing rooms should be adequately equipped to freeze ready-to-cook poultry solid in less than 60 hours. Freezing rooms shall be equipped with floor racks or pallets and fans to insure air circulation.

(p) *Cooling racks.* Cooling racks should be made of metal and be readily accessible for thorough washing and cleaning. All replacements of cooling racks shall be made of metal.

(q) *Trucks and receptacles for carcasses held for further inspection.* Trucks and receptacles in which carcasses or parts thereof are held for further inspection shall be in such numbers and in such locations as the needs of the inspection in the plant may require. They shall be equipped for locking by means of lock and key and the key shall not leave the custody of the inspector in charge of the plant. Such trucks and receptacles shall be marked conspicuously with the word "retained" in letters not less than 2 inches high.

§ 70.271 *Accessibility.* All equipment shall be so placed as to be readily accessible for all processing and cleaning operations.

(a) *Mechanical pickers.* When used in the plant, mechanical pickers shall be so installed as to be accessible for thorough cleaning and removal of the accumulation of feathers.

§ 70.272 *Restrictions on use.* Equipment and utensils used in the official plant shall not be used outside the official plant except under such conditions as may be prescribed or approved by the national supervisor, and equipment used in the preparation of any article (including, but not being limited to, animal food), from inedible material shall not be used outside of the inedible products department except under such conditions as may be prescribed or approved by the national supervisor.

*Maintenance of Sanitary Conditions and Precautions Against Contamination of Products*

§ 70.280 *General.* The premises shall be kept free from refuse, waste materials, and all other sources of objectionable odors and conditions.

§ 70.281 *Cleaning of rooms and compartments.* Rooms, compartments, or other parts of the official plant in which products are handled and kept shall be kept clean and in sanitary condition.

(a) All feathers, blood, offal, birds or parts of birds too severely damaged to be salvaged, and all discarded containers and other materials shall be completely disposed of daily.

(b) All windows, doors, and light fixtures in the official plant shall be kept clean.

(c) All docks and rooms shall be kept clean and free from debris and unused equipment and utensils.

(d) Live poultry receiving docks and receiving rooms shall be of such construction as readily to permit their thorough cleaning.

(e) Floors in feeding rooms shall be cleaned with such regularity as may be necessary to maintain them in a sanitary condition.

(f) The killing, roughing, and pinning room shall be kept clean and free from offensive odors at all times.

(g) The walls, floors, and all equipment and utensils used in the killing, roughing and pinning room shall be thoroughly cleaned after each day's operation.

(h) The floors in the killing, roughing, and pinning room shall be cleaned frequently during roughing and finishing operations and be kept reasonably free from accumulated blood, feathers, manure, water, and dirt.

(i) All equipment in the toilet and locker room, as well as the room itself, shall be kept clean, sanitary, and in good repair.

(j) Cooler and freezer rooms shall be free from objectionable odors of any kind and shall be maintained in a sanitary condition (including, but not being limited to, the prevention of drippings from refrigeration coils onto products).

§ 70.282 *Cleaning of equipment and utensils.* Equipment and utensils used for preparing or otherwise handling any product shall be kept clean and in a sanitary condition and in good repair.

(a) Batteries and dropping pans shall be cleaned regularly and the manure removed from the plant daily.

(b) The feed mixer shall be cleaned daily.

(c) Scalding tanks shall be completely emptied and thoroughly cleaned as often as may be necessary but not less frequently than once a day.

(d) Ice shovels shall be kept clean, free of corrosion, and shall be stored off the floor.

(e) All equipment and utensils used in the killing, roughing, and pinning rooms shall be thoroughly washed and cleaned after each day's operation. The chilling and packing room and equipment and utensils used therein shall be maintained in a clean and sanitary condition.

(f) Graders' and packers' gloves and grading bins shall be washed daily and used only for grading or packing, as the case may be.

(g) Chilling vats or tanks shall be emptied and rinsed after each use. They shall be thoroughly cleaned once daily and after each cleaning operation they shall be sanitized with such compounds or by such methods as may be approved or prescribed by the Administrator.

(h) Thawing. When frozen poultry is to be defrosted in water, adequate facilities (tanks, vats, or racks) shall be provided, including continuously running tap water of sufficient volume for thawing such poultry. Such poultry shall not be thawed in still water and the thawing tanks shall be emptied and rinsed after each use. The tanks shall be thoroughly cleaned once daily and after each cleaning operation they shall be sanitized with such compounds or by such methods as may be prescribed or approved by the Administrator. If water is heated it shall not be heated above 70° F. Thawing tanks shall be equipped with properly installed overflow pipes to discharge over a floor drain or a valley drain. Where mechanical devices are not used for removing thawed carcasses from thawing tanks, the tanks shall be of a size as will enable employees to remove poultry without getting inside the tanks.

(i) When synchronized overhead conveyors and tray conveyors are used, the trays shall be completely washed and sanitized after being automatically emptied of inedible viscera.

(j) When a conveyor tray operation is used, such trays shall be of metal of seamless construction and shall be completely washed and sanitized after each use.

(k) Tables, shelves, bins, trays, pans, knives, and all other tools and equipment used in the preparation of ready-to-cook poultry shall be kept clean and sanitary at all times. Cleaned equipment and utensils shall be drained on racks and shall not be nested.

(l) Drums, cans, tanks, vats, and other receptacles used to hold or transport dressed poultry, or eviscerated poultry, shall be kept in a clean and sanitary condition.

§ 70.283 *Operations and procedures.* Operations and procedures involving the preparation, storing, or handling of any product shall be strictly in accord with clean and sanitary methods.

(a) There shall be no handling or storing of materials which create an objectionable condition in rooms, compartments, or other places in the plant where

any product is prepared, stored, or otherwise handled.

(b) The pinning and finishing operations shall be performed in a part of the room that is away from the killing and roughing operations.

(c) Blood from the killing operation shall be confined to a relatively small area and kept from being splashed about the room.

(d) In finishing and cleaning dressed poultry, the carcass shall be singed, feed shall be removed from the crop, and the fecal material in the cloaca shall be removed by venting, and such operations shall be completed prior to or during the final washing but prior to chilling and packaging of such dressed poultry. Notwithstanding the foregoing, dressed poultry which is to be eviscerated in an official plant within 72 hours from time of slaughter may, when approved by the Administration, be transferred by conveyor or operational type container or other approved means to such official plant prior to removal of the feed in the crop.

(e) The head of each dressed poultry carcass shall be washed thoroughly to remove feed from the mouth and blood from the head and mouth.

(f) In the final washing the carcass shall be passed through a system of sprays providing an abundant supply of fresh clean water either under pressure or scrubbing action.

(g) Grading and packaging. Dressed poultry may be graded and packaged in the killing, roughing, pinning, chilling, and packing room; however, such poultry shall be graded and packed in an area of the room which is well isolated from the killing and roughing operation.

(h) The floors in the eviscerating room shall be kept clean and reasonably dry during eviscerating operations and free of all refuse.

(i) Conveyors shall be operated at such speeds as will permit a sanitary eviscerating operation and will permit adequate inspection for condition and wholesomeness.

(j) Mechanized packaging equipment shall be maintained in good sanitary condition.

(k) All offal resulting from the eviscerating operation shall be removed as often as necessary to prevent the development of a nuisance.

(l) Paper and other material used for lining barrels or other containers in which products are packaged shall be of such kinds as do not tear readily during use but remain intact when moistened by the product.

(m) Protective coverings shall be used for the product in the plant and as it is distributed from the plant, as will afford adequate protection for the product against contamination by any foreign substance (including, but not being limited to, dust, dirt, and insects), considering the means intended to be employed in transporting the product from the plant.

(n) Containers to be used for packaging dressed poultry and ready-to-cook poultry shall be clean, free from objectionable substances or odors and of sufficient strength and durability to adequately protect the product during normal distribution.

(o) Refuse may be moved directly to loading docks only for prompt removal.

(p) Cleanliness and hygiene of personnel. (1) All employees coming in contact with dressed poultry, exposed edible products, or edible products handling equipment shall wear clean garments and shall keep their hands clean at all times while thus engaged.

(2) Hands of employees handling dressed poultry or edible products or edible products handling equipment shall be free of infected cuts, boils, and open sores at all times while thus engaged.

(3) Every person after each use of toilet or change of garments shall wash his hands thoroughly before returning to duties that require the handling of dressed poultry or edible products, or containers therefor, or edible products handling equipment.

(4) Neither smoking nor chewing of tobacco shall be permitted in any room where exposed edible products are prepared, processed, or otherwise handled.

§ 70.284 *Temperatures and cooling and freezing procedures.* Temperatures and procedures which are necessary for cooling and freezing poultry shall be in accordance with sound operating practices which insure the prompt removal of the animal heat and as will maximize the preservation of the quality and condition of the poultry.

(a) *Cooling.* All dressed poultry and ready-to-cook poultry that is prepared in the official plant shall be cooled immediately after processing. Such poultry shall be cooled to an internal temperature of 40° F. or less, within 24 hours from the time of slaughter. If such poultry is to be shipped from the plant in packaged form, the poultry shall be cooled to and maintained at a temperature of 40° F. or less prior to shipment from the plant. However, when approved by the Administration, poultry may be shipped from the plant prior to cooling to 40° F. or less, if such poultry is shipped to and placed in a freezer promptly.

(b) *Ice chilling.* (1) Only ice manufactured or produced from potable water may be used for ice chilling. The ice shall be handled and stored in a sanitary manner. If of block-type, the ice shall be washed by spraying with clean water before crushing. Metal ice crushers shall be washed at least once daily.

(2) Enough clean crushed ice shall be used to maintain a temperature in vats or tanks under 40° F. at all times during chilling. Dressed poultry carcasses weighing less than 8 pounds should be chilled to 40° F. or below in less than 4 hours whereas carcasses weighing more than 8 pounds should be chilled to 40° F. or below in less than 8 hours. In order to facilitate continuous processing operations dressed poultry may be held overnight in chilling tanks provided it is processed and packaged at the resumption of operations the following morning. If such poultry is to be held in chilling tanks for longer periods it shall be properly repacked with crushed ice in clean tanks which are continually drained and during this holding period the internal temperature of the dressed poultry shall be maintained at or below 40° F.

(c) *Air chilling.* In air chilling, dressed poultry shall be passed through a spray of clean water immediately following the removal of the feathers, and then hung on racks. Thereupon the racks of dressed poultry shall be placed in a refrigerated room with moderate air movements and a temperature which will reduce the internal temperature of the carcass to 40° F. or less, within 24 hours.

(d) *Freezing.* (1) When dressed poultry is packaged in bulk or shipping containers, the carcasses should be individually wrapped or packaged in water-vapor resistant cartons or the containers should be lined with heavy water-vapor resistant paper so as to assure adequate overlapping of the lining to completely surround the carcasses and to permit unsealed closure or sealing in such a manner that water-vapor loss from the product is considerably retarded or prevented. The dressed poultry should receive initial rapid freezing under such packaging, temperature, air circulation, and stacking conditions which will result in freezing the carcasses solid in less than 60 hours. Any carcass weighing less than 8 pounds should freeze solid in from 30 to 40 hours, whereas a carcass weighing more than 8 pounds should freeze solid in from 48 to 60 hours. (The approximate highest temperatures which will attain this result under average to most favorable conditions, are −10° F. with circulated air and −20° F. with still air; however, freezing temperatures of −20° F. to −40° F. are desirable.)

(2) Frozen dressed poultry should be stored at 0° F. or below, with temperature maintained as constant as possible.

(e) *Refrigeration of packaged poultry.* Immediately after packaging, all dressed poultry and ready-to-cook poultry other than that which is ice-packed or shipped from the plant in a refrigerated carrier should be moved into the freezer. If such poultry is to be held in the plant for longer than 24 hours it should be held at not above 30° F.

(f) *Ice-pack containers.* When poultry is packed in ice in barrels or other containers the barrels and containers should be covered and shall have an adequate number of drain holes to permit water to drain out.

(g) *General.* The provisions of paragraphs (b) and (d) of this section shall be applicable to ready-to-cook poultry.

§ 70.285 *Vermin.* Every practicable precaution shall be taken to exclude flies, rats, mice, and other vermin from the official plant. Dogs, cats, and other pets shall be excluded from rooms where edible products and dressed poultry are processed, handled and stored.

§ 70.286 *Exclusion of diseased persons.* No person affected with any communicable disease (including, but not being limited to, tuberculosis) in a transmissible stage shall be permitted in any room or compartment where exposed or unpacked dressed poultry or edible products are prepared, processed, or otherwise handled.

§ 70.287 *Table showing types of materials.*

| Equipment, utensils, and facilities | Iron | Rubber | Concrete | Stainless steel and nickel metal | Aluminum | Wood | Copper (tin plated) | Porcelain or glazed tile |
|---|---|---|---|---|---|---|---|---|
| Hatteras | | | | A | A | A | | --- |
| Overhead conveyer | A | | | A | | A | | --- |

SUBPART B—UNITED STATES CLASSES, STANDARDS, AND GRADES FOR POULTRY

UNITED STATES CLASSES OF LIVE POULTRY, DRESSED POULTRY, AND READY-TO-COOK POULTRY

§ 70.300 *General.* The provisions of §§ 70.300 to 70.306 apply to live poultry, dressed poultry, and individual carcasses of ready-to-cook poultry, in determining the kind of poultry and its class. The kinds of poultry are as follows: Chickens, turkeys, ducks, geese, guineas, and pigeons.

§ 70.301 *Chickens.* The following are the various classes of chickens:

(a) *Broiler or fryer.* A broiler or fryer is a young chicken (usually under 16 weeks of age), of either sex, that is tender-meated with soft, pliable, smooth-textured skin and flexible breastbone cartilage.

(b) *Roaster.* A roaster is a young chicken (usually under 8 months of age), of either sex, that is tender-meated with soft, pliable, smooth-textured skin and breastbone cartilage that is somewhat less flexible than that of a broiler or fryer.

(c) *Capon.* A capon is an unsexed male chicken (usually under 10 months of age) that is tender-meated with soft, pliable, smooth-textured skin.

(d) *Stag.* A stag is a male chicken (usually under 10 months of age) with coarse skin, somewhat toughened and darkened flesh, and considerable hardening of the breastbone cartilage. Stags show a condition of fleshing and a degree of maturity intermediate between that of a roaster and a cock or old rooster.

(e) *Hen or stewing chicken or fowl.* A hen or stewing chicken or fowl is a mature female chicken (usually more than 10 months old) with meat less tender than that of a roaster, and non-flexible breastbone.

(f) *Cock or old rooster.* A cock or old rooster is a mature male chicken with coarse skin, toughened and darkened meat, and hardened breastbone.

§ 70.302 *Turkeys.* The following are the various classes of turkeys:

(a) *Fryer or roaster.* A fryer or roaster is a young immature turkey (usually under 16 weeks of age), of either sex, that is tender-meated with soft, pliable, smooth-textured skin, and flexible breastbone cartilage.

(b) *Young hen turkey.* A young hen turkey is a young female turkey (usually under 8 months of age) that is tender-meated with soft, pliable, smooth-textured skin, and breastbone cartilage that is somewhat less flexible than in a turkey fryer or roaster.

(c) *Young tom turkey.* A young tom turkey is a young male turkey (usually under 8 months of age), that is tender-meated with soft, pliable, smooth-textured skin and breastbone cartilage that is somewhat less flexible than in a turkey fryer or roaster.

(d) *Hen turkey.* A hen turkey is a fully matured female turkey (usually over 10 months of age) that is less tender-meated than a young hen turkey, has a hardened breastbone, and may have coarse-textured skin and patchy areas of surface fat.

(e) *Tom turkey.* A tom turkey is a mature male turkey (usually over 10 months of age) with coarse skin, toughened flesh, and hardened breastbone.

§ 70.303 *Ducks.* The following are the various classes of ducks:

(a) *Broiler duckling or fryer duckling.* A broiler duckling or fryer duckling is a young duck (usually under 8 weeks of age), of either sex, that is tender-meated and has a soft bill and soft windpipe.

(b) *Roaster duckling.* A roaster duckling is a young duck (usually under 16 weeks of age), of either sex, that is tender-meated and has a bill that is not completely hardened and a windpipe that is easily dented.

(c) *Mature duck or old duck.* A mature duck or an old duck is a duck (usually over 6 months of age), of either sex, with toughened flesh, hardened bill, and hardened windpipe.

§ 70.304 *Geese.* The following are the various classes of geese:

(a) *Young geese.* A young goose may be of either sex, is tender-meated, and has a windpipe that is easily dented.

(b) *Mature goose or old goose.* A mature goose or old goose may be of either sex and has toughened flesh and hardened windpipe.

§ 70.305 *Guineas.* The following are the various classes of guineas:

(a) *Young guinea.* A young guinea may be of either sex and is tender-meated.

(b) *Mature guinea or old guinea.* A mature guinea or an old guinea may be of either sex and has toughened flesh.

§ 70.306 *Pigeons.* The following are the various classes of pigeons:

(a) *Squab.* A squab is a young, immature pigeon of either sex, and is extra tender-meated.

(b) *Pigeon.* A pigeon is a mature pigeon of either sex, with coarse skin and toughened flesh.

UNITED STATES STANDARDS FOR QUALITY OF LIVE POULTRY

*General*

§ 70.320 *General.* (a) The United States standards for quality of individual live birds contained in §§ 70.320 to 70.328 are applicable only to poultry of the kinds and classes set forth in §§ 70.300 to 70.306.

(b) Birds showing evidence of any disease or other condition which may render them unwholesome or unfit for human food shall not be included in any of the quality designations specified in §§ 70.320 to 70.328.

(c) The following factors are considered in ascertaining the quality of an individual bird: (1) Health and vigor; (2) feathering; (3) conformation; (4) fleshing; (5) fat covering; and (6) the degree of freedom from defects.

*Standards of Quality*

§ 70.325 *A Quality or No. 1 Quality.* To be of A Quality or No. 1 Quality the live bird:

(a) Is alert, has bright eyes, and is of good health and vigor.

(b) Is well feathered, with feathers showing luster or sheen and quite thoroughly covering all parts of the body; however, there may be a slight scattering of pinfeathers.

(c) Is of normal physical conformation except that it may have a slightly curved breastbone or other slight abnormality in the shape of the breastbone which does not interfere with the normal distribution of the flesh. The bird may also have a slightly curved back. There may be a dent in the breastbone which does not exceed ⅛ inch in depth except that for turkeys the depth does not exceed ¼ inch.

(d) Has a well developed, moderately broad and long breast that is well-fleshed throughout its entire length; and the thighs and back are well covered with flesh according to the age and sex of the bird.

(e) Has the breast, back, hips, and pin bones well covered with fat, except that a fryer (whether chicken or turkey) and a young tom turkey may have only a moderate amount of fat covering these parts, and a hen, stewing chicken, or fowl does not have excessive abdominal fat.

(f) Is free from tears and broken bones; however, it may have slight scratches, slight skin bruises, and slight callouses (i. e., slightly thickened, hardened, and darkened areas of skin over the breastbone), if these conditions do not materially affect the appearance of the bird, especially the breast. It may also have slightly scaly shanks.

§ 70.326 *B Quality or No. 2 Quality.* To be of B quality or No. 2 Quality the live bird:

(a) Is of good health and vigor.

(b) Is fairly well feathered (i. e., some feathers may be lacking on some parts of the body); however, there may be a moderate number of pinfeathers.

(c) Is of normal physical conformation except that it may have a slightly crooked breastbone which does not seriously interfere with the normal distribution of the flesh. It may also have a moderately crooked back and slightly misshapen legs and wings.

(d) Is fairly well fleshed in relation to length and depth of body, with all parts fairly well covered with flesh according to the age and sex of the bird.

(e) Has sufficient coverage of fat on breast and legs to prevent a distinct appearance of the flesh through the skin; however, a hen, stewing chicken, or fowl may have excessive abdominal fat.

(f) Is free from tears, broken bones, severe breast blisters, heavy callouses (i. e., thickened, hardened, and darkened areas of skin over the breastbone) and seriously scaly shanks; however, it may have moderate skin bruises and slight flesh bruises.

§ 70.327 *C Quality or No. 3 Quality.* A live bird that does not meet the requirements of B Quality or No. 2 Quality may be of C Quality or No. 3 Quality and such bird may:

(a) Be lacking in vigor.

(b) Have a large number of pinfeathers over all parts of its body and complete lack of plumage feathers on the back.

(c) Have definite deformities (including, but not being limited to, a crooked breastbone, hunchback, and slight crippling).

(d) Have a poorly developed, narrow breast and thin covering of flesh over all parts of its body.

(e) Have only a small amount of fat in the feather tracts and is completely lacking in fat on back and thighs; and

(f) Have skin bruises, small or moderate flesh bruises, and severe breast blisters; however, it has no broken bones.

§ 70.328 *"Reject."* The term "Reject" is not a standard of quality within the purview of §§ 70.320 to 70.327; however, such term may be used with respect to an individual live bird to indicate that it is affected by, or shows evidence of, any disease or condition (including, but not being limited to, large flesh bruises, severe discolorations, severe injury, and emaciation) which may render the bird unfit for human food.

UNITED STATES GRADES FOR LIVE POULTRY

§ 70.330 *General.* (a) The United States grades for live poultry contained in §§ 70.330 to 70.337 are applicable to live poultry of the kinds and classes set forth in §§ 70.300 to 70.306 and are based upon United States standards for quality as set forth in §§ 70.320 to 70.328.

(b) Birds showing evidence of any disease or other condition which may render them unwholesome or unfit for human food shall not be included in any of the grade designations specified in §§ 70.330 to 70.337.

(c) All terms in the United States standards for quality, as set forth in §§ 70.320 to 70.328 shall, when used in §§ 70.330 to 70.338, have the same meaning as when used in the standards.

*Grades*

§ 70.335 *U. S. Grade A or U. S. No. 1.* Any lot of live poultry may be designated as U. S. Grade A or U. S. No. 1 if at least 90 percent, by count, of the birds are of A Quality or No. 1 Quality and the remainder are of B Quality or No. 2 Quality. When more than one container comprises the lot, no container shall have more birds of B Quality or No. 2 Quality than that specified in the following table:

[When lot consists of more than 1 container]

| Grade | Number of birds in container | Maximum number of B Quality or No. 2 Quality birds |
|---|---|---|
| U. S. Grade A or U. S. No. 1 | [illegible] | [illegible] |

§ 70.336 *U. S. Grade B or U. S. No. 2.* Any lot of live poultry may be designated as U. S. Grade B or U. S. No. 2 if at least 90 percent, by count, of the birds are of B Quality or No. 2 Quality, or better, and the remainder are of C Quality, or No. 3 Quality. When more than one container comprises the lot, no container shall have more birds of C Quality or No. 3 Quality than that specified in the following table:

[When lot consists of more than 1 container]

| Grade | Number of birds in container | Maximum number of C Quality or No. 3 Quality birds |
|---|---|---|
| U. S. Grade B or U. S. No. 2 | [illegible] | [illegible] |

§ 70.337 *U. S. Grade C or U. S. No. 3.* Any lot of live poultry may be designated as U. S. Grade C or U. S. No. 3 if it consists of birds of not less than C Quality or No. 3 Quality.

§ 70.338 *"No Grade".* The term "No Grade" is not a grade within the meaning of §§ 70.330 to 70.337. Such term may be applied to any lot of live poultry if such lot contains any birds of less than C Quality or No. 3 Quality or has not been graded in accordance with §§ 70.330 to 70.337.

UNITED STATES STANDARDS FOR QUALITY OF DRESSED POULTRY AND READY-TO-COOK POULTRY

*General*

§ 70.350 *General.* (a) The United States standards for quality contained in §§ 70.350 to 70.357 are applicable to individual carcasses of dressed poultry and ready-to-cook poultry of the kinds and classes set forth in §§ 70.300 to 70.306.

(b) Carcasses found to be unsound, unwholesome, or unfit for food shall not be included in any of the quality designations specified in §§ 70.350 to 70.357. If the carcass is dressed poultry, a determination of unsoundness or unwholesomeness will be based on external characteristics only.

(c) The quality designations specified in §§ 70.350 to 70.357 may not be made applicable to dressed poultry that is not free from the following conditions: Dirty head; bloody head; dirty carcass; bloody carcass; dirty vent; dirty feet; fan feathers on the wing tips; garter feathers around the hock joints; neck feathers; and, if the crop is not removed, feed in the crop.

(d) The A Quality designation may not be made applicable to any poultry carcass if the poultry was wet picked in such a manner that the skin has been damaged by extended immersion in, or high temperature of, the water which resulted in immediate discoloration or may result in later objectionable discoloration.

(e) The following factors are considered in ascertaining, pursuant to §§ 70.350 to 70.357, the quality of an individual carcass: (1) Conformation; (2) fleshing; (3) fat covering; (4) the degree of freedom from pinfeathers and vestigial feathers (i. e., hair or down, as the case may be); (5) the degree of freedom from tears, cuts (including, but not being limited to, any cut for the removal of the crop), disjointed bones, and broken bones; (6) the degree of freedom from discolorations of the skin and of the flesh and of blemishes and bruises of the skin and flesh; and (7) the degree of freedom from freezer burn.

(f) In interpreting the respective requirements specified in §§ 70.350 to 70.357 for A Quality, B Quality, and C Quality, the intensity, aggregate area involved and locations of (1) discolorations (whether or not caused by dressing operations), (2) bruises, (3) pinfeathers, and (4) freezer burn, as such defects individually, or in combination, detract from the general appearance of the carcass, will be considered in determining the particular quality of an individual carcass.

*Standards of Quality*

§ 70.355 *A Quality.* To be of A Quality the carcass:

(a) Is of normal physical conformation except that it may have a slightly curved breastbone or other slight abnormality in the shape of the breastbone which does not interfere with the normal distribution of the flesh. The carcass may also have a very slightly curved back. There may be a dent in the breastbone which does not exceed ⅛ inch in depth except that for turkeys the depth does not exceed ¼ inch.

(b) Has a well-developed, moderately broad and long breast, well-fleshed throughout its entire length, with the flesh carrying sufficiently well up to the crest of the breastbone so that the breastbone is not prominent; and, with respect to young tom turkeys, there may be a slight thickening and slight pouchiness of the skin on the forepart of the

breast. The legs are well covered with flesh.

(c) Has the breast, back, hips, and pin bones well covered with fat except that chicken broilers or fryers, and young tom turkeys may have only a moderate amount of fat covering these parts, a turkey fryer or roaster may be somewhat lacking in fat covering, and a hen, stewing chicken, or fowl does not have excessive abdominal fat.

(d) Is practically free from pinfeathers and vestigial feathers, especially on the breast. If the carcass is dressed poultry. If the carcass is ready-to-cook poultry, it is free from protruding pinfeathers, practically free from nonprotruding pinfeathers and vestigial feathers, especially on the breast.

(e) Is free from skin tears and cuts on the breast and legs; however, elsewhere on the carcass there may be tears and cuts (exclusive of the cuts usually made to remove the neck and viscera in the production of eviscerated poultry) the aggregate length of which does not exceed 1½ inches except that, with respect to any turkey carcass or goose carcass, such aggregate length does not exceed 3 inches. There are no sewn tears or cuts. The carcass has no disjointed bones or broken bones except that it may have one disjointed bone in either a leg or wing but only if there is no evidence of a related bruise or blood clot; and, if the carcass is of a chicken broiler or fryer, it may have one nonprotruding broken bone in a wing in addition to such disjointed bone but only if there is no evidence of a related bruise or blood clot. The wing tips may have been removed.

(f) Is free from bruises and discolorations of the flesh on the breast and legs; however, elsewhere on the carcass there may be bruises and discolorations of the flesh showing not more than a slightly reddened color the aggregate area of which does not exceed the area of a circle ½ inch in diameter, except that, with respect to any turkey or goose carcass, such aggregate area does not exceed the area of a circle 1 inch in diameter. The carcass is free from skin bruises, on the breast and legs, the aggregate area of which exceeds the area of a circle ½ inch in diameter, and from skin bruises, elsewhere on the carcass, the aggregate area of which exceeds the area of a circle ¾ inch in diameter. With respect to any turkey or goose carcass, such aggregate area on the breast and legs does not exceed the area of a circle ¾ inch in diameter; and elsewhere on the carcass such aggregate area does not exceed the area of a circle 1½ inches in diameter. Notwithstanding the foregoing, the total aggregate area, on the breast and legs, of all such flesh bruises, skin bruises, and all other discolorations and blemishes of the skin, is not in excess of the area of a circle 1 inch in diameter; and elsewhere on the carcass such total aggregate area is not in excess of the area of a circle 1½ inches in diameter. Furthermore, with respect to any turkey or goose carcass, such total aggregate area on the breast and legs is not in excess of the area of a circle 2 inches in diameter; and elsewhere on the carcass such total aggregate area is not in excess of the area of a circle 3 inches in diameter. The skin may show only slight reddening in the feather follicles on the neck, near the head, and on the wings because of improper bleeding.

(g) Shows only slight freezer burn, or evidence thereof (i. e., a few pockmarks, or evidence thereof, none of which exceeds the area of a circle ⅛ inch in diameter).

§ 70.356 *B Quality.* To be of B Quality the carcass:

(a) Is of at least practically normal physical conformation except that it may have a dented, curved, and slightly crooked breastbone which does not seriously interfere with the normal distribution of flesh. The carcass may also have a moderately crooked back or misshapen legs or misshapen wings.

(b) Is sufficiently well-fleshed on the breast and legs so as to prevent a thin appearance and a prominent breastbone; however, a young tom turkey may have a pouchy, thick, and somewhat flabby skin on the forepart of the breast.

(c) Has a sufficient coverage of fat on the breast and legs to prevent a distinct appearance of the flesh through the skin.

(d) Has not more than a slight scattering of pinfeathers and vestigial feathers over the entire carcass with only relatively few on the breast, if the carcass is dressed poultry. If the carcass is ready-to-cook poultry, it is free from protruding pinfeathers, but may have not more than a few scattered nonprotruding pinfeathers and vestigial feathers.

(e) Is free from tears and cuts, on the breast and legs, the aggregate length of which exceeds 1½ inches; however, elsewhere on the carcass there may be tears and cuts (exclusive of the cuts usually made to remove the neck and viscera in the production of eviscerated poultry), the aggregate length of which does not exceed 3 inches except that, with respect to any turkey or goose carcass, such aggregate lengths do not exceed 3 inches on the breast and legs and 6 inches elsewhere on the carcass. There are no sewn tears or cuts. The carcass may have not more than a total of 2 disjointed bones in either the legs or wings, or both, but only if there is no evidence of a related bruise or blood clot, and, in addition, 1 broken bone in a leg or wing, but only if it is nonprotruding and does not show an excessive related bruise or blood clot. The wing tips may have been removed.

(f) Is free from bruises and discolorations, of the flesh on the breast and legs, showing not more than a slightly darkened color and which in the aggregate is in excess of the area of a circle ½ inch in diameter; however, elsewhere on the carcass there may be bruises and discolorations of the flesh the aggregate area of which does not exceed the area of a circle 1½ inches in diameter, except that, with respect to any turkey or goose carcass, such aggregate area on the breast and legs does not exceed the area of a circle 1 inch in diameter, and, elsewhere on the carcass, it does not exceed the area of a circle 3 inches in diameter. The carcass is free from skin bruises, on the breast and legs, the aggregate area of which exceeds the area of a circle ¾ inch in diameter, and from skin bruises, elsewhere on the carcass, the aggregate area of which exceeds the area of a circle 1½ inches in diameter. With respect to any turkey or goose carcass, such aggregate area on the breast and legs does not exceed the area of a circle 1½ inches in diameter, and, elsewhere on the carcass, such aggregate area does not exceed the area of a circle 3 inches in diameter. Notwithstanding the foregoing, the total aggregate area on the breast and legs of all such flesh bruises, skin bruises, and all other discolorations and blemishes of the skin is not in excess of the area of a circle 1½ inches in diameter; and elsewhere on the carcass such total aggregate area is not in excess of the area of a circle 3 inches in diameter. Furthermore, with respect to any turkey or goose carcass, such total aggregate area on the breast and legs is not in excess of the area of a circle 2 inches in diameter; and elsewhere on the carcass such total aggregate area is not in excess of the area of a circle 6 inches in diameter. The skin may show not more than moderate reddening in the feather follicles on the neck, near the head, and on the wings and thighs because of improper bleeding.

(g) Shows no more than moderate freezer burn, or evidence thereof, on any part of the carcass and no dried area in excess of the area of a circle ½ inch in diameter.

§ 70.357 *C Quality.* A carcass that does not meet the requirements of B Quality may be of C Quality and such carcass may:

(a) Be of abnormal physical conformation (i. e., possess serious abnormal physical conditions, including, but not being limited to, a crooked breastbone) if it is fairly well fleshed.

(b) Be poorly fleshed and a young tom turkey may have a thick, coarse skin and extended breast that is pouchy or flabby.

(c) Be lacking in fat covering, over all parts of the carcass.

(d) Have numerous pinfeathers and vestigial feathers scattered over the entire carcass, if the carcass is dressed poultry; if ready-to-cook poultry, the carcass is free from protruding pinfeathers but may have a few vestigial feathers and may have nonprotruding pinfeathers that do not seriously detract from the appearance of the carcass.

(e) Have torn skin, disjointed bones, and broken bones but only if there is no evidence of a related severe bruise or blood clot. There are no sewn tears or cuts. Wing tips may have been removed.

(f) Have numerous and large discolored areas or blemishes of the skin which may be accompanied by some reddening and darkening of the flesh beneath, if such discolored areas and blemishes do not render any part of the carcass unfit for food.

(g) Show more than moderate freezer burn or evidence thereof (including, but not being limited to, numerous pockmarks or large dried areas) on any part of the carcass.

UNITED STATES GRADES FOR DRESSED POULTRY AND READY-TO-COOK POULTRY

*General*

§ 70.360 *General.* (a) The United States grades for dressed poultry and ready-to-cook poultry are applicable to dressed poultry and ready-to-cook poultry of the kinds and classes set forth in §§ 70.300 to 70.306 when individual carcasses are not separately identified and are based upon the United States standards for quality set forth in §§ 70.350 to 70.357 except the provisions in § 70.350 (c).

(b) When any lot of dressed poultry is graded on the basis of an examination of each carcass in a representative sample thereof, any carcass that would be of A Quality, if it did not possess any of the following conditions shall, for the purpose of §§ 70.360 to 70.370, be considered as being of B Quality: Dirty or bloody head or carcass, dirty feet or vent, fan feathers or neck feathers or garter feathers, or feed in the crop. Any carcass that would be of B Quality or C Quality if it did not possess any of the foregoing conditions shall, for the purpose of §§ 70.360 to 70.370, be considered as being of C Quality.

(c) All terms in the United States standards for quality set forth in §§ 70.350 to 70.357 shall, when used in §§ 70.360 to 70.370, have the same meaning as when used in the standards.

(d) The suggested weight specifications for dressed poultry and ready-to-cook poultry contained in § 70.370 are not incorporated in the grades for dressed poultry and ready-to-cook poultry since weight, as such, is not a factor of grade for the purpose of §§ 70.360 to 70.370. It is recommended, however, that each container of dressed poultry and ready-to-cook poultry contain carcasses of the weights specified in § 70.370.

*Grades*

§ 70.365 *U. S. Grade A.* Any lot of dressed poultry or ready-to-cook poultry composed of one or more containers of carcasses of the same kind and class may be designated as U. S. Grade A if not less than 90 percent, by count, of the carcasses in such lot are of A Quality, the remainder is of B Quality, and no individual container in such lot contains more carcasses of B Quality than in the proportion of 2 to each 12 carcasses in the container.

§ 70.366 *U. S. Grade B.* Any lot of dressed poultry or ready-to-cook poultry composed of one or more containers of carcasses of the same kind and class may be designated as U. S. Grade B if not less than 90 percent, by count, of the carcasses in such lot are of at least B Quality, the remainder is of C Quality, and no individual container in such lot contains more carcasses of C Quality than in the proportion of 2 to each 12 carcasses in the container.

§ 70.367 *U. S. Grade C.* Any lot of dressed poultry or ready-to-cook poultry may be designated as U. S. Grade C if it consists of carcasses of not less than C Quality.

*Weight Specifications*

§ 70.370 *Suggested weight specifications for dressed poultry and ready-to-cook poultry.* The suggested weight specifications for dressed poultry and ready-to-cook poultry are contained in Tables I, II, III, and IV in this section.

DRESSED POULTRY

TABLE I—CHICKENS

| Class of chickens | Weight range per carcass | | Weight range per dozen carcasses | |
|---|---|---|---|---|
| | Minimum | Maximum | Minimum | Maximum |
| Broilers or fryers | None | 1 pound 8 ounces | None | 18 pounds. |
| | Over 1 pound 8 ounces | 2 pounds | Over 18 pounds | 24 pounds. |
| | Over 2 pounds | 2 pounds 8 ounces | Over 24 pounds | 30 pounds. |
| | Over 2 pounds 8 ounces | 3 pounds | Over 30 pounds | 36 pounds. |
| | Over 3 pounds | 3 pounds 8 ounces | Over 36 pounds | 42 pounds. |
| | Over 3 pounds 8 ounces | 4 pounds | Over 42 pounds | 48 pounds. |
| | Over 3 pounds | 3 pounds 8 ounces | Over 36 pounds | 42 pounds. |
| Roasters | Over 3 pounds 8 ounces | 4 pounds | Over 42 pounds | 48 pounds. |
| | Over 4 pounds | 4 pounds 8 ounces | Over 48 pounds | 54 pounds. |
| | Over 1 pound 8 ounces | 5 pounds | Over 54 pounds | 60 pounds. |
| | Over 5 pounds | 5 pounds 8 ounces | Over 60 pounds | 66 pounds. |
| | Over 5 pounds 8 ounces | None | Over 66 pounds | None. |
| Capons | None | 6 pounds | None | 72 pounds. |
| | Over 6 pounds | 7 pounds | Over 72 pounds | 84 pounds. |
| | Over 7 pounds | 8 pounds | Over 84 pounds | 96 pounds. |
| | Over 8 pounds | 9 pounds | Over 96 pounds | 108 pounds. |
| | Over 9 pounds | 10 pounds | Over 108 pounds | 120 pounds. |
| | Over 10 pounds | None | Over 120 pounds | None. |
| Stags | None | 3 pounds | None | 36 pounds. |
| | Over 3 pounds | 4 pounds | Over 36 pounds | 48 pounds. |
| | Over 4 pounds | 5 pounds | Over 48 pounds | 60 pounds. |
| | Over 5 pounds | 6 pounds | Over 60 pounds | 72 pounds. |
| | Over 6 pounds | None | Over 72 pounds | None. |
| Cocks | None | 4 pounds | None | 48 pounds. |
| | Over 4 pounds | 5 pounds | Over 48 pounds | 60 pounds. |
| | Over 5 pounds | 6 pounds | Over 60 pounds | 72 pounds. |
| | Over 6 pounds | None | Over 72 pounds | None. |
| Hens or stewing chickens or fowl | None | 3 pounds | None | 36 pounds. |
| | Over 3 pounds | 3 pounds 8 ounces | Over 36 pounds | 42 pounds. |
| | Over 3 pounds 8 ounces | 4 pounds | Over 42 pounds | 48 pounds. |
| | Over 4 pounds | 4 pounds 8 ounces | Over 48 pounds | 54 pounds. |
| | Over 4 pounds 8 ounces | 5 pounds | Over 54 pounds | 60 pounds. |
| | Over 5 pounds | None | Over 60 pounds | None |

TABLE II—TURKEYS

| Class | Weight range per carcass | |
|---|---|---|
| | Minimum | Maximum |
| Turkey fryers or roasters | None | 6 pounds. |
| | Over 6 pounds | 8 pounds. |
| | Over 8 pounds | 10 pounds. |
| Young hen turkeys or young tom turkeys | None | 6 pounds. |
| | Over 6 pounds | 8 pounds. |
| | Over 8 pounds | 10 pounds. |
| | Over 10 pounds | 12 pounds. |
| | Over 12 pounds | 14 pounds. |
| | Over 14 pounds | 16 pounds. |
| | Over 16 pounds | 18 pounds. |
| | Over 18 pounds | 20 pounds. |
| | Over 20 pounds | 22 pounds. |
| | Over 22 pounds | 24 pounds. |
| | Over 24 pounds | None. |
| Hen turkeys or tom turkeys | None | 10 pounds. |
| | Over 10 pounds | 15 pounds. |
| | Over 15 pounds | 20 pounds. |
| | Over 20 pounds | None. |

TABLE III—DUCKS, GEESE, GUINEAS, SQUABS, AND PIGEONS

| Kind and class | Weight range per carcass | | Weight range per dozen carcasses | |
|---|---|---|---|---|
| | Minimum | Maximum | Minimum | Maximum |
| Ducks (all classes) | None | 4 pounds | None | 48 pounds. |
| | Over 4 pounds | 5 pounds | Over 48 pounds | 60 pounds. |
| | Over 5 pounds | None | Over 60 pounds | None. |
| Geese (all classes) | None | 8 pounds | None | 96 pounds. |
| | Over 8 pounds | 10 pounds | Over 96 pounds | 120 pounds. |
| | Over 10 pounds | None | Over 120 pounds | None. |
| Guineas (all classes) | None | 1 pound 8 ounces | None | 18 pounds. |
| | Over 1 pound 8 ounces | 2 pounds 4 ounces | Over 18 pounds | 27 pounds. |
| | Over 2 pounds 4 ounces | None | Over 27 pounds | None. |
| Squabs and pigeons | None | 8 ounces | None | 6 pounds. |
| | Over 8 ounces | 11 ounces | Over 6 pounds | 9 pounds 6 ounces. |
| | Over 11 ounces | 14 ounces | Over 8 pounds 6 ounces | 10 pounds 8 ounces. |
| | Over 14 ounces | None | Over 10 pounds 8 ounces | None. |

TABLE IV—READY-TO-COOK POULTRY

| Kinds and classes | Weight range per carcass | |
|---|---|---|
| | Minimum | Maximum |
| Broilers or fryers | None | 1 pound 8 ounces. |
| | Over 1 pound 8 ounces | 2 pounds. |
| | Over 2 pounds | 2 pounds 8 ounces. |
| | Over 2 pounds 8 ounces | 3 pounds. |
| | Over 3 pounds | 3 pounds 8 ounces. |
| | Over 3 pounds 8 ounces | 4 pounds. |
| Roasters | Over 1 pound 8 ounces | 4 pounds 8 ounces. |
| | Over 4 pounds | 5 pounds. |
| | Over 4 pounds 8 ounces | None. |
| | Over 5 pounds | None. |
| | None | 2 pounds. |
| | Over 2 pounds | 2 pounds 8 ounces. |
| | Over 2 pounds 8 ounces | 3 pounds. |
| | Over 3 pounds | 3 pounds 8 ounces. |
| Hens or stewing chickens or fowl | Over 3 pounds 8 ounces | 4 pounds. |
| | Over 4 pounds | 4 pounds 8 ounces. |
| | Over 4 pounds 8 ounces | 5 pounds. |
| | Over 5 pounds | 5 pounds 8 ounces. |
| | Over 5 pounds 8 ounces | None. |
| | None | 2 pounds 8 ounces. |
| | Over 2 pounds 8 ounces | 3 pounds 8 ounces. |
| | Over 3 pounds 8 ounces | 4 pounds 8 ounces. |
| Cocks or old roosters | Over 4 pounds 8 ounces | 5 pounds 8 ounces. |
| | Over 5 pounds 8 ounces | None. |
| | None | 4 pounds. |
| | Over 4 pounds | 6 pounds. |
| | Over 6 pounds | 8 pounds. |
| | Over 8 pounds | 10 pounds. |
| | Over 10 pounds | 12 pounds. |
| | Over 12 pounds | 14 pounds. |
| | Over 14 pounds | 16 pounds. |
| Turkeys and geese (all classes) | Over 16 pounds | 18 pounds. |
| | Over 18 pounds | 20 pounds. |
| | Over 20 pounds | None. |
| | None | 3 pounds. |
| | Over 3 pounds | 3 pounds 8 ounces. |
| | Over 3 pounds 8 ounces | 4 pounds. |
| Ducks (all classes) | Over 4 pounds | None. |
| | None | 12 ounces. |
| | Over 12 ounces | 1 pound. |
| | Over 1 pound | 1 pound 4 ounces. |
| | Over 1 pound 4 ounces | 1 pound 8 ounces. |
| | Over 1 pound 8 ounces | None. |
| Guineas (all classes) | None | 6 ounces. |
| | Over 6 ounces | 10 ounces. |
| | Over 10 ounces | 14 ounces. |
| | Over 14 ounces | None. |
| Pigeons (all classes) | | |

SUBPART C—FORMS, INSTRUCTIONS, AND APPLICATIONS

FORMS OF OFFICIAL IDENTIFICATION

§ 70.380 *Forms of official identification.* The forms prescribed in §§ 70.380 to 70.384 are subject to the requirements of §§ 70.90 to 70.94, Identifying and Marking Products.

§ 70.381 *Form of grade mark.* The grade mark approved for use, pursuant to § 70.91, on a graded product shall be contained within a shield of the form and design indicated in the example in Figure 1 of this section. The information (including the form and arrangement of its wording) which is required in such mark shall be: (a) The class of the product or whether the product is "young," or "mature" (or "old"); (b) the phrase "ready-to-cook"; (c) its U. S. grade, and (d) one of the following phrases: "Federal-State graded," "Government graded," or any other similar phrase which may be approved by the Administrator. In addition, the plant number of the official plant shall be set forth if it does not appear on the packaging material. Such other material as the Administrator may approve may also be included within such shield. However, the grade mark for ready-to-cook poultry may be used only when the product is identified as having been inspected by Federal inspectors or by inspectors of any other inspection system acceptable to the Administrator.

*Example of Grade Mark for Ready-to-Cook Poultry*

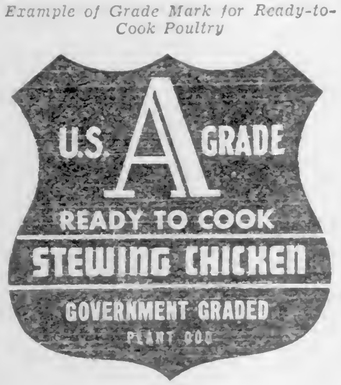

FIGURE 1.

§ 70.382 *Form of inspection mark.* The inspection mark approved for use on inspected and certified edible products shall be contained within a circle and contain the following wording: "Inspected for Wholesomeness by U. S. Department of Agriculture." The form and arrangement of such wording shall be as indicated in the example in Figure 2. In addition, the plant number of the official plant shall be set forth if it does not appear on the packaging material.

*Example*

FIGURE 2.

§ 70.383 *Combined form of grade mark and inspection mark.* With respect to any product which was inspected and graded, a combined form of

*Example*

FIGURE 3.

grade mark and inspection mark is approved for use pursuant to §§ 70.91 and 70.92. Such combination form shall contain applicable wording and be of the form and design as indicated in the example in Figure 3. In addition, the plant number of the official plant shall be set forth if it does not appear on the packaging material. Such other material as the Administrator may approve may be included as a part of the combined form of grade mark and inspection mark. Separate forms of the grade mark and the inspection mark may be used in lieu of the combined form of grade mark and inspection mark.

§ 70.384 *Identification of certain dressed poultry.* With respect to dressed poultry which has been graded or inspected for condition only, the form of identification approved for use shall contain the wording "Dressed Poultry Processed Under USDA Sanitary Standards—Not USDA Graded for Quality or USDA

Inspected for Wholesomeness". All labels with such identification shall set forth the applicable plant number and shall be marked with a lot number which shall be the number of the day of the year on which the poultry was slaughtered. This identification shall be printed on the label and shall not be applied by means of a stencil or a rubber stamp. A rubber stamp may be used to insert the plant number and the lot number within the official mark provided such numbers are applied legibly. The required wording shall be set forth in the manner indicated in Figure 4 of this section and within a rectangle of the form and design illustratcd.

*Example*

DRESSED POULTRY
PROCESSED UNDER U. S. D. A.
SANITARY STANDARDS
Not USDA Graded for Quality
or USDA Inspected for Wholesomeness
Plant No. 000. Lot 000

INSTRUCTIONS GOVERNING THE ADMINISTRATION OF POULTRY INSPECTION WHERE A FEDERAL-STATE SERVICE IS DESIRED

*Basis; Supervision*

§ 70.390 *Basis of providing Federal-State inspection service.* Inspection service rendered pursuant to the regulations governing the grading and inspection of poultry and edible products thereof (Subpart A of this part) may be furnished on a Federal basis or on a Federal-State basis as provided in §§ 70.390 to 70.404. Inspection service in accordance with the regulations shall be furnished on a Federal basis in any State where arrangements have not been made with cooperating State agencies for service on a Federal-State basis. Inspection service shall be furnished on a Federal-State basis in any State in which the cooperating State agency makes a request, and becomes a party to a cooperative agreement which provides for such Federal-State service. Such cooperating parties within the State may be any responsible and qualified agency interested in promoting orderly marketing of poultry products.

§ 70.391 *Supervision.* All inspection service which is provided under the aforesaid regulations and cooperative agreements shall be technically and administratively supervised by the Production and Marketing Administration (hereafter referred to as PMA) through its national and regional supervisory organization. It shall be the responsibility of PMA to determine that the services rendered pursuant to any cooperative agreement under the regulations are conducted in a satisfactory manner, that the actual post-portem inspection of poultry is adequate, and that uniform procedures and policies are followed in all plants in accordance with the requirements of the regulations. In a State where a Federal-State supervisor of inspection is provided, this supervisor shall be immediately responsible for the activities within the State. However, any supervisory official of PMA at a higher administrative level shall have the authority to observe independently of or in conjunction with the Federal-State supervisor, any particular station or the official activities of any particular inspector at any time he deems it advisable; and shall have the authority to supervise such activities as may be desirable and necessary. Supervisory direction should be applied through the Federal-State supervisor.

*Conditions*

§ 70.395 *Regulations.* The regulations of the Secretary of Agriculture governing the grading and inspection of poultry and edible products thereof and instructions of the Administrator governing the inspection of products shall apply to both Federal-State inspection service and to Federal inspection service. PMA shall assume the responsibility for developing the regulations and any instructions issued pursuant thereto and for the supervision of inspection work carried on under the service.

§ 70.396 *Qualifications of Federal-State supervisor.* The Federal-State supervisor of inspection service shall meet the following qualifications:

(a) He shall have a veterinary degree from an accredited school.

(b) He shall have such technical knowledge, experience, and administrative and supervisory ability as will qualify him for satisfactorily performing the duties of a Federal-State supervisor. These qualifications shall be checked by and be acceptable to PMA.

(c) He shall have had experience in the Federal poultry inspection service or have successfully completed a course of training at an interne station which is under the supervision of the Federal poultry inspection service of PMA.

(d) He shall be given a joint Federal-State or a full Federal appointment.

(e) He shall perform supervisory functions in a manner satisfactory to PMA. The Federal-State supervisor may at the discretion of PMA be removed from his position and replaced by another qualified employee whenever such action is in the best interests of PMA.

§ 70.397 *Duties of the Federal-State supervisor.* The Federal-State supervisor of inspection service shall be responsible for the supervision and proper conduct of inspection service within the State or States to which he is assigned. He may be assigned to supervise inspection service in a single State or in two or more adjoining States providing this is agreed to by PMA and the cooperating agencies in such States, except that a Federal-State supervisor shall not have more than 35 plants under his supervision. He shall examine each prospective State inspector and recommend acceptable applicants for a license. Such recommendation shall be in writing and be accompanied by a statement of the qualifications of the applicant. He shall be responsible for making surveys of plants applying for service within his State and present his recommendation for action on such applications in writing accompanied by appropriate supporting evidence to the Federal office of the inspection service. The assignment of State employed inspectors to plants shall be mutually agreeable to the State agency and PMA. Insofar as practicable inspectors will not be assigned to plants where they have been previously employed.

§ 70.398 *Employment and licensing of State inspectors.* (a) The cooperating State agency shall assume responsibility for recruitment and employment of State inspectors for plants under the Federal-State service, and the salaries of such inspectors shall be paid by the State. Such inspectors may be employed only when licensed by PMA, and it shall be understood that PMA shall have the authority to withdraw such license at any time (and thus terminate the services of any such inspector) in accordance with the provisions of the regulations. The licensed State inspector shall not under any circumstance, while a licensed inspector, accept employment, money or remuneration of any kind from the company to which assigned.

(b) Each prospective State inspector shall complete a period of training under the immediate supervision of a Federally employed training supervisor. The license issued to the prospective State inspector shall be a limited license authorizing him to perform inspection work only under the supervision of the inspector-in-charge of the station to which he is assigned. A license authorizing the State inspector to serve as inspector-in-charge of a station may be issued when it has been determined by the officer-in-charge of the poultry grading and inspection service of PMA that the inspector is qualified for such a position.

§ 70.399 *Duties of State-employed inspectors.* The duties of the State-employed inspectors shall be the same as the duties of Federally-employed inspectors. Inspectors shall make proper, accurate and adequate post-mortem examinations of poultry carcasses and shall thoroughly familiarize themselves with and adhere to the inspection procedures and the applicable provisions of the Federal regulations governing inspection service.

§ 70.400 *Replacement of Federal inspectors.* When Federal-State inspection service is inaugurated in a State, and when such service will replace Federal inspection service furnished in the State at that time, the replacement of Federal inspectors by State inspectors shall not be carried out until satisfactory transfers of the Federal inspectors to plants out of the State can be accomplished by PMA.

§ 70.401 *Collection of fees.* Either the cooperating State agency or PMA, as agreed upon, may assume the responsibility for the collection of all fees for Federal-State inspection service in the State. The contract providing for Federal-State inspection service shall be between each firm under Federal-State inspection service and the agency responsible for the collection of fees, and

each such contract, in either case, shall be approved or concurred in by PMA.

§ 70.402 *Reimbursement of PMA by State cooperating agency.* When the cooperating State agency assumes the responsibility for the collection of fees, it shall reimburse PMA from fees collected or from State appropriations, or both, for the following:

(a) An amount equal to that part of the Federal-State supervisor's salary paid by PMA.

(b) An amount equal to salaries of any Federally employed inspectors who perform inspection service in any plant operating under Federal-State inspection service, such salary costs to cover the periods of such assignments.

(c) An amount to cover accrued leave both annual and sick and travel costs incurred by persons referred to in paragraphs (a) and (b) of this section, during periods such persons are performing Federal-State service.

(d) An amount equal to 7 percent of the amounts referred to in paragraphs (a), (b), and (c) of this section.

(e) An amount sufficient to cover overhead in excess of that specified in paragraph (d) of this section, general supervision and other costs and expenses incurred by the Administration in rendering the inspection service.

§ 70.403 *Reimbursement of cooperating State agency by PMA.* When PMA assumes the responsibility for the collection of fees, it shall reimburse the cooperating State agency for the salaries of the State inspectors, for periods during which such inspectors perform Federal-State inspection service, and for such annual and sick leave as may be authorized by the State, and agreed to by PMA.

§ 70.404 *Additional provisions.* The cooperating State agency shall, without cost to PMA, furnish office space, office furniture and equipment, heat, light, clerical assistance, and telephone service for use by the Federal-State supervisor.

APPLICATION FOR GRADING SERVICE

§ 70.410 *Application for grading service with respect to live poultry, dressed poultry, and ready-to-cook poultry.*

Application is hereby made, in accordance with the applicable provisions of the regulations (7 CFR Part 70) governing the grading and inspection of poultry and edible products thereof and United States specifications for classes, standards, and grades with respect thereto, for grading service to be performed at the plant hereinafter designated:

Name of plant ----------
Street address ----------
City and State ----------

(a) Upon approval of this application by the Production and Marketing Administration, United States Department of Agriculture (hereinafter referred to as "PMA"), PMA will furnish grading service in accordance with the terms and conditions hereof.

(b) In making this application, the applicant agrees to comply with the terms and conditions of the aforesaid regulations (including such applicable instructions as may be issued from time to time by the Administrator), and such other conditions as hereinafter enumerated.

(c) The applicant agrees to pay for the full cost of the grading service covered hereby to PMA at the time the respective invoices are rendered by PMA. The full costs shall comprise such of the following items as may be due and may be included, from time to time, in the invoice or invoices covering the period or periods during which the grading service may be rendered:

(i) A charge of $75.00 for the initial survey (required to be made with respect to an official plant pursuant to the aforesaid regulations) of the designated plant and its premises (but no charge for the final survey) prior to the performance, by the Administration, of the grading service covered hereby: *Provided*, That, if at the time of submission of this application for poultry grading service such designated plant is an official plant in which inspection service is performed by the Administration and poultry grading service has not been performed by the Administration in such plant during the twelve-month period ending on the date of this application, the charge for the survey shall be computed in the manner specified in subparagraph (ii) of this paragraph;

(ii) A charge for each additional survey to be computed on the basis (a) of the actual cost to the Administration of the travel and per diem incurred in the making of the survey, and (b) a charge of $3.60 per hour for the time consumed in making the survey;

(iii) An inauguration charge of $50.00 to cover costs incurred by PMA in connection with the inauguration of the grading service and assignment of a grader to the designated plant;

(iv) A charge of $25.00 for each additional grader or replacement of a previously assigned grader to the designated plant: *Provided*, That, no charge under this subdivision (iv) is to be made for temporary relief graders for regular graders or for the replacement of a grader who is a Federal employee when the replacement is made by PMA other than at the request of the applicant;

(v) A charge equal to the salary costs paid to each grader assigned to applicant's plant by PMA, including earned annual leave and, if necessary, earned sick leave: *Provided*, That, no charge is to be made for salary costs for any assigned grader of the designated plant while temporarily reassigned by PMA to perform a grading service for other than the applicant;

(vi) A charge equal to the salary costs, travel expenses and per diem paid by PMA to any grader whose services are required for relief purposes when regular graders are on annual or sick leave;

(vii) A charge for the actual cost to PMA of any travel and per diem incurred by each grader assigned to the plant while in the performance of grading service rendered the applicant;

(viii) A charge, at the sole discretion of PMA, of an amount not in excess of the actual cost to PMA of the travel (including the cost of movement of household goods and dependents) and per diem with respect to each grader who is transferred from an official station to the designated plant;

(ix) A charge included in salary costs equal to the Employer's tax imposed under the United States Internal Revenue Code (26 U. S. C.) for Old Age and Survivor's benefits under the Social Security System; and

(x) An administrative service charge based upon the aggregate weight of the total monthly volume of all products handled in the plant, and computed in accordance with the following table:

Computation of administrative service charges:

| | |
|---|---|
| 0 to 20,000 pounds | $25.00 |
| 20,000 to 100,000 pounds | 30.00 |
| 100,000 to 150,000 pounds | 35.00 |
| 150,000 to 200,000 pounds | 40.00 |
| 200,000 to 250,000 pounds | 45.00 |
| 250,000 to 300,000 pounds | 50.00 |
| 300,000 to 400,000 pounds | 55.00 |
| 400,000 to 500,000 pounds | 60.00 |
| 500,000 to 600,000 pounds | 65.00 |
| 600,000 to 700,000 pounds | 70.00 |
| 700,000 pounds or more | 75.00 |

(d) The applicant shall designate, in writing, the employees of the applicant who will be required and authorized, to furnish each grader with such information as may be necessary for the performance of the grading service.

It is agreed that:

(a) PMA will provide an adequate number of graders to perform the grading service covered hereby;

(b) At the sole discretion of PMA the graders may be either a Federal or State employee or a licensed employee of the applicant;

(c) PMA shall not be responsible for damages accruing through any acts of commission or omission on the part of any grader;

(d) The provisions hereof shall continue in full force and effect from its effective date until suspended, withdrawn, or terminated, by (i) mutual consent of the applicant and PMA; (ii) written notice given by either party to the other to take effect on a specific date not less than 30 days from the date of the giving of such notice; (iii) one (1) days written notice by PMA to the applicant if the applicant fails to honor any invoice within thirty (30) days after date of invoice covering the cost of the grading service as herein provided; or (iv) termination of the services requested herein pursuant to the provisions in the following paragraph (e);

(e) The services to be rendered hereunder shall be terminated by PMA at any time PMA, acting pursuant to any applicable laws, rules, or regulations, debars the applicant from receiving any further benefits of the service, or the services hereunder may be suspended or terminated at any time PMA concludes that the applicant has not conformed, or cannot conform, hereto;

(f) All terms used herein shall have the same meaning as when used in the aforesaid regulations and instructions;

(g) A federally employed grader will be required to confine his activities to those duties necessary in the rendering of grading service and such closely related activities as may be approved by PMA: *Provided*, That, in no instance will the federally employed grader assume the duties of management;

(h) No member of or Delegate to Congress, or Resident Commissioner, shall be admitted to any share or part of this agreement or to any benefit that may arise therefrom unless derived through the agreement made with a corporation for its general benefit.

## Chapter IX—Production and Marketing Administration (Marketing Agreements and Orders), Department of Agriculture

[Docket No. AO-177-A12]

PART 972—MILK IN TRI-STATE MARKETING AREA

SUBPART—ORDER REGULATING HANDLING

Sec.
972.0 Findings and determinations.

DEFINITIONS

972.1 Act.
972.2 Secretary.
972.3 Department of Agriculture.
972.4 Person.
972.5 Tri-State marketing area.
972.6 Route.
972.7 Fluid milk plant.
972.8 Huntington district plant.
972.9 Gallipolis district plant.
972.10 Scioto district plant.
972.11 Athens district plant.
972.12 Nonfluid milk plant.
972.13 Producer.
972.14 Producer milk.
972.15 Delivery period.
972.16 Handler.
972.17 Producer-handler.
972.18 Other source milk.

MARKET ADMINISTRATOR

972.20 Designation.
972.21 Powers.
972.22 Duties.

REPORTS, RECORDS, AND FACILITIES

972.25 Delivery period reports of receipts and utilization.
972.26 Other reports.
972.27 Records and facilities.
972.28 Retention of records.

CLASSIFICATION

972.30 Skim milk and butterfat to be classified.
972.31 Classes of utilization.
972.32 Shrinkage.
972.33 Responsibility of handlers and reclassification of milk.
972.34 Transfers.
972.35 Computation of skim milk and butterfat in each class.
972.36 Allocation of skim milk and butterfat classified.

MINIMUM PRICES

972.40 Basic formula price to be used in determining class prices.
972.41 Class I milk prices.
972.42 Class II milk prices.
972.43 Class III milk prices.
972.44 Butterfat differentials to handlers.
972.45 Emergency price provisions.
972.46 Prices for Class I, Class II and Class III milk disposed of outside the marketing area.
972.47 Price of Class I or Class II milk transferred by one handler to another handler.

APPLICATION OF PROVISIONS

972.50 Producer-handlers.
972.51 Exempt milk.
972.52 Milk caused to be delivered by an association of producers.
972.53 Diverted milk.

DETERMINATION OF UNIFORM PRICES

972.60 Computation of value of milk.
972.61 Computation of uniform prices.
972.62 Notification of handlers.

PAYMENTS

972.65 Time and method of final payment.
972.66 Partial payments.
Sec.
972.70 Butterfat differential.
972.71 Expense of administration.

MARKETING SERVICE DEDUCTIONS

972.75 Payments to market administrator.
972.76 Payments to cooperative associations.

ADJUSTMENT OF ACCOUNTS

972.80 Errors in payments.
972.81 Overdue accounts.

MISCELLANEOUS PROVISIONS

972.85 Effective time.
972.86 Suspension or termination.
972.87 Continuing power and duty of the market administrator.
972.88 Liquidation after suspension or termination.
972.89 Agents.
972.90 Separability of provisions.
972.91 Termination of obligation.

AUTHORITY: §§ 972.0 to 972.91 issued under sec. 5, 49 Stat. 753, as amended; 7 U. S. C. and Sup. 608c.

§ 972.0 *Findings and determinations.* The findings and determinations hereinafter set forth are supplementary and in addition to the findings and determinations previously made in connection with the issuance of the aforesaid order and of each of the previously issued amendments thereto; and all of said previous findings and determinations are hereby ratified and affirmed, except insofar as such findings and determinations may be in conflict with the findings and determinations set forth herein.

(a) *Findings upon the basis of the hearing record.* Pursuant to the provisions of the Agricultural Marketing Agreement Act of 1937, as amended (7 U. S. C. 601 et seq.), and the applicable rules of practice and procedure, as amended, governing the formulation of marketing agreements and marketing orders (7 CFR Part 900), a public hearing was held upon certain proposed amendments to the tentative marketing agreement and to the order, as amended, regulating the handling of milk in the Tri-State marketing area. Upon the basis of the evidence introduced at such hearing and the record thereof, it is found that:

(1) The said order, as amended, and as hereby further amended, and all of the terms and conditions thereof, will tend to effectuate the declared policy of the act;

(2) The parity prices of milk produced for sale in the said marketing area as determined pursuant to section 2 of the act are not reasonable in view of the price of feeds, available supplies of feeds and other economic conditions which affect market supplies of and demand for such milk, and the minimum prices specified in the order, as amended, and as hereby further amended, are such prices as will reflect the aforesaid factors, insure a sufficient quantity of pure and wholesome milk and be in the public interest; and

(3) The said order, as amended, and as hereby further amended, regulates the handling of milk in the same manner as and is applicable only to persons in the respective classes of industrial and commercial activity specified in a marketing agreement upon which a hearing has been held.

(4) All milk and milk products handled by handlers as defined in this order amending the order, as amended, are in the current of interstate commerce or directly burden, obstruct, or affect interstate commerce in milk and its products; and

(5) The necessary expenses of the market administrator for the maintenance and functioning of such agency will require the payment by each handler as his pro-rata share of such expense 4 cents per hundredweight or such lesser amount as the Secretary may prescribe with respect to all receipts of producer milk (including such handler's own production) and of other source milk classified as Class I milk pursuant to § 972.31 (a) (1) or as Class II milk.

(b) *Additional findings.* It is hereby found and determined that good cause exists for making this order amending the order, as amended, effective on November 1, 1953. The regulatory provisions of this order amending the order, as amended, are such that no extensive preparation prior to its effective date will be required of handlers regulated thereunder. The regulatory provisions of this order amending the order, as amended, are well known to handlers—a hearing on proposals containing provisions similar to the regulatory provisions of this order amending the order, as amended, was held in May 1953; the recommended decision in this proceeding containing regulatory provisions substantially the same as those contained herein was issued on September 11, 1953; and the decision the regulatory provisions of which are made a part of this order amending the order, as amended, was issued on October 23, 1953. Under these circumstances handlers will be afforded reasonable time for such preparations as may be necessary. The undesirable marketing conditions which this order amending the order, as amended, is designed to correct are such that their continued existence tends to further jeopardize the orderly marketing of milk in the Tri-State marketing area. Therefore, it is impracticable, unnecessary, and contrary to the public interest to delay the effective date of this order amending the order, as amended, until at least 30 days after its publication in the FEDERAL REGISTER, and good cause exists pursuant to section 4 (c) of the Administrative Procedure Act (5 U. S. C. 1000) for making this order amending the order, as amended, effective November 1, 1953.

(c) *Determinations.* It is hereby determined that handlers (excluding cooperative associations of producers who are not engaged in processing, distributing or shipping milk covered by this order amending the order, as amended, which is marketed within the Tri-State marketing area) of more than 50 percent of the milk which is marketed within the said marketing area, refused or failed to sign the proposed marketing agreement regulating the handling of milk in the said marketing area, and it is hereby further determined that:

(1) The refusal or failure of such handlers to sign said proposed marketing agreement tends to prevent the effectuation of the declared policy of the act;

(2) The issuance of this order amending the order, as amended, is the only practical means, pursuant to the declared policy of the act, of advancing the interests of producers of milk which is produced for sale in the said marketing area; and

(3) The issuance of this order amending the order, as amended, is approved or favored by at least two-thirds of the producers who during the determined representative period (May 1953) were engaged in the production of milk for sale in the said marketing area and who participated in a referendum to ascertain producer approval or disapproval of the issuance of such order amending the order, as amended.

(4) The terms and conditions of this order amending the order, as amended, providing for the payment to all producers and associations of producers delivering milk to the same handler of uniform prices for all milk delivered by them are approved or favored by at least three-fourths of the producers who during a representative period (May 1953) were engaged in the production of milk for sale in the said marketing area and who participated in a referendum to ascertain producer approval or disapproval of the issuance of such order amending the order, as amended.

*Order relative to handling.* It is therefore ordered that on and after the effective date thereof the handling of milk in the Tri-State marketing area shall be in conformity to and in compliance with the terms and conditions of the aforesaid order, as amended, and as hereby further amended, and the aforesaid order, as amended, is hereby further amended as follows:

DEFINITIONS

§ 972.1 *Act.* "Act" means Public Act No. 10, 73d Congress, as amended and as reenacted and amended by the Agricultural Marketing Agreement Act of 1937, as amended (7 U. S. C. 601 et seq.).

§ 972.2 *Secretary.* "Secretary" means the Secretary of Agriculture of the United States or such other officer or employee of the United States authorized to exercise the powers or to perform the duties of the Secretary of Agriculture.

§ 972.3 *Department of Agriculture.* "Department of Agriculture" means the United States Department of Agriculture or such other Federal agency authorized to perform the price reporting functions specified in §§ 972.40 and 972.44.

§ 972.4 *Person.* "Person" means any individual, partnership, corporation, association, or any other business unit.

§ 972.5 *Tri-State marketing area.* "Tri-State marketing area," hereinafter called the "marketing area," means the territory lying within the boundaries of (a) Boyd County, Kentucky; (b) Athens County; Gallipolis Township of Gallia County; Jackson County, except Bloomfield and Jackson Townships; Fayette, Hamilton, Perry, Rome, Union, and Upper Townships of Lawrence County; Beaver, Camp Creek, Jackson, Marion, Newton, Pee Pee, Scioto, Seal, and Union Townships of Pike County; Scioto County; and Belpre, Marietta, and Muskingum Townships of Washington County; all in Ohio; and (c) Cabell County, except McComas and Union Magisterial Districts; Graham, Lewis, and Waggoner Magisterial Districts of Mason County; Ceredo, Union, and Westmoreland Magisterial Districts of Wayne County; and Lubeck, Parkersburg, Tygart, and Williams Magisterial Districts of Wood County; all in West Virginia; including but not limited to, all municipal corporations in the above described area.

§ 972.6 *Route.* "Route" means delivery route (including a plant store) on which milk, skim milk, buttermilk, flavored milk, or flavored milk drink is distributed for consumption in fluid form to wholesale or retail shops other than to any milk plant(s).

§ 972.7 *Fluid milk plant.* Any milk handling plant (hereinafter referred to as a "plant") except a plant at which the handling of milk is regulated by another milk marketing agreement or order issued pursuant to the act shall be a "fluid milk plant":

(a) In any delivery period in which a route is operated wholly or partially within the marketing area from such plant;

(b) In any delivery period in which a total of 25,000 pounds or more of milk is delivered in the form of milk from such plant to one or more plants which are fluid milk plants pursuant to paragraph (a) of this section: *Provided*, That a plant shall not be a fluid milk plant pursuant to this paragraph during any delivery period prior to May 1954 or during any of the subsequent delivery periods of September through April in which milk is delivered from such plant to one or more fluid milk plants pursuant to paragraph (a) of this section on less than one day of each week ending within such delivery period: *And further provided*, That a "fluid milk plant" pursuant to this section shall not mean such portions of a building or facilities used for receiving or processing such milk, or milk product, as is required by the appropriate health authority to be kept physically separate from the receiving or processing of Class I milk for the community(s) served.

§ 972.8 *Huntington district plant.* "Huntington district plant" means a fluid milk plant located in Boyd or Greenup County, Kentucky, Cabell, Logan, or Wayne County, West Virginia, or Lawrence County, Ohio.

§ 972.9 *Gallipolis district plant.* "Gallipolis district plant" means a fluid milk plant located in Gallia County, Ohio, or in Mason County, West Virginia.

§ 972.10 *Scioto district plant.* "Scioto district plant" means a fluid milk plant located in Jackson, Pike, Scioto, or Vinton County, Ohio.

§ 972.11 *Athens district plant.* "Athens district plant" means a fluid milk plant which is not a Huntington district plant, a Gallipolis district plant, or a Scioto district plant.

§ 972.12 *Nonfluid milk plant.* "Nonfluid milk plant" means any milk processing or manufacturing plant not a fluid milk plant pursuant to § 972.7.

§ 972.13 *Producer.* "Producer" means a person who produces milk received:

(a) At a fluid milk plant,

(b) At a nonfluid milk plant by diversion within April, May, June, or July from a fluid milk plant, or

(c) By an association in its capacity as a handler: *Provided*, That such person producing milk holds a dairy farm inspection permit or equivalent certification if required by the appropriate health authority of the community for which his milk is produced.

§ 972.14 *Producer milk.* "Producer milk" means milk produced by one or more producers under the conditions set forth in § 972.13.

§ 972.15 *Delivery period.* "Delivery period" means the calendar month or the total portion thereof during which this part is in effect.

§ 972.16 *Handler.* "Handler" means:

(a) A person who operates a fluid milk plant, or

(b) An association of producers with respect to milk customarily received at producer milk at a fluid milk plant which is diverted by such association within April, May, June or July on its account from a fluid milk plant to a nonfluid milk plant.

§ 972.17 *Producer-handler.* "Producer-handler" means any person who:

(a) Produces milk but receives no milk from dairy farmers, and

(b) Operates a route extending into the marketing area.

§ 972.18 *Other source milk.* "Other source milk" means all skim milk (including reconstituted skim milk) and butterfat not received from a producer, or from a fluid milk plant, but:

(a) Contained in milk, skim milk, or cream, or

(b) Used to produce any milk product.

MARKET ADMINISTRATOR

§ 972.20 *Designation.* The agency for the administration of this part shall be a market administrator, selected by the Secretary, who shall be entitled to such compensation as may be determined by and shall be subject to removal at the discretion of, the Secretary.

§ 972.21 *Powers.* The market administrator shall have the following powers with respect to this part:

(a) To administer its terms and provisions;

(b) To make rules and regulations to effectuate its terms and provisions;

(c) To receive, investigate, and report to the Secretary complaints of violations; and

(d) To recommend amendments to the Secretary.

§ 972.22 *Duties.* The market administrator shall perform all duties necessary to administer the terms and provisions of this part, including, but not limited to, the following:

(a) Within 30 days following the date on which he enters upon his duties, or such lesser period as may be prescribed by the Secretary, execute and deliver to the Secretary a bond, effective as of the date on which he enters upon such duties and conditioned upon the faithful performance of such duties, in an amount and with surety thereon satisfactory to the Secretary;

(b) Employ and fix the compensation of such persons as may be necessary to enable him to administer its terms and provisions;

(c) Obtain a bond in a reasonable amount and with reasonable surety thereon covering each employee, who handles funds entrusted, to the market administrator;

(d) Pay, out of the funds provided by § 972.71:

(1) The cost of his bond and of the bonds of his employees;

(2) His own compensation; and

(3) All other expenses, except those incurred under § 972.75 necessarily incurred by him in the maintenance and functioning of his office and in the performance of his duties;

(e) Keep such books and records as will clearly reflect the transactions provided for in this part, and upon request by the Secretary, surrender the same to such other person as the Secretary may designate;

(f) Publicly announce, unless otherwise directed by the Secretary, by posting in a conspicuous place in his office and by such other means as he deems appropriate, the name of any person who within 15 days after the day upon which he is required to perform such acts, has not made:

(1) Reports pursuant to §§ 972.25 or 972.26, or

(2) Payments pursuant to §§ 972.65 through 972.81;

(g) Submit his books and records to examination by the Secretary and furnish such information and reports as may be requested by the Secretary;

(h) Upon request, supply on or before the 25th day after the end of each delivery period to each association of producers with respect to producers whose membership in such association has been verified by the market administrator, a record of the pounds of milk received by each handler from member producers and the class utilization of such milk. For the purpose of this report such member milk shall be prorated to each class in the proportions that the total receipts of milk from producers by such handler were classified in each class;

(i) Audit all reports and payments by each handler by inspection of such handler's records and of the records of any other handler or person upon whose utilization the classification of skim milk and butterfat for such handler depends; and

(j) Publicly announce, by posting in a conspicuous place in his office and by such other means as he deems appropriate, the prices determined for each delivery period as follows:

(1) On or before the 5th day after the end of such delivery period, the class prices and butterfat differentials computed pursuant to §§ 972.41 through 972.44; and

(2) On or before the 10th day after the end of such delivery period, the uniform prices computed pursuant to § 972.61 and the butterfat differential computed pursuant to § 972.70.

REPORTS, RECORDS, AND FACILITIES

§ 972.25 *Delivery period reports of receipts and utilization.* On or before the 5th day after the end of each delivery period each handler, except a producer-handler, shall report the following to the market administrator with respect to all producer milk received, all other source milk received at a fluid milk plant, and all skim milk and butterfat received in any form at a fluid milk plant from any other fluid milk plant, within such delivery period in the detail and on forms prescribed by the market administrator:

(a) The quantities of butterfat and quantities of skim milk contained in (or used in the production of) such receipts, and their sources;

(b) The utilization of such receipts; and

(c) Such other information with respect to such receipts and utilization as the market administrator may prescribe.

§ 972.26 *Other reports.* Handlers shall submit other reports as follows:

(a) The intention to receive other source milk shall be reported by the receiving handler on or before the first day other source milk is received and the intention to discontinue such receipts shall be reported on or before the last day such milk is received.

(b) Each producer-handler shall make reports to the market administrator at such time and in such manner as the market administrator may request.

(c) On or before the 20th day after the end of each delivery period each handler shall submit to the market administrator such handler's producer payroll for the delivery period, which shall show:

(1) The total pounds of milk received from each producer and association of producers and the total pounds of butterfat contained in such milk.

(2) The amount of payment to each producer and association of producers, and

(3) The nature and the amount of any deductions and charges involved in the payments referred to in subparagraph (2) of this paragraph.

§ 972.27 *Records and facilities.* Each handler shall maintain, and make available to the market administrator during the usual hours of business, such accounts and records of his operations and such facilities as, in the opinion of the market administrator, are necessary to verify or to establish the correct data with respect to:

(a) The utilization, in whatever form, of all skim milk and butterfat received;

(b) The weights, samples, and tests for butterfat and for other content of all skim milk and butterfat handled;

(c) Payments to producers and associations of producers, and

(d) The pounds of skim milk and butterfat contained in or represented by all milk, skim milk, cream and each milk product on hand at the beginning and at the end of each delivery period.

§ 972.28 *Retention of records.* All books and records required under this part to be made available to the market administrator shall be retained by the handler for a period of three years to begin at the end of the calendar month to which such books and records pertain, except that all such books and records pertaining to transactions before August 1, 1949, shall be retained until October 1, 1949: *Provided*, That if within such three-year period or before October 1, 1949, whichever is applicable, the market administrator notifies the handler in writing that the retention of such books and records, or of specified books and records, is necessary in connection with a proceeding under section 8c (15) (A) of the act or a court action specified in such notice, the handler shall retain such books and records, or specified books and records, until further written notification from the market administrator. In either case the market administrator shall give further written notification to the handler promptly upon the termination of the litigation or when the records are no longer necessary in connection therewith.

CLASSIFICATION

§ 972.30 *Skim milk and butterfat to be classified.* Skim milk and butterfat contained in milk, skim milk, and cream, or used to produce milk products, received from all sources within the delivery period by a handler at his fluid milk plant(s), and all producer milk received within the delivery period in the manner described in § 972.16 (b) shall be classified by the market administrator pursuant to §§ 972.31 through 972.34.

§ 972.31 *Classes of utilization.* Subject to the conditions set forth in §§ 972.32 through 972.34, the skim milk and butterfat described in § 972.30 shall be classified by the market administrator on the basis of the following classes:

(a) Class I milk shall be all skim milk (including reconstituted skim milk) and butterfat:

(1) Disposed of in fluid form as milk, skim milk (except as provided in paragraph (c) (2) and (3) of this section), or flavored milk or flavored milk drink; and

(2) Not specifically accounted for under subparagraph (1) of this paragraph or as Class II milk or Class III milk.

(b) Class II milk shall be all skim milk (including reconstituted skim milk) and butterfat disposed of in fluid form as cream or any mixture of cream and milk (or skim milk) containing not less than 6 percent of butterfat, or buttermilk (except as provided in paragraph (c) (2) of this section).

(c) Class III milk shall be all skim milk and butterfat:

(1) Used to produce a milk product other than any of those specified in paragraphs (a) (1) or (b) of this section;

(2) Dumped or disposed of for livestock feeding as skim milk or buttermilk;

(3) Disposed of as bulk skim milk to any manufacturer of candy, soup, or bakery products who does not dispose of milk in fluid form;

(4) In actual plant shrinkage of producer milk computed pursuant to

§ 972.32 (d) but not in excess of 2 percent thereof; and

(5) In actual plant shrinkage of other source milk computed pursuant to § 972.32 (d).

§ 972.32 *Shrinkage.* The market administrator shall determine the shrinkage of skim milk and butterfat, respectively, in producer milk and in other source milk in the following manner:

(a) Compute the total shrinkage of skim milk and butterfat, respectively, by:

(1) Combining the shrinkage thereof for all fluid milk plants operated by the handler, and

(2) Combining in a separate sum the shrinkage thereof for all nonfluid milk plants operated by him to which any skim milk or butterfat has been transferred from any of his fluid milk plants;

(b) Prorate the shrinkage of skim milk and butterfat, respectively, computed pursuant to paragraph (a) (2) of this section in such nonfluid milk plants between:

(1) Skim milk or butterfat, respectively, transferred from any of his fluid milk plants, and

(2) Skim milk or butterfat, respectively, received from all other sources;

(c) Add to the shrinkage of skim milk and butterfat, respectively, computed pursuant to paragraph (a) (1) of this section, the shrinkage of skim milk or butterfat, respectively, transferred from the handler's fluid milk plants to his nonfluid milk plants, computed pursuant to paragraph (b) of this section; and

(d) Prorate the total shrinkage of skim milk and butterfat, respectively, computed pursuant to paragraph (c) of this section between producer milk and other source milk at his fluid milk plants after deducting from the total receipts therein, the receipts from fluid milk plants other than his own.

§ 972.33 *Responsibility of handlers and reclassification of milk.* All skim milk and butterfat shall be Class I milk, unless the handler who first receives such skim milk or butterfat proves to the market administrator that such skim milk or butterfat should be classified otherwise. Any skim milk or butterfat classified (except that transferred to a producer-handler) in one class shall be reclassified if used or reused by such handler or by another handler in another class.

§ 972.34 *Transfers.* Skim milk or butterfat transferred from a handler's fluid milk plant to any other plant shall be classified as Class I milk if so transferred as any item listed in § 972.31 (a) (1) and as Class II milk if so transferred as any item listed in § 972.31 (b);

(a) To another fluid milk plant of a handler (except a producer-handler) unless utilization in another class is mutually indicated in writing to the market administrator by both handlers on or before the 5th day after the end of the delivery period within which such transfer was made: *Provided*, That skim milk or butterfat assigned to a particular class shall be limited to the amount thereof remaining in such class in the fluid milk plant of the transferee handler after the subtraction of other source milk pursuant to § 972.36 (a) (2), and any excess of such transferred skim milk or butterfat, respectively, shall be assigned in series beginning with the next lowest-priced available class;

(b) To a producer-handler; and

(c) To a nonfluid milk plant unless:

(1) Other utilization is mutually indicated in writing to the market administrator by both the buyer and seller on or before the 5th day after the end of the delivery period within which such transfer was made,

(2) The buyer maintains books and records showing utilization of all skim milk and butterfat at his plant which are made available if requested by the market administrator for audit, and

(3) Such buyer's plant had actually used not less than an equivalent amount of skim milk or butterfat in the use indicated in such statement: *Provided*, That if such buyer's plant had not actually used an equivalent amount of skim milk or butterfat in such indicated use, the remaining pounds shall be classified in the next lowest-priced available class of utilization as if the classes of utilization set forth in § 972.31 were applicable to such buyer's plant.

§ 972.35 *Computation of skim milk and butterfat in each class.* For each delivery period, the market administrator shall correct for mathematical and for other obvious errors the delivery period report submitted by each handler and compute the total pounds of skim milk and butterfat, respectively, in Class I milk, Class II milk and Class III milk for such handler.

§ 972.36 *Allocation of skim milk and butterfat classified.* The classification of skim milk and butterfat in producer milk shall be determined as follows:

(a) The pounds of skim milk remaining in each class after making the following computations shall be the pounds in such class allocated to producer milk:

(1) Subtract from the total pounds of skim milk in Class III milk the pounds of skim milk in plant shrinkage pursuant to § 972.31 (c) (4);

(2) Subtract from the pounds of skim milk remaining in each class after making the deduction pursuant to subparagraph (1) of this paragraph, in series beginning with the lowest-priced available class, the pounds of skim milk in other source milk;

(3) Subtract from the remaining pounds of skim milk in each class the pounds of skim milk received from other fluid milk plants in such classes pursuant to § 972.34 (a);

(4) Add to the remaining pounds of skim milk in Class III milk the pounds of skim milk subtracted pursuant to subparagraph (1) of this paragraph; and

(5) If the remaining pounds of skim milk in all classes exceed the pounds of skim milk in producer milk, subtract such excess from the remaining pounds of skim milk in each class in series beginning with the lowest-priced available class.

(b) Allocate classified butterfat to producer milk according to the method prescribed in paragraph (a) of this section for skim milk.

(c) Determine the weighted average butterfat test of the remaining milk in each class computed pursuant to paragraphs (a) and (b) of this section.

MINIMUM PRICES

§ 972.40 *Basic formula price to be used in determining class prices.* The basic formula price per hundredweight of milk to be used in determining the class prices provided by §§ 972.41 through 972.43 shall be the highest of the prices per hundredweight for milk of 3.5 percent butterfat content determined by the market administrator pursuant to paragraphs (a), (b), or (c) of this section computed to the nearest tenth of a cent.

(a) The average of the basic (or field) prices per hundredweight reported to have been paid or to be paid for milk of 3.5 percent butterfat content received from farmers during the delivery period at the following plants or places for which prices have been reported to the market administrator or to the Department of Agriculture.

| *Present Operator and Location* |
|---|
| Borden Co., Black Creek, Wis. |
| Borden Co., Greenville, Wis. |
| Borden Co., Mt. Pleasant, Mich. |
| Borden Co., New London, Wis. |
| Borden Co., Orfordville, Wis. |
| Carnation Co., Berlin, Wis. |
| Carnation Co., Jefferson, Wis. |
| Carnation Co., Chilton, Wis. |
| Carnation Co., Oconomowoc, Wis. |
| Carnation Co., Richland Center, Wis. |
| Carnation Co., Sparta, Mich. |
| Pet Milk Co., Belleville, Wis. |
| Pet Milk Co., Coopersville, Mich. |
| Pet Milk Co., Hudson, Mich. |
| Pet Milk Co., New Glarus, Wis. |
| Pet Milk Co., Wayland, Mich. |
| White House Milk Co., Manitowoc, Wis. |
| White House Milk Co., West Bend, Wis. |

(b) The price per hundredweight computed as follows:

(1) Multiply by six the average wholesale price per pound of 92-score butter at Chicago as reported by the Department of Agriculture for the delivery period;

(2) Add an amount equal to 2.4 times the average weekly prevailing price per pound of "Twins" during the delivery period on the Wisconsin Cheese Exchange at Plymouth, Wisconsin: *Provided*, That if the price of "Twins" is not quoted on the Wisconsin Cheese Exchange the weekly prevailing price per pound of "Cheddars" shall be used; and

(3) Divide by seven, add 30 percent thereof, and then multiply by 3.5.

(c) The price per hundredweight computed by adding together the plus values pursuant to subparagraphs (1) and (2) of this paragraph:

(1) From the average wholesale price per pound of 92-score butter at Chicago, as reported by the Department of Agriculture for the delivery period, subtract three cents, add 20 percent thereof, and then multiply by 3.5; and

(2) From the average of the carlot prices per pound of nonfat dry milk solids for human consumption, spray and roller process, f. o. b. manufacturing plants, as published for the Chicago area for the delivery period by the Department of Agriculture, including in the average the quotations published for any fractional part of the previous delivery period which were not published and available for the price determination of such nonfat dry milk solids for the previous delivery period, deduct 5.5 cents, multiply by 8.5 and then multiply by 0.965.

§ 972.41 *Class I milk prices.* Subject to the provisions of §§ 972.44 through 972.47, the minimum prices per hundredweight on a 3.5 percent butterfat content basis to be paid by each handler for producer milk classified as Class I milk, shall be the basic formula price determined pursuant to § 972.40 adjusted as follows:

(a) Add the following amounts for the delivery periods indicated:

| | April, May, June, and July | February, March, August, and September | October, November, December, and January |
|---|---|---|---|
| Ha[illegible]ton district plants | $1.00 | $1.45 | $1.90 |
| [illegible] district plants | .90 | 1.35 | 1.80 |
| [illegible]rict plants | .80 | 1.25 | 1.70 |
| Ath[illegible] district plants | .70 | 1.15 | 1.60 |

(b) Add or subtract a "supply-demand adjustment" computed as follows:

(1) Divide the total gross volume of Class I milk (less interhandler transfers) at all fluid milk plants of handlers in the first and second preceding delivery periods by the total receipts of milk from producers at such plants during the same delivery periods, multiply the result by 100, and round to the nearest whole number. The result shall be known as the "current utilization percentage."

(2) Compute a "net utilization percentage" by subtracting from the current utilization percentage as computed in subparagraph (1) of this paragraph the appropriate "standard utilization percentage" shown below:

| Delivery period for which price is being computed | Standard utilization percentage | |
|---|---|---|
| | For use in computing prices for May 1954 and subsequent delivery periods | For use in computing prices for delivery periods prior to May 1954 |
| [illegible]ary | 84 | 102 |
| [illegible] | 84 | 100 |
| [illegible] | 80 | 98 |
| [illegible] | 77 | 93 |
| [illegible] | 71 | 86 |
| [illegible] | 60 | 73 |
| [illegible] | 70 | 84 |
| [illegible] | 72 | 64 |
| [illegible]r | 76 | 67 |
| [illegible]r | 69 | 57 |
| [illegible]er | 72 | 88 |
| [illegible]er | 81 | 98 |

(3) Determine the amount of the supply-demand adjustment as follows: *Provided*, That the amount of the supply-demand adjustment for each delivery period prior to August 1954 shall not exceed plus 28 cents or shall not be less than minus 28 cents.

| If net utilization percentage is: | *Supply-demand adjustment is* (cents) |
|---|---|
| +12 or over | +38 |
| +9 or +10 | +28 |
| +6 or +7 | +20 |
| +3 or +4 | +10 |
| +1 or −1 | 0 |
| −3 or −4 | −10 |
| −6 or −7 | −20 |
| −9 or −10 | −28 |
| −12 or over | −38 |

When the net utilization percentage does not fall within a tabulated bracket, the supply-demand adjustment shall be determined by the adjacent bracket which is the same or nearest to the bracket used in the previous month. If in the first delivery period this supply-demand adjustment is in effect the net utilization percentage does not fall within a tabulated bracket, the supply-demand adjustment shall be determined by the adjacent bracket which would have been used in determining the supply-demand adjustment had it been in effect in the previous month.

§ 972.42 *Class II milk prices.* Subject to the provisions of §§ 972.44 through 972.47, the minimum prices per hundredweight of a 3.5 percent butterfat content basis to be paid by each handler for producer milk classified as Class II milk shall be the Class I milk price determined pursuant to § 972.41 minus 30 cents.

§ 972.43 *Class III milk prices.* Subject to the provisions of §§ 972.44 through 972.47, the minimum price per hundredweight on a 3.5 percent butterfat content basis to be paid by each handler for producer milk classified as Class III milk, shall be the basic formula price.

§ 972.44 *Butterfat differentials to handlers.* If the weighted average butterfat test of producer milk which is classified in any class, respectively, for any handler, is more or less than 3.5 percent, there shall be added to or subtracted from, as the case may be, the price for such class, for each one-tenth of one percent that such weighted average butterfat test is above or below 3.5 percent, a butterfat differential (computed to the nearest tenth of a cent) calculated by the market administrator for such class as follows:

(a) *Class I milk.* Multiply by 1.2 the average wholesale price per pound of 92-score butter at Chicago as reported by the Department of Agriculture for the delivery period, divide the result by 10 and add 1.0 cent.

(b) *Class II milk.* Multiply by 1.2 the average wholesale price per pound of 92-score butter at Chicago as reported by the Department of Agriculture for the delivery period, divide the result by 10 and add 0.5 cent.

(c) *Class III milk.* Multiply by 1.2 the average wholesale price per pound of 92-score butter at Chicago as reported by the Department of Agriculture for the delivery period and divide the result by 10.

§ 972.45 *Emergency price provisions.* Whenever the provisions of this part require the market administrator to use a specific price (or prices) for milk or any milk product for the purpose of determining class prices or for any other purpose, the market administrator shall add to the specified price the amount of any subsidy or other similar payment being made by any Federal agency in connection with the milk, or product, associated with the price specified: *Provided*, That if for any reason the price specified is not reported or published as indicated, the market administrator shall use the applicable maximum uniform price established by regulations of any Federal agency plus the amount of any subsidy or other similar payment: *Provided further*, That if the specified price is not reported or published and there is no applicable maximum uniform price, or if the specified price is not reported or published and the Secretary determines that the market price is below the applicable maximum uniform price, the market administrator shall use a price determined by the Secretary to be equivalent to or comparable with the prices specified.

§ 972.46 *Prices for Class I, Class II, and Class III milk disposed of outside the marketing area.* The price for Class I, Class II, and Class III milk disposed of outside the marketing area by a handler shall be those applicable, respectively, pursuant to §§ 972.41 through 972.43, to Class I, Class II, and Class III milk disposed of by such handler in the marketing area.

§ 972.47 *Price of Class I or Class II milk transferred by one handler to another handler.* The price of Class I or Class II milk transferred by a handler to another handler shall be that applicable to Class I or Class II milk at the selling handler's fluid milk plant, pursuant to §§ 972.41 and 972.42: *Provided*, That any hauling charge with respect thereto chargeable to producers or to associations of producers shall not exceed that customarily applied to deliveries of such producers from their farms to the selling handler's fluid milk plant.

APPLICATION OF PROVISIONS

§ 972.50 *Producer-handlers.* Sections 972.30 through 972.47 and §§ 972.60 through 972.76 shall not apply to a producer-handler. Any handler who desires to qualify as a producer-handler shall furnish to the market administrator for his verification, subject to review by the Secretary, evidence of his qualifications satisfactory to the market administrator, and he shall furnish similar evidence of subsequent changes in his operations that affect his qualifications. Verification by the market administrator shall be made within 5 days after the date of receipt of such evidence, and shall be effective retroactively to the date on which the applicant became so eligible, but not earlier than the first day of the delivery period during which verification of such eligibility is made.

§ 972.51 *Exempt milk.* Milk received at a plant of a handler the handling of which the Secretary determines to be subject to the pricing and payment provisions of any other Federal milk marketing agreement or order issued pursuant to the act for any fluid milk marketing area shall not be subject to

the pricing and payment provisions of this part.

§ 972.52 *Milk caused to be delivered by an association of producers.* Milk referred to in this part as received from producers by a handler shall include producer milk caused to be delivered to such handler by an association of producers which is not a handler and which is authorized to collect payment for such milk.

§ 972.53 *Diverted milk.* Producer milk diverted by an operator of a fluid milk plant from such plant to a nonfluid milk plant shall be deemed to have been received by the fluid milk plant from which such milk was diverted. Producer milk diverted by an association of producers from a fluid milk plant to a nonfluid milk plant shall be deemed to have been received by such an association.

DETERMINATION OF UNIFORM PRICES

§ 972.60 *Computation of value of milk.* The value of producer milk received during each delivery period by each handler shall be a sum of money computed by the market administrator by (a) multiplying the pounds of such milk in each class for the delivery period, by the applicable class prices, and (b) adding together the resulting amounts: *Provided*, That if a handler, after subtracting other source milk and receipts from other handlers, has disposed of skim milk or butterfat in excess of the skim milk or butterfat which, on the basis of his reports, has been credited to producers as having been received from them, there shall be added an amount computed by multiplying the pounds in each class determined pursuant to § 972.36 (a) (5) and (b) by the applicable class prices.

§ 972.61 *Computation of uniform prices.* For each delivery period the market administrator shall compute for each handler a "uniform price" per hundredweight to be paid to producers and associations of producers for milk of 3.5 percent butterfat content received at fluid milk plants as follows:

(a) From the value of milk computed for such handler pursuant to § 972.60, subtract, if the weighted average butterfat test of producer milk represented by the value included under paragraph (a) of this section is greater than 3.5 percent, or add, if such butterfat test is less than 3.5 percent, an amount computed by: Multiplying the amount by which its weighted average butterfat test varies from 3.5 percent by the butterfat differential computed pursuant to § 972.70, and multiplying the resulting figure by the total hundredweight of such milk;

(b) Add or subtract, as the case may be, any amounts necessary to correct errors in classification for previous delivery periods as disclosed by audit by the market administrator;

(c) Adjust the resulting amount by the sum of money used in adjusting the uniform price pursuant to paragraph (e) of this section, for the previous month, to the nearest cent;

(d) Divide the result by the total hundredweight of producer milk represented by the value computed pursuant to § 972.60; and

(e) Adjust the resulting figure to the nearest cent.

§ 972.62 *Notification to handlers.* On or before the 10th day after the end of each delivery period, the market administrator shall notify each handler of:

(a) The amount and value of his milk in each class and the totals thereof;

(b) His uniform price; and

(c) The amount to be paid by such handler pursuant to §§ 972.65 and 972.70.

PAYMENTS

§ 972.65 *Time and method of final payment.* Each handler shall make payment, subject to the provisions of §§ 972.66, 972.70, 972.75, and 972.76, for all producer milk received during each delivery period, as follows:

(a) Except as set forth in paragraph (b) of this section, to each producer, on or before the 18th day after such delivery period, at not less than such handler's uniform price for milk of 3.5 percent butterfat; and

(b) To an association of producers for milk to producers from whom such association has received written authorization to collect payment, on or before the 16th day after such delivery period, of a total amount equal to not less than the sum of the individual amounts otherwise payable to such producers under paragraph (a) of this section.

§ 972.66 *Partial payments.* Handlers shall make partial payments to producers as follows:

(a) On or before the last day of each delivery period, each handler shall make payment except as set forth in paragraph (b) of this section, to each producer at not less than such handler's uniform price of the preceding delivery period for the milk of such producer which was received by such handler during the first 15 days of the current delivery period; and

(b) On or before the day immediately preceding the last day of each delivery period, each handler shall make payment to an association of producers for milk of producers from whom such association has received written authorization to collect payment at not less than such handler's uniform price of the preceding delivery period for all such milk which was received by such handler during the first 15 days of the current delivery period.

§ 972.70 *Butterfat differential.* If, during the delivery period, any handler has received from any producer or from an association of producers, milk having a weighted average butterfat test other than 3.5 percent, such handler, in making the payments prescribed in § 972.65, shall add to, or subtract from the applicable uniform price per hundredweight, for each one-tenth of 1 percent of such butterfat test in milk above or below, as the case may be, 3.5 percent, an amount computed by the market administrator as follows: Multiply by 1.2 the average wholesale price per pound of 92-score butter at Chicago, as reported by the Department of Agriculture for the delivery period, divide the result by 10, and round to the nearest tenth of a cent.

§ 972.71 *Expense of administration.* As his pro rata share of the expense incurred pursuant to § 972.22 (d) each handler shall pay the market administrator, on or before the 13th day after the end of each delivery period, 4 cents per hundredweight, or such lesser amount as the Secretary may prescribe, to be announced by the market administrator on or before the 10th day after the end of such delivery period with respect to all receipts within the delivery period, of producer milk (including such handler's own production) and other source milk at his fluid milk plant classified as Class I milk pursuant to § 972.31 (a) (1) and Class II milk: *Provided*, That an association of producers shall pay such pro rata share of expense of administration on producer milk with respect to which it is a handler.

MARKETING SERVICE DEDUCTIONS

§ 972.75 *Payments to market administrator.* Except as set forth in § 972.76 each handler shall deduct an amount not exceeding 6 cents per hundredweight (the exact amount to be determined by the market administrator subject to review by the Secretary) from the payments due pursuant to § 972.65, with respect to all producer milk received by such handler (except milk of such handler's own production) during each delivery period and shall pay such deductions to the market administrator on or before the 13th day after such delivery period. Such moneys shall be used by the market administrator to make, or check, weights, samples, and tests of producer milk received by handlers and to provide producers with market information such services to be performed in whole or in part by the market administrator or by an agent engaged by and responsible to him.

§ 972.76 *Payments to cooperative associations.* In the case of producers for whom a cooperative association which, as determined by the Secretary:

(a) Is engaged in the collective sale or marketing of their milk,

(b) Has its entire activities under the control of its members,

(c) Meets the standards set forth in the act of Congress of February 18, 1922, as amended, known as the "Capper-Volstead Act," and

(d) Is actually performing the services set forth in § 972.75, each handler shall make, in lieu of the deductions specified in § 972.75, such deductions from the payments to be made to such producers as have been authorized by such producers and, on or before the 14th day after each delivery period, pay over such deductions to the cooperative association rendering such services.

ADJUSTMENT OF ACCOUNTS

§ 972.80 *Errors in payments.* Whenever audit by the market administrator of a handler's reports, books, records, or accounts discloses adjustments to be made, for any reason which result in moneys due:

(a) The market administrator from such handler,

(b) Such handler from the market administrator, or

(c) Any producer or association of producers from such handler, the market administrator shall promptly notify such handler of any such amount due; and explain the basis for such adjustment; and payment thereof shall be made on or before the next date for making payment set forth in the provision under which such error occurred, following the 5th day after such notice.

§ 972.81 *Overdue accounts.* Any unpaid obligation of a handler or of the market administrator pursuant to §§ 972.65 through 972.80 shall be increased one-half of one percent on the first day of the calendar month next following the due date of such obligation and on the first day of each month thereafter until such obligation is paid.

MISCELLANEOUS PROVISIONS

§ 972.85 *Effective time.* The provisions of this part, or any amendment of this part, shall become effective at such time as the Secretary may declare and shall continue in force until suspended or terminated, pursuant to § 972.86.

§ 972.86 *Suspension or termination.* The Secretary may suspend or terminate this part or any provision of this part, whenever he finds that this part or any provision of this part, obstructs, or does not tend to effectuate the declared policy of the act. This part shall terminate, in any event, whenever the provisions of the act authorizing it cease to be in effect.

§ 972.87 *Continuing power and duty of the market administrator.* If, upon the suspension or termination of any or all provisions of this part, there are any obligations arising under this part the final accrual or ascertainment of which requires further acts by any handler, the market administrator, or by any other person, the power and duty to perform such further acts shall continue notwithstanding such suspension or termination: *Provided*, That any such acts required to be performed by the market administrator shall, if the Secretary so directs, be performed by such other person, persons, or agency as the Secretary may designate. The market administrator, or such other person as the Secretary may designate, shall:

(a) Continue in such capacity until discharged by the Secretary.

(b) From time to time account for all receipts and disbursements, and, when so directed by the Secretary, deliver all funds or property on hand, together with the books and records of the market administrator, to such person as the Secretary may direct, and

(c) If so directed by the Secretary, execute such assignments or other instruments necessary or appropriate to vest in such person full title to all funds, property, and claims vested in the market administrator or such person pursuant to this part.

§ 972.88 *Liquidation after suspension or termination.* Upon the suspension or termination of any or all provisions of this part, the market administrator, or such person as the Secretary may designate shall, if so directed by the Secretary, liquidate the business of the market administrator's office and dispose of all funds and property then in his possession or under his control, together with claims for any funds which are unpaid or owing at the time of such suspension or termination. Any funds collected pursuant to the provisions of this part, over and above the amounts necessary to meet outstanding obligations and the expenses necessarily incurred by the market administrator or such person in liquidating and distributing such funds, shall be distributed to the contributing handlers and producers in an equitable manner.

§ 972.89 *Agents.* The Secretary may, by designation in writing, name of any officer or employee of the United States to act as his agent or representative in connection with any of the provisions of this part.

§ 972.90 *Separability of provisions.* If any provision of this part, or the application thereof to any person or circumstances, is held invalid, the remainder of this part and the application of such provision to other persons or circumstances, shall not be affected thereby.

§ 972.91 *Termination of obligation.* The provisions of this section shall apply to any obligation under this part for the payment of money irrespective of when such obligation arose, except an obligation involved in an action instituted before August 1, 1949, under section 8c (15) (A) of the act or before a court.

(a) The obligation of any handler to pay money required to be paid under the terms of this part shall, except as provided in paragraphs (b) and (c) of this section, terminate two years after the last day of the calendar month during which the market administrator receives the handler's utilization report on the milk involved in such obligation, unless within such two-year period the market administrator notifies the handler in writing that such money is due and payable. Service of such notice shall be complete upon mailing to the handler's last known address, and it shall contain but need not be limited to the following information:

(1) The amount of the obligation;

(2) The month(s) during which the milk, with respect to which the obligation exists, was received or handled; and

(3) If the obligation is payable to one or more producers or to an association of producers, the name of such producer(s) or association of producers, or if the obligation is payable to the market administrator, the account for which it is to be paid.

(b) If a handler fails or refuses, with respect to any obligation under this part, to make available to the market administrator or his representatives all books and records required by this part to be made available, the market administrator may, within the two-year period provided for in paragraph (a) of this section, notify the handler in writing of such failure or refusal. If the market administrator so notifies a handler, the said two-year period with respect to such obligation shall not begin to run until the first day of the calendar month following the month during which all such books and records pertaining to such obligation are made available to the market administrator or his representatives.

(c) Notwithstanding the provisions of paragraphs (a) and (b) of this section, a handler's obligation under this part to pay money shall not be terminated with respect to any transaction involving fraud or willful concealment of a fact, material to the obligation, on the part of the handler against whom the obligation is sought to be imposed.

(d) Any obligation on the part of the market administrator to pay a handler any money which such handler claims to be due him under the terms of this part shall terminate two years after the end of the calendar month during which the milk involved in the claim was received if an underpayment is claimed, or two years after the end of the calendar month during which the payment (including deduction or set-off by the market administrator) was made by the handler if a refund on such payment is claimed, unless such handler, within the applicable period of time, files, pursuant to section 8c (15) (A) of the act, a petition claiming such money.

Issued at Washington, D. C., this 29th day of October 1953 to be effective on and after November 1, 1953.

[SEAL] JOHN H. DAVIS,
*Assistant Secretary of Agriculture.*

[F. R. Doc. 53-9279, Filed, Oct. 30, 1953; 9:00 a. m.]

## TITLE 26—INTERNAL REVENUE

### Chapter I—Internal Revenue Service, Department of the Treasury

Subchapter A—Income and Excess Profits Taxes

[T. D 6046, Regs. 129, 130]

PART 24—CONSOLIDATED INCOME AND EXCESS PROFITS TAX RETURNS

PART 40—EXCESS PROFITS TAX; TAXABLE YEARS ENDING AFTER JUNE 30, 1950

MISCELLANEOUS AMENDMENTS

In order to conform Regulations 129 (26 CFR Part 24) and Regulations 130 (26 CFR Part 40) to the provisions of Public Law 125, 83d Congress, approved July 16, 1953, relating to the extension until December 31, 1953, of the period with respect to which the excess profits tax shall be effective, such regulations are hereby amended as follows:

PARAGRAPH 1. Subdivision (iii) of § 24.31 (a) (90) is amended by striking "June 30, 1953" and "July 1, 1953", wherever such dates appear, and inserting in lieu thereof "December 31, 1953" and "January 1, 1954", respectively, so that such subdivision as amended shall read as follows:

(iii) In the case of a taxable year of the group beginning before January 1, 1954, and ending after December 31, 1953, such amount shall be reduced to an amount which is such part thereof as the number of days in such taxable year before January 1, 1954, is of the total number of days in such taxable year; and

(53 Stat 32; 26 U. S. C. 62. Interprets or applies 53 Stat. 58, as amended; 26 U. S. C. 141)

PAR. 2. There is inserted immediately preceding § 40.430–1 the following:

PUBLIC LAW 125, 83D CONGRESS, APPROVED JULY 16, 1953

• • • sections 430 (a), 430 (c), • • • of the Internal Revenue Code are amended, effective with respect to taxable years ending after June 30, 1953, by striking "June 30, 1953," and "July 1, 1953," wherever such dates appear, and inserting in lieu thereof "December 31, 1953," and "January 1, 1954," respectively.

PAR. 3. The second sentence of § 40.430–1 is amended by striking "July 1, 1953" and inserting in lieu thereof "January 1, 1954" so that such sentence as amended shall read as follows: "The excess profits tax is imposed upon the adjusted excess profits net income of every corporation, both domestic and foreign, for each taxable year ending after June 30, 1950, and beginning before January 1, 1954, except in the case of certain corporations which are exempt from the tax under the provisions of section 454."

PAR. 4. Paragraph (c) of § 40.430-2 is amended by striking "June 30, 1953" and "July 1, 1953", wherever such dates appear, and inserting in lieu thereof "December 31, 1953" and "January 1, 1954", respectively, so that such paragraph as amended shall read as follows:

(c) *Taxable years beginning before January 1, 1954, and ending after December 31, 1953.* In the case of a taxable year which begins before January 1, 1954, and ends after December 31, 1953, the excess profits tax will be an amount equal to that portion of a tentative tax determined under section 430 (a) and under (a) of this section as the number of days in such year prior to January 1, 1954, bears to the total number of days in such year.

PAR. 5. The last sentence of § 40.431–1, as added by Treasury Decision 6024, approved June 25, 1953, is amended by striking "June 30, 1953" and "July 1, 1953", and inserting in lieu thereof "December 31, 1953" and "January 1, 1954", respectively, so that such sentence as amended shall read as follows: "For treatment of taxable years beginning before January 1, 1954, and ending after December 31, 1953, see § 40.430–2 (c)."

PAR. 6. There is inserted immediately preceding § 40.432–1 the following:

PUBLIC LAW 125, 83D CONGRESS, APPROVED JULY 16, 1953

• • • sections • • • 432 (b) of the Internal Revenue Code are amended, effective with respect to taxable years ending after June 30, 1953, by striking "June 30, 1953," and "July 1, 1953," wherever such dates appear, and inserting in lieu thereof "December 31, 1953," and "January 1, 1954," respectively.

PAR. 7. The first and fourth sentences of paragraph (a) of § 40.432–1 are amended by striking "June 30, 1953" and "July 1, 1953", wherever such dates appear, and inserting in lieu thereof "December 31, 1953" and "January 1, 1954", respectively, so that such sentences as amended shall read as follows: "Section 432 provides that the unused excess profits credit for any taxable year ending after June 30, 1950, and beginning before January 1, 1954, is the excess of the corporation's excess profits credit for such taxable year over its excess profits net income for such year computed without regard to the net operating loss deduction and computed on the basis of the excess profits credit applicable to such year. • • • If the taxable year begins before January 1, 1954, and ends after December 31, 1953, the unused excess profits credit will be an amount which is such portion of the unused excess profits credit determined under the general rule as the number of days in the taxable year before January 1, 1954, is of the total number of days in such taxable year."

Inasmuch as this Treasury decision merely provides for the extension, until December 31, 1953, of the period with respect to which the excess profits tax shall be effective, in conformity with the provisions of Public Law 125, 83d Congress, approved July 16, 1953, it is hereby found that it is unnecessary to issue such Treasury decision with notice and public procedure thereon under section 4 (a) of the Administrative Procedure Act, approved June 11, 1946, or subject to the effective date limitation of section 4 (c) of that act.

(53 Stat 32, 467, 26 U. S. C. 62, 3791. Interpret or apply 53 Stat. 58, as amended, 26 U. S. C. 141)

[SEAL] T. COLEMAN ANDREWS, *Commissioner of Internal Revenue.*

Approved: October 28, 1953.

M. B. FOLSOM, *Acting Secretary of the Treasury.*

## TITLE 32—NATIONAL DEFENSE

### Chapter VII—Department of the Air Force

#### Subchapter C—Claims and Accounts

PART 836—CLAIMS AGAINST THE UNITED STATES

PART 1021—AIR FORCE EMERGENCY FACILITIES DEPRECIATION BOARD

REIMBURSEMENT TO OWNERS AND TENANTS OF LAND ACQUIRED BY THE AIR FORCE; LIST OF CONTRACTOR INFORMATION ON TRUE DEPRECIATION

1. The following amendments of §§ 836.124 and 836.134 were approved by the Secretary of Defense on September 28, 1953.

§ 836.124 *Delegation.* Authority is delegated to the Chief of Engineers, Department of the Army, and such officers and employees of the Corps of Engineers as he may designate and are approved by the Secretary of the Air Force, to perform all functions and make all determinations which are authorized to be performed by the Secretary of the Air Force with respect to reimbursement under the provisions of section 401 (b) of the act.

(Sec. 401, 66 Stat. 624)

§ 836.134 *Delegation.* Authority is delegated to the Chief of Engineers, Department of the Army, and such officers and employees of the Corps of Engineers as he may designate and are approved by the Secretary of the Air Force, to perform all functions and make all determinations which are authorized to be performed by the Secretary of the Air Force with respect to reimbursement under the provisions of section 501 (b) of the act.

(Sec. 501, 65 Stat. 363)

2. The introductory paragraph of Appendix A to Part 1021 (18 F. R. 1445, 3689) is amended by adding at the end thereof the following sentence:

APPENDIX A—LIST OF CONTRACTOR INFORMATION ON TRUE DEPRECIATION

• • • The reporting and/or record-keeping requirements contained herein have been approved by the Bureau of the Budget in accordance with the Federal Reports Act of 1942 (56 Stat. 1078, 5 U. S. C. 139–139f). (Bureau of the Budget No. 21–R060, Expiration—Indefinite.)

[SEAL] E. L. WALTERS, *Colonel, U. S. Air Force, Acting Air Adjutant General.*

### Chapter XI—National Guard and State Guard, Department of the Army

PART 1101—NATIONAL GUARD REGULATIONS

MEDICAL ATTENDANCE AND BURIALS

Sections 1101.37 through 1101.40 are rescinded and the following substituted therefor:

§ 1101.37 *To whom applicable—a) General.* Officers, warrant officers, and enlisted men of the National Guard who suffer personal injury or contract disease in the line of duty while en route to or from, or during their attendance at encampments, maneuvers, or other exercises, or at service schools, under the provisions of sections 94, 97, and 99 of the National Defense Act of June 3, 1916, as amended, and members of the National Guard of the United States who suffer injuries or contract disease in line of duty while on active duty under proper orders in time of peace shall, under such regulations as the President may prescribe, be entitled, at Government expense, to such hospitalization, rehospitalization, medical and surgical care in hospital and at their homes, as is necessary for the appropriate treatment of such injury or disease, until the disability resulting from such injury or disease cannot be materially improved by further hospitalization or treatment. See act of June 15, 1926.

(b) *Aerial flights during armory training.* Officers, warrant officers, and enlisted men of the National Guard who suffer injury (as distinguished from disease) in line of duty when participating in aerial flights, prescribed under the provisions of section 92 of the National Defense Act, shall be entitled to the same hospitalization, rehospitilization, medical and surgical care, pay and allowances, and transportation as if such injury had been suffered while in line of duty during their attendance at encampments, maneuvers, or other exercises, or at service schools, under the provisions of sections 94, 97, or 99 of the National Defense Act, as amended. See act of June 15, 1936 and act of October 14, 1940.

(c) *National Guard civilian personnel.* The provisions of this section and § 1101.38 do not apply to members of the National Guard not on active duty who are employed as administrative assistants; accounting clerks; maintenance personnel; rangekeepers; and administrative, supply, and maintenance technicians, and who become disabled during the normal discharge of their duties as civilian employees of the State by which employed.

§ 1101.38 *Pay and allowances—(a) Tours of active duty for training not to exceed 30 days' duration.* During hospitalization or rehospitalization, officers, warrant officers, and enlisted personnel of the National Guard shall be entitled to pay and allowances, either in money or in kind, but not for more than an aggregate period of 6 months after the termination of the prescribed tour of active duty for training.

(b) *Tours of active duty for training in excess of 30 days' duration.* Under Public Law 108, 81st Congress, officers, warrant officers, and enlisted personnel of the National Guard, are entitled to receive basic pay and allowances during their full period of hospitalization or rehospitalization if the tour of active duty for training is in excess of 30 days' duration.

(c) *Computation of pay and allowances.* The pay and allowances are to be computed at the same rate, and on the same basis as that to which officers, warrant officers, and enlisted personnel of the National Guard are entitled at the time injury is suffered or disease contracted. They shall also be entitled to the necessary transportation incident to hospitalization, rehospitalization, and return to their homes when discharged from the hospital. There is no provision under current law for the payment of members of the National Guard who are disabled, but not hospitalized. The term "hospitalized" shall be construed to include only that period of time that an individual is carried on the records of a hospital as a resident patient, including official sick leave. Pay is not authorized for periods between hospitalization and rehospitalization, or during periods of out-patient treatment, or other types of non-hospitalized medical care.

[NGR 62, Sept. 17, 1953] (Sec. 118, 39 Stat. 213; 32 U. S. C. 17. Interpret or apply 49 Stat. 1507; 32 U. S. C. 164a–164b)

[SEAL] WM. E. BERGIN, *Major General, U. S. Army, The Adjutant General.*

## TITLE 32A—NATIONAL DEFENSE, APPENDIX

### Chapter XII—Defense Minerals Exploration Administration, Department of the Interior

[DMEA Order 1, Amdt. 3]

DMEA 1—GOVERNMENT AID IN DEFENSE EXPLORATION PROJECTS

RATIO OF CONTRIBUTIONS

In the formulation of this amendment there has been no consultation with industry representatives or trade association representatives because special circumstances have rendered such consultation impracticable and contrary to the interests of the national defense.

1. Section 7, after the colon in the first sentence, is amended to read as follows:

(a) In the case of chromium, copper, and molybdenum—50 percent.

(b) In the case of asbestos (chrysotile only), beryl, cobalt, columbium, manganese, mica (muscovite block and film only), nickel, platinum, tantalum, tungsten, and uranium—75 percent.

(c) In the event that two or more of the minerals named in this section are the subject of the proposed exploration, the allowable percentage shall be apportioned between them.

2. This amendment shall not apply to applications for exploration project contracts received by or placed in the United States mail for Defense Minerals Exploration Administration before 12 o'clock midnight of the day of its publication in the FEDERAL REGISTER.

(Sec. 704, 64 Stat. 816, as amended; 50 U. S. C. App. Sup. 2154)

[SEAL] C. O. MITTENDORF, *Administrator, Defense Minerals Exploration Administration.*

OCTOBER 30, 1953.

## TITLE 33—NAVIGATION AND NAVIGABLE WATERS

### Chapter I—Coast Guard, Department of the Treasury

[CGFR 53-35]

#### Subchapter K—Security of Vessels

PART 121—SECURITY CHECK AND CLEARANCE OF MERCHANT MARINE PERSONNEL

#### Subchapter L—Security of Waterfront Facilities

PART 125—IDENTIFICATION CREDENTIALS FOR PERSONS REQUIRING ACCESS TO WATERFRONT FACILITIES FOR VESSELS

APPEAL AND REVIEW PROCEDURES FOR PERSONS DENIED SECURITY CLEARANCE

The purpose of the revised regulations set forth in this document and any changes from present procedures are intended, in effect, to provide that any seaman who is denied security clearance or any person denied a Coast Guard Port Security Card shall receive (1) a written notification of denial stating that such person is a poor security risk or is not entitled to security clearance and this notification shall contain a statement of the basis of denial so worded with such specificity as to afford said person reasonable notice of the basis for denial and an opportunity to marshal evidence in refutation thereof, and otherwise in his behalf; and (2) that if such person appeals in accordance with the procedures in 33 CFR Part 121 as revised by this document, such person will be furnished a statement or bill of particulars setting forth the alleged acts, or associations, or beliefs, or other data which formed the basis for the determination that such person is a poor security risk or is not entitled to security clearance. However, in the administration of these revised regulations, the written notification of denial, the statement of the basis of denial, and the statement or bill of particulars shall not be worded with such specificity or particularity as to disclose the source of such information or data nor the identity of any person or persons who may have furnished such information or data to said person or other persons.

A person who has been denied security clearance before the date of publication of this document in the FEDERAL REGISTER may file a new appeal within 60 days of this date and such appeal will be handled and administered in accordance with the administrative appeal procedures in 33 CFR Part 121 as revised by this document. A person whose document evidencing security clearance has been revoked before the date this document is published in the FEDERAL REGISTER may file a new appeal within 60 days for reconsideration and such appeal will be considered in accordance with the administrative appeal procedures in 33 CFR Part 121 as revised by this document. The time limitation for filing an appeal may be waived by the Commandant, U. S. Coast Guard, upon written showing of good cause. The appeal for reconsideration of a denial of security clearance or the revocation of a document evidencing security clearance provided by this paragraph shall be submitted to the Chairman of the nearest Local Appeal Board.

It is hereby found that compliance with the notice of proposed rule making, public rule making procedures thereon, and effective date requirements of the Administrative Procedure Act is impractical since these changes clarify the right of appeal and appeal procedures to be followed and in the public interest should be placed in effect as soon as possible.

By virtue of the authority vested in me as Commandant, United States Coast Guard, by Executive Order 10173, as amended, the following amendments are prescribed and shall become effective immediately upon publication of this document in the FEDERAL REGISTER.

1. Section 121.15 (e) is amended to read as follows:

§ 121.15 *Issuance of documents bearing security clearance indorsement.* • • •

(e) *Denial or revocation of clearance indorsement.* (1) When it is determined by the Commandant that a person to whom security clearance has been de-

nied or is not eligible therefor within the meaning of § 121.13 (d) (or § 125.29 of this chapter for a person denied access to waterfront facilities or vessels), such person shall be so notified in writing. This written notification shall contain a statement of the basis for the initial determination that he is not entitled to security clearance or that he is a poor security risk.

(2) When it is determined by the Commandant that a person to whom a document evidencing security clearance has been granted is not enitled thereto, or is not eligible therefor within the meaning of § 121.13 (d) (or § 125.29 of this chapter for a person denied access to waterfront facilities or vessels), such person shall be so notified in writing and he shall immediately surrender to the Coast Guard every Coast Guard document held by him which evidences security clearance. This written notification shall also contain a statement of the basis for the determination that he is a poor security risk or that he is not entitled to security clearance.

(3) The statement of the basis for the action taken under subparagraph (1) or (2) of this paragraph shall be worded with such specificity as to afford such person an opportunity to marshal evidence in refutation thereof, and otherwise in his behalf. This statement shall not be worded with such particularity as to disclose the source of such information or data, nor the identity of any person or persons who may have furnished such information or data, to said person or other persons.

2. Section 121.21 (a) (3) is amended to read as follows:

§ 121.21 *Chairman of the Board: duties and responsibilities.* (a) * * *

(3) Furnish the appellant with a written notification stating:

(i) The basis for the action in the form of a written statement or bill of particulars setting forth the alleged acts, or associations, or beliefs, or other data which formed the basis for the determination that the appellant is a poor security risk or is not entitled to security clearance. This statement or bill of particulars shall not be worded with such particularity or specificity as to disclose the source of such information or data, nor the identity of any person or persons who may have furnished such information or data, to the appellant or to other persons.

(ii) That, within a period of 10 days from the receipt of this notification, he may file, if he so desires, a written answer with the Chairman.

(iii) That, within 15 days after receipt of such notification, unless the appellant tenders a timely request for a postponement, the Local Appeal Board will meet to hear such evidence as the appellant desires to submit.

(iv) That, unless otherwise requested by the appellant, at least 48 hours' notice will be given of the date and place of hearing.

(v) That the appellant may appear personally before such Board; be present during the entire hearing; be represented by counsel, or other representative, of his own choosing; and present evidence in his own behalf, through witnesses, or by documents, or both.

(vi) The names of the prospective members of the Board, their occupations, and the names of business or labor organizations or associations with which such persons are affiliated.

(vii) The appellant's privilege, for good cause shown, of challenging any member of the Board.

(40 Stat. 220, as amended; 50 U. S. C. 191, E. O. 10173, Oct. 18, 1950, 15 F. R. 7005; 3 CFR, 1950 Supp., as amended by E. O. 10277, Aug. 1, 1951, 16 F. R. 7537; 3 CFR, 1951 Supp., E. O. 10352, May 19, 1952, 17 F. R. 4607; 3 CFR, 1952 Supp.)

Section 125.33 is amended to read as follows:

§ 125.33 *Right of appeal.* Any person who has been denied a Coast Guard Port Security Card pursuant to § 125.29 or who has been required to surrender his Coast Guard Port Security Card pursuant to § 125.31 shall have the right to appeal from such action in the manner described and under the same conditions as set forth in Part 121 of Subchapter K of this chapter.

(40 Stat. 220, as amended; 50 U. S. C. 191, E. O. 10173, Oct. 18, 1950, 15 F. R. 7005; 3 CFR, 1950 Supp., as amended by E. O. 10277, Aug. 1, 1951, 16 F. R. 7537; 3 CFR, 1951 Supp., E. O. 10352, May 19, 1952, 17 F. R. 4607; 3 CFR, 1952 Supp.)

Dated: October 27, 1953.

[SEAL] MERLIN O'NEILL,
*Vice Admiral, U. S. Coast Guard, Commandant.*

## TITLE 43—PUBLIC LANDS: INTERIOR

### Chapter I—Bureau of Land Management, Department of the Interior

Appendix—Public Land Orders

[Public Land Order 925]

ALASKA

PARTIAL REVOCATION OF EXECUTIVE ORDER NO. 8216 OF JULY 25, 1939

By virtue of the authority vested in the President by section 1 of the act of June 25, 1910 (36 Stat. 847; 43 U. S. C. 141), and otherwise, and pursuant to Executive Order No. 10355 of May 26, 1952, it is ordered as follows:

Executive Order No. 8216 of July 25, 1939, reserving certain areas in Alaska for use of the Department of the Navy, is hereby revoked so far as it relates to the following-described lands:

Aleutski Island in Sitka Bay, approximate latitude 57° 02'45" N., longitude 135° 20' W.

The island, which is approximately five acres in area, is sparsely covered with Sitka Spruce of no commercial value. A major portion of the island is rocky and contains no growth other than moss and fern plants.

This order shall not otherwise become effective to change the status of such lands until 10:00 a. m. on the 35th day after the signing of the order, at which time the land shall, subject to valid existing rights and to the provisions of existing withdrawals, be opened to settlement under the homestead laws and the homesite act of May 26, 1934 (48 Stat. 809; 48 U. S. C. 461), and to those forms of appropriation only by qualified veterans of World War II for whose services recognition is granted by the act of September 27, 1944 (58 Stat. 747; 43 U. S. C. 279–284), as amended, and by other qualified persons entitled to credit for service under the said act. Commencing at 10:00 on the 126th day after the date of this order, any of such land not settled upon by veterans or other persons entitled to credit for service shall become subject to settlement and other forms of appropriation by the public generally in accordance with appropriate laws and regulations.

Applications for this land, which shall be filed in the Land Office, Bureau of Land Management, Anchorage, Alaska, shall be acted upon in accordance with the regulations contained in § 295.8 of Title 43 of the Code of Federal Regulations, to the extent that such regulations are applicable. Applications under the homesite or homestead laws shall be governed by the regulations contained in Parts 64 and 66, inclusive, of Title 43 of the Code of Federal Regulations. Inquiries concerning this land shall be addressed to the Manager, Land Office, Bureau of Land Management, Anchorage, Alaska.

ORME LEWIS,
*Assistant Secretary of the Interior.*

OCTOBER 27, 1953.

[F. R. Doc. 53-9235; Filed, Nov. 2, 1953; 8:45 a. m.]

## TITLE 49—TRANSPORTATION

### Chapter I—Interstate Commerce Commission

[Order No. 13528]

PART 132—POWER BRAKES AND DRAWBARS

INVESTIGATION OF POWER BRAKES AND APPLIANCES FOR OPERATING POWER BRAKE SYSTEMS

At a session of the Interstate Commerce Commission, Division 3, held at its office in Washington, D. C., on the 27th day of October A. D. 1953.

Upon further consideration of the record in the above-entitled proceeding, and good cause appearing therefor:

*It is ordered*, That the order heretofore entered herein on September 21, 1945, as amended, requiring respondents to install power brakes and appliances on their cars used in freight service be, and it is hereby, further amended so as not to require the installation of such brakes and appliances on

a. Locomotives;

b. Scale test weight cars;

c. Locomotive cranes, steam shovels, pile drivers and similar construction and maintenance machines built prior to September 21, 1945;

d. Export, industrial, and other than railroad owned cars which are not to be used in service by respondents, except for movement as shipments on their own wheels to given destinations, provided that any such car so moved shall be properly identified by a card attached to each side of car, signed by shipper, stating that such movement is being made under authority of this order; and

e. Industrial and other than railroad owned cars which are not to be used in service by respondents except for movement within the limits of a single switching district.

*It is further ordered*, That the effective date of said order of September 21, 1945, as amended, be, and it is hereby, extended until further order of the Commission, insofar as it applies to:

f. Narrow-gauge cars, and

g. Cars being returned from Canada or Mexico to owners in the United States, provided each such car being returned is routed directly to owner and is properly identified by a card attached to each side of car, signed by shipper, stating that the movement is being made under authority of this order.

(Sec. 6, 36 Stat. 299, 45 U. S. C. 15)

By the Commission, Division 3.

[SEAL] GEORGE W. LAIRD,
*Secretary.*

[F. R. Doc. 53-9263; Filed Nov. 2, 1953; 8:50 a. m.]

# PROPOSED RULE MAKING

## DEPARTMENT OF AGRICULTURE

### Production and Marketing Administration

[7 CFR Part 903]

[Docket No. AO 10-A18]

HANDLING OF MILK IN ST. LOUIS, MISSOURI, MARKETING AREA

NOTICE OF RECOMMENDED DECISION AND OPPORTUNITY TO FILE WRITTEN EXCEPTIONS WITH RESPECT TO PROPOSED AMENDMENT TO TENTATIVE MARKETING AGREEMENT, AND TO ORDER, AS AMENDED

Pursuant to the provisions of the Agricultural Marketing Agreement Act of 1937, as amended (7 U. S. C. 601 et seq.), and the applicable rules of practice and procedure, as amended, governing the formulation of marketing agreements and marketing orders (7 CFR Part 900), notice is hereby given of the filing with the Hearing Clerk of the recommended decision of the Assistant Administrator, Production and Marketing Administration, United States Department of Agriculture, with respect to a proposal to amend the tentative marketing agreement and the order, as amended, regulating the handling of milk in the St. Louis, Missouri, marketing area. Interested parties may file written exceptions to this decision with the Hearing Clerk, United States Department of Agriculture, Washington 25, D. C. not later than the close of business the 5th day after publication of this decision in the FEDERAL REGISTER. Exceptions should be filed in quadruplicate.

*Preliminary statement.* The hearing, on the record of which the following findings and conclusions were formulated, was conducted at St. Louis, Missouri, on October 12 and 13, 1953, pursuant to notice thereof which was issued on October 7, 1953 (18 F. R. 6384) and October 8, 1953 (18 F. R. 6409).

By an emergency action of the Assistant Secretary of Agriculture taken on October 26, 1953, decision has been made with respect to the Class I pricing provisions for the period through June 1954. Said decision reserved for later determination the remaining issues contained in the hearing record.

The remaining material issues of record, decision on which is herein recommended, related to:

1. The elimination of administrative assessments on milk subject to the Class I pricing provisions of other orders;

2. Minor modifications in the allocation provisions of the order; and

3. Calculation of shrinkage according to utilization of milk at the plant.

*Findings and conclusions.* The findings and conclusions with respect to the material issues herein decided, all of which are based on the evidence introduced at the hearing and the record thereof, are as follows:

1. The order should be amended to eliminate any duplication of administrative assessments on Class I milk received from other federally regulated markets. Milk coming to St. Louis from other regulated markets and allocated to Class I is now subject to administrative asssessment in both markets. This represents a duplication in cost to handlers which is undesirable and unnecessary, since the amount of work involved in auditing and administering is approximately the same whether the milk is sold in the market where it originates or in a second regulated market. Information on such audits may be exchanged between administrators. The assessment should accrue to the administration fund in the market where the milk originates. If milk is sold to another regulated market from St. Louis, the regular assessment will accrue to the St. Louis administrator.

2. The allocation provisions of the order should be amended as follows:

(a) The allocation provisions of the order should be amended to place all handlers on an equal basis with respect to the assignment of producer milk to Class II before the allocation of milk priced as Class I under another order issued pursuant to the act.

Under the present provisions of the order, each handler is permitted to reserve an amount of Class II milk equivalent to no more than 5 percent of the milk received from producers for assignment to producer milk as Class II. This results in some inequality among handlers associated with differences in supply arrangements. In the case of a handler operating his own supply plants, this 5 percent is calculated on the basis of the quantity of milk received from producers at both supply plants and distributing plants. This is true even with respect to milk not moved between plants. On the other hand, a distributing plant operator depending upon unaffiliated supply plants for part of his milk may reserve only 5 percent of the producer milk received at his own plant. No credit is allowed for the milk received at the supply plants. Thus a multiple plant operator may have a larger proportionate assignment of milk as Class II shrinkage than the distributing plant operator who is purchasing milk from unaffiliated country plants.

In order to place all handlers on a more equal footing in this respect, the order should be amended so that the 5 percent maximum allocation to Class II will be calculated on the basis of only the approved milk received at the handler's distributing plants. It should apply, however, to approved milk from all pool supply plants as well as that received directly from producers. It would not apply to milk received at a supply plant but not shipped to a distributing plant or to milk received from other distributing plants. This will result in an allowance more nearly in line with the needs of the different handlers.

(b) The allocation provisions of the order should be amended to avoid the assignment of more approved milk to Class I sales in a plant than was actually received at such plant.

The order presently provides that milk received from producers shall be allocated to Class I sales on a priority basis for each handler. This applies whether or not the plant may dispose of Class I milk which does not carry a Grade A label. The basis for this allocation procedure is set forth in the decision of the Secretary issued July 15, 1953 (18 F. R. 4123). Said decision did not consider the possibility that Class I milk sold without a Grade A label from one plant might be assigned to producer milk disposed of as Class II milk in the second plant of the same handler. Evidence in this hearing record indicates, however, that such is now the case. A representative of one handler testified that Class I sales from its distributing plant exceeded receipts of approved milk at such plant. Because allocation of other source milk to Class II sales takes place on the basis of a handler's entire operation, ungraded milk is now assigned to Class II disposition of producer milk which takes place at its supply plant. This supply plant has no Class I disposition except that of bulk milk sales which are primarily to the handler's own

bottling and distributing plant. Since producer milk so disposed of as Class II in the supply plant is not physically available for sale as Class I milk in the distributing plant, it should not be assigned to such Class I sales. The order should therefore be amended to provide an exception which will avoid such assignment. This should apply only to plants which are permitted under the applicable health department regulations to bottle and sell non-Grade A milk to Class I outlets.

3. Shrinkage should be assigned to plants according to type of operation at the plant.

The order now provides that shrinkage may be classified as Class II milk up to a maximum of 2 percent of the milk received by the handler from producers. Two percent has been considered under the order as the maximum necessary allowance for the conduct of a fluid milk and surplus disposal business. Any loss in excess of that amount raises the question whether the handler has disposed of Class I milk for which he has failed to account.

The shrinkage allowance is now calculated for each individual handler's operation. No allowance applies to milk transferred between handlers. A considerable share of the milk in the St. Louis market is received at country receiving stations and is transported to city bottling plants for distribution to consumers. Much of the loss sustained in the processing and distribution of fluid milk is incurred at the plant where the milk is packaged for sale to consumers.

At the present time, a plant having its own country receiving stations is allowed maximum shrinkage on the basis of producer receipts at all of its plant locations. However, a bottling plant buying milk from unaffiliated country stations is allowed shrinkage on only that portion of the milk received directly from producers at the bottling plant. While the country receiving stations supplying such a plant are allowed the full 2 percent shrinkage, these plants do not ordinarily incur such shrinkage. There is no opportunity at the present time for the shrinkage which may be incurred in the bottling of milk from unaffiliated supply plants to be classified as Class II milk, except as such shrinkage does not exceed the difference between the shrinkage allowed on direct producer receipts and the shrinkage experienced on such receipts.

The order should be amended therefore to allow a lesser rate of Class II shrinkage if the milk is simply received at a pool plant and shipped in bulk. The reduction thus brought about in allowable shrinkage should be transferred to the pool plant receiving and processing or distributing such milk.

Other source milk should be subject to the same provisions as producer milk in order to place it on a comparable basis. Thus, other source milk received as milk from farmers and not shipped in bulk would be subject to a maximum allowance of 2 percent. If other source milk were received as bulk milk and not reshipped in bulk, it would be subject to a 1 5 percent allowance.

No shrinkage allowance as Class II should be permitted on milk received as bulk milk and reshipped in the same form, nor on milk diverted to non-pool plants. If milk is processed or separated at the plant where received, the shrinkage will be allowed at such plant.

*Rulings on proposed findings and conclusions.* Written arguments and proposed findings and conclusions submitted on behalf of interested persons concerning issues on which decision is herein recommended were considered, along with the evidence in the record, in making the findings and reaching the conclusions herein set forth. To the extent that the proposed findings and conclusions differ from the findings and conclusions contained herein, the specific or implied requests to make such findings are denied because of the reasons stated in support of the findings and conclusions in this decision.

*General findings.* (a) The proposed marketing agreement and the order, as amended, and as hereby proposed to be further amended, and all of the terms and conditions thereof, will tend to effectuate the declared policy of the act;

(b) The parity prices of milk as determined pursuant to Section 2 of the act are not reasonable in view of the price of feeds, available supplies of feeds and other economic conditions which affect market supply of and demand for milk in the marketing area, and the minimum prices specified in the proposed marketing agreement and the order, as amended, and as hereby proposed to be further amended, are such prices as will reflect the aforesaid factors, insure a sufficient quantity of pure and wholesome milk and be in the public interest; and

(c) The proposed order, as amended, and as hereby proposed to be further amended, will regulate the handling of milk in the same manner as, and will be applicable only to persons in the respective classes of industrial and commercial activity specified in a marketing agreement upon which a hearing has been held.

*Recommended marketing agreement and order, amending the order, as amended.* The following order amending the order, as amended, is recommended as the detailed and appropriate means by which the foregoing conclusions may be carried out. The recommended marketing agreement is not included in this decision because the regulatory provisions thereof would be identical with those contained in the order, as amended, and as hereby proposed to be further amended.

1. Delete § 903.87 (b) and substitute therefor the following:

(b) Received at a pool plant as Grade A other source milk (except milk subject to the Class I pricing provisions of another order issued pursuant to the act) and allocated to Class I, or

2. Delete § 903.45 (a) (4) and substitute therefor the following:

(4) Subtract from the pounds of skim milk remaining in Class II milk an amount equal to such remainder, or the product obtained by multiplying by 0.05 the pounds of skim milk in approved milk received at plants qualified pursuant to § 903.10 (a), from (i) producers and (ii) plants qualified pursuant to § 903.10 (b), whichever is less;

3. Delete § 903.41 (a) (3) and substitute therefor the following:

(3) In shrinkage not to exceed an amount calculated (except with respect to milk diverted to a non-pool plant pursuant to § 903.7) as follows:

(i) 0.5 percent of milk received from dairy farmers and disposed of in the form of bulk milk;

(ii) 1.5 percent of milk received as other source milk or bulk approved milk and disposed of in a form other than bulk milk: *Provided*, That any disposition of milk in bulk form shall be assigned first to receipts of bulk milk;

(iii) 2.0 percent of milk received from dairy farmers and disposed of in a form other than bulk milk;

*Provided*, That shrinkage of skim milk and butterfat shall be assigned to skim milk and butterfat, respectively, in approved milk and in other source milk as determined pursuant to this paragraph.

4. In § 903.45 (a) (1) delete the word "producer" and substitute therefor the word "approved."

5. Delete § 903.45 (a) (3) and substitute therefor the following:

(3) Subtract from the pounds of skim milk remaining in Class II milk the remaining pounds of skim milk in other source milk which was not subject to the Class I pricing provisions of an order issued pursuant to the act: *Provided*, That skim milk so subtracted from Class II pursuant to this paragraph shall not result in the assignment of more skim milk in approved milk to Class I in a plant which is permitted to receive and bottle Grade A and non-Grade A milk than is contained in the approved milk received at such plant: *And provided further*, That if the pounds of skim milk to be subtracted is greater than the remaining pounds of skim milk in Class II, the balance shall be subtracted from the pounds of skim milk in Class I;

6. Delete § 903.52 and substitute therefor the following:

§ 903.52 *Location differentials to handlers.* With respect to skim milk and butterfat contained in milk received from producers at a pool plant in Meramec or Bonhomme townships, St. Louis County, Missouri (except in the cities of Valley Park and Kirkwood), or outside the marketing area, which is classified as Class I milk, the price per hundredweight shall be reduced by the amounts set forth in the following schedule according to the airline distance from the plant where the milk is received from producers, or the plant from which the milk is diverted, to the City Hall in St. Louis:

| Mileage: | Allowance (cents) |
|---|---|
| Not more than 10 miles | 6 |
| More than 10 but not more than 20 miles | 12 |
| More than 20 but not more than 30 miles | 14 |
| More than 30 but not more than 40 miles | 16 |
| For each additional 10 miles or fraction thereof an additional | 1 |

*Provided*, That for the purposes of calculating such location differential with respect to milk transferred between pool plants, the Class II approved milk remaining in the transferee plant after deducting therefrom the amount of such milk or an amount equivalent to 0.05 times the producer milk at such plant, whichever is less, shall be assigned to approved milk from other plants in sequence according to the location differential applicable at each plant, beginning with the plant having the largest differential, and then to producer milk.

Filed at Washington, D. C., this 28th day of October 1953.

[SEAL] ROY W. LENNARTSON, *Assistant Administrator.*

## DEPARTMENT OF HEALTH, EDUCATION, AND WELFARE

### Food and Drug Administration

### [ 21 CFR Part 14 ]

[Docket No. FDC 26 (a)]

CACAO PRODUCTS; DEFINITIONS AND STANDARDS OF IDENTITY

COUMARIN

In the matter of amending the definitions and standards of identity for chocolate liquor, chocolate, baking chocolate, bitter chocolate, cooking chocolate, chocolate coating, bitter chocolate coating; breakfast cocoa, high-fat cocoa; sweet chocolate, sweet chocolate coating; and milk chocolate, sweet milk chocolate, milk chocolate coating, sweet milk chocolate coating:

By virtue of the authority vested in the Secretary of Health, Education, and Welfare by the provisions of the Federal Food, Drug, and Cosmetic Act (secs. 401, 701, 52 Stat. 1046, 1055; 21 U. S. C. 341, 371; 67 Stat. 18), and upon the basis of substantial evidence received at the public hearing held pursuant to the notice published in the FEDERAL REGISTER on August 5, 1953 (18 F. R. 4606), it is proposed that the following order be made:

*Findings of fact.*[1] 1. Based on evidence taken at a hearing held beginning December 9, 1940, an proposals to adopt definitions and standards of identity for various cacao products, coumarin (among other designated substances) was found to be a suitable artificial flavoring ingredient and accordingly it was listed as a permitted optional ingredient in the definitions and standards of identity for chocolate liquor (21 CFR 14.2), breakfast cocoa (21 CFR 14.3), sweet chocolate (21 CFR 14.6), and milk chocolate (21 CFR 14.7). By reference it also became an optional ingredient in the definitions and standards of identity for cocoa (21 CFR 14.4), low-fat cocoa (21 CFR 14.5), skim milk chocolate (21 CFR 14.8), buttermilk chocolate (21 CFR 14.9), mixed dairy product chocolate (21 CFR 14.10), sweet chocolate and vegetable fat (other than cocoa fat) coating (21 CFR 14.11), sweet cocoa and vegetable fat (other than cocoa fat) coating (21 CFR 14.12). (Ex. 2.)

2. Recent investigations have shown that coumarin has toxic properties, should now be classed as a poisonous and deleterious substance, and is not suitable for use in foods, and so is not a suitable optional ingredient of the various chocolate products named in finding 1. (R. 6–17; Ex. 3, 4.)

*Conclusion.* It is concluded that it will promote honesty and fair dealing in the interest of consumers to amend the definitions and standards of identity for the various cacao products named in finding 1 to repeal all provisions making coumarin an optional ingredient in such definitions and standards of identity.

Therefore, it is proposed that Part 14—Cacao Products; Definitions and Standards of Identity be amended in the following respects:

1 a. In § 14.2 (a) (3), omit the word "coumarin".

b. In § 14.2 (b), last sentence, change the statement "With Added Cinnamon, Vanilla, and Coumarin, an Artificial Flavoring" to read "With Added Cinnamon, Vanilla, and Ethyl Vanillin, an Artificial Flavoring."

2 a. In § 14.3 (a) (3), omit the word "coumarin".

b. In § 14.3 (b), last sentence, change the statement "With Added Cinnamon, Vanilla, and Coumarin, an Artificial Flavoring" to read "With Added Cinnamon, Vanilla, and Ethyl Vanillin, an Artificial Flavoring."

3 a. In § 14.6 (a) (2), omit the word "coumarin".

b. In § 14.6 (c), last sentence, change the Statement "With Added Cinnamon, Vanilla, and Coumarin, an Artificial Flavoring" to read "With Added Cinnamon, Vanilla, and Ethyl Vanillin, an Artificial Flavoring."

4a. In § 14.7 (a) (2), omit the word "coumarin".

b. In § 14.7 (c) (3), last sentence, change the statement "With Added Emulsifier and Coumarin, an Artificial Flavoring" to read "With Added Emulsifier and Ethyl Vanillin, an Artificial Flavoring."

Any interested person whose appearance was filed at the hearing may, within 30 days from the date of the publication of this tentative order in the FEDERAL REGISTER, file with the Hearing Clerk, Department of Health, Education, and Welfare, Room 5440, Health, Education, and Welfare Building, Fourth and Independence Avenue SW., Washington, D. C., written exceptions thereto. Exceptions shall point out with particularity the alleged errors in this tentative order and shall contain specific references to the pages of the transcript of the testimony or to the exhibits on which such exceptions are based. Such exceptions may be accompanied by a memorandum or brief in support thereof. Exceptions and accompanying memoranda or briefs shall be submitted in quintuplicate.

Dated: October 28, 1953.

[SEAL] NELSON A. ROCKEFELLER, *Acting Secretary.*

# NOTICES

## DEPARTMENT OF THE TREASURY

### United States Coast Guard

[CGFR 53-43]

ACCEPTANCE OF CERTIFICATES ISSUED PURSUANT TO THE INTERNATIONAL CONVENTION FOR THE SAFETY OF LIFE AT SEA, 1948

1. The Proclamation of the President, dated September 10, 1952, quoted the International Convention for the Safety of Life at Sea, 1948, which was signed at London on June 10, 1948 (hereinafter referred to as "1948 Convention"), and declared that this 1948 Convention shall be observed and in effect on and after November 19, 1952, for the United States of America (see Treaties and Other International Acts, Series 2495, issued by the Department of State).

2. The 1948 Convention states that each Contracting Government, or a person or organization duly authorized to perform the function for such country, shall issue to a vessel of her registry, which is subject to the provisions of the Convention, the applicable certificates described in Regulation 11 of Chapter I, when such vessel is in compliance with the Convention. The United States Coast Guard will accept and recognize valid certificates issued by a country that has acceded to the 1948 Convention. Therefore, such a vessel carrying valid applicable certificates will be subject to an inspection by the United States Coast Guard to the extent necessary to satisfy the marine inspectors that the condition of the vessel, her boilers, lifesaving equipment, fire-fighting equipment, etc., are as stated in the certificates held by such vessel.

Dated: October 27, 1953.

[SEAL] MERLIN O'NEILL, *Vice Admiral, U. S. Coast Guard, Commandant.*

[F. R. Doc. 53-9271; Filed, Nov. 2, 1953, 8:50 a. m.]

[1] The citations following each finding of fact refer to the pages of the transcript of the testimony and the exhibits received in evidence at the hearing.

[CGFR 53-44]

DENUNCIATION OF THE INTERNATIONAL CONVENTION FOR THE SAFETY OF LIFE AT SEA, 1929, AND DETERMINATIONS REGARDING CERTIFICATES

1. Executive Order 10402, dated October 30, 1952 (17 F. R. 9917; 3 CFR, 1952 Supp.), superseded Executive Order 7543, dated February 5, 1937, entitled "Enforcement of the Convention for the Safety of Life at Sea, 1929," to the extent that the International Convention for the Safety of Life at Sea, 1948, which was signed at London June 10, 1948 (hereinafter referred to as "1948 Convention"), replaces and abrogates the International Convention for the Safety of Life at Sea, 1929, which was signed at London on May 31, 1929 (hereinafter referred to as "1929 Convention").

2. The United States of America denounced the 1929 Convention on November 19, 1952. By the terms of Article 66 of the 1929 Convention this denunciation becomes effective on November 19, 1953.

Therefore, on and after November 19, 1953, the United States Coast Guard will not accept nor recognize any certificate held by a vessel issued pursuant to the 1929 Convention except as authorized by the 1948 Convention. The acceptance of 1929 Convention certificates held by a foreign vessel will be in accordance with her status as follows:

(a) Up to November 19, 1953, a vessel of a country which is a party to the 1929 Convention is entitled to claim recognition by the United States of a valid certificate issued pursuant to the 1929 Convention.

(b) On and after November 19, 1953, a vessel of a country which is a party to the 1929 Convention but which has not accepted nor acceded to the 1948 Convention will not be entitled to claim recognition by the United States or certificates issued pursuant to the 1929 Convention.

(c) On and after November 19, 1953, a vessel belonging to a country which is a party to the 1929 Convention and which has accepted or acceded to the 1948 Convention will be entitled to claim recognition of her 1929 Convention certificates under Regulation 77 of Chapter I of the 1948 Convention during a period of one year from the date on which her country's ratification or acceptance of the 1948 Convention becomes effective.

(d) Between the date of November 19, 1953, and the effective date of her country's ratification or acceptance of the 1948 Convention deposited subsequent to August 19, 1953, a vessel of a country which is also a party to the 1929 Convention will not be entitled to claim recognition of her certificates issued under the 1929 Convention by virtue of the authority of Regulation 11 of Chapter I of the 1948 Convention (see subparagraph (c) above for acceptance of certificates held by a vessel after the effective date of her country's ratification or acceptance of the 1948 Convention).

3. The findings and decisions of the Acting Secretary of Commerce regarding acceptance of valid safety certificates issued pursuant to the 1929 Convention, which were published as Department of Commerce Circular No. 297, dated October 8, 1935, and reaffirmed by the Commandant, United States Coast Guard, in an order dated March 5, 1942, are canceled effective November 19, 1953, because they are no longer applicable. The acceptance by the United States Coast Guard of certificates held by a foreign vessel pursuant to the 1948 Convention is set forth in a separate document entitled "Acceptance of Certificates Issued Pursuant to the International Convention for the Safety of Life at Sea, 1948" and is further identified as Coast Guard Document CGFR 53-43.

Dated: October 27, 1953.

[SEAL] MERLIN O'NEILL,
*Vice Admiral, U. S. Coast Guard, Commandant.*

## DEPARTMENT OF JUSTICE

### Immigration and Naturalization Service

ASSISTANT COMMISSIONER, INSPECTIONS AND EXAMINATIONS DIVISION

DELEGATION OF FINAL AUTHORITY WITH RESPECT TO ADJUSTMENT OF IMMIGRATION STATUS

The following amendment to the Statement of Organization of the Immigration and Naturalization Service (17 F. R. 11613, Dec. 19, 1952), as amended, is hereby prescribed:

Section 1.31 is amended by adding paragraph (fff) which, when taken with the introductory material, will read as follows:

SEC. 1.31 *Final authority: delegation to Assistant Commissioner, Inspections and Examinations Division.* The Assistant Commission, Inspections and Examinations Division, has been delegated final authority to take any action required or authorized to be taken by Chapter I of Title 8 of the Code of Federal Regulations with respect to the following matters:

* * * * * *

(fff) Adjustment of Immigration status as provided in section 6 of the Refugee Relief Act of 1953 and 8 CFR Part 481.

Dated: October 16, 1953.

HERBERT BROWNELL, Jr.,
*Attorney General.*

Recommended: September 22, 1953.

ARGYLE R. MACKEY,
*Commissioner of Immigration and Naturalization.*

## FEDERAL POWER COMMISSION

[Docket Nos. E-6199, IT-5891, IT-5932]

BUREAU OF RECLAMATION, DEPARTMENT OF THE INTERIOR

NOTICE OF REQUEST FOR CONFIRMATION AND APPROVAL OF REVISED RATES AND CHARGES FOR SALE OF POWER FROM FORT PECK PROJECT

OCTOBER 28, 1953.

In the matter of Bureau of Reclamation, Department of Interior, Fort Peck Project, Montana; Docket Nos. E-6199, IT-5891, IT-5932.

Notice is hereby given that the Commissioner of the Bureau of Reclamation, Department of Interior, on September 28, 1953, with amendment thereto on October 20, 1953, filed with the Federal Power Commission (F. P. C.) for confirmation and approval, pursuant to the provisions of the Fort Peck Act (52 Stat. 403), the following revised schedules of rates for the sale of power by the Fort Peck Project:

Schedule R6-F4—Schedule of Rates for Wholesale Firm Power Service modifying and superseding Schedule R6-F3 approved by F. P. C. by order of April 6, 1945, in Docket No. IT-5891.

Schedule R6-S4—Schedule of Rates for Wholesale Firm Power Service for Limited Period modifying and superseding Schedule R6-S2 approved by order of F. P. C. issued June 30, 1949, in Docket No. E-6199.

Schedule R6-S5—Schedule for rates for Wholesale Power Service for Customers Having Their Own Generating Facilities modifying and superseding Schedule R6-S1 approved by order of F. P. C. issued April 28, 1949, in Docket No. IT-5891.

Special rate for sale of electric energy to Montana-Dakota Utilities Co. modifying and superseding the special rate approved by F. P. C. by order of April 6, 1945, in Docket No. IT-5932.

The new rates modify the rates now in effect principally by substituting for the present minimum monthly bill provisions for a minimum annual capacity charge as follows:

For first 12 full billing period: $7.20 per kilowatt of 80 percent of contract rate of delivery.

For second 12 full billing periods: $7.20 per kilowatt of 90 percent of contract rate of delivery.

For subsequent billing periods: $7.20 per kilowatt of 100 percent of contract rate of delivery.

Rate Schedules R6-F4, R6-S4 and R6-S5 provide further with respect to the minimum annual capacity charge that subsequent increases in rates of delivery after initial service under the schedule shall be considered separately in like manner.

Any person desiring to make comments or suggestions with respect to the above should submit the same on or before November 18, 1953, to the Federal Power Commission, Washington 25, D. C.

[SEAL] J. H. GUTRIDE,
*Acting Secretary.*

ARKANSAS LOUISIANA GAS CO.

NOTICE OF ORDER AFFIRMING INITIAL DECISION

OCTOBER 28, 1953.

Notice is hereby given that on October 26, 1953, the Federal Power Commission issued its order adopted October 21, 1953, in the above-entitled matters, affirming initial decision of the Presiding Examiner issued in said dockets.

[SEAL] J. H. GUTRIDE,
*Acting Secretary.*

[F. R. Doc. 53-9238; Filed, Nov. 2, 1953; 8:45 a. m.]

[Docket Nos. G-2222, G-2235, G-2243, G-2244, G-2271]

ALABAMA-TENNESSEE NATURAL GAS CO. ET AL.

ORDER DENYING REQUEST FOR SHORTENED PROCEDURE, SEVERING PART OF AN APPLICATION, CONSOLIDATING PROCEEDINGS, PERMITTING INTERVENTION, FIXING DATE OF HEARING AND SPECIFYING PROCEDURE

In the matters of Alabama-Tennessee Natural Gas Company, Docket No. G-2222; The Waterworks and Gas Board of the Town of Cherokee, Alabama, Docket No. G-2235; City of Russellville, Alabama, Docket No. G-2243; The Lawrence-Colbert Counties Gas District, Docket No. G-2244; Tennessee Gas Transmission Company, Docket No. G-2271.

Alabama-Tennessee Natural Gas Company (Alabama-Tennessee), a Delaware corporation having its principal place of business in Florence, Alabama, on August 5, 1953, filed an application for a certificate of public convenience and necessity pursuant to section 7 (c) of the Natural Gas Act, authorizing the construction and operation of approximately 13.2 miles of 12- and 8-inch loop pipe line, together with a 350 BHP compressor station to be located in Colbert County, Alabama, for the purpose of increasing its system capacity to meet the estimated peak requirements of its customers during the 1953–1954 winter, all as more fully described in said application, as supplemented, on file with the Commission and open to public inspection.

The Waterworks and Gas Board of the Town of Cherokee, Alabama (Cherokee), a municipal corporation located in the State of Alabama, on August 31, 1953, filed an application pursuant to section 7 (a) of the Natural Gas Act for an order directing Alabama-Tennessee to establish physical connection of its transmission facilities near the Town of Cherokee with the proposed facilities of, and to deliver and sell natural gas to, Cherokee for resale, all as more fully described in said application on file with the Commission and open to public inspection.

The City of Russellville, Alabama (Russellville), a municipal corporation located in the State of Alabama, on September 8, 1953, filed an application pursuant to section 7 (a) of the Natural Gas Act for an order directing Alabama-Tennessee to establish physical connection of its transmission facilities near the City of Tuscumbia, Alabama, with the proposed facilities of, and to deliver and sell natural gas to, Russellville for resale, or to the Gas Board of the City of Russellville for resale if the creation of such a Gas Board is deemed necessary, all as more fully described in said application on file with the Commission and open to public inspection.

The Lawrence-Colbert Counties Gas District (Gas District), a public corporation organized under the laws of the State of Alabama, on September 8, 1953, filed an application pursuant to section 7 (a) of the Natural Gas Act for an order directing Alabama-Tennessee to establish physical connection of its transmission facilities with the proposed facilities of, and to deliver and sell natural gas to, Gas District for resale, all as more fully described in said application on file with the Commission and open to public inspection.

Tennessee Gas Transmission Company (Tennessee), a Delaware corporation having its principal place of business in Houston, Texas, on October 12, 1953, filed an application for a certificate of public convenience and necessity pursuant to section 7 (c) of the Natural Gas Act, authorizing the transportation and sale of natural gas in increased volumes to Alabama-Tennessee, Tennessee Natural Gas Lines, Inc. and Western Kentucky Gas Company for the purpose of enabling these customer companies to meet their requirements during the 1953-1954 winter, all as more fully described in said application on file with the Commission and open to public inspection.

The applicants herein for relief under section 7 (a) of the Natural Gas Act, Cherokee in Docket No. G-2235, Russellville in Docket No. G-2243, and Gas District in Docket No. G-2244, each filed, on September 21, 1953, an amendment to the respective applications requesting that the order entered in each proceeding also direct Tennessee, Alabama-Tennessee's sole supplier, "to sell natural gas to Alabama-Tennessee in quantities and amounts sufficient to meet the requirements of * * * (each) Applicant as well as Alabama-Tennessee's other customers."

Alabama-Tennessee and Tennessee have each requested that their respective applications herein be heard under the shortened procedure provided by § 1.32 (b) (18 CFR 1.32 (b)) of the Commission's rules of practice and procedure.

Due notice of the filing of said application by Alabama-Tennessee has been given, including publication in the FEDERAL REGISTER on August 27, 1953 (18 F. R. 5127). Notices of the filing of the applications by Cherokee, Russellville, Gas District and Tennessee were published in the FEDERAL REGISTER on October 23, 1953 (18 F. R. 6740 and 6741). The time within which protests or petitions to intervene with respect to the latter four applications may be filed will expire November 9, 1953.

Alabama-Tennessee filed separate answers to the applications of Cherokee, Russellville and Gas District, respectively, on September 30, 1953, requesting dismissal of all of the said applications for the principal reason that Alabama-Tennessee's ability to render adequate service to its existing customers would be impaired due to capacity limitations if the applications were granted.

Tennessee has not filed answers to the amendments to the applications herein of Cherokee, Russellville and Gas District.

Petitions seeking leave to intervene in the proceeding in Docket No. G-2222 were filed by Cherokee on September 2, 1953, and by Russellville and Gas District on September 8, 1953.

A petition seeking leave to intervene in the proceeding in Docket No. G-2222 was filed by the Town of Selmer, Tennessee, on September 9, 1953. A joint petition seeking leave to intervene in the proceeding in Docket No. G-2222 was filed by the Cities of Athens, Decatur, Florence, Hartselle, Huntsville, Sheffield and Tuscumbia, Alabama, and the Cities of Corinth and Iuka, Mississippi, on September 10, 1953. All of the above-named communities purchase their entire supply of natural gas from Alabama-Tennessee. The joint petition was not filed within the time prescribed by the Commission's rules of practice and procedure.

An answer to the petitions of Cherokee, Russellville and Gas District to intervene in Docket No. G-2222 was filed by Alabama-Tennessee on September 17, 1953, raising numerous objections, principally that permitting intervention would delay the proceedings in Docket G-2222 to the detriment of existing customers. A joint motion in opposition to the petitions of Cherokee and Russellville to intervene in Docket No. G-2222 was filed by the Cities of Athens, Decatur, Florence, Hartselle, Huntsville, Sheffield and Tuscumbia, Alabama, Corinth and Iuka, Mississippi, and Selmer, Tennessee, on September 14, 1953, raising generally the same objections as those raised by Alabama-Tennessee. A memorandum in support of the petitions to intervene by Cherokee, Russellville and Gas District in Docket No. G-2222 was filed by the said communities and Gas District on October 1, 1953.

Separate joint petitions for intervention in the proceedings in Docket Nos. G-2235, G-2243 and G-2244 were filed by the Cities of Athens, Decatur, Florence, Hartselle, Huntsville, Sheffield and Tuscumbia, Alabama, Corinth and Iuka, Mississippi, and Selmer, Tennessee, on September 29, 1953.

Separate motions by the applicants in Docket Nos. G-2235, G-2243 and G-2244 to consolidate the proceedings in each of these dockets with the proceeding in Docket No. G-2222 were filed September 21, 1953. A joint answer in opposition was filed by the Cities of Athens, Decatur, Florence, Hartselle, Huntsville, Sheffield and Tuscumbia, Alabama, Corinth and Iuka, Mississippi, and Selmer, Tennessee, on September 29, 1953, raising generally the same objections urged against granting the petitions to intervene by Cherokee, Russellville and Gas District in Docket No. G-2222. Alabama-Tennessee filed objections to the above motion to consolidate on September 30, 1953.

A joint application by the Cities of Haleyville and Phil Campbell, Alabama, for an order and relief similar to that requested herein in Docket Nos. G-2235, G-2243 and G-2244 was withdrawn and canceled, as was a petition to intervene in the proceedings in Docket No. G-2222, after the City Council of the City of Haleyville by resolution authorized and directed such action with respect to the City of Haleyville. Accordingly, any pleadings in response to or with refer-

ence to said application and petition to intervene by the Cities of Haleyville and Phil Campbell will not be considered herein.

The Commission finds:

(1) Good cause has not been shown for granting Alabama-Tennessee's request that its application herein be heard under the shortened procedure as provided by the Commission's rules of practice and procedure, and good cause has likewise not been shown for granting Tennessee's request that its application herein be heard under the shortened procedure, so far as the latter application involves transportation and sale of additional volumes of gas to Alabama-Tennessee, and said requests should be denied as and to the extent hereinafter ordered.

(2) That portion of the application in Docket No. G-2271, involving transportation and sale of additional volumes of gas to Alabama-Tennessee, should be severed from the other matters contained in the said application in Docket No. G-2271 for the purpose of separate hearing and disposition and should further be consolidated with the other above-entitled proceedings because such portion of the said application in Docket No. G-2271, and the matters contained in the application in Docket No. G-2222, are interdependent.

(3) Although the joint petition to intervene in the proceeding in Docket No. G-2222 by the Cities of Athens, Decatur, Florence, Hartselle, Huntsville, Sheffield and Tuscumbia, Alabama, and Corinth and Iuka, Mississippi, was not filed within the time required by § 1.8 of the Commission's rules of practice and procedure, good cause exists to permit the late filing.

(4) The participation by intervention of Cherokee, Russellville and Gas District, the Town of Selmer, Tennessee, and of the above-named joint petitioners in the proceeding in Docket No. G-2222, and the participation of the above-named joint petitioners in the proceedings in Docket Nos. G-2235, G-2243 and G-2244, may be in the public interest.

(5) Good cause exists to consolidate all the above-entitled applications, including a portion of the application in Docket No. G-2271, for the purpose of hearing.

(6) It is necessary and appropriate in carrying out the provisions of the Natural Gas Act and it is in the public interest that the procedure hereinafter prescribed with respect to exhibits and prepared testimony be ordered.

The Commission orders:

(A) Alabama-Tennessee's request that its application herein be heard under the shortened procedure provided by § 1.32 (b) of the Commission's rules of practice and procedure and Tennessee's request that its application herein be heard under the shortened procedure, so far as the latter application involves transportation and sale of additional volumes of gas to Alabama-Tennessee, be and the same are hereby denied.

(B) That portion of the application in Docket No. G-2271, involving transportation and sale of additional volumes of gas to Alabama-Tennessee, be and the same is hereby severed from the other matters contained in the said application in Docket No. G-2271 for the purpose of separate hearing and disposition.

(C) The Waterworks and Gas Board of the Town of Cherokee, Alabama, the City of Russellville, Alabama, and The Lawrence-Colbert Counties Gas District and the Town of Selmer, Tennessee, and the Cities of Athens, Decatur, Florence, Hartselle, Huntsville, Sheffield and Tuscumbia, Alabama, and Corinth and Iuka, Mississippi, be and the same are hereby permitted to become interveners in the proceeding in Docket No. G-2222, and the Cities of Athens, Decatur, Florence, Hartselle, Huntsville, Sheffield and Tuscumbia, Alabama, Corinth and Iuka, Mississippi, and Selmer, Tennessee, be and the same are hereby permitted to become interveners in the proceedings in Docket Nos. G-2235, G-2243 and G-2244, subject to the rules and regulations of the Commission: *Provided, however,* That the participation of the above-named petitioners shall be limited to matters affecting asserted rights and interests specifically set forth in the petition for leave to intervene: *And provided, further,* That the admission of the above-named petitioners shall not be construed as recognition by the Commission that it might be aggrieved because of any order or orders of the Commission entered in the respective proceedings.

(D) The proceedings upon the applications in Docket Nos. G-2222, G-2235, G-2243 and G-2244, and that portion of the proceeding upon the application in Docket No. G-2271, involving transportation and sale of additional volumes of gas to Alabama-Tennessee, be and the same are hereby consolidated for purpose of hearing.

(E) Pursuant to the authority contained in and by virtue of the jurisdiction conferred upon the Federal Power Commission by sections 7 and 15 of the Natural Gas Act and the Commission's rules of practice and procedure, a formal hearing be held commencing on November 18, 1953, at 10:00 a. m., e. s. t., in the Hearing Room of the Federal Power Commission, 441 G Street NW., Washington, D. C., concerning the matters involved and the issues presented by said applications, as supplemented and amended, and as limited herein with respect to the application in Docket No. G-2271.

(F) In the interest of expedition, all parties to the proceeding herein shall, not later than November 12, 1953, serve upon all parties herein, including Commission Staff counsel, copies of all exhibits and prepared testimony proposed to be offered at the hearing.

(G) Interested State commissions may participate as provided by §§ 1.8 and 1.37 (f) (18 CFR 1.8 and 1.37 (f)) of the Commission's rules of practice and procedure.

Adopted: October 23, 1953.

Issued: October 28, 1953.

By the Commission.

[SEAL] J. H. GUTRIDE,
*Acting Secretary.*

[Docket No. G-2269]

COLORADO INTERSTATE GAS CO.

NOTICE OF APPLICATION

OCTOBER 28, 1953.

Take notice that Colorado Interstate Gas Company (Applicant), a Delaware corporation, with its principal place of business in Colorado Springs, Colorado, filed, on October 7, 1953, an application for a certificate of public convenience and necessity pursuant to section 7 of the Natural Gas Act, authorizing the construction and operation of the following natural-gas facilities:

(1) 49.5 miles of 20-inch transmission line from its presently authorized Morton County Compressor Station, Morton County, Kansas, to Compressor Station No. 101 of Natural Gas Pipeline Company of America (Natural), near Hooker, Oklahoma.

(2) A dehydration plant in Morton County, Kansas.

(3) A delivery meter station.

The facilities are proposed to be used to deliver approximately 20,000 Mcf of firm gas per day from the Morton County acreage to Natural and such additional volumes on a firm basis, as may be available up to a total of 50,000 Mcf per day.

The estimated overall cost of the proposed facilities, including production and gathering facilities, is $3,604,950 which Applicant proposes to finance by borrowing $3,500,000 on a short term basis.

Protests or petitions to intervene may be filed with the Federal Power Commission, Washington 25, D. C., in accordance with the rules of practice and procedure (18 CFR 1.8 or 1.10) on or before the 18th day of November 1953. The application is on file with the Commission for public inspection.

[SEAL] LEON M. FUQUAY,
*Secretary.*

[F. R. Doc. 53-9255; Filed, Nov. 2, 1953; 8:48 a. m.]

---

[Docket No. G-2272]

BLACKSTONE VALLEY GAS AND ELECTRIC CO.

NOTICE OF APPLICATION

OCTOBER 27, 1953.

Take notice that Blackstone Valley Gas and Electric Company (Applicant), a Rhode Island corporation having its principal place of business in Pawtucket, Rhode Island, filed on October 12, 1953, an application pursuant to section 7 of the Natural Gas Act for a certificate of public convenience and necessity authorizing the use, maintenance and operation of certain existing facilities for the purpose of transporting, delivering and selling natural gas to Blackstone Gas Company subject to the jurisdiction of the Commission.

Applicant proposes to deliver natural gas to be received from Northeastern Gas Transmission Company in accordance with the terms of the Commission's Opinion No. 259 and accompanying order issued August 6, 1953, in Docket No. G-1568 et al., to Blackstone Gas Company at the Massachusetts-Rhode Island state border for distribution in the town of Blackstone, Massachusetts.

Applicant represents that the delivery and sale of natural gas will be accomplished without construction of additional facilities.

Protests or petitions to intervene may be filed with the Federal Power Commission, 441 G Street NW., Washington, D. C., in accordance with the rules of practice and procedure (18 CFR 1.8 or 1.10) on or before the 16th day of November 1953. The application is on file with the Commission for public inspection.

---

[Docket No. G-2279]

EL PASO NATURAL GAS CO.

NOTICE OF APPLICATION

OCTOBER 27, 1953.

Take notice that on October 15, 1953, El Paso Natural Gas Company (Applicant), a Delaware corporation, having its principal place of business at El Paso, Texas, filed an application for a certificate of public convenience and necessity pursuant to section 7 of the Natural Gas Act authorizing the construction and operation of certain natural gas facilities as hereinafter described.

The facilities which Applicant proposes to construct and operate include a 30-inch O. D. pipeline approximately 3 miles in length extending from Applicant's existing Yuma meter station located in Yuma County, Arizona, easterly and southeasterly direction paralleling Applicant's existing 5-inch O. D. Yuma transmission pipeline to a point of termination in said county together with necessary valves and regulators for utilization of the aforementioned 3-mile section as a storage capacity for meeting peak day demands on its Yuma facilities, and a 150 H. P. portable type field compressor station with appurtenant standard equipment for the operation of the same to be located at the beginning of the 3-mile section of the 30-inch O. D. pipeline.

The 3 miles of storage line and related facilities will be arranged to operate so that when peak demands exceed the maximum delivery capacity of Applicant's 5-inch pipeline, the pressure at the Yuma meter station will begin to drop below contract or required delivery and by means of a regulator controlled by such delivery pressure, as the pressure begins to drop, the regulator will open and pass gas from the 30-inch pipeline.

The application recites that the facilities hereinbefore described will be utilized in conjunction with the operation of its existing facilities for the purpose of making additional deliveries of natural gas to the Arizona Public Service Company for distribution and resale by said company to residents and other users of natural gas within and near the Town of Yuma, Arizona. Applicant asserts that such increased deliveries will be made primarily to meet the high hourly peak requirements during the period of from 4 to 5 months from November through March of each year. And further that unless such facilities are constructed and placed in operation Applicant will not be able to meet its peak day requirement demands which it anticipates will be made upon its system for additional natural gas which it asserts will result in curtailment of service to the customers of the Arizona Public Service Company in and about the Town of Yuma, Arizona.

The total estimated cost of the proposed facilities is approximately $303,015 which Applicant proposes to finance out of its current working funds without additional financing.

The Applicant requests that its application be heard under the shortened procedure pursuant to § 1.32 (b) of the Commission's rules of practice and procedure.

Protests or petitions to intervene may be filed with the Federal Power Commission, Washington 25, D. C., in accordance with the rules of practice and procedure (18 CFR 1.8 or 1.10) on or before the 16th day of November 1953. The application is on file with the Commission for public inspection.

[Docket No. G-2282]

NATURAL GAS PIPELINE COMPANY OF AMERICA

NOTICE OF APPLICATION

OCTOBER 28, 1953.

Take notice that Natural Gas Pipeline Company of America (Applicant), a Delaware corporation, with its principal place of business in Chicago, Illinois, filed, on October 15, 1953, an application for a certificate of public convenience and necessity pursuant to section 7 of the Natural Gas Act, authorizing the construction and operation of the following natural-gas facilities:

(1) One (1) additional 1250 B. H. P. compressor unit, to be installed at Applicant's existing Compressor Station No. 101, near Hooker, Oklahoma.

(2) 2750 feet of 24-inch pipeline connecting Applicant's Compressor Station No. 101 with its main transmission line.

The facilities are to be used for the compression of gas proposed to be purchased from Colorado Interstate Gas Company, at Docket No. G-2269, as well as that purchased under an existing contract with Panoma Corporation.

The estimated over-all cost of the proposed facilities is $665,000 which Applicant proposes to finance from funds on hand.

Protests or petitions to intervene may be filed with the Federal Power Commission, Washington 25, D. C., in accordance with the rules of practice and procedure (18 CFR 1.8 or 1.10) on or before the 18th day of November 1953. The application is on file with the Commission for public inspection.

## INTERSTATE COMMERCE COMMISSION

[4th Sec. Application 28595]

FOREIGN WOODS FROM GULF PORTS TO VIRGINIA

APPLICATION FOR RELIEF

OCTOBER 29, 1953.

The Commission is in receipt of the above-entitled and numbered application for relief from the long-and-short-haul provision of section 4 (1) of the Interstate Commerce Act.

Filed by: R. E. Boyle, Jr., Agent, for carriers parties to Agent C. A. Spaninger's tariff I. C. C. No. 1356.

Commodities involved: Lumber, logs, flitches or piling of foreign woods, built-up woods, dimension stock and carpenters moulding, carloads.

From: Pensacola, Fla., Mobile, Ala., Gulfport, Miss., and New Orleans, La.

To: Points in Virginia.

Grounds for relief: Competition with rail carriers, circuitous routes, and to maintain grouping.

Schedules filed containing proposed rates: C. A. Spaninger's tariff I. C. C. No. 1356, supp. 9.

Any interested person desiring the Commission to hold a hearing upon such application shall request the Commission in writing so to do within 15 days from the date of this notice. As provided by the general rules of practice of the Commission, Rule 73, persons other than applicants should fairly disclose their interest, and the position they intend to take at the hearing with respect to the application. Otherwise the Commission, in its discretion, may proceed to investigate and determine the matters involved in such application without further or formal hearing. If because of an emergency a grant of temporary relief is found to be necessary before the expiration of the 15-day period, a hearing, upon a request filed within that period, may be held subsequently.

By the Commission.

[4th Sec. Application 28596]

LIQUEFIED CHLORINE GAS FROM WEST VIRGINIA, TO POINTS IN THE SOUTH

APPLICATION FOR RELIEF

OCTOBER 29, 1953.

The Commission is in receipt of the above-entitled and numbered application for relief from the long-and-short-haul provision of section 4 (1) of the Interstate Commerce Act.

Filed by: H. R. Hinsch, Alternate Agent, for carriers parties to his tariffs I. C. C. Nos. 4367 and 4510, pursuant to fourth-section order No. 17220.

Commodities involved: Liquified chlorine gas, tank-car loads.

From: Points in West Virginia.

To: Points in Florida, Georgia, North Carolina, South Carolina, and Tennessee.

Grounds for relief: Competition with rail carriers and circuitous routes.

Any interested person desiring the Commission to hold a hearing upon such application shall request the Commission in writing so to do within 15 days from the date of this notice. As provided by the general rules of practice of the Commission, Rule 73, persons other than applicants should fairly disclose their interest, and the position they intend to take at the hearing with respect to the application. Otherwise the Commission, in its discretion, may proceed to investigate and determine the matters involved in such application without further or formal hearing. If because of an emergency a grant of temporary relief is found to be necessary before the expiration of the 15-day period, a hearing, upon a request filed within that period, may be held subsequently.

[4th Sec. Application 28597]

LARD FROM MEMPHIS, TENN., TO GEORGIA

APPLICATION FOR RELIEF

OCTOBER 29, 1953.

The Commission is in receipt of the above-entitled and numbered application for relief from the long-and-short-haul provision of section 4 (1) of the Interstate Commerce Act.

Filed by: R. E. Boyle, Jr., Agent, for carriers parties to Agent C. A. Spaninger's tariff I. C. C. No. 1215.

Commodities involved: Lard, lard compounds, lard substitutes, cooking oils, salad oils or vegetable oil shortening, in packages, carloads.

From: Memphis, Tenn.

To: Atlanta, Columbus, La Grange, Rome and West Point, Ga.

Grounds for relief: Competition with motor carriers.

Schedules filed containing proposed rates: C. A. Spaninger's tariff I. C. C. No. 1215, supp. 34.

Any interested person desiring the Commission to hold a hearing upon such application shall request the Commission in writing so to do within 15 days from the date of this notice. As provided by the general rules of practice of the Commission, Rule 73, persons other than applicants should fairly disclose their interest, and the position they intend to take at the hearing with respect to the application. Otherwise the Commission, in its discretion, may proceed to investigate and determine the matters involved in such application without further or formal hearing. If because of an emergency a grant of temporary relief is found to be necessary before the expiration of the 15-day period, a hearing, upon a request filed within that period, may be held subsequently.

[4th Sec. Application 28598]

KYANITE FROM CLOVER, S. C., TO WHEELING, W. VA.

APPLICATION FOR RELIEF

OCTOBER 29, 1953.

The Commission is in receipt of the above-entitled and numbered application for relief from the long-and-short-haul provision of section 4 (1) of the Interstate Commerce Act.

Filed by: R. E. Boyle, Jr., Agent, for carriers parties to Agent C. A. Spaninger's tariff I. C. C. No. 1346.

Commodities involved: Kyanite, crude or ground, carloads.

From: Clover, S. C.

To: Wheeling, W. Va.

Grounds for relief: Competition with rail carriers and circuitous routes.

Schedules filed containing proposed rates; C. A. Spaninger's tariff I. C. C. No. 1346, supp. 27.

Any interested person desiring the Commission to hold a hearing upon such application shall request the Commission in writing so to do within 15 days from the date of this notice. As provided by the general rules of practice of the Commission, Rule 73, persons other than applicants should fairly disclose their interest, and the position they intend to take at the hearing with respect to the application. Otherwise the Commission, in its discretion, may proceed to investigate and determine the matters involved in such application without further or formal hearing. If because of an emergency a grant of temporary relief is found to be necessary before the expiration of the 15-day period, a hearing, upon a request filed within that period, may be held subsequently.

[Rev. S. O. 562, Taylor's I. C. C. Order 30]

MINNESOTA WESTERN RAILWAY CO.

REROUTING OR DIVERSION OF TRAFFIC

In the opinion of Charles W. Taylor, Agent, the Minnesota Western Railway Company, account bridge out of service, is unable to transport traffic routed over its line: *It is ordered*, That:

(a) Rerouting traffic: The Minnesota Western Railway Company being unable to transport traffic routed over its line, because of bridge out of service, is hereby authorized to divert or reroute such traffic over any available route to expedite the movement, regardless of the routing shown on the waybill. The billing covering all such cars rerouted shall carry a reference to this order as authority for the rerouting.

(b) Concurrence of receiving roads to be obtained: The railroad desiring to divert or reroute traffic under this order shall confer with the proper transportation officer of the railroad or railroads to which such traffic is to be diverted or rerouted, and shall receive the concurrence of such other railroads before the rerouting or diversion is ordered.

(c) Notification to shippers: Each carrier rerouting cars in accordance with this order shall notify each shipper at the time each car is rerouted or diverted and shall furnish to such shipper the new routing provided under this order.

(d) Inasmuch as the diversion or rerouting of traffic by said Agent is deemed to be due to carrier's disability, the rates applicable to traffic diverted or rerouted by said Agent shall be the rates which were applicable at the time of shipment on the shipments as originally routed.

(e) In executing the directions of the Commission and of such Agent provided for in this order, the common carriers involved shall proceed even though no contracts, agreements, or arrangements now exist between them with reference to the divisions of the rates of transportation applicable to said traffic; divisions shall be, during the time this order remains in force, those voluntarily agreed upon by and between said carriers; or upon failure of the carriers to so agree, said divisions shall be those hereafter fixed by the Commission in accordance with pertinent authority conferred upon it by the Interstate Commerce Act.

(f) Effective date: This order shall become effective at 9:00 a. m., October 27, 1953.

(g) Expiration date: This order shall expire at 11:59 p. m., November 26, 1953, unless otherwise modified, changed, suspended or annulled.

*It is further ordered*, That this order shall be served upon the Association of American Railroads, Car Service Division, as agent of all railroads subscribing to the car service and per diem agreement under the terms of that agreement and by filing it with the Director, Division of the Federal Register.

Issued at Washington, D. C., October 27, 1953.

[Rev. S. O. 562, Taylor's I. C. C. Order 31]

NEW YORK, NEW HAVEN AND HARTFORD RAILROAD CO.

REROUTING OR DIVERSION OF TRAFFIC

In the opinion of Charles W. Taylor, Agent, The New York, New Haven and Hartford Railroad Company, account of derailment at East Walden, New York, approximately five miles east of Maybrook, New York, is unable to transport traffic routed over its line between Maybrook and Hopewell Junction, New York: *It is ordered*, That:

(a) Rerouting traffic: The New York, New Haven and Hartford Railroad Company, being unable to transport traffic routed over its line between Maybrook and Hopewell Junction, because of derailment at East Walden, New York, and its connections, is hereby authorized to divert or reroute such traffic over any available route to expedite the movement, regardless of the routing shown on the waybill. The billing covering all such cars rerouted shall carry a reference to this order as authority for the rerouting.

(b) Concurrence of receiving roads to be obtained: The railroads desiring to divert or reroute traffic under this order shall confer with the proper transportation officer of the railroad or railroads to which such traffic is to be diverted or rerouted, and shall receive the concurrence of such other railroads before the rerouting or diversion is ordered.

(c) Notification to shippers: Each carrier rerouting cars in accordance with this order shall notify each shipper at the time each car is rerouted or diverted and shall furnish to such shipper the new routing provided under this order.

(d) Inasmuch as the diversion or rerouting of traffic by said Agent is deemed to be due to carrier's disability, the rates applicable to traffic diverted or rerouted by said Agent shall be the rates which were applicable at the time of shipment on the shipments as originally routed.

(e) In executing the directions of the Commission and of such Agent provided for in this order, the common carriers involved shall proceed even though no contracts, agreements, or arrangements now exist between them with reference to the divisions of the rates of transportation applicable to said traffic; divisions shall be, during the time this order remains in force, those voluntarily agreed upon by and between said carriers; or upon failure of the carriers to so agree, said divisions shall be those hereafter fixed by the Commission in accordance with pertinent authority conferred upon it by the Interstate Commerce Act.

(f) Effective date: This order shall become effective at 9:00 a. m., October 28, 1953.

(g) Expiration date: This order shall expire at 9:00 a. m., October 30, 1953, unless otherwise modified, changed, suspended or annulled.

*It is further ordered*, That this order shall be served upon the Association of American Railroads, Car Service Division, as agent of all railroads subscribing to the car service and per diem agreement under the terms of that agreement and by filing it with the Director, Division of the Federal Register.

Issued at Washington, D. C., October 28, 1953.

## OFFICE OF DEFENSE MOBILIZATION

EDENTON, NORTH CAROLINA, AREA

FINDING AND DETERMINATION OF CRITICAL DEFENSE HOUSING AREAS UNDER DEFENSE HOUSING AND COMMUNITY FACILITIES AND SERVICES ACT OF 1951, AS AMENDED

Upon a review of specific data presented to me, I find that all of the conditions set forth in section 101 (b) of the Defense Housing and Community Facilities and Services Act of 1951, as amended, exist in the

*Edenton, North Carolina, Area*: The area consists of all of Chowan County, North Carolina.

Accordingly, pursuant to section 101 of the Defense Housing and Community Facilities and Services Act of 1951 and by virtue of the authority vested in me by Executive Order 10296 of October 2, 1951, I hereby determine that said area is a critical defense housing area.

Dated: October 29, 1953.

ARTHUR S. FLEMMING, *Director, Office of Defense Mobilization.*

## SECURITIES AND EXCHANGE COMMISSION

[File No. 1-2873]

SIMPLICITY PATTERN CO., INC.

NOTICE OF APPLICATION TO WITHDRAW FROM LISTING AND REGISTRATION, AND OF OPPORTUNITY FOR HEARING

OCTOBER 28, 1953.

Simplicity Pattern Co., Inc., pursuant to section 12 (d) of the Securities Exchange Act of 1934 and Rule X-12D2-1 (b) promulgated thereunder, has made application to withdraw its Common Stock, $1 Par Value, from listing and registration on the Detroit Stock Exchange.

The reasons alleged in the application for withdrawing this security from listing and registration are as follows:

(1) No transactions in this security have taken place on the Detroit Stock Exchange during the year 1953 up until the present date.

(2) Since the only transactions on a national securities exchange that are now being effected in this security are taking place on the American Stock Exchange where the security will continue to be listed and registered, applicant does not feel justified in continuing the expense of listing and registration on the Detroit Stock Exchange.

Upon receipt of a request, prior to November 20, 1953, from any interested person for a hearing in regard to terms to be imposed upon the delisting of this security, the Commission will determine whether to set the matter down for hearing. Such request should state briefly the nature of the interest of the person requesting the hearing and the position he proposes to take at the hearing with respect to imposition of terms or conditions. In addition, any interested person may submit his views or any additional facts bearing on this application by means of a letter addressed to the Secretary of the Securities and Exchange Commission, Washington, D. C. If no one requests a hearing on this matter, this application will be determined by order of the Commission on the basis of the facts stated in the application, and other information contained in the official file of the Commission pertaining to the matter.

By the Commission.

[SEAL] ORVAL L. DUBOIS, *Secretary.*

[File No. 1-3237]

ADOLF GOBEL, INC.

ORDER SUMMARILY SUSPENDING TRADING

At a regular session of the Securities and Exchange Commission held at its office in the city of Washington, D. C., on the 28th day of October A. D. 1953.

The Commission by order adopted March 13, 1953, pursuant to section 19 (a) (4) of the Securities Exchange Act of 1934, having summarily suspended trading in the $1 par value common stock of Adolf Gobel, Inc. on the American Stock Exchange for a period of ten days from that date, and subsequently having entered additional orders further suspending such trading in order to prevent fraudulent, deceptive or manipulative acts or practices; and

The Commission being of the opinion that the public interest requires the summary suspension of trading in such security on that Exchange and that such action is necessary and appropriate for the protection of investors; and,

The Commission being of the opinion that such suspension is necessary in order to prevent fraudulent, deceptive or manipulative acts or practices, with the result that it will be unlawful under section 15 (c) (2) of the Securities Exchange Act of 1934 and the Commission's Rule X-15C2-2 thereunder, for any broker or dealer to make use of the mails or of any means or instrumentality of interstate commerce to effect any transaction in, or to induce or attempt to induce the purchase or sale of, such security otherwise than on a national securities exchange,

*It is ordered*, Pursuant to section 19 (a) (4) of the Securities Exchange Act of 1934, that trading in said securities on the American Stock Exchange be summarily suspended in order to prevent fraudulent, deceptive or manipulative acts or practices, effective at the opening of the trading session on said Exchange on October 29, 1953, for a period of ten days.

By the Commission.

PENN FUEL GAS, INC., AND JOHN H. WARE, 3D

SUPPLEMENTAL ORDER GRANTING APPLICATION WITH RESPECT TO FEES AND EXPENSES

OCTOBER 27, 1953.

In the matter of Penn Fuel Gas, Inc., and John H. Ware, 3d, File No. 70-2507; Penn Fuel Gas, Inc., File No. 69-71.

The Commission having by order, dated June 29, 1951, granted the application, as amended, of Penn Fuel Gas, Inc. ("Penn Fuel"), an exempt holding company, for approval pursuant to section 10 of the Public Utility Holding Company Act of 1935 ("act") of the acquisition from John H. Ware, 3d, the owner of all of Penn Fuel's outstanding common stock, of the outstanding securities of seven gas utility companies and of certain related transactions;

The record having been incomplete with respect to the fees and expenses proposed to be paid by Penn Fuel for services in connection with the proposed transactions;

Penn Fuel having filed a further amendment to its application setting forth the nature and extent of the services rendered and the fees and expenses proposed to be paid in connection therewith, as follows:

| | Fees and expenses |
|---|---|
| Morgan, Lewis & Bocklius, a company counsel: | |
| Fee | $12,500.00 |
| Expenses | 960.74 |
| Ropes, Gray, Best, Coolidge & Rugg, counsel to Massachusetts Mutual Life Insurance Co., purchaser of Penn Fuel's bonds: | |
| Fee | 3,500.00 |
| Expenses | 381.89 |
| George H. Dean Co., printing indenture and exchange agreement | 2,253.49 |
| Other | 1,035.70 |
| Total | 20,635.82 |

Penn Fuel having requested that the Commission approve the payment of the aforesaid fees and expenses;

The Commission having examined the record as further amended and it appearing to the Commission that the requested fees and expenses are not unreasonable:

*It is ordered*, That the application as further amended with respect to the fees and expenses proposed to be paid by Penn Fuel be, and the same hereby is, granted.

By the Commission.

[SEAL] ORVAL L. DUBOIS, *Secretary.*

[File No. 70-3114]

CONSOLIDATED NATURAL GAS CO.

ORDER AUTHORIZING SALE OF CERTAIN GAS PROPERTIES OF SUBSIDIARY

OCTOBER 28, 1953.

Consolidated Natural Gas Company ("Consolidated"), a registered holding company, having filed with the Commission a declaration and an amendment thereto pursuant to section 12 (d) of the Public Utility Holding Company Act of 1935 ("the act") and Rule U-44 thereunder, in which Consolidated proposes that its wholly-owned subsidiary Hope Natural Gas Company ("Hope") shall sell to the Manufacturers Light and Heat Company ("Manufacturers") for a consideration of approximately $277,816 certain gas leases, wells and equipment owned by Hope within the area of Manufacturers' Victory Storage Field in Wetzel and Marshall counties, West Virginia; which sale and transfer of gas properties and facilities have heretofore been approved by the Public Service Commission of West Virginia; and

Due notice of the filing of said declaration having been given, and a hearing not having been requested of or ordered by the Commission; and

The Commission finding that the applicable provisions of the act and the rules thereunder are satisfied and that no adverse findings are necessary, and deeming it appropriate in the public interest and in the interest of investors and consumers that said declaration be permitted to become effective forthwith:

*It is ordered*, Pursuant to Rule U-23 and the applicable provisions of the act, that said declaration be, and hereby is, permitted to become effective forthwith, subject to the terms and conditions prescribed in Rule U-24.

By the Commission.

[SEAL] ORVAL L. DUBOIS, *Secretary.*

[File No. 70-3143]

MISSOURI POWER & LIGHT CO.

NOTICE OF FILING REGARDING ISSUANCE OF SHORT-TERM NOTE

OCTOBER 28, 1953.

Notice is hereby given that Missouri Power & Light Company ("Missouri"), a public utility subsidiary company of Union Electric Company of Missouri, a registered holding company, has filed a declaration pursuant to section 7 of the Public Utility Holding Company Act of 1935 ("act") with this Commission with respect to a proposed transaction which is summarized below:

On September 21, 1953, Missouri entered into a conditional agreement with The Chase National Bank of the City of New York whereby said bank agreed to make an unsecured loan to Missouri in the principal amount of $2,800,000 on December 10, 1953. The proceeds of the proposed loan will be used by Missouri to pay notes to be outstanding and maturing on December 10, 1953, in that amount. The notes to be then paid by Missouri were authorized by the order of this Commission dated December 8, 1952. The proposed loan will be evidenced by an unsecured promissory note for $2,800,000 which will mature on September 10, 1954, and will bear interest until maturity or prior payment at the rate of 3¼ percent per annum or at the prime commercial rate of interest of The Chase National Bank of the City of New York for such paper at the time of the borrowing, whichever is higher. The interest will be payable on June 10, 1954, and at maturity. Missouri intends subsequently to fund the proposed loan through the issue and sale of stock, mortgage bonds or other form of permanent financing.

The declaration states that no State or Federal Commission, other than this Commission, has jurisdiction over the proposed transaction.

Fees and expenses are estimated at $1,250, including counsel fees of $500.

Notice is further given that any interested person may, not later than November 13, 1953, at 5:30 p. m., e. s. t., request the Commission in writing that a hearing be held on such matter, stating the reasons for such request, the nature of his interest and the issues of fact or law raised by said filing which he desires to controvert, or may request that he be notified if the Commission should order a hearing thereon. Any such request should be addressed: Secretary, Securities and Exchange Commission, 425 Second Street NW., Washington 25, D. C. At any time after November 13, 1953, such declarations as filed or as amended, may be granted or permitted to become effective, as provided in Rule U-23 of the rules and regulations promulgated under the act or the Commission may exempt such transaction as provided in Rules U-20 (a) and U-100 thereof.

By the Commission.

[SEAL] ORVAL L. DUBOIS, *Secretary.*

## TITLE 16—COMMERCIAL PRACTICES

### Chapter I—Federal Trade Commission

[Docket 6104]

PART 3—DIGEST OF CEASE AND DESIST ORDERS

FLORIDA PLANTERS, INC.

Subpart—*Discriminating in price under section 2, Clayton Act, as amended*—Payment or acceptance of commission, brokerage or other compensation under 2 (c): § 3.800 *Buyer's agents;* § 3.820 *Direct buyers.* In connection with the sale of potatoes, or any other vegetables, in interstate commerce: (1) Making payments to brokers on purchases for their own accounts in amounts which are the same as the amounts of brokerage fees paid to brokers effecting sales, as agents, to other purchasers, or in any other amounts which are also paid as brokerage, whether such payments are made upon being billed therefor or otherwise; (2) selling to any purchaser at prices which are lower than the prices at which sales are made to other purchasers in amounts which are the same or substantially the same as the amounts of brokerage fees paid to brokers effecting sales, as agents, to such other purchasers or in any other amounts which also are in lieu of brokerages whether such lower prices are charged by invoicing at a lower price or by permitting the purchaser to make a deduction from the regular invoice price in remitting payment or by any other device; and (3) paying or granting anything of value as a commission, brokerage or other compensation or allowance or discount in lieu thereof to the other parties to such transactions, or to their agents, representatives or other intermediaries therein who in fact act for or in behalf, or are subject to the direct or indirect control, of such other parties; prohibited.

(Sec. 6, 38 Stat. 722; 15 U. S. C. 46. Interpret or apply sec. 2, 38 Stat. 730, as amended, 15 U. S. C. 13) [Cease and desist order, Florida Planters, Inc., Hastings, Fla., Docket 6104, October 6, 1953]

This proceeding was heard by James A. Purcell, hearing examiner, upon the complaint of the Commission and respondent's answer, in which it admitted all of the material allegations of facts set forth in said complaint and elected not to contest the same.

Thereafter, the proceeding regularly came on for final consideration by said examiner, theretofore duly designated by the Commission, upon said complaint and admission answer thereto, proposed findings and conclusions not having been submitted by counsel, and oral argument not having been requested, and said examiner, having duly considered the record in the matter, made his initial decision comprising certain findings as to the facts,[1] conclusions drawn therefrom,[1] and order to cease and desist.

Thereafter, following the Commission's review of said initial decision, the matter was disposed of by "Decision of the Commission and Order to File Report of Compliance", dated October 6, 1953, as follows:

This matter coming on to be heard by the Commission upon its review of the hearing examiner's initial decision herein; and

The Commission having duly considered the entire record and being of the opinion that said initial decision is adequate and appropriate to dispose of the proceeding:

*It is ordered*, That the attached initial decision of the hearing examiner[1] shall on the 6th day of October, 1953, become the decision of the Commission.

*It is further ordered*, That the respondent, Florida Planters, Inc., shall, within sixty (60) days after service upon it of this order, file with the Commission a report in writing setting forth in detail the manner and form in which it has complied with the order to cease and desist.

The order to cease and desist in said initial decision, thus made the decision of the Commission is as follows:

*It is ordered*, That the respondent, Florida Planters, Inc., a corporation, and its officers, directors, agents or employees, directly or through any corporate or other device, in connection with the sale of potatoes, or any other vege-

PART 3—DIGEST OF CEASE AND DESIST ORDERS

ANNSHIRE GARMENT CO., INC., ET AL.

Subpart—*Misbranding or mislabeling:* § 3.1190 *Composition; Wool Products Labeling Act;* § 3.1325 *Source or origin*—Maker or seller—Wool Products Labeling Act. Subpart—*Neglecting, unfairly or deceptively, to make material disclosure:* § 3.1845 *Composition*—Wool Products Labeling Act; § 3.1900 *Source or origin*—Wool Products Labeling Act. In connection with the introduction or manufacture for introduction into commerce, or the offering for sale, sale, transportation or distribution in commerce of ladies' coats or other "wool products" as such products are defined in and subject to the Wool Products Labeling Act of 1939, which products contain, purport to contain, or in any way are represented as containing "wool", "reprocessed wool", or "reused wool", as those terms are defined in said Act, misbranding such products by: (1) Falsely or deceptively stamping, tagging, labeling or otherwise falsely identifying such products as to the character or amount of the constituent fibers contained therein; (2) failing to securely affix to or place on each such product a stamp, tag, label or other means of identification showing in a clear and conspicuous manner: (a) The percentage of the total fiber weight of such wool product, exclusive of ornamentation not exceeding five percentum of said total fiber weight of (1) wool, (2) reprocessed wool, (3) reused wool, (4) each fiber other than wool where said percentage by weight of such fiber is five percentum or more, and (5) the aggregate of all other fibers; (b) the maximum percentages of the total weight of such wool product of any nonfibrous loading, filling, or adulterating matter; (c) the name or the registered identification number of the manufacturer of such wool product or of one or more persons engaged in introducing such wool product into commerce, or in the offering for sale, sale, transportation, distribution or delivering for shipment thereof in commerce, as "commerce" is defined in the Wool Products Labeling Act of 1939; and, (3) failing to separately set forth on the required stamp, tag, label or other means of identification the character and amount of the constituent fibers appearing in the interlinings of such wool products as provided by Rule 24 of the rules and regulations promulgated under said act; prohibited, subject to the proviso, however, that the foregoing provisions concerning misbranding shall not be construed to prohibit acts permitted by paragraphs (a) and (b) of section 3 of the Wool Products Labeling Act of 1939; and subject to the further provision that nothing contained in the order shall be construed as limiting any applicable provisions of said act or the rules and regulations promulgated thereunder.

(Sec. 6, 38 Stat. 722; 15 U. S. C. 46. Interpret or apply sec. 5, 38 Stat. 719, as amended, secs. 2–5, 54 Stat. 1128–1130; 15 U. S. C. 45, 68–68c) [Cease and desist order, Annshire Garment Co., Inc., et al., Pittsburg, Kans., Docket 6110, October 1, 1953]

*In the Matter of Annshire Garment Co., Inc., a Corporation, and Isidore Liebling and Jack Liebling, Individually*

This proceeding was instituted by complaint which charged respondents with the use of unfair and deceptive acts and practices in violation of the provisions of the Federal Trade Commission Act and the Wool Products Labeling Act of 1939.

It was disposed of, as announced by the Commission's "Notice", dated October 6, 1953, through the consent settlement procedure provided in Rule V of the Commission's rules of practice as follows:

The consent settlement tendered by the parties in this proceeding, a copy of which is served herewith, was accepted by the Commission on October 1, 1953,

and ordered entered of record as the Commission's findings as to the facts, conclusion, and order in disposition of this proceeding.

Said order to cease and desist, thus entered of record, following the findings as to the facts[1] and conclusion,[1] reads as follows:

*It is ordered*, That respondent Annshire Garment Co., Inc., a corporation, and its officers, and respondents Isidore Liebling and Jack Liebling, individually, and respondents' representatives, agents and employees, directly or through any corporate or other device, in connection with the introduction or manufacture for introduction into commerce, or the offering for sale, sale, transportation or distribution in commerce, as "commerce" is defined in the Federal Trade Commission Act and the Wool Products Labeling Act of 1939, of ladies' coats or other "wool products" as such products are defined in and subject to the Wool Products Labeling Act of 1939, which products contain, purport to contain, or in any way are represented as containing "wool," "reprocessed wool" or "reused wool," as those terms are defined in said act, do forthwith cease and desist from misbranding such products by:

1. Falsely or deceptively stamping, tagging, labeling or otherwise falsely identifying such products as to the character or amount of the constituent fibers contained therein;

2. Failing to securely affix to or place on each such product a stamp, tag, label or other means of identification showing in a clear and conspicuous manner:

(a) The percentage of the total fiber weight of such wool product, exclusive of ornamentation not exceeding five percentum of said total fiber weight of (1) wool, (2) reprocessed wool, (3) reused wool, (4) each fiber other than wool where said percentage by weight of such fiber is five percentum or more, and (5) the aggregate of all other fibers;

(b) The maximum percentages of the total weight of such wool product of any non-fibrous loading, filling, or adulterating matter;

(c) The name or the registered identification number of the manufactuer of such wool product or of one or more persons engaged in introducing such wool product into commerce, or in the offering for sale, sale, transportation, distribution or delivering for shipment thereof in commerce, as "commerce" is defined in the Wool Products Labeling Act of 1939.

3. Failing to separately set forth on the required stamp, tag, label or other means of identification the character and amount of the constituent fibers appearing in the interlinings of such wool products as provided by Rule 24 of the rules and regulations promulgated under said act.

*Provided*, That the foregoing provisions concerning misbranding shall not be construed to prohibit acts permitted by paragraphs (a) and (b) of section 3 of the Wool Products Labeling Act of 1939; *And provided further*, That nothing contained in this order shall be construed as limiting any applicable provisions of said act or the rules and regulations promulgated thereunder.

*It is further ordered*, That the respondents herein shall, within sixty (60) days after service upon them of this order, file with the Commission a report in writing setting forth in detail the manner and form in which they have complied with the order to cease and desist.

The foregoing consent settlement is hereby accepted by the Federal Trade Commission and ordered entered of record on this 1st day of October 1953.

Issued: October 6, 1953.

By direction of the Commission.

## PART 3—DIGEST OF CEASE AND DESIST ORDERS

### ARTHUR DOCTOR & CO. ET AL.

Subpart—*Misbranding or mislabeling:* § 3.1190 *Composition;* Wool Products Labeling Act; § 3.1325 *Source or origin*—Maker or seller—Wool Products Labeling Act. Subpart—*Neglecting, unfairly or deceptively, to make material disclosure:* § 3.1845 *Composition*—Wool Products Labeling Act; § 3.1900 *Source or origin*—Wool Products Labeling Act. In connection with the introduction or manufacture for introduction in commerce, or the offering for sale, sale, transportation or distribution in commerce, of ladies' or misses' coats or other "wool products" as such products are defined in and subject to the Wool Products Labeling Act of 1939, which products contain, purport to contain, or in any way are represented as containing "wool", "reprocessed wool", or "reused wool", as those terms are defined in said Act, misbranding such products by: (1) Falsely or deceptively stamping, tagging, labeling or otherwise identifying such products as to the character or amount of the constituent fibers included therein: (2) failing to securely affix to or place on each such product a stamp, tag, label or other means of identification showing in a clear and conspicuous manner: (a) The percentage of the total fiber weight of such wool product, exclusive of ornamentation not exceeding five percentum of said total fiber weight, of (1) wool, (2) reprocessed wool, (3) reused wool, (4) each fiber other than wool where said percentage by weight of such fiber is five percentum or more, and (5) the aggregate of all other fibers; (b) the maximum percentage of the total weight of such wool product of any non-fibrous loading, filling, or adulterating matter; (c) the name or the registered identification number of the manufacturer of such wool product or of one or more persons engaged in introducing such wool product into commerce, or in the offering for sale, sale, transportation, distribution or delivery for shipment thereof in commerce, as "commerce" is defined in the Wool Products Labeling Act of 1939; (3) falsely or deceptively stamping, tagging, labeling or otherwise identifying such products as containing hair or fleece of the Cashmere goat; and (4) stamping, tagging, labeling or otherwise identifying such products as containing hair or fleece of the Cashmere goat without setting out in a clear and conspicuous manner on each such stamp, tag, label, or other identification the percentage of such Cashmere therein; prohibited, subject to the proviso, however, that the foregoing provisions concerning misbranding shall not be construed to prohibit acts permitted by paragraphs (a) and (b) of section 3 of the Wool Products Labeling Act of 1939; and to the further provision that nothing contained in the order shall be construed as limiting any applicable provisions of said act or the rules and regulations promulgated thereunder.

(Sec. 6, 38 Stat. 722; 15 U. S. C. 46. Interpret or apply sec. 5, 38 Stat. 719, as amended, secs. 2–5, 54 Stat. 1128–1130; 15 U. S. C. 45, 68–68c) [Cease and desist order, Arthur Doctor et al. trading as Arthur Doctor & Co., New York, N. Y., Docket 6120, October 1, 1953]

*In the Matter of Arthur Doctor, Theodore Doctor, and Celestine Doctor, Individually and as Copartners Trading and Doing Business as Arthur Doctor & Co.*

This proceeding was instituted by complaint which charged respondents with the use of unfair and deceptive acts and practices in violation of the provisions of the Federal Trade Commission Act and the Wool Products Labeling Act of 1939.

It was disposed of, as announced by the Commission's "Notice", dated October 5, 1953, through the consent settlement procedure provided in Rule V of the Commission's rules of practice as follows:

The consent settlement tendered by the parties in this proceeding, a copy of which is served herewith, was accepted by the Commission on October 1, 1953 and ordered entered of record as the Commission's findings as to the facts, conclusion, and order in disposition of this proceeding.

Said order to cease and desist, thus entered of record, following the findings as to the facts[1] and conclusions,[1] reads as follows:

*It is ordered*, That the respondents, Arthur Doctor, Theodore Doctor, and Celestine Doctor, individually and trading and doing business under the firm name of Arthur Doctor & Co., or under any other name or names, and their respective representatives, agents and employees, directly or through any corporate or other device, in connection with the introduction or manufacture for introduction into commerce, or the offering for sale, sale, transportation or distribution in commerce, as "commerce" is defined in the Federal Trade Commission Act and the Wool Products Labeling Act of 1939, of ladies' or misses' coats or other "wool products" as such products are defined in and subject to the Wool Products Labeling Act of 1939, which products contain, purport to contain or in any way are represented as containing "wool," "reprocessed wool" or "reused wool," as those terms are defined in said act, do forthwith cease and desist from misbranding such products by:

1 Falsely or deceptively stamping, tagging, labeling or otherwise identifying such products as to the character or amount of the constituent fibers included therein;

2 Failing to securely affix to or place on each such product a stamp, tag, label or other means of identification showing in a clear and conspicuous manner;

(a) The percentage of the total fiber weight of such wool product, exclusive of ornamentation not exceeding five percentum of said total fiber weight, of (1) wool, (2) reprocessed wool, (3) reused wool, (4) each fiber other than wool where said percentage by weight of such fiber is five percentum or more, and (5) the aggregate of all other fibers;

(b) The maximum percentage of the total weight of such wool product of any non-fibrous loading, filling, or adulterating matter;

(c) The name or the registered identification number of the manufacturer of such wool product or of one or more persons engaged in introducing such wool product into commerce, or in the offering for sale, sale, transportation, distribution or delivery for shipment thereof in commerce, as "commerce" is defined in the Wool Products Labeling Act of 1939.

3. Falsely or deceptively stamping, tagging, labeling or otherwise identifying such products as containing hair or fleece of the Cashmere goat;

4. Stamping, tagging, labeling or otherwise identifying such products as containing hair or fleece of the Cashmere goat without setting out in a clear and conspicuous manner on each such stamp, tag, label or other identification the percentage of such Cashmere therein;

*Provided*, That the foregoing provisions concerning misbranding shall not be construed to prohibit acts permitted by paragraphs (a) and (b) of section 3 of the Wool Products Labeling Act of 1939: *And provided further*, That nothing contained in this order shall be construed as limiting any applicable provisions of said act or the rules and regulations promulgated thereunder.

*It is further ordered*, That the respondents herein shall within sixty (60) days after service upon them of this order, file with the Commission a report in writing setting forth in detail the manner and form in which they have complied with the order to cease and desist.

The foregoing consent settlement is hereby accepted by the Federal Trade Commission and ordered entered of record on this 1st day of October A. D. 1953.

Issued: October 5, 1953.

By direction of the Commission.

[SEAL] ALEX. AKERMAN, Jr.,
*Secretary.*

# TITLE 14—CIVIL AVIATION

## Chapter I—Civil Aeronautics Board

[Reg. No. SR 385B]

PART 40—SCHEDULED INTERSTATE AIR CARRIER CERTIFICATION AND OPERATION RULES

PART 41—CERTIFICATION AND OPERATION RULES FOR SCHEDULED AIR CARRIER OPERATIONS OUTSIDE THE CONTINENTAL LIMITS OF THE UNITED STATES

PART 42—IRREGULAR AIR CARRIER AND OFF-ROUTE RULES

PART 45—COMMERCIAL OPERATOR CERTIFICATION AND OPERATION RULES

PART 61—SCHEDULED AIR CARRIER RULES

SPECIAL CIVIL AIR REGULATION; DELEGATION OF AUTHORITY TO THE ADMINISTRATOR TO PERMIT AIR CARRIERS UNDER CONTRACT TO THE MILITARY SERVICES TO DEVIATE FROM CIVIL AIR REGULATIONS

Adopted by the Civil Aeronautics Board at its office in Washington, D. C., on the 29th day of October 1953.

On July 31, 1953, Special Civil Air Regulation SR–385A was adopted extending until November 1, 1953, the authority of the Administrator to permit air carriers under contract to the military services to deviate from Parts 40, 41, 42, 45, and 61 of the Civil Air Regulations. This limited extension was adopted at that time to permit the Board to investigate more fully the question as to the necessity for continuing this authority.

A meeting was held in Washington, D. C., which interested industry and government representatives attended, to discuss the entire problem. The result of this meeting is a proposed revised Special Civil Air Regulation, for which a notice of proposed rule making is being issued concurrently with this regulation. In view of the fact that the authority delegated to the Administrator terminates on November 1, 1953, and insufficient time exists for the promulgation of the new proposed Special Civil Air Regulation prior to that date, this regulation extends until February 1, 1954, the authority previously granted to the Administrator. This extension will permit sufficient time for the study and receipt of comment concerning the new proposed Special Civil Air Regulation.

Since the time remaining prior to November 1, 1953, is insufficient to permit normal rule making procedure and delay beyond that date would operate contrary to the purpose of the regulation, the Board finds that notice and public procedure hereon are impracticable; and since this regulation imposes no additional burden on any person, the regulation may be made effective without prior notice.

In consideration of the foregoing, the Civil Aeronautics Board hereby makes and promulgates a Special Civil Air Regulation, effective November 1, 1953, to read as follows:

1. Contrary provisions of the Civil Air Regulations notwithstanding, the Administrator may, upon application by an air carrier, authorize an air carrier under contract to the military services, or an air carrier furnishing civil aircraft and/or flight crews to another air carrier for use in operations conducted pursuant to a contract with the military services, to deviate from the applicable provisions of Parts 40 (including revised Part 40), 41, 42, 45, and 61 to the extent that he finds upon investigation a deviation from those regulations is necessary for the expeditious conduct of such operations.

2. Any authority granted by the Administrator pursuant to this regulation shall be limited to those operations conducted pursuant to military contracts and shall not be applicable to any other type of operation.

3. The Administrator shall, in any authorization granted pursuant to this regulation, specify the terms and conditions under which the air carrier may deviate from the currently prescribed regulations, and each carrier shall, in the conduct of operations pursuant to military contracts, comply with such terms and conditions.

This regulation shall terminate February 1, 1954, unless sooner superseded or rescinded.

(Sec. 205, 52 Stat. 984; 49 U. S. C. 425. Interpret or apply sections 601, 604, 52 Stat. 1007, 1010, as amended; 49 U. S. C. 551, 554)

By the Civil Aeronautics Board.

[SEAL] M. C. MULLIGAN,
*Secretary.*

[F. R. Doc. 53-9329; Filed, Nov. 3, 1953; 8:55 a. m.]

## Chapter II—Civil Aeronautics Administration

[Amdt 45]

### Part 609—Standard Instrument Approach Procedures

ALTERATIONS

The standard instrument approach procedure alterations appearing hereinafter are adopted to become effective when indicated in order to promote safety of the flying public. Compliance with the notice, procedures, and effective date provisions of section 4 of the Administrative Procedure Act would be impracticable and contrary to the public interest, and therefore is not required.

Part 609 is amended as follows:

1. The instrument landing system procedures prescribed in § 609.11 are amended to read in part:

INSTRUMENT LANDING SYSTEM PROCEDURES

When an ILS instrument approach is conducted at the below named airport(s), it shall be in accordance with the following instrument approach procedure(s), unless an approach is conducted in accordance with a different procedure authorized by the Administrator for such airport(s). Initial approaches shall be made over specified routes. Minimum altitude(s) shall correspond with those established for en route operation in the particular area or as set forth below.

| City and State; airport name; elevation; localizer; frequency and identification; LMM frequency and identification; LOM frequency and identification; procedure No. | Transition to ILS | | | | Procedure turn ( ) side of final approach course; outbound and inbound; altitudes; limiting distances | Minimum altitude at glide slope interception inbound (ft.) | Altitude of glide slope and distance to approach end of runway | | Ceiling and visibility minimums | | | If visual contact not established upon descent to authorized landing minimums, or if landing not accomplished, remarks |
|---|---|---|---|---|---|---|---|---|---|---|---|---|
| | From— | To— | Course and distance | Minimum altitude (ft.) | | | At outer marker | At middle marker | Condition | Type of aircraft: 75 m. p. h. or less | Type of aircraft: More than 75 m. p. h. | |

INSTRUMENT LANDING SYSTEM PROCEDURES—Continued

When an ILS instrument approach is conducted at the below named airports, it shall be in accordance with the following instrument approach procedure(s), unless an approach is conducted in accordance with a different procedure authorized by the Administrator for such airports. Initial approaches shall be made over specified routes. Minimum altitudes shall correspond with those established for air route operation in the particular area or as set forth below.

| City and State; airport name; elevation; localizer; frequency and identification; LMM frequency and identification; LOM; frequency and identification; procedure No. | Transition to ILS: From— | Transition to ILS: To— | Transition to ILS: Course and distance | Transition to ILS: Minimum altitude (ft.) | Procedure turn: ( ) side of final approach course (outbound and inbound); altitudes; limiting distances | Minimum altitude at glide slope intercept. inbound (ft.) | Altitude of glide slope and distance to approach end of runway: At outer marker | Altitude of glide slope and distance to approach end of runway: At middle marker | Ceiling and visibility minimums: Condition | Ceiling and visibility minimums: Type of aircraft: 75 m. p. h. or less | Ceiling and visibility minimums: Type of aircraft: More than 75 m. p. h. | If visual contact not established upon descent to authorized landing minimums, or if landing not accomplished; remarks |

## PART 609—STANDARD INSTRUMENT APPROACH PROCEDURES

### ALTERATIONS

The standard instrument approach procedure alterations appearing hereinafter are adopted to become effective when indicated in order to promote safety of the flying public. Compliance with the notice, procedures, and effective date provisions of section 4 of the Administrative Procedure Act would be impracticable and contrary to the public interest, and therefore is not required.

Part 609 is amended as follows:

1. The low frequency range procedures prescribed in § 609.6 are amended to read in part:

LFR STANDARD INSTRUMENT APPROACH PROCEDURE

Bearings, headings, and courses are magnetic. Distances are in statute miles unless otherwise indicated. Elevations and altitudes are in feet, MSL. Ceilings are in feet above airport elevation.

If an LFR instrument approach is conducted at the below named airport, it shall be in accordance with the following instrument approach procedure, unless an approach is conducted in accordance with a different procedure authorized by the Administrator for Civil Aeronautics for such airport. Initial approaches shall be made over specified routes. Minimum altitude(s) shall correspond with those established for en route operation in the particular area or as set forth below:

| City and State; airport name, elevation; facility; class and identification; procedure No.; effective date | Initial approach to facility from— | Course and distance | Minimum altitude (ft.) | Procedure turn (—) side of final approach course (outbound and inbound); altitudes; limiting distances | Minimum altitude over facility on final approach course (ft.) | Course and distance, facility to airport | Ceiling and visibility minimums: Condition | Type aircraft: 75 m. p. h. or less | Type aircraft: More than 75 m. p. h. | If visual contact not established at authorized landing minimums after passing facility within distance specified, or if landing not accomplished |

2. The automatic direction finding procedures prescribed in § 609.9 are amended to read in part:

ADF STANDARD INSTRUMENT APPROACH PROCEDURE

Bearings, headings, and courses are magnetic. Distances are in statute miles unless otherwise indicated. Elevations and altitudes are in feet, MSL. Ceilings are in feet above airport elevation.

If an ADF instrument approach is conducted at the below named airport, it shall be in accordance with the following instrument approach procedure, unless an approach is conducted in accordance with a different procedure authorized by the Administrator for Civil Aeronautics for such airport. Initial approaches shall be made over specified routes. Minimum altitude(s) shall correspond with those established for en route operation in the particular area or as set forth below:

| City and State; airport name, elevation; facility; class and identification; procedure No.; effective date | Initial approach to facility from— | Course and distance | Minimum altitude (ft.) | Procedure turn (—) side of final approach course (outbound and inbound); altitudes; limiting distances | Minimum altitude over facility on final approach course (ft.) | Course and distance, facility to airport | Ceiling and visibility minimums: Condition | Type aircraft: 75 m. p. h. or less | Type aircraft: More than 75 m. p. h. | If visual contact not established at authorized landing minimums after passing facility within distance specified, or if landing not accomplished |

3. The instrument landing system procedures prescribed in § 609.11 are amended to read in part:

ILS STANDARD INSTRUMENT APPROACH PROCEDURE

Bearings, headings, and courses are magnetic. Distances are in statute miles unless otherwise indicated. Elevations and altitudes are in feet, MSL. Ceilings are in feet above airport elevation.

If an ILS instrument approach is conducted at the below named airport, it shall be in accordance with the following instrument approach procedure, unless an approach is conducted in accordance with a different procedure authorized by the Administrator for Civil Aeronautics for such airport. Initial approaches shall be made over specified routes. Minimum altitude(s) shall correspond with those established for en route operation in the particular area or as set forth below:

ILS STANDARD INSTRUMENT APPROACH PROCEDURE—Continued

Bearings, headings, and courses are magnetic. Distances are in statute miles or feet unless otherwise indicated. Elevations and altitudes are in feet MSL. Ceilings are in feet above airport elevation. Visibilities are in statute miles unless otherwise indicated. If an ILS instrument approach procedure as published herein cannot be accomplished with the following limitations, clearance may be obtained by the Administrator for Civil Aeronautics for such purpose. Pilots shall be familiar with these limitations and shall be responsible for their execution. Minimum altitudes shall be complied with. Unless otherwise specified in the following procedures, all turns shall be made to the left. Procedure turns shall be executed within the distances specified in the following procedures or as set forth below.

| City and State | Transition to ILS | | | Minimum altitudes (ft.) | Ceiling and visibility minimums | | | | If visual contact not established upon initial approach or within the prescribed limits and the missed approach procedure is executed, pilot shall climb to the altitude specified for the missed approach procedure before proceeding to the next fix or to the airport for a landing. |

# TITLE 22—FOREIGN RELATIONS

## Chapter III—International Claims Commission, Department of State

[Dept. Reg. 108.197]

### PART 300—RULES OF PRACTICE AND PROCEDURE

Pursuant to the International Claims Settlement Act of 1949 (64 Stat. 12; 22 U. S. C. secs. 1621 ff.) and to section 4 of the Administrative Procedure Act of 1946 (60 Stat. 238; 5 U. S. C. 1003), the International Claims Commission of the United States, having given an opportunity to interested persons to submit their views and other relevant information with respect to the proposed rules of the International Claims Commission of the United States, as the same appeared in the FEDERAL REGISTER of September 29, 1953, Vol. 18, No. 190, and having given full consideration to such views and other relevant information, hereby publishes and declares as its rules of practice and procedure, effective on the date of publication in the FEDERAL REGISTER, the following:

Sec.
300.1 Business hours.
300.2 Definitions.
300.3 Appearance and practice before the Commission.
300.4 Filing of claims.
300.5 Procedure for determination of claims.
300.6 Hearings.
300.7 Service.

AUTHORITY: §§ 300.1 to 300.7 issued under sec. 3, 64 Stat. 13; 22 U. S. C. Sup., 1622. Interpret or apply secs. 4, 5, 7, 64 Stat. 13, 16; 22 U. S. C. Sup., 1623, 1624, 1626.

§ 300.1 *Business hours.* The principal office of the Commission, at Washington, D. C., is open each business day, except Saturdays, from 8:45 a. m. to 5:30 p. m.

§ 300.2 *Definitions.* Terms specifically defined in the International Claims Settlement Act of 1949, as amended, shall have the same meaning when used in this part.

§ 300.3 *Appearance and practice before the Commission.* (a) An individual may appear in his own behalf; a member of a partnership may represent it; a bona fide officer of a corporation, trust or association may represent the same.

(b) A person may be represented by an attorney at law admitted to practice before the Supreme Court of the United States, the highest court of any State or Territory of the United States, or the United States Court of Appeals for the District of Columbia Circuit.

(c) A person may not be represented before the Commission except as authorized in paragraphs (a) and (b) of this section.

(d) Any person appearing for another before or transacting business with the Commission shall file a power of attorney showing his authority so to act.

(e) The Commission may disqualify, and deny, temporarily or permanently, the privilege of appearing or practicing before it in any way to any person who is found after hearing in the matter—

(1) Not to possess the requisite qualifications to represent others before the Commission; or

(2) To be lacking in character or integrity or to have engaged in unethical or improper professional conduct; or

(3) To have violated section 4 (f) of the International Claims Settlement Act.

(f) Contemptuous or contumacious conduct at any hearing shall be ground for exclusion from said hearing and for summary suspension without a hearing for the duration of the hearing.

§ 300.4 *Filing of claims*—(a) *Form and content.* Claims filed with the Commission shall be in writing, the original signed and verified by the claimant, with two copies thereof, and an original and two copies of all accompanying exhibits; shall cite the claims agreement or convention under which, and the foreign government against which, the claim is urged; and shall contain a concise statement of the facts upon which the claim is based, including the following:

(1) Name and address of the claimant.

(2) (Individual) Date and place of birth.

(3) (Corporation) State or county under whose laws the corporation was organized.

(4) The manner (birth, marriage, naturalization, etc.) by which and the date when claimant, if an individual, became a national of the United States and whether such nationality was ever lost.

(5) Whether claimant was the owner of the property or of any rights and interests in and with respect to the property, on the date of nationalization or other taking.

(6) Statement as to the manner by which claimant acquired the property or rights and interests in and with respect to the property taken, including the consideration paid therefor or the valuation thereof, at the time of acquisition.

(7) Description, identification, nature and extent of ownership.

(8) Statement as to the manner by which the property or rights and interests in and with respect to property was nationalized or otherwise taken.

(9) The date of nationalization or other taking.

(10) Valuation at the time of nationalization or other taking.

(11) Whether claimant has previously filed a claim with respect to the same subject matter or a related claim with any foreign government, and if so, the disposition or status of such claim.

(12) Whether claimant has sought, received, or has any reason to expect to receive, any benefits, pecuniary or otherwise, other than any award that may be made upon the claim being filed, on account of the loss resulting from the nationalization or other taking referred to in the claim, setting forth the details.

(13) The amount of the claim.

(b) *Exhibits and documents in support of claim.* (1) If available, such exhibits and documents shall be filed with and at the same time as the claim, and shall, wherever possible, be in the form of original documents, or copies of originals certified as such by their public or other official custodian.

(2) Where claimant desires that the Commission obtain, through the foreign government concerned, evidence, including certified copies of books, records, or other documents, as may be necessary or appropriate to support its claim, it shall include in the statement of claim a request therefor and the following information with reference thereto:

(i) A justification of the relevancy or materiality of the information or documents requested;

(ii) An explanation of why same is not in claimant's possession or is not otherwise obtainable by him;

(iii) Where same is located;

(iv) Names or other identification and locations of witnesses to be questioned, with description of their probable testimony.

(3) Upon good cause shown, the Commission may, subsequent to the filing of the claim, grant a request to obtain evidence such as described in subparagraph (2) of this paragraph.

(c) *Documents in foreign language.* Every document, exhibit or paper filed in a claims proceeding, which is written or printed in a language other than English, shall be accompanied by an English translation thereof duly verified under oath by its translator, with his name and address, to be a true and accurate translation thereof, with an extra copy of such translation to accompany each copy of such document.

(d) *Time for filing.* Claims shall be filed with the Commission on or before June 30, 1951, where based on the Yugoslav Claims Agreement of 1948, or by August 4, 1952, where based on the Claims Convention with Panama, effective October 11, 1950. The Commission may, in its discretion, and for good cause shown, grant an extension of time for filing a claim in any particular case.

(e) *Acknowledgment and docketing.* The Commission will acknowledge the receipt of a claim in writing and will notify the claimant of the docket number assigned to it, which shall be used on all further correspondence and papers filed with regard to it.

(f) *Preparation of papers.* All claims, briefs, and memoranda filed shall be typewritten or printed and, if typewritten, shall be on legal size paper.

§ 300.5 *Procedure for determination of claims.* (a) The Commission may of its own motion order a hearing upon any claim, specifying the questions to which it shall be limited.

(b) Without previous hearing, the Commission may issue a proposed decision in determination of a claim.

(c) Where such proposed decision denies the claim in whole or in part, claimant may within thirty days of service thereof file objections to such denial, assigning the errors relied upon, with accompanying brief in support thereof, and may request a hearing on the claim, specifying whether for the taking of evidence, or only for the hearing of oral argument, upon the errors assigned.

(d) Within fifteen days after receipt of notice of any proposed decision issued

as provided in paragraph (b) of this section, the foreign government concerned may notify the Commission in Washington, or through the diplomatic representative of the United States in the country concerned, of its intention to file a brief as amicus curiae with respect to the claim, and may then file such brief within thirty days after such notice.

(e) Upon the expiration of thirty days after such service or receipt of notice, if no objection under paragraph (c) of this section nor notice of intention under paragraph (d) of this section has in the meantime been filed, such proposed decision shall by further order of the Commission become its final determination and decision upon the claim.

(f) If any such objections or brief have in the meantime been filed, but no hearing requested, the Commission may, after due consideration thereof, affirm or modify its proposed decision as its final decision and determination of the claim, or as its further proposed decision, or may of its own motion order hearing thereon, specifying whether for the taking of evidence and on what questions or only for the hearing of oral argument or the receipt of further briefs or both.

(g) Within five days, or such longer time as the Commission may grant, after the conclusion of a hearing, whether held at claimant's request or on the Commission's own motion, the claimant may, unless it has waived same in the meantime, submit requested findings and conclusions of law, with appropriate supporting references to the record, and supporting brief; and the foreign government concerned may, within the same time, file brief as amicus curiae with regard to the claim.

(h) After the conclusion of a hearing, upon the expiration of any time allowed for the filing of requested findings and briefs under paragraph (g) of this section or upon such filing or waiver thereof meantime, the Commission may proceed to final decision and determination of the claim.

§ 300.6 *Hearings.* (a) Hearings, whether upon the Commission's own motion or upon request of claimant, shall be held upon fifteen days' notice of the time and place thereof and of the questions to which limited, to the claimant and to the foreign government concerned, or sooner upon consent by the claimant and notice thereof to the foreign government concerned.

(b) Such hearings shall be open to the public unless otherwise requested by claimant and ordered by the Commission.

(c) Such hearings shall be conducted by the Commission or a member thereof, presiding. Oral testimony and documentary evidence, including depositions that may have been taken as provided by statute, may be offered in evidence on claimant's behalf, or by counsel for the Commission designated by it to represent the public interest opposed to the allowance of any unjust or unfounded claim or portion thereof; and either may cross-examine as to evidence offered through witnesses on behalf of the other. Objections to the admission of any such evidence shall be ruled upon by the presiding officer.

(d) The claimant shall be the moving party, and shall have the burden of proof on all issues involved in the determination of its claim.

(e) Hearings shall be stenographically reported by a reporter designated by the Commission and a transcript thereof shall be part of the record. Where the hearing is ordered at claimant's request, the cost of such reporting and transcription may be charged to and deducted from any award made in its favor. Where ordered at the Commission's own motion, such cost shall be borne by the Commission.

(f) Witness fees and mileage, in connection with attendance upon hearings or upon the taking of depositions, and fees of persons taking depositions, to the extent authorized by statute and not already covered by deposits made against the same under paragraph (g) of this section, shall be charged to and deducted from any award made in favor of the party at whose instance the witness appears or the deposition is taken.

(g) Before issuing a subpoena or ordering the taking of a deposition at the instance of a claimant, the Commission will require the deposit of an amount adequate to cover the estimated total of fees and mileage involved.

§ 300.7 *Service.* (a) Service of notices required under this part to be furnished to claimants may be accomplished by mailing to it or to its counsel of record, at their last address of record, by registered mail, return receipt requested, copy of the matter to be noticed; and the date of such service shall be that of acknowledgment of its receipt by such return receipt.

(b) The requirement of notice may also be satisfied by waiver or acknowledgment of same signed by claimant personally or by its representative or counsel of record.

Dated at Washington, D. C., October 29, 1953.

By the Commission.

[SEAL] H. B. TEEGARDEN,
*Acting Chairman.*
GEORGE W. SPANGLER,
*Acting Commissioner.*

PART 301—SPECIAL RULES FOR CLAIMS UNDER THE YUGOSLAV CLAIMS AGREEMENT OF 1948

PART 302—SPECIAL RULES FOR CLAIMS UNDER ARTICLE I (C) AND ARTICLE II (C) OF THE CLAIMS CONVENTION BETWEEN THE UNITED STATES AND THE REPUBLIC OF PANAMA, WHICH WENT INTO EFFECT ON OCTOBER 11, 1950

SUPERSEDURE OF PARTS

CROSS REFERENCE: Parts 301 and 302 of this chapter are superseded by the revised Part 300—Rules of Practice and Procedure, *supra.*

## TITLE 32A—NATIONAL DEFENSE, APPENDIX

### Chapter I—Office of Defense Mobilization

[General Administrative Order—I-2, Revised]

ADMINISTRATIVE PROCEEDINGS UNDER TITLE IV OF THE DEFENSE PRODUCTION ACT OF 1950, AS AMENDED

SECTION 1. The purpose of this General Administrative Order is to provide for the conduct and orderly completion of administrative proceedings arising under section 405, 407 and 408 of the Defense Production Act of 1950, as amended, which function has been made the responsibility of the Director of the Office of Defense Mobilization by Executive Order 10494 of October 14, 1953 (18 F. R. 6585).

SEC. 2. Subject to such supervision as the Director may deem appropriate, the General Counsel of the Office of Defense Mobilization is hereby authorized to carry out the functions delegated to the Director by Executive Order 10494. For these purposes the General Counsel is also designated as Assistant Director of the Office of Defense Mobilization. The term "functions" includes powers, duties, authority, responsibilities, and discretion.

SEC. 3. The orders of the Economic Stabilization Agency which are relevant to the conduct and completion of administrative proceedings under sections 405, 407 and 408 of the act, particularly ESA General Order 15 and 18, as amended (17 F. R. 2994, 6925, and 9977); ESA General Procedural Regulation 1, Revised, as amended (17 F. R. 7737, 18 F. R. 1663); and OPS Price Procedural Regulation 1, Revision 2, as amended (17 F. R. 3787 and 9935) are hereby adopted and incorporated herein by reference.

SEC. 4. This General Administrative Order shall become effective November 1, 1953.

OFFICE OF DEFENSE MOBILIZATION,
ARTHUR S. FLEMMING,
*Director.*

[F. R. Doc. 53-9362; Filed, Nov. 2, 1953; 4:13 p. m.]

### Chapter VI—Business and Defense Services Administration, Department of Commerce

[BDSA Designation of Scarce Materials 1 (Formerly NPA Designation of Scarce Materials 1)—Revocation]

DSM-1—DESIGNATION OF SCARCE MATERIALS

REVOCATION

BDSA DSM-1 (formerly NPA DSM-1), as amended June 18, 1953 (18 F. R. 3566), is hereby revoked.

This revocation does not relieve any person of any obligation or liability incurred under BDSA DSM-1 (formerly NPA DSM-1) as originally issued or as thereafter amended, nor deprive any person of any rights received or accrued under said designation prior to the effective date of this revocation.

(64 Stat. 816, Pub. Law 95, 83d Cong.; 50 U. S. C. App. Sup. 2154)

This revocation is effective November 2, 1953.

BUSINESS AND DEFENSE SERVICES ADMINISTRATION,
By WILLIAM E. HAINES,
*Assistant Deputy Administrator.*

[F. R. Doc. 53-9360; Filed, Nov. 2, 1953; 2:56 p. m.]

### Chapter XXI—Defense Rental Areas Division, Office of Defense Mobilization

[Rent Regulation 1, Amdt. 165 to Schedule A]

[Rent Regulation 2, Amdt. 163 to Schedule A]

RR 1—HOUSING

RR 2—ROOMS IN ROOMING HOUSES AND OTHER ESTABLISHMENTS

SCHEDULE A—DEFENSE-RENTAL AREAS

OHIO

Effective November 4, 1953, Rent Regulation 1 and Rent Regulation 2 are amended so that the item of Schedule A indicated below reads as set forth below.

(Sec. 204, 61 Stat. 197, as amended; 50 U. S. C. App. Sup. 1894)

Issued this 30th day of October 1953.

GLENWOOD J. SHERRARD,
*Director,*
*Defense Rental Areas Division.*

| Name and name of defense-rental area | Class | County or counties in defense-rental area under regulation | Maximum rent date | Effective date of regulation |
|---|---|---|---|---|
| Ohio | | | | |
| [illegible] Portsmouth-Chillicothe. | B | SCIOTO COUNTY, except the townships of Brush Creek, Madison, Rarden, and Vernon. | Jan. 1, 1946 | Oct. 1, 1946 |
| | C | do | Aug. 1, 1952 | Nov. 6, 1952 |
| | A | In SCIOTO COUNTY, the townships of Brush Creek, Madison, Rarden, and Vernon. | do | Do. |

This amendment decontrols a part of the Portsmouth-Chillicothe Defense Rental Area on the initiative of the Director, Defense Rental Areas Division, Office of Defense Mobilization, under section 204 (c) of the act.

[F. R. Doc. 53-9359; Filed, Nov. 2, 1953; 2:21 p. m.]

---

[Rent Regulation 3, Amdt. 155 to Schedule A]

[Rent Regulation 4, Amdt. 99 to Schedule A]

RR 3—HOTELS

RR 4—MOTOR COURTS

SCHEDULE A—DEFENSE-RENTAL AREAS

OHIO

Effective November 4, 1953, Rent Regulation 3 and Rent Regulation 4 are amended so that the item of Schedule A indicated below reads as set forth below.

(Sec. 204, 61 Stat. 197, as amended; 50 U. S. C. App. Sup. 1894)

Issued this 30th day of October 1953.

GLENWOOD J. SHERRARD,
*Director,*
*Defense Rental Areas Division.*

| Name of defense-rental area | State | County or counties in defense-rental area under regulation | Maximum rent date | Effective date of regulation |
|---|---|---|---|---|
| [illegible] Portsmouth-Chillicothe. | Ohio | SCIOTO | Aug. 1, 1952 | Nov. 6, 1952 |

This amendment decontrols a part of the Portsmouth-Chillicothe Defense Rental Area on the initiative of the Director, Defense Rental Areas Division, Office of Defense Mobilization, under section 204 (c) of the act.

[F. R. Doc. 53-9358; Filed, Nov. 2, 1953; 2:21 p. m.]

## TITLE 36—PARKS, FORESTS, AND MEMORIALS

### Chapter I—National Park Service, Department of the Interior

PART 20—SPECIAL REGULATIONS

SEQUOIA-KINGS CANYON NATIONAL PARKS; FISHING

1. Subparagraph (3) of paragraph (e) *Fishing* of § 20.8 *Sequoia-Kings Canyon National Parks* is amended to read as follows:

(3) A California State fishing license is required of all persons 16 years of age or over fishing in the Parks.

2. Subdivision (ii) of subparagraph (4) of paragraph (e) *Fishing* of § 20.8 *Sequoia-Kings Canyon National Parks* is amended to read as follows:

(ii) On the watershed of the Marble Fork of the Kaweah River: Deer Creek from the foot bridge on the Sunset-Village Trail to source, except to children 10 years of age or younger; that section of Wolverton Creek from the dam up to the first posted water supply sign, except to persons 15 years of age or younger; that section of Wolverton Creek from point where water supply signs are posted to source; and Silliman Creek from Generals Highway to source at outlet of Silliman Lakes.

(Sec. 3, 39 Stat. 535, as amended; 16 U. S. C. 3)

Issued this 29th day of October 1953.

ORME LEWIS,
*Assistant Secretary of the Interior.*

## TITLE 47—TELECOMMUNICATION

### Chapter I—Federal Communications Commission

[Docket No. 8333]

PART 1—PRACTICE AND PROCEDURE

DAYTIME SKYWAVE TRANSMISSIONS OF STANDARD BROADCAST STATIONS

In the matter of promulgation of rules and regulations and Standards of Good Engineering Practice concerning daytime skywave transmissions for standard broadcast stations; Docket No. 8333; and in the matter of amendment of § 1.371 of the Commission's rules and regulations.

1. The Commission has under consideration an order in the above-entitled case adopted on August 10, 1953 and footnote 10b to § 1.371 of its rules and regulations relating to the acceptance of applications.

2. Footnote 10b of § 1.371, as adopted in the above order, provides that the processing of applications for unlimited time Class II stations which would operate differently in the daytime than at nighttime, on the clear channels specified in § 3.25 (a) [1] and (b) will be with-

[1] This section was included in error since unlimited time Class II stations are not assigned the frequencies specified therein.

held pending a conclusion of the proceeding in Docket 8333.

3. It now appears that certain types of applications which do not come within the scope of the daytime skywave proceeding in Docket 8333, are inadvertently encompassed within footnote 10b. For example, applications for changes in the nighttime operation of Class II stations presently operating on the frequencies set forth in § 3.25 (b), under the footnote as presently written, would be needlessly held without action. In order to provide for the processing of such applications we find it necessary to amend the provisions presently contained in subparagraph (d) of footnote 10b. Desirable editorial changes have also been made in the footnote.

4. The amendment adopted herein is procedural in nature, and, pursuant to the provisions of section 4 of the Administrative Procedure Act, may be adopted and made effective immediately.

5. In view of the above: *It is ordered*, That pursuant to sections 4 (i), 303 (c), (f), (h) and (r) of the Communications Act of 1934, is amended, effective immediately footnote 10b of § 1.371 is amended to read as follows:

[10b] Pending conclusion of the proceeding in Docket No. 8333 action will be withheld on the following:

(1) Applications proposing daytime or limited time assignments on any of the frequencies specified in § 3.25 (a) and (b) of this chapter;

(2) Applications from existing daytime or limited time stations presently assigned to any of the frequencies specified in § 3.25 (a) and (b), of this chapter, proposing (a) a change in operation resulting in an increase in radiation towards the normally protected contour of a United States Class I station on the channel; or (b) proposing a change in transmitter location resulting in a material reduction in the distance from that station to the normally protected contour of a United States Class I station on the channel;

(3) Applications for new stations, and those for changes in frequency assignment, proposing unlimited time Class II assignments on any of the frequencies specified in § 3.25 (b) of this chapter, which would operate differently during the day than at night;

(4) Applications for changes, other than frequency, of unlimited time Class II stations on any of the frequencies specified in § 3.25 (b), of this chapter, where the resulting daytime and nighttime operations are different; and either

(a) It is proposed to change daytime operation resulting in an increase in radiation towards the normally protected contour of a United States Class I station on the channel; or

(b) It is proposed to change transmitter location resulting in a material reduction in the distance from that station to the normally protected contour of a United States Class I station on the channel.

(Sec. 4, 48 Stat. 1066 as amended; 47 U. S. C. 154. Interprets or applies sec. 303, 48 Stat. 1082, as amended; 47 U. S. C. 303)

Adopted: October 29, 1953.

Released: October 30, 1953.

FEDERAL COMMUNICATIONS COMMISSION,
[SEAL] WM. P. MASSING,
*Acting Secretary.*

[F. R. Doc. 53-9321; Filed, Nov. 3, 1953; 8:54 a. m.]

---

[Docket No. 10572]

PART 3—RADIO BROADCAST SERVICES

ANTENNA SYSTEMS; SHOWING REQUIRED

In the matter of amendment of Part 3 (Radio Broadcast Services) of the Commission's rules and regulations; Docket No. 10572.

1. The Commission has under consideration its notice of proposed rule making (FCC 53-830), issued July 6, 1953, and published in the FEDERAL REGISTER on July 11, 1953 (18 F. R. 4077), which proposes to amend § 3.33 of the Commission's rules to require all applications for standard broadcast stations to specify a definite site.

2. Two comments have been received. In its opposition, Fred W. Grimwood and Company, Inc., contends that the adoption of the proposed rule would discourage the construction of many "small town" standard broadcast stations since the majority of such stations "are started by local interests who have the minimum of financial backing" and who are therefore greatly benefited by the ability to "obtain a construction permit without tying up large amounts of their capital in land." It is asserted that after grant of their applications for construction permit, such stations can rally local support and "proceed much more readily with construction." The opposition concludes that "the difficulties presented to the small town broadcaster" far outweigh "the small technical advantages of filing with a specific site."

3. Mercer Broadcasting Company asserts that the requirement proposed in these proceedings should have been effected simply by the issuance of a notice rather than by the institution of proposed rule making. Our recent decision in In re Application of Mercer Broadcasting Company, 9 Pike & Fischer, RR 357, makes it unnecessary to consider the contentions made by Mercer Broadcasting Company. That decision established the propriety of employing the rule making procedure to effect the proposed change.

4. With respect to the comments of Fred W. Grimmood and Company, we recognize that the proposed new procedure may have some disadvantages from the viewpoint of the "small town" applicant of limited financial means who will now probably have the added expense of an option on the desired site. But for the reasons set out in our notice of July 6th—the reduction of the unnecessary additional workload imposed upon the Commission at a time when its processes are already heavily taxed and the elimination of the uncertainties inherent in the original grant when the site-to-be-determined application is employed, we conclude that adoption of the outstanding proposal is in the public interest.

5. Site-to-be-determined applications now on file with the Commission will be processed on that basis. All applications for authority to install a standard broadcast antenna filed after the effective date of this order must specify a definite site. As to the latter date, it is believed, because of the workload factor and the desirability of expediting the processing of applications, that the subject amendments should be made effective immediately.

6. Authority for the adoption of the amendment herein is contained in sections 4 (i), 303 (f) and 303 (r) of the Communications Act of 1934, as amended.

7. In view of the foregoing: *It is ordered*, That, effective immediately, § 3.33 of the Commission's rules is amended to read as follows:

§ 3.33 *Antenna systems; showing required.* (a) An application for authority to install a broadcast antenna shall specify a definite site [11] and include full details of the antena design and expected performance.

(b) All data necessary to show compliance with the terms and conditions of the construction permit must be filed with the license application. If the station is using a directional antenna, a proof of performance must also be filed.

(Sec. 4, 48 Stat. 1066 as amended; 47 U. S. C. 154. Interprets or applies sec. 303, 48 Stat. 1082, as amended; 47 U. S. C. 303)

Adopted: October 28, 1953.

Released: October 30, 1953.

FEDERAL COMMUNICATIONS COMMISSION,
[SEAL] WM. P. MASSING,
*Acting Secretary.*

[F. R. Doc. 53-9322; Filed, Nov. 3, 1953; 8:54 a. m.]

---

[Docket No. 10686]

PART 3—RADIO BROADCAST SERVICES

TABLE OF ASSIGNMENTS

In the matter of amendment of § 3.606, table of assignments, rules governing television broadcast stations; Docket No. 10686.

1. The Commission has under consideration its notice of proposed rule making issued on September 11, 1953 (FCC 53-1169), and published in the FEDERAL REGISTER on September 17, 1953 (18 F. R. 5571), proposing to assign Channel 43 to Corpus Christi, Texas.

2. The time for filing comments in this proceeding expired October 13, 1953. No comments were filed opposing the assignment of Channel 43 to Corpus Christi, Texas. The Commission finds that the assignment of Channel 43 to Corpus Christi would comply with the Commission's rules and that a finalization of the proposal would serve the public interest since it would provide a second commercial UHF assignment and better balance the relationship between the UHF and VHF service in the area.

3. Authority for the adoption of the amendment is contained in sections 4 (i), 301, 303 (c), (d), (f), and (r) and 307 (b) of the Communications Act of 1934, as amended.

4. In view of the foregoing: *It is ordered*, That effective 30 days from publication in the FEDERAL REGISTER, the table of assignments contained in § 3.606 of the Commission's rules and regulations is amended as follows:

| City: | Channel No. |
|---|---|
| Corpus Christi, Tex. | 6+, 10—, *16+, 22, 43 |

(Sec. 4, 48 Stat. 1066 as amended; 47 U. S. C. 154. Interprets or applies secs. 301, 303, 307, 48 Stat. 1081, 1082, as amended, 1084; 47 U. S. C. 301, 303, 307)

Adopted: October 28, 1953.

Released: October 30, 1953.

FEDERAL COMMUNICATIONS COMMISSION,
[SEAL] WM. P. MASSING,
*Acting Secretary.*

[F. R. Doc. 53-9323; Filed, Nov. 3, 1953; 8:54 a. m.]

---

[Docket No. 10687]

PART 3—RADIO BROADCAST SERVICES

TABLE OF ASSIGNMENTS

In the matter of amendment of § 3.606, *Table of assignments*, rules governing television broadcast stations; Docket No. 10687.

1. The Commission has under consideration its notice of proposed rule making issued on September 9, 1953 (FCC 53-1171), and published in the FEDERAL REGISTER on September 17, 1953 (18 F. R. 5572), proposing to assign Channel 50 to Washington, D. C.

2. The time for filing comments in this proceeding expired October 13, 1953. No comments were filed opposing the assignment of Channel 50 to Washington, D. C. The Commission finds that the assignment of Channel 50 to Washington, D. C., would comply with the Commission's rules, and that a finalization of the proposal would serve the public interest since it would provide a second commercial UHF assignment and better balance the relationship between the UHF and VHF service in the area.

3. Authority for the adoption of the amendment is contained in sections 4 (i), 301, 303 (c), (d), (f), and (r) and 307 (b) of the Communications Act of 1934, as amended.

4. In view of the foregoing: *It is ordered*, That effective 30 days from publication in the FEDERAL REGISTER, the table of assignments contained in § 3.606 of the Commission's rules and regulations is amended as follows:

1. Amend the table to read:

| City: | Channel No. |
|---|---|
| Washington, D. C. | 4—, 5—, 7+, 9—, 20+, *26—, 50— |

2. Change the Channel 50 assignment in Rocky Mount, N. C., from 50 to 50+.

3. Change the Channel 50 assignment in Marion, Va., from 50— to 50.

(Sec. 4, 48 Stat. 1066 as amended; 47 U. S. C. 154. Interprets or applies secs. 301, 303, 307, 48 Stat. 1081, 1082, as amended, 1084; 47 U. S. C. 301, 303, 307)

Adopted: October 28, 1953.

Released: October 30, 1953.

FEDERAL COMMUNICATIONS COMMISSION,
[SEAL] WM. P. MASSING,
*Acting Secretary.*

[F. R. Doc. 53-9324; Filed, Nov. 3, 1953; 8:54 a. m.]

---

[11] Site-to-be-determined applications which were on file prior to October 28, 1953, may be granted conditioned upon the filing within 60 days of such grant of an application for modification of permit specifying a site conforming to Commission's rules and standards.

---

[Docket No. 10647]

PART 4—EXPERIMENTAL AND AUXILIARY BROADCAST SERVICES

MISCELLANEOUS AMENDMENTS

In the matter of amendment of Part 4 of the Commission's rules and regulations governing auxiliary broadcast services; Docket No. 10647.

1. The Commission has under consideration its notice of proposed rule making (FCC 53-1075) of August 21, 1953, and published in the FEDERAL REGISTER on August 28, 1953, proposing to amend Part 4 of the Commission's rules so as to make provision for FM inter-city relay stations in the band 940-952 Mc.

2. The Commission finds that the proposed amendments are necessary in order to provide for FM inter-city relay stations on the frequencies allocated for this purpose and would be in the public interest. The time for filing comments in this proceeding expired on September 24, 1953. No comments opposing the amendments were filed.

3. Authority for the adoption of the proposed amendments set out in the attached appendix is contained in sections 4 (i), 303, (a), (b), (c), (f) and (r) of the Communications Act of 1934 as amended.

4. In view of the foregoing: *It is ordered*, That effective 30 days from the publication in the FEDERAL REGISTER, Part 4 of the Commission's rules and regulations Governing Auxiliary Broadcast Services is amended as set out below.

Adopted: October 28, 1953.

Released: October 30, 1953.

FEDERAL COMMUNICATIONS COMMISSION,
[SEAL] WM. P. MASSING,
*Acting Secretary.*

Part 4 of the Commission's rules and regulations is amended as follows:

1. In § 4.1 delete paragraph (b) (2) and substitute the following:

(2) Broadcast STL and FM inter-city relay (Subpart E).

2. In § 4.11 insert the term FM inter-city relay, between the terms "broadcast STL", and "experimental facsimile" in the first sentence of this section.

3. Change the title of Subpart E to "Broadcast STL and FM Inter-City Relay Stations."

4. Change the paragraph designators (c) and (d) in § 4.501 respectively to (d) and (e) and insert a new paragraph (c) as follows:

(c) FM inter-city relay station: A fixed station used for the transmission of FM broadcasting programs from one FM broadcasting station to other FM broadcasting stations to provide simultaneous network FM broadcasting and operated only by FM broadcast licensees.

5. Add a new paragraph (d) to § 4.502 to read as follows:

(d) FM inter-city relay stations may be licensed on any of the frequencies listed in paragraphs (a) and (b) of this section, subject to the condition that no harmful interference is caused to stations operating in accordance with the Table of Frequency Allocations contained in § 2.104 (a) of this chapter.

6. Delete present § 4.531 and substitute the following:

§ 4.531 *Licensing requirements.* (a) An FM broadcast STL station will be licensed only to the licensee of an FM broadcasting station as an auxiliary to a particular FM broadcasting station of that licensee.

(b) A standard broadcast STL station will be licensed only to the licensee of a standard broadcast station as an auxiliary to a particular standard broadcast station of that licensee.

(c) An FM intercity relay station will be licensed only to the licensee of an FM broadcast station and only upon a satisfactory showing that suitable common carrier facilities are not available. An application for construction permit for a new FM intercity relay station or for renewal of license of an existing station shall be accompanied by a verified statement containing the following:

(1) A full statement as to why the applicant requires the requested facilities including reasons why common carrier facilities cannot be utilized; and,

(2) A showing that the applicant has, at the earliest time reasonably practicable, requested the appropriate common carrier or common carriers serving the general area involved to furnish the intercity FM transmission service required by the applicant, including in such showing a copy of the request or requests and of the reply or replies received from such common carriers.

(d) More than one broadcast STL station or FM intercity relay stations will be licensed for use with single broadcast station only upon a showing that, (1) more than one transmitter is required for the effective operation of a single STL or intercity relay circuit due to distance of transmission, terrain anomalies, or similar circumstances; or, (2) more than one STL circuit is needed to connect additional studios or more than one FM intercity relay circuit is needed to connect additional FM broadcast stations in the network; and it is shown that the nature and extent of use of such additional circuits is such as to justify their authorization.

(e) Each station shall be licensed at a fixed location and the direction of radiation of the antenna shall be fixed.

7. Delete paragraphs (b) and (c) and footnote 2 of § 4.532 and substitute the following:

(b) The license of an FM intercity relay station authorizes the relaying of FM broadcast programs and communications relating thereto between FM broadcasting stations located in different cities in order to provide network FM broadcasting. The operation of FM intercity relay stations is subject to the condition that no harmful interference is caused to other radio stations, present or future, operating in accordance with the Table of Frequency Allocations set forth in § 2.104 (a) of this chapter.

(c) Each FM broadcast STL station, standard broadcast STL station, or FM intercity relay station will be licensed for unlimited time operation.

(d) During periods in which it is not a part of the broadcast circuit, the transmitting equipment may be used for the transmission of communications which pertain to the broadcast operations.[3] Superfluous transmissions are not permitted.

8. Delete § 4.533 and substitute the following:

§ 4.533 *Remote control and unattended operation.* (a) Broadcast STL or FM intercity relay stations may be operated by remote control: *Provided*, That such operation is conducted in accordance with the conditions listed in this section: *And provided further*, That the Commission is notified at least 10 days prior to such operation and that such notification is accompanied by a detailed description of the proposed remote control installation showing the manner of compliance with the following conditions:

(1) The operating position shall be under the control and supervision of the licensee and shall be the place at which a licensed operator meeting the requirements of § 4.565 and responsible for the operation of the transmitter is stationed;

(2) A carrier operated device shall be provided at the operating position which shall give a continuous visual indication when the transmitter is radiating; or, in lieu thereof, a device shall be provided which will give a continuous visual indication when any transmitter control circuits have been placed in a condition to produce radiation;

(3) Facilities shall be provided at the operating position which will permit the operator to turn the transmitter carrier on and off at will; and

(4) The transmitter and all of its operating controls shall be so installed and protected that they are not accessible to other than authorized personnel.

(b) FM intercity relay stations, and broadcast STL stations where the circuit requires the use of more than one STL transmitter, may be operated unattended: *Provided*, That such operation is conducted in accordance with the conditions listed below: *And provided further*, That the Commission is notified at least 10 days prior to the beginning of such operation and that such notification is accompanied by a detailed description of the proposed installation showing the manner of compliance with the following conditions:

(1) The transmitter is capable of retransmitting by self-actuating means a radio signal received from another radio station or stations;

(2) The transmitter shall be provided with adequate safeguards to prevent improper operation of the equipment;

(3) The transmitter shall be so installed and protected that it is not accessible to other than duly authorized persons;

(4) Appropriate observations shall be made, at intervals not exceeding one hour during the period of its operations, at the receiving end of the circuit by a person holding a valid first or second class radiotelephone operator license who shall immediately institute measures sufficient to assure prompt correction of any condition of improper operation that is observed; and

(5) The station licensee shall remain responsible for the proper operation of the station, and all adjustments or tests during or coincident with the installation, servicing, or maintenance of the station which may affect its proper operation, shall be performed by or under the immediate supervision and responsibility of a person holding a valid first or second class radiotelephone operator license.

(c) The Commission may notify the licensee not to commence remote control or unattended operation, or to cancel, suspend, or change the date of the beginning of such operation as and when such action may appear to be in the public interest, convenience and necessity.

9. a. Substitute the term Broadcast STL and FM intercity relay stations for the term "Broadcast STL Stations" in the following sections: § 4.534, first sentence; § 4.535 (a), first sentence;

b. Substitute the term broadcast STL or FM intercity relay station for the term "broadcast STL station" in the following sections: § 4.536, first sentence; § 4.551, first sentence; § 4.561, first sentence; § 4.562, first sentence; § 4.563, first sentence; § 4.581, first sentence; § 4.582, first sentence.

(Sec. 4, 48 Stat. 1066, as amended; 47 U. S. C. 154. Interpret or apply sec. 303, 48 Stat. 1082, as amended; 47 U. S. C. 303)

[F. R. Doc. 53-9325; Filed, Nov. 3, 1953; 8:55 a. m.]

[Docket No. 10710]

## PART 7—STATIONS ON LAND IN THE MARITIME SERVICE

## PART 8—STATIONS ON SHIPBOARD IN THE MARITIME SERVICE

AVAILABILITY OF FREQUENCIES FOR ASSIGNMENT TO RADIONAVIGATION (DEVELOPMENTAL) STATIONS

In the matter of amendment of Parts 7 and 8 of the Commission's rules regarding availability of frequencies for assignment to radionavigation (developmental) stations, Docket No. 10710.

At a session of the Federal Communications Commission held at its offices in Washington, D. C., on the 28th day of October 1953:

The Commission having under consideration its proposal in the above-entitled matter to amend §§ 7.503 and 8.433 of its rules by adding thereto certain frequencies for shore and ship radionavigation (developmental) stations; and

It appearing, that in accordance with the requirements of section 4 (a) of the Administrative Procedure Act, notice of proposed rule making in Docket No. 10719 which made provision for submission of certain comments by interested parties was duly published in the FEDERAL REGISTER on October 6, 1953 (18 F. R. 6358); and

It further appearing, that the period in which interested persons were afforded opportunity to comment has expired; and

It further appearing, that no objection as such, was filed to the proposed amendments; however, Aeronautical Radio, Inc., filed a comment stating that it does not oppose the proposed amendments, providing similar action is taken to include in Part 9 of the Commission's rules governing Aviation Services the frequency bands available for assignment to developmental stations of the aircraft and aeronautical radionavigation services, and requested that the said Part 9 be amended accordingly; and

It further appearing, that Aeronautical Radio, Inc.'s, request is receiving consideration but that such consideration is not relevant to the proceedings in Docket No. 10710; and

It further appearing, that the public interest, convenience and necessity will be served by the amendments herein ordered, the authority for which is contained in section 303 (c), (f), (g), and (r) of the Communications Act of 1934, as amended; and

It further appearing, that the rule amendments herein ordered are urgently necessary to permit processing of pending applications and therefore should be made available for licensing immediately;

*It is ordered*, That, effective immediately, Parts 7 and 8 of the Commission's rules are amended as set forth below.

Released: October 29, 1953.

FEDERAL COMMUNICATIONS COMMISSION,
[SEAL] WM. P. MASSING,
*Acting Secretary.*

1. Amend § 7.503 by the addition of paragraph (c) reading as follows:

(c) In addition to the specific frequency bands designated by § 7.402 for shore radionavigation stations, each of the following frequencies or frequency bands may be licensed as an assigned frequency or an authorized frequency band for use by developmental shore radionavigation stations:

| *Authorized frequency band* | *Assigned frequency* |
|---|---|
| 2900 to 3000 Mc. | |
| 3246 to 3266 Mc | 3256 Mc (Racons only). |
| 3266 to 3300 Mc. | |
| 5250 to 5440 Mc. | |
| 5440 to 5460 Mc | 5450 Mc (Racons only). |
| 8500 to 9300 Mc. | |
| 9300 to 9320 Mc | 9310 Mc (Racons only). |
| 9500 to 9800 Mc. | |

2. Amend § 8.433 by addition of paragraph (c) reading as follows:

(c) In addition to specific frequency bands designated by § 8.404 for ship radionavigation stations, each of the following frequencies or frequency bands may be licensed as an assigned frequency or an authorized frequency band for use by developmental ship radionavigation stations:

| *Authorized frequency band* | *Assigned frequency* |
|---|---|
| 2900 to 3000 Mc. | |
| 3246 to 3266 Mc | 3256 Mc (Racons only). |
| 3266 to 3300 Mc. | |
| 5250 to 5440 Mc. | |
| 5440 to 5460 Mc | 5450 Mc (Racons only). |
| 8500 to 9300 Mc. | |
| 9300 to 9320 Mc | 9310 Mc (Racons only). |
| 9500 to 9800 Mc. | |

(Sec. 303, 48 Stat. 1082, as amended; 47 U. S. C. 303)

[F. R. Doc. 53-9326; Filed, Nov. 3, 1953; 8:55 a. m.]

## TITLE 50—WILDLIFE

### Chapter I—Fish and Wildlife Service, Department of the Interior

#### Subchapter B—Hunting and Possession of Wildlife

## PART 6—MIGRATORY BIRDS AND CERTAIN GAME MAMMALS

COMPENSATORY EXTENSIONS OF CERTAIN MIGRATORY GAME BIRD SEASONS

*Basis and purpose.* Requests have been received from the States of Tennessee and West Virginia for the extension of the migratory game bird hunting seasons by the number of days sportsmen were not permitted to hunt such birds due to emergency State action closing extensive areas to shooting as a forest fire prevention measure. It has been determined that the slight compensatory extensions sought are not likely to result in a diminution of the birds to any greater extent than was contemplated for the original period.

Accordingly, pursuant to authority conferred upon me by § 6.4 of the Migratory Bird Treaty Act Regulations (16 F. R. 7513), the seasons fixed by the amendments to such regulations approved during July, August and September 1953 (18 F. R. 4421, 4891, 5175 and 5495) are, subject to shooting hours and other applicable provisions of the current Federal regulations, extended as follows:

In Tennessee, mourning doves from October 30 to November 11, 1953, both dates inclusive, an extension of 13 days.

In West Virginia, woodcock from October 29 to November 30; waterfowl and coot from October 29 to December 26, all dates inclusive. The seasons in this State were closed from October 1 to October 28 inclusive.

(Sec. 3, 40 Stat. 755, as amended; 16 U. S. C. 704)

Since these amendments are relaxations of existing regulations, notice and public procedure thereon are not required (60 Stat. 237; 5 U. S. C. 1001, et seq.), and they shall become effective immediately.

ALBERT M. DAY,
*Acting Director,*
*Fish and Wildlife Service.*

OCTOBER 28, 1953.

[F. R. Doc. 53-9281; Filed, Nov. 3, 1953; 8:46 a. m.]

---

[3] If the transmitter and receiver are equipped with a multiplex circuit, communications during broadcast periods may be authorized upon application therefor. Such a circuit, if used, shall be designed and operated in a manner which will not cause spurious emissions or derogation of the program transmission. Studio to transmitter and transmitter to studio communication may also be provided by equipment operated under the remote pickup broadcast station rules.

# PROPOSED RULE MAKING

## FEDERAL COMMUNICATIONS COMMISSION

[ 47 CFR Parts 10, 11, 16 ]

[Docket No. 10500]

PUBLIC SAFETY, INDUSTRIAL, AND LAND TRANSPORTATION RADIO SERVICES

OPERATIONAL FIXED STATIONS; WITHDRAWAL OF NOTICE OF PROPOSED RULE MAKING AND TERMINATION OF PROCEEDINGS

In the matter of amendments to Parts 10, 11, and 16 of the Commission's rules to establish certain new provisions regarding operational fixed stations operating on frequencies above 890 Mc.; Docket No. 10500.

1. The Commission has had under consideration a notice of proposed rule making adopted May 13, 1953, in the above-entitled matter and comments filed relative thereto. In the light of the comments and in further consideration of the problems relating to the licensing of private microwave radio systems, it would appear desirable to defer action on the promulgation of rules until an overall policy can be adopted.

2. The Commission's staff is undertaking a study of the entire field of licensing policy for private microwave systems. Similar investigations are being conducted by representatives of manufacturers and user groups. Since a study of the magnitude contemplated will undoubtedly require a minimum of a year, there appears to be little reason why the outstanding docket should be continued. In the interim the Commission will continue to license microwave stations on a developmental basis in accordance with existing policies.

3. In view of the above: *It is ordered*, This 28th day of October 1953, that the notice of proposed rule making in the above-entitled matter be withdrawn and the proceedings in Docket 10500 are terminated.

Released: October 29, 1953.

FEDERAL COMMUNICATIONS COMMISSION,
[SEAL] WM. P. MASSING,
*Acting Secretary.*

[F. R. Doc. 53-9327; Filed, Nov. 3, 1953; 8:55 a. m.]

# NOTICES

## DEPARTMENT OF THE INTERIOR

### Bureau of Land Management

CALIFORNIA

CLASSIFICATION ORDER

OCTOBER 28, 1953.

1. Pursuant to the authority delegated to me by the Regional Administrator, Region II, Bureau of Land Management, by Order No. 1, Amendment No. 2, dated January 29, 1953 (18 F. R. 23), I hereby classify under the Small Tract Act of June 1, 1938 (52 Stat. 609), as amended July 14, 1945 (59 Stat. 467, 43 U. S. C. 682a), as hereinafter indicated, the following described lands in the Los Angeles land district, embracing approximately 180 acres,

CALIFORNIA SMALL TRACT CLASSIFICATION NO. 388

For lease and sale for homesite purposes only.

T. 9 N., R. 2 W., S. B. M.,
Sec. 11, W½NE¼NE¼, NW¼NE¼, S½NE¼, SW¼NW¼.

The lands are located near the town of Barstow in San Bernardino County, California. State Highway U. S. 66-91 crosses the northwestern part of Section 11, and access to these lands can be obtained from the highway. The topography is level to rolling and somewhat dissected by dry washes.

2. As to applications regularly filed prior to 11:20 a. m., December 10, 1952, which describe tracts in accordance with the provisions contained herein, this order shall be effective immediately.

3. This order shall not otherwise become effective to change the status of such lands until 10:00 a. m. on the 35th day after the date of this order. At that time the said lands shall, subject to valid existing rights and the provisions of existing withdrawals, become subject to applications under the Small Tract Act as follows:

(a) *Ninety-one day period for preference-right filings.* For a period of 91 days, commencing at the hour and on the day specified above, the public lands affected by this order shall be subject only to application under the Small Tract Act of June 1, 1938, 52 Stat. 609 (43 U. S. C. 682a), as amended, by qualified veterans of World War II, subject to the requirements of applicable law. All applications filed under this paragraph either at or before 10:00 a. m. on the 35th day after the date of this order shall be treated as though filed simultaneously at that time. All applications filed under this paragraph after 10:00 a. m. on the said 35th day shall be considered in the order of filing.

(b) *Date for non-preference-right filings.* Commencing at 10:00 a. m. on the 126th day after the date of this order, any lands remaining unappropriated shall become subject to disposal under the Small Tract Act only. All such applications filed either at or before 10:00 a. m. on the 126th day after the date of this order, shall be treated as though filed simultaneously at the hour

specified on such 126th day. All applications filed thereafter shall be considered in the order of filing.

4. A veteran shall accompany his application with a complete photostatic, or other copy (both sides), of his certificate of honorable discharge, or of an official document of his branch of the service which shows clearly his honorable discharge as defined in § 181.36 of Title 43 of the Code of Federal Regulations, or constitutes evidence of other facts upon which the claim for preference is based and which shows clearly the period of service. Other persons claiming credit for service of veterans must furnish like proof in support of their claims. Persons asserting preference rights, through settlement or otherwise, and those having equitable claims, shall accompany their application by duly corroborated statements in support thereof, setting forth in detail all facts relevant to their claims.

5. All of the lands will be leased in tracts of 1¼ acres, with approximate dimensions of 330 feet east and west and 165 feet north and south, each tract forming an aliquot part of the official survey of the section.

6. Preference right leases referred to in paragraph 2 will be issued only if the tract applied for conforms to or is amended to conform to the area, dimensions and orientation specified in paragraph 5.

7. Leases will be issued for a period of three years at an annual rental of $5 payable for the entire lease period in advance of issuance of the lease. Leases will contain an option to purchase clause at the appraised value of $150 per tract. Application to purchase may be filed during the term of the lease but not more than 30 days prior to the expiration of one year from the date of the lease issuance.

8. Tracts will be subject to all existing rights-of-way and to rights-of-way 33 feet in width along the boundaries thereof for road purposes and public utilities. Such rights-of-way may be utilized by the Federal Government, or the State, County or municipality in which the tract is situated, or by any agency thereof. The rights-of-way may, in the discretion of the authorized officer of the Bureau of Land Management, be definitely located prior to the issuance of the patent. If not so located, they may be subject to location after patent is issued.

9. All inquiries relating to these lands should be addressed to the Manager, Land Office, Los Angeles, California.

E. I. ROWLAND,
*Regional Chief,*
*Division of Lands.*

[F. R. Doc. 53-9283; Filed, Nov. 3, 1953; 8:46 a. m.]

## Bureau of Reclamation

HASSAYAMPA PROJECT, ARIZONA

ORDER OF REVOCATION

JULY 27, 1953.

Pursuant to the authority delegated by Departmental Order No. 2515, of April 7, 1949 (14 F. R. 1937), I hereby revoke Departmental Order of April 7, 1944, insofar as said order affects the following described lands: *Provide, however,* That such revocation shall not affect the withdrawal of any other lands by said orders or affect any other orders withdrawing or reserving the land hereinafter decribed.

GILA AND SALT RIVER MERIDIAN, ARIZONA

T. 7 N., R. 4 W.,
Sec. 20, E½SE¼.

The above area aggregates 80 acres.

G. W. LINEWEAVER,
*Assistant Commissioner.*

I concur. The records of the Bureau of Land Management will be noted accordingly.

This revocation is made in furtherance of an exchange under section 8 of the act of June 28, 1934, as amended by section 3 of the act of June 26, 1936 (48 Stat. 1272, 49 Stat. 1976; 43 U. S. C. 315g), by which the offered lands will benefit a Federal land program. This restoration is, therefore, not subject to the provisions contained in the act of September 27, 1944 (58 Stat. 147; 43 U. S. C. 279–284) as amended, granting preference rights to veterans of World War II and others.

EDWARD WOOZLEY,
*Director,*
*Bureau of Land Management.*

OCTOBER 29, 1953.

# DEPARTMENT OF LABOR

## Wage and Hour Division

LEARNER EMPLOYMENT CERTIFICATES

ISSUANCE TO VARIOUS INDUSTRIES

Notice is hereby given that pursuant to section 14 of the Fair Labor Standards Act of 1938, as amended (52 Stat. 1068, as amended; 29 U. S. C. and Sup. 214) and Part 522 of the regulations issued thereunder (29 CFR Part 522), special certificates authorizing the employment of learners at hourly wage rates lower than the minimum wage rates applicable under section 6 of the act have been issued to the firms listed below. The employment of learners under these certificates is limited to the terms and conditions therein contained and is subject to the provisions of Part 522. The effective and expiration dates, occupations, wage rates, number or proportion of learners, and learning period for certificates issued under the general learner regulations (§§ 522.1 to 522.14) are as indicated below; conditions provided in certificates issued under special industry regulations are as established in these regulations.

Single Pants, Shirts and Allied Garments, Women's Apparel, Sportswear and Other Odd Outerwear, Rainwear, Robes and Leather and Sheep-Lined Garments Divisions of the Apparel Industry Learner Regulations (29 CFR 522.160 to 522.168, as amended December 31, 1951, 16 F. R. 12043; and June 2, 1952, 17 F. R. 3818).

Athens Garment Co., Athens, Ala., effective 10–24–53 to 10–23–54; 10 learners (work shirts).

J. H. Bonck Co., Inc., 1100 South Jefferson Davis Parkway, New Orleans, La., effective 10–26–53 to 10–25–54; 10 percent of the factory production force for normal labor turnover purposes (sport shirts).

Cassie Sportswear Co., 306–8–10 West Catawissa Street, Nesquehoning, Pa., effective 10–21–53 to 10–20–54; 10 percent of the total number of factory production workers (not including office and sales personnel) (ladies' blouses).

Chester Manufacturing Co., Inc., 1 Brookside Avenue, Chatham, N. Y., effective 10–23–53 to 10–22–54; 5 learners for normal labor turnover purposes (ladies' and children's street and house dresses).

Duncannon Dress Co., 711 High Street, Duncannon, Pa., effective 10–26–53 to 10–25–54; 10 percent of the factory production force for normal labor turnover purposes (ladies' cotton house dresses).

Eureka Pants Co., Shelbyville, Tenn., effective 10–27–53 to 10–26–54; 10 percent of the total number of factory production workers (not including office and sales personnel) (cotton work pants).

Fly Manufacturing Co., Shelbyville, Tenn., effective 10–27–53 to 10–26–54; 10 percent of the total number of factory production workers (not including office and sales personnel) (cotton work pants, overalls, and jackets).

Forest City Manufacturing Co., 1641 Washington Avenue, St. Louis, Mo., effective 10–22–53 to 10–21–54; 10 percent of the factory production force for normal labor turnover purposes (junior and misses' dresses).

Gross Galesburg Co., Lewistown, Ill., effective 11–1–53 to 4–30–54; 40 learners for expansion purposes (men's and boys' waistband overalls).

Juvenile Manufacturing Co., Inc., 327 North Flores Street, San Antonio, Tex., effective 10–24–53 to 10–23–54; 10 percent of the total number of factory production workers (excluding those engaged in the production of coat suits and topcoats) (slacks, shorts, boxerettes, boxer shorts, jackets, and shirts, etc.).

McMinnville Garment Co., McMinnville, Tenn., effective 11–9–53 to 11–8–54; 10 percent of the factory production force for normal labor turnover purposes (cotton trousers).

Charles Meyers & Co., First and Harrison Streets, Belleville, Ill., effective 11–2–53 to 11–1–54; 10 percent of the factory production workers for normal labor turnover purposes (men's trousers).

Milan Shirt Manufacturing Co., 134 Williamson Street, Milan, Tenn., effective 11–4–53 to 11–3–54; 10 percent of the factory production force for normal labor turnover purposes (cotton work shirts).

Nardis Sportswear, Inc., 400 South Poydras Street, Dallas, Tex., effective 10–23–53 to 10–22–54; 10 percent of the number of factory production workers (excluding workers engaged in the production of skirts, jackets, and toppers, lined and unlined suits) (blouses and vests).

Palm Beach Co., Talladega, Ala., effective 10–27–53 to 10–26–54; 10 percent of the total number of factory production workers (not including office and sales personnel) (summer wash pants).

Pettibelle, Inc., Sumter, S. C., effective 10–23–53 to 4–22–54; 75 learners for expansion purposes (children's cotton dresses).

Princess Peggy, Inc., 1001 South Adams Street, Peoria, Ill., effective 10–27–53 to 10–26–54; 10 percent of the factory production force for normal labor turnover purposes (women's cotton house dresses).

Salant & Salant Inc., First Street, Lexington, Tenn., effective 11–9–53 to 11–8–54; 10 percent of the factory production force for normal labor turnover purposes (cotton work shirts).

Salant & Salant Inc., Pine Street, Lexington, Tenn., effective 11–6–53 to 11–5–54; 10 percent of the factory production workers for normal labor turnover purposes (cotton work shirts).

Salant & Salant Inc., Troy, Tenn., effective 11–7–53 to 11–6–54; 10 percent of the factory production force for normal labor turnover purposes (cotton work shirts).

Salant & Salant Inc., Obion, Tenn., effective 11–9–53 to 11–8–54; 10 percent of the factory production workers for normal labor turnover purposes (cotton work shirts).

Shamokin Dress Co., 1012 North Shamokin Street, Shamokin, Pa., effective 10–26–53 to 10–25–54; 10 percent of the factory production force for normal labor turnover purposes (women's and girls' dresses).

Shane Uniform Co., Inc., 2015 West Maryland Street, Evansville, Ind., effective 10–21–53 to 10–20–54; 10 percent of the factory production force for normal labor turnover purposes (washable service apparel).

United Garment Manufacturing Co., 316 West Lake Street, Chisholm, Minn., effective 10–27–53 to 4–26–54; 15 learners for expansion purposes (men's and boys' parkers, boys' and girls' surcoats, girls' jackets).

Washington Overall Manufacturing Co., Scottsville, Ky., effective 10–26–53 to 10–25–54; 10 percent of the factory production force for normal labor turnover purposes (work pants).

Wide Awake Shirt Co., Inc., Reading, Pa., effective 10–27–53 to 10–26–54; 10 percent of the total number of factory production workers (not including office and sales personnel) (men's shirts).

J. M. Wood Manufacturing Co., Inc., 226 South Sixth Street, Waco, Tex., effective 10–27–53 to 10–26–54; 10 percent of the factory production force for normal labor turnover purposes (dungarees, men's work pants, and men's one piece suits).

Independent Telephone Industry Learner Regulations (29 CFR 522.82 to 522.93, as amended January 25, 1950, 15 F. R. 398).

The Cass County Telephone Co., Harrisonville, Mo., effective 11–10–53 to 11–9–54.

West Iowa Telephone Co., Remsen, Iowa, effective 11–17–53 to 11–16–54.

Each certificate has been issued upon the employer's representation that employment of learners at subminimum rates is necessary in order to prevent curtailment of opportunities for employ-

ment, and that experienced workers for the learner occupations are not available. The certificates may be cancelled in the manner provided in the regulations and as indicated in the certificates. Any person aggrieved by the issuance of any of these certificates may seek a review or reconsideration thereof within fifteen days after publication of this notice in the FEDERAL REGISTER pursuant to the provisions of Part 522.

Signed at Washington, D. C., this 26th day of October 1953.

MILTON BROOKE,
*Authorized Representative of the Administrator.*

## FEDERAL COMMUNICATIONS COMMISSION

SHIP STATION LICENSES AUTHORIZED TO USE CERTAIN TELEGRAPH FREQUENCIES

ORDER SPECIFYING DURATION OF LICENSE MODIFICATIONS

In the matter of modification of licenses of ship station licensees presently authorized to use telegraph frequencies below 535 kc to include authority to use the working frequency 448 kc (Region 2 only).

At a session of the Federal Communications Commission held at its offices in Washington, D. C., on the 28th day of October 1953;

The Commission having under consideration its order adopted October 27, 1952, modifying the licenses of ship station licensees authorized to use telegraph frequencies below 535 kc so as to include in all such licenses authority to operate on the working frequency 448 kc (Region 2 only) for a period until November 1, 1953 or until the date of expiration of license, whichever occurred earlier;

It appearing, that the emergency described in the above-referred-to order which furnished the basis for the issuance of the order under the provisions of section 308 (a) (3) of the Communications Act of 1934, as amended, has been prolonged beyond its anticipated duration by reason of printing delays making unavailable in reasonable time appropriate application forms which could be used by licensees to apply for a regular authorization:

*It is ordered*, That, effective November 1, 1953, the Commission's order of October 27, 1952, referred to above, is modified by specifying the duration of the license modifications therein ordered to be until May 1, 1954, or until the date of expiration of the current license of each ship station involved, whichever occurs earlier.

*It is further ordered*, That a copy of this order be posted by all licensees affected along with their regular licenses.

FEDERAL COMMUNICATIONS COMMISSION,
[SEAL] WM. P. MASSING,
*Acting Secretary.*

[F R. Doc. 53-9312; Filed, Nov. 3, 1953; 8:52 a. m.]

[Docket No. 8737]

CHERRY & WEBB BROADCASTING CO.

MEMORANDUM OPINION AND ORDER DESIGNATING APPLICATIONS FOR HEARING ON STATED ISSUES

In re applications of Cherry & Webb Broadcasting Company, Providence, Rhode Island, Docket No. 8737, File No. BPCT-223; for construction permit for new television broadcast station, for special temporary authorization.

1. On September 3, 1953, the Commission granted the above-entitled application for a permit to construct a new television broadcast station on Channel 12 at Providence, Rhode Island. On September 23, the Commission granted the above-entitled application for special temporary authority to operate commercially on an interim basis. On October 2, 1953, Channel 16 of Rhode Island, Inc. filed its "Petition Protesting Grants, Requesting Hearing, And For Other Relief", pursuant to section 309 (c) of the Communications Act of 1934, as amended, directed against the Commission's actions of September 3 and 23, 1953, granting, respectively, the above-entitled applications. On October 16, 1953, the Commission, by Memorandum Opinion and Order (FCC 53-1367) found that the protestant was a party in interest and that it had specified with particularity the facts, matters and things relied upon, as required by section 309 (c) of the Communications Act. Accordingly, on the latter date, the Commission postponed the effective dates of the above grants and designated the above-entitled applications for hearing "at a time and place and upon appropriate issues to be designated by further order of the Commission".

2. We are including issues "(1)" to "(4)", inclusive, in the terms specified by protestant. Issues "(5)", "(6)" and "(7)" proposed by protestant read as follows:

(5) To obtain full information concerning the procedures pursuant to which the amended application of Cherry and Webb Broadcasting Company for construction permit (BPCT-223) was granted, with particular reference to facts showing the Commission's practice relating to issuance of notices of broadcast applications, the nature of any notices of the filing of such amended application or of the dismissal of the competing applications of Hope Broadcasting Company (BPCT-1661) and Greater Providence Broadcasting Company (BPCT-1689), the time and manner in which said amended application and dismissals were filed, the general nature of the steps constituting "processing and review" of said application in the light of the provisions of Footnote 10, §§ 1.371 and 1.372 of the Commission's rules.

(6) To obtain full information concerning the procedures pursuant to which the letter request of Cherry and Webb Broadcasting Company for so-called Special Temporary Authorization for Interim Operation was granted, including the circumstances surrounding the filing and granting thereof, the nature of any public notices pertaining to such filing and granting, and the steps and actions taken by the grantee of said STA pursuant to said grant.

(7) To determine in the light of the facts adduced under the foregoing issues whether a grant of the application would be consistent with the provisions of law, with particular reference to sections 3 (bb and dd), 4 (j), 308, 309, 310, and 319, of the Communications Act of 1934, as amended, the policies enunciated, and practices established by the Commission pursuant thereto, and the rules and regulations of the Commission, particularly Footnote (10) of §§ 1.371 and 1.372, 3.35 and 3.636; and whether the procedures followed meet the requirements of section 3 (a) of the Administrative Procedure Act and due process of law.

It is apparent that issues "(5)" and "(6)", as drafted by the protestant, include an inquiry into certain matters, such as the filing dates of certain pleadings, the public notices relating to the above-entitled applications, the rules governing the Commission's processing procedures and the rules governing its administrative functioning, which are clearly appropriate matters of inquiry. As a matter of fact, there is no dispute concerning these matters, and official notice could be taken of the facts with respect to such matters. However, in order that appropriate factual data on which the legality of the Commission's actions may be determined shall be made part of the hearing record, we are including an issue relating thereto. It would appear, however, that although no factual allegations of specific misconduct are made in the protest, issues "(5)" and "(6)" as drafted by protestant are also broad enough to cover inquiries into such matters as day-to-day and hour-to-hour functioning of the Commission and its staff, the mental processes of the Commission, and the time spent by the Commission and its staff in each step of its processing procedure. The Commission is of the opinion that examination into such matters is clearly not appropriate in any hearing on the protest, and we have, accordingly, redrafted the substance of issues "(5)" and "(6)" in the light of these views to limit the scope of the hearing thereon to what we believe is appropriate.[1] The burden of proof with respect to this redrafted issue, No. 5, will, as in the case of all other hearing issues, be on the protestant.

3. Inasmuch as proposed issue "(7)" is not designed to elicit facts but rather seeks a final determination based on the findings and conclusions resulting from the prior issues, it is not to be referred to an Examiner but will be the subject of oral argument before the Commission. The burden of proof as to said issue will be on the protestant.

4. Accordingly: *It is ordered*, That pursuant to section 309 (c) of the Communications Act of 1934, as amended, the above-entitled applications are designated for hearing at the offices of the Commission in Washington, D. C. on the following issues:

(1) To obtain full information concerning the agreement, dated September 1, 1953, submitted as part of the amended application of Cherry and Webb Broadcasting Company, including:

(a) The circumstances under which the agreement was entered into;

(b) The nature, substance, and terms of any written or oral understandings or arrangements between or among the parties, between or among any other individuals, and between or among any other individuals and said parties, pertaining to the effectuation of said agreement or to the receipt or payment of any of the considerations or benefits provided for in said agreement;

(c) The nature and substance of the plans and intentions of the parties with respect to the effectuation of said agreement, including the specific actions contemplated to be taken in such effectuation;

(d) The nature of the specific benefits, detriments, services, or other considerations provided for in said agreement with specific reference to option rights, monetary considerations, and other benefits to Messrs. Engles and Taylor and other persons who are connected with Greater Providence Broadcasting Company, either as officers, stockholders, directors, or employees, or through contractual arrangements having to do with such considerations.

(2) To obtain full information concerning the identity, affiliations, connections, and other matters upon which information is required by FCC Form 301 (Application for Authority to Construct a New Broadcast Station) with respect to any and all stockholders or proposed stockholders, officers, directors, and operating personnel in the proposed new corporation provided for in, or contemplated by, said agreement, as well as any and all proposed stockholders, officers, directors and employees of any existing corporate or proposed corporate stockholder of said proposed new corporation.

(3) To obtain full information concerning the connections with any existing or proposed broadcast station in Providence, Rhode Island, or elsewhere in the United States of any individuals connected or to be connected by stock ownership, official position, or employment with the licensee of the proposed television station on Channel 12 in Providence.

(4) To obtain full information concerning the nature and amount of costs of all construction of a proposed television station or part thereof, undertaken by Cherry and Webb Broadcasting Company prior to the issuance of any instrument by the Commission authorizing commencement of such construction.

(5) To determine, with respect to the above-entitled applications, the dates of filing thereof, the dates and nature of Commission actions thereon, and the dates and content of public notices issued by the Commission with respect thereto.

(6) To determine in the light of the facts adduced under the foregoing issues whether a grant of the application would be consistent with the provisions of law, with particular reference to sections 3 (bb and dd), 4 (j), 308, 309, 310, and 319, of the Communications Act of 1934, as amended, the policies enunciated, and practices established by the Commission pursuant thereto, and the rules and regulations of the Commission, particularly Footnote (10) of §§ 1.371, 1.372, 3.35, and 3.636; and whether the procedures followed meet the requirements of section 3 (a) of the Administrative Procedure Act and due process of law.

The burden of proof as to each of the above issues shall be on the protestant.

5. *It is further ordered*, That the protestant and the Chief of the Broadcast Bureau are hereby made parties to the proceedings herein and that:

(1) The hearings on issues "(1)" to "(5)", inclusive, shall commence at 10:00 a. m. on November 18, 1953, and shall be held before an Examiner to be specified by the Commission who shall issue an initial decision setting forth findings of fact based on the record before him with respect to said issues and upon the issuance of such findings shall certify the record of the proceedings to the Commission; and

(2) The parties to the proceedings shall have 15 days after issuance of the Examiner's findings to file exceptions thereto and 7 days thereafter to file replies to any such exceptions; and

(3) At a time to be designated by further order, the Comission en banc will hear oral argument on any exceptions filed to the Examiner's findings and, in addition, will hear argument on issue "(6)".

(4) Subsequent to such oral hearing, the Commission shall issue a decision in these proceedings, which decision shall constitute the final decision of the Commission in this matter.

(5) The appearances by the parties intending to participate in the above hearings shall be filed not later than November 10, 1953.

Adopted: October 28, 1953.

Released: October 28, 1953.

FEDERAL COMMUNICATIONS COMMISSION,
[SEAL] WM. P. MASSING,
*Acting Secretary.*

[F. R. Doc. 53-9313; Filed, Nov. 3, 1953; 8:53 a. m.]

[1] While section 309 (c) gives a protestant latitude in drafting hearing issues, it is obvious that a protest proceeding may not be converted into a fishing expedition into the mental processes of the Commission. See United States v. Morgan, 313 U. S. 409, 421-422. Were we to permit the inclusion of issues "(5)" and "(6)" as specified by protestant, we would in any event be forced to direct the Examiner to respect the privileged character of the matter as to which inquiry is made. We believe it more orderly to limit the issues themselves.

[Docket Nos. 10289, 10290]

HEAD OF THE LAKES BROADCASTING CO. AND RED RIVER BROADCASTING CO., INC.

ORDER CONTINUING HEARING

In re applications of Head of the Lakes Broadcasting Co., Superior, Wisconsin, Docket No. 10289, File No. BPCT-621; Red River Broadcasting Co., Inc., Duluth, Minnesota, Docket No. 10290, File No. BPCT-903; for construction permits for new television stations.

At a session of the Federal Communications Commission held at its offices in Washington, D .C., on the 29th day of October 1953;

The Commission having under consideration a petition filed October 23, 1953, by the Head of the Lakes Broadcasting Company requesting review and reversal of an order of the Examiner herein denying the petitioner's request for a 30-day postponement of the hearing in the above-entitled proceeding; and an Opposition to the subject petition, filed October 27, 1953, by the Red River Broadcasting Company, Inc.; and

It appearing, That the petitioner contends that the hearing should be continued until (a) the conclusion of a pending rule-making proceeding looking toward the assignment of Channel 10 to Duluth, Minnesota, because "the finalization of this action will make it possible for the petitioner to apply . . . for Channel 10, thereby eliminating the need for any hearing on Channel 3 . . ." and (b) the disposition of a "Petition to Restrict Hearing to Limited Issues" filed by Head of the Lakes; and

It further appearing, That the Red River Broadcasting Company, Inc., asks that the relief requested be denied principally because further postponement might cause injury to certain private interests of this applicant; and

It further appearing, That a grant of the relief requested may render the instant hearing unnecessary and may therefore make it possible to afford additional television services to the Duluth-Superior area at an earlier date than might otherwise be anticipated;

*It is ordered*, That the above-described petition of Head of the Lakes Broadcasting Co. is granted; and

*It is further ordered*, That the hearing in the above-entitled proceeding, now scheduled to reconvene on October 30, 1953, is continued until November 30, 1953.

Released: October 30, 1953.

FEDERAL COMMUNICATIONS COMMISSION,
[SEAL] WM. P. MASSING,
*Acting Secretary.*

[F. R. Doc. 53-9314; Filed, Oct. 30, 1953; 5:02 p. m.]

[Docket Nos. 10559, 10560]

GULF COAST BROADCASTING CO. AND BAPTIST GENERAL CONVENTION OF TEXAS

ORDER RE AMENDMENT OF ISSUES

In re applications of Gulf Broadcasting Company, Corpus Christi, Texas, Docket No. 10559, file No. BPCT-723; Baptist General Convention of Texas, Corpus Christi, Texas, Docket No. 10560, File No. BPCT-906; for construction permits for new television broadcast stations.

At a session of the Federal Communications Commission held at its offices in Washington, D. C., on the 29th day of October 1953;

The Commission having under consideration (1) a petition filed July 22, 1953, by Baptist General Convention of Texas to enlarge the issues in the hearing on the above-entitled applications to permit a showing of comparative signal coverage and to permit inquiry into the availability of finances to Gulf Coast Broadcasting Company and the

adequacy of available funds to effectuate the proposals set forth in the Gulf Coast aplications; (2) an answer by Gulf Coast Broadcasting Company filed August 7, 1953; (3)) Baptist's supplement to its petition to enlarge the issues, filed September 15, 1953; and (4) Gulf Coast's answer to the supplement of Baptist, filed September 24, 1953; and

It appearing, that Gulf Coast was on September 1, 1953, granted leave to amend its application to show additional loan commitments from local Corpus Christi banks and a substantial prepayment from a prospective television advertiser; and

It further appearing, that in its original Order of Designation in this proceeding the Commission was satisfied that Gulf Coast was financially qualified and made specific findings to that effect; and that by its amendment of September 1, 1953, Gulf Coast has met the questions raised by Baptist with respect to the availability of finances; and

It further appearing, that the question of whether or not the available funds of Gulf Coast will be sufficient to effectuate its proposals, and hence whether or not the issues should be broadened to permit the receipt of evidence on this question, is a matter best left to the discretion of the Examiner after his receipt of allegations sufficiently particularized and material so that, if proved, they would establish significant differences between the competing proposals, all as set out in our Memorandum Opinion and Order in re South Central Broadcasting Corporation, et al., released October 7, 1953, Docket Nos. 10461–10464; and

It further appearing, that, as established by our Memorandum Opinion and Order in re Louis Wasmer, released July 30, 1953, FCC 53–979, no petition will be granted which seeks to enlarge the issues to include the issue of comparative superiority of signal coverage unless the petitioner has made a prior showing that the data proposed to be introduced under such issue would be sufficiently accurate and reliable to support a finding of significant differences and that no such showing has been made in the instant case;

*It is ordered*, This 29th day of October 1953, that the petition of Baptist General Convention of Texas, filed July 22, 1953, to enlarge the issues in this proceeding, is denied insofar as it requests enlargement of the issues to permit inquiry into the availability of finances to Gulf Coast Broadcasting Company and to permit a showing of comparative signal coverage; and

*It is further ordered*, That the issues specified in this proceeding may be enlarged by the Examiner, upon sufficient allegations of fact made in support of said enlargement, by the addition of the following issue:

To determine whether the funds available to the applicant will give reasonable assurance that the proposals set forth in its application will be effectuated.

Released: October 30, 1953.

FEDERAL COMMUNICATIONS COMMISSION,
[SEAL] WM. P. MASSING,
*Acting Secretary.*

[Docket No. 10736]

HATTIESBURG TELEVISION CO.

ORDER DESIGNATING APPLICATION FOR HEARING ON STATED ISSUES

In re applications of Charles J. Wright, Sr., Dave A. Mattison, Jr., Charles J. Wright, Jr., and Charles W. Holt, d/b as Hattiesburg Television Company, Hattiesburg, Mississippi, Docket No. 10736, File No. BPCT–1545; for a construction permit for a new television station.

At a session of the Federal Communications Commission held at its offices in Washington, D. C., on the 28th day of October 1953;

The Commission having under consideration the above-entitled application requesting a construction permit for a new television broadcast station to operate on Channel 9 in Hattiesburg, Mississippi; and

It appearing, That, pursuant to section 309 (b) of the Communications Act of 1934, as amended, the above-named applicant was advised by a letter dated June 26, 1953, that the Commission was unable to determine that a grant of the above-entitled application would serve the public interest, convenience or necessity in the light of § 3.35 of the Commission's rules and the Commission's general policy with respect to complete divorcement of management, ownership and other interests between stations of the same class in the same community or serving substantially the same area, and that a hearing appeared to be necessary; and

It further appearing, That upon due consideration of the above-entitled application (no reply resolving the questions raised in the above letter nor any amendments to the above-entitled application having been filed), the Commission finds that the above-named applicant is legally, technically and financially qualified to construct, own and operate a television broadcast station, but that the application, considered in the light of § 3.35 of our rules and our established policy, raises a serious question as to whether a grant thereof would result in a lessening of competition between Stations WFOR and WHSY;

*It is ordered*, That, pursuant to section 309 (b) of the Communications Act of 1934, as amended, the above-entitled application is designated for hearing to commence at a time and place to be specified in a subsequent order, upon the following issues.

1. To determine, in light of the provisions of § 3.35 of the Commission's rules and the Commission's policy with respect to complete divorcement of management, ownership and other interests between stations of the same class in the same community or serving substantially the same area, what special circumstances, if any, exist which would justify a grant of the above-entitled application.

2. To determine what steps, if any, would be taken, in the event of a grant of the above-entitled application, to minimize the possibility of diminution of competition between standard broadcast Stations WFOR and WHSY.

3. To determine, in light of the evidence adduced under the above issues, whether grant of the above-entitled application would serve the public interest, convenience, and necessity.

Released: October 29, 1953.

FEDERAL COMMUNICATIONS COMMISSION,

[Docket Nos. 10737, 10738]

PETERSBURG TELEVISION CORP. AND SOUTHSIDE VIRGINIA TELECASTING CORP.

ORDER DESIGNATING APPLICATIONS FOR CONSOLIDATED HEARING ON STATED ISSUES

In re applications of Petersburg Television Corporation, Petersburg, Virginia, Docket No. 10737, File No. BPCT–1772; Southside Virginia Telecasting Corporation, Petersburg, Virginia, Docket No. 10738, File No. BPCT–1773; for construction permits for new television stations.

At a session of the Federal Communications Commission held at its offices in Washington, D. C., on the 28th day of October 1953;

The Commission having under consideration the above-entitled applications, each requesting a construction permit for a new television broadcast station to operate on Channel 8 in Petersburg, Virginia; and

It appearing, That the above-entitled applications are mutually exclusive in that operation by more than one applicant would result in mutually destructive interference; and

It further appearing, that pursuant to section 309 (b) of the Communications Act of 1934, as amended, the above-named applicants were advised by letters dated October 12, 1953, that their applications were mutually exclusive; that Petersburg Television Corporation was advised by the said letter that certain questions were raised as the result of deficiencies of a technical nature in its application; and that Southside Virginia Telecasting Corporation was advised by the said letter that the question of whether its proposed antenna system and site would constitute a hazard to air navigation was unresolved; and

It further appearing, that upon due consideration of the above-entitled applications, the amendments filed thereto, and the replies to the above letters, the Commission finds that under section 309 (b) of the Communications Act of 1934, as amended, a hearing is mandatory; and that each of the above-named applicants is legally, financially, and technically qualified to construct, own and operate a television broadcast station;

*It is ordered*, That, pursuant to section 309 (b) of the Communications Act of 1934, as amended, the above-entitled applications are designated for hearing in a consolidated proceeding to commence at 10:00 a. m. on November 27, 1953, in Washington, D. C., to determine on a comparative basis which of the operations proposed in the above-entitled applications would better serve the public interest, convenience or necessity in the light of the record made with respect to the significant differences between the applications as to:

(1) The background and experience of each of the above-named applicants having a bearing on its ability to own and operate the proposed television station.

(2) The proposals of each of the above-named applicants with respect to the management and operation of the proposed station.

(3) The programming service proposed in each of the above-entitled applications.

*It is further ordered*, That the issues in the above-entitled proceeding may be enlarged by the Examiner, on his own motion or on petition properly filed by a party to the proceeding and upon sufficient allegations of fact in support thereof, by the addition of the following issue:

To determine whether the funds available to the applicant will give reasonable assurance that the proposals set forth in the application will be effectuated.

Released: October 29, 1953.

FEDERAL COMMUNICATIONS COMMISSION,
[SEAL] WM. P. MASSING,
*Acting Secretary.*

[Docket No. 10739]

CARBON EMERY BROADCASTING CO.

ORDER DESIGNATING APPLICATION FOR HEARING ON STATED ISSUES

In re application of George G. Platis and Robert E. Hawley d/b as Carbon Emery Broadcasting Company Price, Utah, Docket No. 10739, File No. BP–8797, for construction permit.

At a session of the Federal Communications Commission held at its offices in Washington, D. C., on the 28th day of October 1953;

The Commission having under consideration a protest filed on October 15, 1953, pursuant to section 309 (c) of the Communications Act of 1934, as amended, by Uintah Broadcasting and Television Company, licensee of Station KJAM, Vernal, Utah (1340 kc, 250 w, U) requesting the Commission to reconsider its action of September 16, 1953, granting the above-entitled application of Carbon Emery Broadcasting Company for a construction permit for a new standard broadcast station to operate on 1340 kc, 250 w, unlimited time, at Price, Utah, and to designate the application for hearing;

It appearing, That the engineering affidavit, together with supporting field intensity measurements attached to the KJAM petition, indicates that the 0.025 mv/m contour of the station proposed in the above-entitled application will overlap with the 0.5 mv/m contour of Station KJAM, that the Commission's further study of the matter, including an analysis of the field intensity measurements submitted by the petitioner, indicates that the proposed station would cause some interference within the KJAM normally protected 0.5 mv/m contour as defined by the Standards of Good Engineering Practice Concerning Standard Broadcast stations; and

It further appearing, That the Commission is of the opinion that the aforesaid protest meets the requirements of section 309 (c) and that a hearing must be held on the above-entitled application upon the matters put in issue by said protest;

*It is ordered*, That the above-described petition of Uintah Broadcasting and Television Company is granted; and

*It is further ordered*, That pursuant to section 309 (c) of the Communications Act of 1934, as amended, the above-entitled application of Carbon Emery Broadcasting Company for construction permit for a new standard broadcast station at Price, Utah, is designated for hearing at a time and place to be designated in a subsequent order upon the following issues:

1. To determine the nature and extent of the interference that may be caused to Station KJAM by the proposed operation of the Price, Utah station on 1340 kilocycles with the power of 250 watts and unlimited hours of operation, the areas and populations affected thereby, the availability of other primary service to such areas and population, and the nature and character of the program service now being rendered by Station KJAM to such areas and populations.

2. To determine the type and character of program service proposed to be rendered by the Price, Utah, station and whether it would meet the requirements of the populations and areas proposed to be served.

3. To determine whether, based on the findings made pursuant to the issues above, the public interest convenience or necessity would be served by the grant of the above-entitled application.

*It is further ordered*, That the above issues are adopted by the Commission; therefore, the burden of proceeding with the introduction of evidence and the burden of proof with respect to those issues is placed upon Carbon Emery Broadcasting Company.

*It is further ordered*, That Uintah Broadcasting and Television Company, licensee of Station KJAM, Vernal, Utah, and the Chief, Broadcast Bureau, Federal Communications Commission are made parties to the proceeding.

*It is further ordered*, That effective immediately and pending the final determination of the above hearing, the effectiveness of the Commission's action of September 16, 1953, granting the above-entitled Carbon Emery Broadcasting application is postponed.

Released: October 30, 1953.

FEDERAL COMMUNICATIONS COMMISSION,
[SEAL] WM. P. MASSING,
*Acting Secretary.*

[Docket No. 10740]

ROBERT V. H. SUGDEN

ORDER DESIGNATING MATTER FOR HEARING

In the matter of revocation of license of Special Industrial Station KOG–285; Robert V. H. Sugden, Route 1, Box 629, Yuma, Arizona.

At a session of the Federal Communications Commission held at its offices in Washington, D. C., on the 28th day of October 1953;

The Commission having under consideration alleged violations of the Communications Act of 1934, as amended, and the rules of the Commission committed by the licensee of the above-described station during the course of the operation thereof;

It appearing, That on August 26, 1953, Robert V. H. Sugden was authorized to operate under the call sign KOG–285 a station in the Special Industrial Radio Service governed by Part 11 of the Commission's rules; and

It further appearing, That on August 23, 1953, Robert V. H. Sugden wilfully transmitted or caused to be transmitted communications and signals by radio in violation of section 301 of the Communications Act; and

It further appearing, That during the period from September 4 to September 18, 1953, Station KOG–285 was wilfully operated in a manner contrary to the public interest, the terms of the license, the law and the Commission's regulations in the following particulars:

(a) Unauthorized communications in violation of § 11.151 of the rules of the Commission were repeatedly transmitted by the licensee over the facilities of his station;

(b) The station was operated on several occasions by a person who was not a holder of an appropriate operator authorization issued by the Commission in violation of section 318 of the Communications Act of 1934, as amended, and § 11.154 (e) (1) of the Commission's rules;

(c) No frequency, power, and modulation measurements were made as required by § 11.108 of the Commission's rules;

(d) No station records were maintained as required by § 11.160 of the Commission's rules;

(e) The Commission's Engineer in Charge of the district in which Station KOG–285 is located was not notified prior to the commencement of the sta-

tion's operation as required by § 11.52 (c) of the Commission's rules.

It further appearing, that Station KOG-285 was repeatedly used by the licensee thereof in connection with and in furtherance of illegal activities violative of the laws of the United States and was used to thwart the efforts of the officers of the Immigration and Naturalization Service to enforce the Immigration and Nationality Act:

*It is ordered*, Pursuant to § 312 (c) of the Communications Act of 1934, as amended, that Robert V. H. Sugden show cause why the license of his Special Industrial Station KOG-285 should not be revoked; and

*It is further ordered*, That a hearing in this matter will be held in Washington, D. C., on the 1st day of December 1953, in order to determine whether an Order revoking said license should be issued and that Robert V. H. Sugden is herewith called upon to appear at this hearing and give evidence upon the matters specified herein;* and

*It is further ordered*, That the Secretary shall mail a copy of this Order to the licensee by Registered Mail—Return Receipt Requested.

Released: October 29, 1953.

FEDERAL COMMUNICATIONS COMMISSION,
[SEAL] WM. P. MASSING,
*Acting Secretary.*

[F. R. Doc. 53-9319; Filed, Nov. 3, 1953; 8:54 a. m.]

*Section 1.402 of the Commission's rules provides that in order to avail himself of the opportunity to appear before the Commission at the time and place specified in the Show Cause Order, the licensee shall within thirty (30) days from the date of receipt of this order inform the Commission in writing whether he will appear or whether he waives his rights to a hearing. Waiver of a hearing may be accompanied by a statement of reasons why said licensee believes that an Order of Revocation should not be issued. A waiver unaccompanied by such a statement will be deemed to be an admission of the allegations specified in this order. Failure to respond within the above 30-day period, or failure to appear at the hearing, will be deemed to be a waiver of the right to a hearing and an admission of the allegations specified in the Order to Show Cause.

[Docket No. 10741]

MID-ATLANTIC BROADCASTING CO.

ORDER DESIGNATING MATTER FOR HEARING

In the matter of Cease and Desist Order to be directed against Mid-Atlantic Broadcasting Company, Atlantic City, New Jersey.

At a session of the Federal Communications Commission held at its offices in Washington, D. C., on the 28th day of October 1953;

The Commission having under consideration, the issuance of an order directed to Mid-Atlantic Broadcasting Company, licensee of Radio Station WMID, Atlantic City, New Jersey, to cease and desist from violating § 3.46 (c) of the Commission's rules and regulations, by permitting Radio Station WMID to be operated in such a manner as to cause objectionable second harmonic interference (2680 kc) with frequency 2670 kc which is used by the U. S. Coast Guard at Atlantic City, New Jersey, to receive distress signals from small boats at sea;

It appearing, that Mid-Atlantic Broadcasting Company has been notified by the Commission, from time to time, on February 9, 1949, March 2, 1949, May 15, 1953, July 10, 1953, and September 10, 1953, that their second harmonic emission on 2680 kc was causing objectionable interference with emergency frequency 2670 kc, used by the U. S. Coast Guard;

It further appearing, that, even though Mid-Atlantic Broadcasting Company had a new trap installed in August 1953 to eliminate the objectionable second harmonic interference with frequency 2670 kc, the objectionable interference still exists, specifically at 1:30 p. m., e. d. s. t., on September 10, 1953;

It further appearing, that frequency 2670 kc, as allocated, is used for emergency operations by the local U. S. Coast Guard Radio Station;

It further appearing, that Commission's § 3.46 (c) requires that the station equipment shall be so operated, tuned, and adjusted that emissions are not radiated outside the authorized band which cause or are capable of causing interference to the communications of other stations;

It further appearing, that Mid-Atlantic Broadcasting Company allowed, and continues to allow, radio station WMID to operate, knowing that such operation causes objectionable second harmonic interference with the frequency 2670 kc.

*It is ordered*, Pursuant to the provisions of section 312 (c) of the Communications Act of 1934, as amended, that Mid-Atlantic Broadcasting Company be and is hereby directed to show cause why an order commanding it to cease and desist from violating § 3.46 (c) of the Commission's rules and regulations, by permitting Station WMID to be operated in such a manner as to cause objectionable second harmonic interference to frequency 2670 kc.

*It is further ordered*, That a hearing in this matter will be held in Washington, D. C., on November 16, 1953, in order to determine whether said cease and desist order should be issued, and that Mid-Atlantic Broadcasting Company is hereby called upon to appear at this hearing and give evidence upon the matter specified herein; and

*It is further ordered*, That said Mid-Atlantic Broadcasting Company is directed on or before November 9, 1953, to inform the Commission in writing whether it will appear at the hearing specified above, or whether it waives its right to a hearing, in which event the above cease and desist order will be forthwith issued. Failure to respond by November 9, 1953, or failure to appear at the hearing will be deemed to be a waiver of the right to a hearing.

Released: October 30, 1953.

FEDERAL COMMUNICATIONS COMMISSION,
[SEAL] WM. P. MASSING,
*Acting Secretary.*

## UNITED STATES TARIFF COMMISSION

[Investigation No. 29]

SAFETY PINS

NOTICE OF INVESTIGATION INSTITUTED AND PUBLIC HEARING ORDERED

*Investigation instituted.* Upon application of the DeLong Hook and Eye Company, Philadelphia, Pa., and others received September 28, 1953, the United States Tariff Commission, on the 29th day of October 1953, under the authority of section 7 of the Trade Agreements Extension Act of 1951, as amended, and section 332 of the Tariff Act of 1930, instituted an investigation to determine whether safety pins provided for in paragraph 350 of the Tariff Act of 1930 are, as a result in whole or in part of the duty or other customs treatment reflecting concessions granted thereon under the General Agreement on Tariffs and Trade, being imported into the United States in such increased quantities either actual or relative, as to cause or threaten serious injury to the domestic industry producing like or directly competitive products.

*Hearing ordered.* A public hearing in this investigation was ordered by the Tariff Commission to begin at 10 a. m. on January 12, 1954, in the Hearing Room of the Tariff Commission, Eighth and E Streets, NW., Washington, D. C., at which hearing all interested parties will be given opportunity to be present, to produce evidence, and to be heard.

*Requests to appear at hearing.* Interested parties desiring to appear and give testimony at the hearing should notify the Secretary of the Commission, in writing, in advance of the hearing.

*Inspection of application.* The application filed in this case is available for public inspection at the office of the Secretary, United States Tariff Commission, Eighth and E Streets NW., Washington, D. C., and in the New York office of the Tariff Commission, located in Room 437 of the Custom House, where it may be read and copied by persons interested.

I certify that the above investigation was instituted and the above hearing was ordered by the Tariff Commission on the 29th day of October 1953.

Issued: October 30, 1953.

[SEAL] DONN N. BENT,
*Secretary.*

[Investigation No. 26]

WATCH MOVEMENTS AND PARTS

NOTICE OF POSTPONEMENT OF PUBLIC HEARING

The Tariff Commission ordered that the public hearing in the investigation instituted under section 7 of the Trade Agreements Extension Act of 1951, as amended, with respect to watch movements and parts, heretofore scheduled for January 12, 1954 (18 F. R. 5524), be postponed to 10 a. m., February 9, 1954.

The hearing will be held in the Hearing Room, Tariff Commission Building, Eighth and E Streets NW., Washington, D. C.

*Request to appear.* Parties desiring to appear, to produce evidence, and to be heard at the public hearing should file request in writing with the Secretary, United States Tariff Commission, Washington 25, D. C., in advance of the date of the hearing.

I certify that the above action was taken by the Tariff Commission on the 29th day of October 1953.

Issued: October 30, 1953.

SPECIFIED HOUSEHOLD CHINA TABLEWARE, KITCHENWARE, AND TABLE AND KITCHEN UTENSILS

NOTICE OF HEARING ORDERED

The United States Tariff Commission, on the 29th day of October 1953, ordered a public hearing to be held in the Hearing Room of the Tariff Commission, Eighth and E Streets NW., Washington, D. C., to begin at 10 a. m. on December 15, 1953, in connection with Investigation No. 118 under section 336 of the Tariff Act of 1930, which was instituted on May 15, 1952. The investigation and hearing relate to specified Household China Tableware, Kitchenware, and Table and Kitchen Utensils, provided for in paragraph 212 of the Tariff Act of 1930, and described in the Commission's public notice of investigation (17 F. R. 4628; weekly Treasury Decisions, issue of May 22, 1952).

*Request for appearance at hearing.* All parties interested will be given opportunity to be present, to produce evidence, and to be heard at the said hearing. Requests for appearance at the hearing should be made, in writing, and addressed to the Secretary, United States Tariff Commission, Washington 25, D. C.

I certify that the above hearing was ordered by the Tariff Commission on the 29th day of October 1953.

Issued: October 30, 1953.

[Investigation No. 28]

STRAIGHT (DRESSMAKERS' OR COMMON) PINS

NOTICE OF PUBLIC HEARING

The United States Tariff Commission announces a public hearing to begin at 10 a. m. on January 13, 1954, in the Hearing Room of the Tariff Commission, Eighth and E Streets NW., Washington, D. C., in connection with Investigation No. 28 under section 7 of the Trade Agreements Extension Act of 1951, as amended, instituted on September 24, 1953, with respect to Straight (Dressmakers' or Common) Pins provided for in paragraph 350 of the Tariff Act of 1930. Public notice of the investigation has previously been given (18 F. R. 6253).

Parties interested will be given opportunity to be present, to produce evidence, and to be heard at the above hearing.

*Request to appear at hearing.* Interested parties desiring to appear and give testimony at the above hearing should notify the Secretary of the Commission, in writing, in advance of the hearing.

I certify that the above hearing was ordered by the Tariff Commission on the 29th day of October 1953.

Issued: October 30, 1953.

SECRETARY OF THE INTERIOR

DELEGATION OF AUTHORITY WITH REGARD TO DISPOSAL OF FENCE PROPERTY ON TUCUMCARI PROJECT, SAN MIGUEL COUNTY, NEW MEXICO

1. Pursuant to authority vested in me by the Federal Property and Administrative Services Act of 1949, as amended, I hereby authorize the Secretary of the Interior to dispose, by negotiated sale or otherwise, of two narrow strips of land, totaling 262.42 acres, extending some thirty miles on either side of an irrigation canal on the Tucumcari Project, San Miguel County, New Mexico, together with the fences thereon and related fencing supplies on hand.

2. An explanatory statement shall be prepared and submitted to the appropriate committees of Congress, as required by said act, at least thirty days before consummation of any negotiated disposal of the property. A copy of such statement shall be furnished this Administration.

3. The Secretary of the Interior may redelegate this authority to any officer or employee of the Department of the Interior.

4. This delegation of authority is effective immediately.

## INTERSTATE COMMERCE COMMISSION

[4th Sec. Application 28599]

SAND FROM HANCOCK AND BERKELEY SPRINGS, W. VA., AND GORE, VA., TO LAURENS, S. C.

APPLICATION FOR RELIEF

OCTOBER 30, 1953.

The Commission is in receipt of the above-entitled and numbered application for relief from the long-and-short-haul provision of section 4 (1) of the Interstate Commerce Act.

Filed by: C. W. Boin, Agent, for carriers parties to his tariff I. C. C. No. A-968.

Commodities involved: Sand, other than ground or pulverized, or moulding, bonded, carloads.

From: Hancock and Berkeley Springs, W. Va., and Gore, Va.

To: Laurens, S. C.

Grounds for relief: Circuitous routes.

Schedules filed containing proposed rates: C. W. Boin's tariff I. C. C. No. A-968, supp. 21.

Any interested person desiring the Commission to hold a hearing upon such application shall request the Commission in writing so to do within 15 days from the date of this notice. As provided by the general rules of practice of the Commission, Rule 73, persons other than applicants should fairly disclose their interest, and the position they intend to take at the hearing with respect to the application. Otherwise the Commission, in its discretion, may proceed to investigate and determine the matters involved in such application without further or formal hearing. If because of an emergency a grant of temporary relief is found to be necessary before the expiration of the 15-day period, a hearing, upon a request filed within that period, may be held subsequently.

By the Commission.

[4th Sec. Application 28600]

SAND, GRAVEL, AND CRUSHED STONE FROM MARLBORO, S. C., TO GEORGIA AND FLORIDA

APPLICATION FOR RELIEF

OCTOBER 30, 1953.

The Commission is in receipt of the above-entitled and numbered application for relief from the long-and-short-haul provision of section 4 (1) of the Interstate Commerce Act.

Filed by: Atlantic Coast Line Railroad Company for itself and on behalf of carriers parties to Agent C. A. Spaninger's tariff I. C. C. No. 1315.

Commodities involved: Sand, gravel, crushed stone, and related articles, carloads.

From: Marlboro, S. C.

To: Points in Georgia and Florida

Grounds for relief: Rail competition, circuitous routes, grouping, and to apply rates on basis of a distance formula.

Any interested person desiring the Commission to hold a hearing upon such application shall request the Commission in writing so to do within 15 days from the date of this notice. As provided by the general rules of practice of the Commission, Rule 73, persons other than applicants should fairly disclose their interest, and the position they intend to take at the hearing with respect to the application. Otherwise the Commission, in its discretion, may proceed to investigate and determine the matters involved in such application without further or formal hearing. If because of an emergency a grant of temporary relief is found to be necessary before the expiration of the 15-day period, a hearing, upon a request filed within that period, may be held subsequently.

By the Commission.

[4th Sec. Application 28601]

COPPER FROM NEW ORLEANS, LA., TO REDSTONE ARSENAL, ALA.

APPLICATION FOR RELIEF

OCTOBER 30, 1953.

The Commission is in receipt of the above-entitled and numbered application for relief from the long-and-short-haul provision of section 4 (1) of the Interstate Commerce Act.

Filed by: F. C. Kratzmeir, Agent, for the Chicago, Rock Island and Pacific Railroad Company and other carriers, pursuant to fourth-section order No. 16101.

Commodities involved: Copper, viz: anodes, bars (rough cast), cakes, cathodes, ingots, matte, pigs or slabs, carloads.

From: New Orleans, La.

To: Redstone Arsenal, Ala.

Grounds for relief: Competition with rail carriers, and circuitous routes.

Any interested person desiring the Commission to hold a hearing upon such application shall request the Commission in writing so to do within 15 days from the date of this notice. As provided by the general rules of practice of the Commission, Rule 73, persons other than applicants should fairly disclose their interest, and the position they intend to take at the hearing with respect to the application. Otherwise the Commission, in its discretion, may proceed to investigate and determine the matters involved in such application without further or formal hearing. If because of an emergency a grant of temporary relief is found to be necessary before the expiration of the 15-day period, a hearing, upon a request filed within that period, may be held subsequently.

By the Commission.

[SEAL] GEORGE W. LAIRD,
*Secretary.*

[4th Sec. Application 28602]

CAUSTIC SODA FROM PERKINS, W. VA., TO KANSAS AND MISSOURI

APPLICATION FOR RELIEF

OCTOBER 30, 1953.

The Commission is in receipt of the above-entitled and numbered application for relief from the long-and-short-haul provision of section 4 (1) of the Interstate Commerce Act.

Filed by: H. R. Hinsch, Alternate Agent, for carriers parties to fourth-section application No. 28463.

Commodities involved: Caustic soda in solution, tank-car loads.

From: Perkins, W. Va.

To: Points in Kansas and Missouri.

Grounds for relief: Competition with rail carriers, and circuitous routes.

Any interested person desiring the Commission to hold a hearing upon such application shall request the Commission in writing so to do within 15 days from the date of this notice. As provided by the general rules of practice of the Commission, Rule 73, persons other than applicants should fairly disclose their interest, and the position they intend to take at the hearing with respect to the application. Otherwise the Commission, in its discretion, may proceed to investigate and determine the matters involved in such application without further or formal hearing. If because of an emergency a grant of temporary relief is found to be necessary before the expiration of the 15-day period, a hearing, upon a request filed within that period, may be held subsequently.

By the Commission.

[4th Sec. Application 28603]

PHOSPHATE ROCK FROM FLORIDA MINES TO CAIRO AND LIMA, OHIO

APPLICATION FOR RELIEF

OCTOBER 30, 1953.

The Commission is in receipt of the above-entitled and numbered application for relief from the long-and-short-haul provision of section 4 (1) of the Interstate Commerce Act.

Filed by: R. E. Boyle, Jr., Agent, for carriers parties to schedules listed below.

Commodities involved: Phosphate rock, ground or not ground, slush and floats, and soft phosphate, carloads.

From: Florida mines.

To: Cairo and Lima, Ohio.

Grounds for relief: Competition with rail carriers, circuitous routes, and to apply rates on the basis of the short line distance formula.

Schedules filed containing proposed rates: Atlantic Coast Line Railroad tariff I. C. C. No. B-3232, supp. 90. Seaboard Air Line Railroad tariff I. C. C. No. A-8153, supp. 84.

Any interested person desiring the Commission to hold a hearing upon such application shall request the Commission in writing so to do within 15 days from the date of this notice. As provided by the general rules of practice of the Commission, Rule 73, persons other than applicants should fairly disclose their interest, and the position they intend to take at the hearing with respect to the application. Otherwise the Commission, in its discretion, may proceed to investigate and determine the matters involved in such application without further or formal hearing. If because of an emergency a grant of temporary relief is found to be necessary before the expiration of the 15-day period, a hearing, upon a request filed within that period, may be held subsequently.

By the Commission.

[4th Sec. Application 28604]

FERTILIZER FROM LAVERGNE, TENN., TO OFFICIAL TERRITORY

APPLICATION FOR RELIEF

OCTOBER 30, 1953.

The Commission is in receipt of the above-entitled and numbered application for relief from the long-and-short-haul provision of section 4 (1) of the Interstate Commerce Act.

Filed by: R. E. Boyle, Jr., Agent, for carriers parties to Agent C. A. Spaninger's tariff I. C. C. No. 1366.

Commodities involved: Fertilizer and fertilizer materials, carloads.

From: Lavergne, Tenn.

To: Points in official territory.

Grounds for relief. Rail competition, circuitous routes, grouping, and to apply rates on the basis of the short line distance formula.

Schedules filed containing proposed rates: C. A. Spaninger's tariff I. C. C. No. 1366, supp. 13.

Any interested person desiring the Commission to hold a hearing upon such application shall request the Commission in writing so to do within 15 days from the date of this notice. As provided by the general rules of practice of the Commission, Rule 73, persons other than applicants should fairly disclose their interest, and the position they intend to take at the hearing with respect to the application. Otherwise the Commission, in its discretion, may proceed to investigate and determine the matters involved in such application without further or formal hearing. If because of an emergency a grant of temporary relief is found to be necessary before the expiration of the 15-day period, a hearing, upon a request filed within that period, may be held subsequently.

[4th Sec. Application 28605]

CRUSHED STONE FROM MT. AIRY, N. C., TO EAST ST. LOUIS, ILL.

APPLICATION FOR RELIEF

OCTOBER 30, 1953.

The Commission is in receipt of the above-entitled and numbered application for relief from the long-and-short-

haul provision of section 4 (1) of the Interstate Commerce Act.

Filed by: R. E. Boyle, Jr., Agent, for the Louisville and Nashville Railroad Company and other carriers.

Commodities involved: Stone, crushed (except bituminous rock or bituminous asphalt rock), carloads.

From: Mt. Airy, N. C.

To: East St. Louis, Ill.

Grounds for relief: Circuitous routes.

Schedules filed containing proposed rates: C. A. Spaninger's tariff I. C. C. No. 1315, supp. 34.

Any interested person desiring the Commission to hold a hearing upon such application shall request the Commission in writing so to do within 15 days from the date of this notice. As provided by the general rules of practice of the Commission, Rule 73, persons other than applicants should fairly disclose their interest, and the position they intend to take at the hearing with respect to the application. Otherwise the Commission, in its discretion, may proceed to investigate and determine the matters involved in such application without further or formal hearing. If because of an emergency a grant of temporary relief is found to be necessary before the expiration of the 15-day period, a hearing, upon a request filed within that period, may be held subsequently.

Jidda, Saudi Arabia.
Managua, Nicaragua.

7. Paragraph (c) is amended by the addition of the following post:

Baghdad, Iraq.

(Sec. 102, Part I, E. O. 100000, Sept. 16, 1948, 13 F. R. 5453; 3 CFR, 1948 Supp.)

For the Secretary of State.

DONOLD B. LOURIE, *Under Secretary for Administration.*

OCTOBER 28, 1953.

[F. R. Doc. 53-9349; Filed, Nov. 4, 1953; 8:49 a. m.]

## TITLE 6—AGRICULTURAL CREDIT

### Chapter IV—Production and Marketing Administration and Commodity Credit Corporation, Department of Agriculture

#### Subchapter C—Loans, Purchases, and Other Operations

[1953 C. C. C. Grain Price Support Bulletin 1, Supp 2, Corn]

#### PART 601—GRAINS AND RELATED COMMODITIES

#### SUBPART—1953 CORN LOAN AND PURCHASE AGREEMENT PROGRAM

#### SUPPORT RATES

The 1953 C. C. C. Grain Price Support Bulletin 1, 18 F. R. 5359, issued by the Commodity Credit Corporation and containing the general requirements with respect to price support operations for grains and related commodities produced in 1953, was supplemented by 1953 C. C. C. Grain Price Support Bulletin 1, Supplement 1, Corn, 18 F. R. 5359, containing the specific requirements applicable to price support operations on corn of the 1953 crop. These regulations are further supplemented as follows:

§ 601.61 *Support rates.* Basic support rates for corn placed under loan and for corn delivered under purchase agreements are as set forth in this section. Both farm-storage and warehouse-storage loans will be made at the support rate established for the county in which the corn is stored. County support rates per bushel for corn grading No. 3, except for moisture, or No. 4 on the factor of test weight only but otherwise grading No. 3 or better, except for moisture, are set forth below:

ALABAMA

| *County* | *Rate per bushel* |
|---|---|
| All counties | $1.77 |

ARIZONA

| | |
|---|---|
| All counties | $1.82 |

ARKANSAS

| *County* | *Rate per bushel* | *County* | *Rate per bushel* |
|---|---|---|---|
| Arkansas | $1.75 | Calhoun | $1.75 |
| Ashley | 1.75 | Carroll | 1.67 |
| Baxter | 1.68 | Chicot | 1.75 |
| Benton | 1.67 | Clark | 1.71 |
| Boone | 1.68 | Clay | 1.67 |
| Bradley | 1.75 | Cleburne | 1.71 |

## TITLE 7—AGRICULTURE

### Chapter IV—Federal Crop Insurance Corporation, Department of Agriculture

[Amdt. 1]

PART 415—FLAX CROP INSURANCE

SUBPART—REGULATIONS FOR THE 1953 AND SUCCEEDING CROP YEARS

POLICY

The above identified regulations (17 F. R. 8416; 18 F. R. 3631) are hereby amended, effective beginning with the 1954 crop year, as follows:

1. Section 2 of the policy shown in § 415.10 is amended to read as follows:

2. *Insurable acreage.* For each crop year of the contract any acreage is insurable only if a coverage for such acreage is shown on the county actuarial table for that crop year.

2. Subsections (a) and (c) of section 9 of the policy shown in § 415.10 are amended to read as follows:

(a) Subject to the provisions of this section, the contract shall be in effect for the first crop year specified on the application and shall continue in effect for each succeeding crop year until canceled by either the insured or the Corporation. Cancellation may be made by either party giving written notice to the other party on or before the cancellation date which shall be the December 31 preceding the crop year for which the cancellation is to become effective: *Provided, however,* That if by March 31 following such cancellation date any amount due the Corporation remains unpaid, the contract shall terminate as if canceled by the Corporation prior to such cancellation date. Any notice of cancellation by the insured shall be in writing and shall be filed with the county office. The Corporation shall mail any notice of cancellation to the insured's last known address and mailing shall constitute notice to the insured.

* * * * *

(c) If the Corporation determines that the county minimum participation requirement established by the Federal Crop Insurance Act, as amended, is not met for any crop year, insurance shall not be in effect for that crop year and the contract shall terminate.

3. Section 13 of the policy shown in § 415.10 is amended to read as follows:

13 *Amount of annual premium.* (a) The premium rate per acre will be established by the Corporation for the coverage and rate area in which the insured acreage is located and will be shown on the county actuarial table on file in the county office. The annual premium for each insurance unit under the contract will be based upon (1) the insured acreage of flax, (2) the applicable premium rate(s) and (3) the insured interest(s) in the crop at the time of seeding. The annual premium for the contract shall be the total of the premiums computed for the insured for all insurance units covered by the contract, and with respect to any insured acreage shall be earned and payable when the flax on such acreage is seeded.

(b) The premium rate(s) shown on the county actuarial table are based on prompt payment and any amount of the premium which remains unpaid on the day following the discount date (the discount date shall be November 30 for each year of the contract) will be increased by 10 percent, which increased amount shall be the premium balance. Thereafter, at the end of each 12 months' period, 6 percent simple interest shall attach to any amount of the premium balance remaining unpaid. Interest shall not be charged on premiums earned in the 1954 and succeeding crop years except as specified in this section. When the discount date falls on a Sunday or other day when the county office is not officially open for business, such date shall be extended to the next business day.

(c) The insured's annual premium for any year may be reduced 25 percent if he has had seven consecutively insured flax crops (immediately preceding the current crop year) without a loss for which an indemnity was paid. Whether or not the insured is eligible for the above premium reduction, his annual premium may be reduced in lieu of the above in any year by not to exceed 25 percent if it is determined by the Corporation that the accumulated balance (expressed in bushels) of premiums over indemnities on consecutively insured flax crops exceeds his total coverage (computed on a harvested acreage basis). Nothing in this paragraph shall create in the insured any right to a reduced premium.

(d) Notwithstanding any other provision of the contract, if in any year a premium is earned and totals less than $10.00 the amount shall be increased to $10.00.

4. Subsection (b) of section 14 of the policy shown in § 415.10 is amended to read as follows:

(b) Any unpaid amount of any premium or any other amount owed the Corporation by the insured may be deducted from any indemnity payable by the Corporation, or from any loan or any payment made to the insured under any act of Congress or program administered by the United States Department of Agriculture. There shall be no refund of any annual premium overpayment of less than $1.00 unless written request for such refund is received by the Corporation within one year after the payment thereof.

5. Subsection (a) of section 31 of the policy shown in § 415.10 is deleted.

6. Subsection (d) of section 31 of the policy shown in § 415.10 is amended to read as follows:

(d) "County office" means the Corporation's office for the county, shown on the application for insurance or such other office as may be specified by the Corporation from time to time.

7. Section 31 of the policy shown in § 415.10 is further amended by adding a subsection (j) to read as follows:

(j) "County" means the area shown on the county actuarial table which may include farms located in a local producing area(s) bordering on the county.

(Secs. 506, 516, 52 Stat. 73, as amended, 77, as amended; 7 U. S. C. 1506, 1516. Interpret or apply secs. 507-509, 52 Stat. 73-75, as amended, Pub. Law 261, 83d Cong.; 7 U. S. C. and Sup. 1507-1509, 1516)

Adopted by the Board of Directors on October 26, 1953.

[SEAL] C. S. LAIDLAW,
*Secretary,*
*Federal Crop Insurance Corporation.*

Approved on October 30, 1953.

PART 416—CORN CROP INSURANCE

SUBPART—REGULATIONS FOR THE 1953 AND SUCCEEDING CROP YEARS

MISCELLANEOUS AMENDMENTS

The above identified regulations (17 F. R. 10531; 18 F. R. 3632) are hereby amended, effective beginning with the 1954 crop year, as follows:

1. Section 2 of the policy shown in § 416.10 is amended to read as follows:

2. *Insurable acreage.* For each crop year of the contract any acreage is insurable only if a coverage for such acreage is shown on the county actuarial table for that crop year.

2. Subsection (a) of section 6 of the policy shown in § 416.10 is amended to read as follows:

(a) The coverage(s) per acre established for the area in which the insured acreage is located shall be shown on the county actuarial table on file in the county office. The coverage per acre is progressive depending upon whether the acreage is (1) released and planted to a substitute crop, (2) not harvested and not planted to a substitute crop, or released and fed to livestock in the field, or (3) harvested or to be harvested.

Where the value of production harvested or to be harvested (determined in accordance with section 7) on any acreage does not equal or exceed 10 percent of the harvested or to be harvested coverage such acreage shall not be considered harvested or to be harvested.

3. Subsections (a) and (c) of section 9 of the policy shown in §416.10 are amended to read as follows:

(a) Subject to the provisions of this section, the contract shall be in effect for the first crop year specified on the application and shall continue in effect for each succeeding crop year until canceled by either the insured or the Corporation. Cancellation may be made by either party giving written notice to the other party on or before the cancellation date which shall be the March 31 preceding the crop year for which the cancellation is to become effective: *Provided, however,* That if by April 30 following such cancellation date any amount due the Corporation remains unpaid, the contract shall terminate as if canceled by the Corporation prior to such cancellation date. Any notice of cancellation by the insured shall be in writing and shall be filed with the county office. The Corporation shall mail any notice of cancellation to the insured's last known address and mailing shall constitute notice to the insured.

* * * * *

(c) If the Corporation determines that the county minimum participation requirement established by the Federal Crop Insurance Act, as amended, is not met for any crop year, insurance shall not be in effect for that crop year and the contract shall terminate.

4. Section 13 of the policy shown in § 416.10 is amended to read as follows:

13. *Amount of annual premium.* (a) The premium rate per acre will be established by the Corporation for the coverage and rate area in which the insured acreage is located and will be shown on the county actuarial table on file in the county office. The annual premium for each insurance unit under the contract will be based upon (1) the insured acreage of corn, (2) the applicable premium rate(s) and (3) the insured interest(s) in the crop at the time of planting. The annual premium for the contract shall be the total of the premiums computed for the insured for all insurance units covered by the contract, and with respect to any insured acreage shall be earned and payable when the corn on such acreage is planted.

(b) The premium rate(s) shown on the county actuarial table is based on prompt payment and any amount of the premium which remains unpaid on the day following the discount date (the discount date shall be November 30 for each year of the contract) will be increased by 10 percent, which increased amount shall be the premium balance. Thereafter, at the end of each 12 months' period, 6 percent simple interest shall attach to any amount of the premium balance remaining unpaid. Interest shall not be charged on premiums earned in the 1954 and succeeding crop years except as specified in this section. When the discount date falls on a Sunday or other day when the county office is not officially open for business, such date shall be extended to the next business day.

(c) The insured's annual premium for any year may be reduced 25 percent if he has had seven consecutively insured corn crops (immediately preceding the current crop year) without a loss for which an indemnity was paid. Whether or not the insured is eligible for the above premium reduction, his annual premium may be reduced in lieu of the above in any year by not to exceed 25 percent if it is determined by the Corporation that the cash equivalent (based on the fixed price for that crop year) of his accumulaed balance of premiums over indemnities on consecutively insured corn crops exceeds his total coverage (computed on a harvested acreage basis). Nothing in this paragraph shall create in the insured any right to a reduced premium.

(d) Notwithstanding any other provision of the contract, if in any year a premium is earned and totals less than $10.00 the amount shall be increased to $10.00.

5. Subsection (b) of section 14 of the policy shown in § 416.10 is amended to read as follows:

(b) Any unpaid amount of any premium or any other amount owed the Corporation by the insured may be deducted from any indemnity payable by the Corporation, or from any loan or any payment made to the insured under any act of Congress or program administered by the United States Department of Agriculture. There shall be no refund of any annual premium overpayment of less than $1.00 unless written request for such refund is received by the Corporation within one year after the payment thereof.

6. The schedule following subsection (a) of section 20 of the policy shown in § 416.10 is amended by adding a footnote, which shall apply only to the items in the schedule numbered 1, 2, and 3, and read as follows:

[1] If the value of production harvested or to be harvested (determined in accordance with section 7) does not equal or exceed 10 percent of the harvested or to be harvested coverage, such production shall not be counted.

7. Subsection (a) of section 31 of the policy shown in § 416.10 is deleted.

8. Subsection (d) of section 31 of the policy shown in § 416.10 is amended to read as follows:

(d) "County office" means the Corporation's office for the county, shown on the application for insurance or such other office as may be specified by the Corporation from time to time.

9 Section 31 of the policy shown in §416.10 is further amended by adding a subsection (j) to read as follows:

(j) "County" means the area shown on the county actuarial table which may include farms located in a local producing area(s) bordering on the county.

10. Section 416.11 is deleted.

(Secs. 506, 516, 52 Stat. 73, as amended, 77, as amended; 7 U. S. C. 1506, 1516. Interpret or apply secs. 507-509, 52 Stat. 73-75, as amended, Pub. Law 261, 83d Cong.; 7 U. S. C. and Sup. 1507-1509, 1516)

Adopted by the Board of Directors on October 26, 1953.

[SEAL] C. S. LAIDLAW,
*Secretary,*
*Federal Crop Insurance Corporation.*

Approved on October 30, 1953.

JOHN H. DAVIS,
*Assistant Secretary of Agriculture.*

## PART 418—WHEAT CROP INSURANCE

### SUBPART—REGULATIONS FOR THE 1953 AND SUCCEEDING CROP YEARS

#### POLICY

The above identified regulations, as amended (16 F. R. 9628, 11565; 17 F. R. 189, 10537; 18 F. R. 439, 3632), are hereby amended for all counties in Minnesota and North Dakota, all counties in Montana except Blaine, Cascade, Chouteau, Fergus, Hill, Judith Basin, Liberty, Petroleum, Pondera and Teton, and all counties in South Dakota except Bennett, Jones, Lyman, Meade, Mellette and Tripp, effective beginning with the 1954 crop year, as follows:

1. Section 2 of the policy shown in § 418.210 (formerly designated § 418.160) is amended to read as follows:

2. *Insurable acreage.* For each crop year of the contract any acreage is insurable only if a coverage for such acreage is shown on the county actuarial table for that crop year, provided the farming practice followed on such acreage is one for which a coverage was established.

2. Section 12 of the policy shown in § 418.210 (formerly designated § 418.160) is amended to read as follows:

12. *Amount of annual premium.* (a) The premium rate per acre will be established by the Corporation for the coverage and rate area in which the insured acreage is located and will be shown by practice(s) on the county actuarial table on file in the county office. The annual premium for each insurance unit under the contract will be based upon (1) the insured acreage of wheat, (2) the applicable premium rate(s) and (3) the insured interest(s) in the crop at the time of seeding. There will be a reduction in the annual premium for each insurance unit of 1 percent in cases where the insured acreage on the insurance unit is as much as 25 acres and does not exceed 74.9 acres, and an additional 1 percent reduction for each additional 50 acres or fraction thereof on the insurance unit. However, the total reduction shall not exceed 20 percent. The annual premium for the contract shall be the total of the premiums computed for the insured for all insurance units covered by the contract, and with respect to any insured acreage shall be earned and payable when the wheat on such acreage is seeded.

(b) The premium rate(s) shown on the county actuarial table is based on prompt payment and any amount of the premium which remains unpaid on the day following the discount date (the discount date shall be November 30 for each year of the contract) will be increased by 10 percent, which increased amount shall be the premium balance. Thereafter, at the end of each 12 months' period, 6 percent simple interest shall attach to any amount of the premium balance remaining unpaid. Interest shall not be charged on premiums earned in the 1954 and succeeding crop years except as specified in this section. When the discount date falls on a Sunday or other day when the county office is not officially open for business, such date shall be extended to the next business day.

(c) The insured's annual premium for any year may be reduced 25 percent if he has had seven consecutively insured wheat crops (immediately preceding the current crop year) without a loss for which an indemnity was paid. Whether or not the insured is eligible for the above premium reduction, his annual premium may be reduced in lieu of the above in any year by not to exceed 50 percent if it is determined by the Corporation that the accumulated balance (expressed in bushels) of premiums over indemnities on consecutively insured wheat crops exceeds his total coverage (computed on a harvested acreage basis). Nothing in this paragraph shall create in the insured any right to a reduced premium.

3. Subsection (b) of section 13 of the policy shown in § 418.210 (formerly designated § 418.160) is amended to read as follows:

(b) Any unpaid amount of any premium or any other amount owed the Corporation by the insured may be deducted from any indemnity payable by the Corporation, or from any loan or any payment made to the insured under any act of Congress or program administered by the United States Department of Agriculture. There shall be no refund of any annual premium overpayment of less than $1.00 unless written request for such refund is received by the Corporation within one year after the payment thereof.

4. Subsection (a) of section 30 of the policy shown in § 418.210 (formerly designated § 418.160) is deleted.

5. Subsection (a) of section 30 of the policy shown in § 418.210 (formerly designated § 418.160) is amended to read as follows:

(d) "County office" means the Corporation's office for the county, shown on the application for insurance or such other office as may be specified by the Corporation from time to time.

6. Section 30 of the policy shown in § 418.210 (formerly designated § 418.160) is further amended by adding a subsection (k) to read as follows:

(k) "County" means the area shown on the county actuarial table which may include farms located in a local producing area(s) bordering on the county.

7. Section 32, as amended, of the policy shown in § 418.210 (formerly designated § 418.160) is amended by deleting the maturity dates and changing the discount date to November 30 for all counties affected by this amendment.

(Secs. 506, 516, 52 Stat. 73, as amended, 77, as amended; 7 U. S. C. 1506, 1516. Interpret or apply secs. 507-509, 52 Stat. 73-75, as amended, Pub. Law 261, 83d Cong.; 7 U. S. C. and Sup. 1507-1509, 1516)

Adopted by the Board of Directors on October 26, 1953.

[SEAL] C. S. LAIDLAW,
*Secretary,*
*Federal Crop Insurance Corporation.*

Approved on October 30, 1953.

JOHN H. DAVIS,
*Assistant Secretary of Agriculture.*

## PART 419—COTTON CROP INSURANCE

### SUBPART—REGULATIONS FOR THE 1952 AND SUCCEEDING CROP YEARS

#### MISCELLANEOUS AMENDMENTS

The above identified regulations, as amended (16 F. R. 7975, 11565; 17 F. R. 2110, 5633, 8206, 8471; 18 F. R. 440, 3633, 3994), are hereby amended, effective beginning with the 1954 crop year, as follows:

1. Paragraphs (a) and (b) of § 419.4 are amended to read as follows:

(a) Application for insurance on a Corporation form entitled "Application for Crop Insurance on Cotton" may be made by any person to cover his interest as landlord, owner-operator, tenant-operator, share tenant, or sharecropper, in a cotton crop.

(b) Application for insurance may also be made by any owner-operator or tenant-operator on the form mentioned above to cover the interest(s) which a share tenant(s) or sharecropper(s) has in a cotton crop in which such farm operator has an interest. The interest(s) covered shall be that interest(s) which the share tenant(s) or sharecropper(s) has at the time of planting and any interest(s) allocated to him after planting pursuant to an understanding existing at the time of planting. As to such share tenant(s) or sharecropper(s) interest(s), notwithstanding any other provision of the contract to the contrary, (1) the applicant shall be considered the insured and the interest(s) insured shall be considered as his interest(s), (2) premiums (except for reductions based on good experience) and losses shall be computed and transfers of interest shall be made in the same manner and under the same terms and conditions as if the share tenant(s) or sharecropper(s) had signed (and the Corporation had accepted) an individual application for insurance, (3) the applicant shall designate on his annual acreage report the name of the share tenant(s) or sharecropper(s) and the acreage allocated to him, (4) any indemnity shall be paid to the insured for the benefit of the share tenant or sharecropper (or transferee) allocated the insurance unit on which the loss occurred and payment shall be made by joint check payable to the insured and said share tenant or sharecropper (or transferee), (5) collateral assignments shall not be honored but the insured shall from the proceeds of the joint check be entitled to any amounts owed him for advances to finance the current cotton crop on the insurance unit, and (6) the Corporation shall not deduct from any indemnity any amount except the current premium on the share tenant's or sharecropper's interest and any amount owed the Corporation by the share tenant or sharecropper (or transferee). For each crop year of the contract, the contract shall not cover the interest of any share tenant or sharecropper who is insured with the Corporation under an individual contract.

2. Section 419.6 is deleted.

3. Section 1 of the policy shown in § 419.13 is amended to read as follows:

1. *Insurance acreage.* For each crop year of the contract any acreage is insurable only if a coverage for such acreage is shown on the county actuarial table for that crop year, provided the farming practice followed on such acreage is one for which a coverage was established.

4. Section 8, as amended, of the policy shown in § 419.13 is amended to read as follows:

8. *Life of contract, cancellation or termination thereof.* (a) Subject to the provisions of this section, the contract shall be in effect for the first crop year specified on the application and shall continue in effect for each succeeding crop year until canceled by either the insured or the Corporation. Cancellation may be made by either party giving written notice to the other party on or before the cancellation date which shall be the December 31 preceding the crop year for which the cancellation is to become effective: *Provided, however,* That if by the applicable closing date for filing applications following such cancellation date any amount due the Corporation remains unpaid or the insured has not complied with a request by the Corporation that arrangements satisfactory to the Corporation be made for the payment of the following crop year's premium, the contract shall terminate as if canceled by the Corporation prior to such cancellation date. Any notice of cancellation by the insured shall be in writing and shall be filed with the county office. The Corporation shall mail any notice of cancellation or any request that arrangements be made for the payment of a premium to the insured's last known address and mailing shall constitute notice to the insured.

(b) If the insured cancels the contract, he shall not be eligible for cotton crop insurance in the county in the next succeeding crop year unless he subsequently applies for insurance on or before the cancellation date preceding such year.

(c) If the Corporation determines that the county minimum participation requirement established by the Federal Crop Insurance Act, as amended, is not met for any crop year, insurance shall not be in effect for that crop year and the contract shall terminate.

5. Section 11 of the policy shown in § 419.13 is amended to read as follows:

11. *Amount of annual premium.* (a) The premium rate per acre will be the applicable number of pounds of lint cotton established by the Corporation for the coverage and rate area in which the insured acreage is located and will be shown by practice(s) on the county actuarial table on file in the county office. The annual premium for each insurance unit under the contract will be based upon (1) the insured acreage of cotton, (2) the applicable premium rate(s), (3) the insured interest(s) in the crop at the time of planting and (4) the fixed price. However, the amount of the premium so determined for an insurance unit shall not exceed 50 percent of the result obtained by multiplying (1) the insured acreage by (2) the applicable coverage per acre by (3) the insured interest in the crop and by (4) the fixed price. There will be a reduction in the annual premium for each insurance unit of four percent for each full hundred acres of insured acreage on the unit, provided, however, that the total reduction shall not exceed 20 percent. The annual premium for the contract shall be the total of the premiums computed for the insured for all insurance units covered by the contract, and with respect to any insured acreage shall be earned and payable when the cotton on such acreage is planted.

(b) The premium rate(s) shown on the county actuarial table is based on prompt payment and any amount of the premium which remains unpaid on the day following the applicable discount date shown below will be increased by 10 percent, which increased amount shall be the premium balance. Thereafter, at the end of each 12 months' period, 6 percent simple interest shall attach to any amount of the premium balance remaining unpaid. Interest shall not be charged on premiums earned in the 1954 and succeeding crop years except as specified in this section. For each year of the contract, December 31 shall be the discount date for counties in Arizona, California and New Mexico and for Andrews, Martin, Howard, Mitchell, Scurry, Kent, Dickens, Motley, Hall and Collingsworth Counties, Texas, and for all Texas counties lying north and west thereof, and November 30 shall be the discount date for all other counties.

(c) The insured's annual premium for any year may be reduced 25 percent if he has had seven consecutively insured cotton crops (immediately preceding the current crop year) without a loss for which an indemnity was paid. If the insured is not eligible for the above premium reduction, his annual premium for any year may be reduced not to exceed 25 percent if it is determined by the Corporation that the accumulated balance, expressed in pounds, of premiums over indemnities on consecutively insured cotton crops exceeds his total coverage (computed on a harvested acreage basis). Nothing in this paragraph shall create in the insured any right to a reduced premium.

(d) Notwithstanding any other provision of the contract, if in any year a premium is earned and totals less than $5.00 the amount shall be increased to $5.00.

6. Section 12, as amended, of the policy shown in § 419.13 is amended to read as follows:

12. *Manner of payment of premium.* (a) Payment on any annual premium shall be made by means of cash or by check, money order, or bank draft payable to the order of the Treasurer of the United States. All checks and drafts will be accepted subject to collection, and no payments shall be regarded as paid unless collection is made.

(b) Any unpaid amount of any premium or any other amount owed the Corporation by the insured may be deducted from any indemnity payable by the Corporation, or from any loan or any payment made to the insured under any act of Congress or program administered by the United States Department of Agriculture. There shall be no refund of any annual premium overpayment of less than $1.00 unless written request for such refund is received by the Corporation within one year after the payment thereof.

7. Section 17 of the policy shown in § 419.13 is amended to read as follows:

17. *Insurance unit.* Losses shall be determined separately for each insurance unit except as provided in section 18 (b). An insurance unit consists of all insurable acreage in the county (1) in which the insured has 100 percent interest, plus any acreage owned by him and worked for him by a share tenant(s) or sharecropper(s) or (2) which is owned by the insured and rented to one tenant-operator, or (3) which is owned by one person and operated by the insured as a tenant-operator, or (4) which is owned by one person and worked by the insured as a share tenant or sharecropper. Land rented for cash or for a fixed commodity payment shall be considered as owned by the lessee.

8. Subsections (c), (e), (l) and (m) of section 29 of the policy shown in § 419.13 are amended to read as follows:

(c) "County" (which shall be interpreted as "parish" in Louisiana) means the area shown on the county actuarial table which may include farms located in a local producing area(s) bordering on the county.

* * * * *

(e) "County office" means the Corporation's office for the county, shown on the application for insurance or such other office as may be specified by the Corporation from time to time.

* * * * *

(l) "Share tenant" and "sharecropper" mean (1) a person other than an owner-operator or tenant-operator who works cotton under supervision of a farm operator and is entitled to receive a share of the crop or proceeds therefrom, and (2) a person employed on the farm who receives for his labor 100 percent interest in the cotton crop, or proceeds therefrom, produced on a specified acreage.

(m) "Tenant-operator" and "tenant" mean a person who rents land from another person for a share of the cotton crop or proceeds therefrom, produced on such land and is responsible for farm management with respect to the production of cotton on such acreage whether produced by his own or other persons'(s') labor.

9. Section 29 of the policy shown in § 419.13 is further amended by adding a subsection (n) to read as follows:

(n) "Owner-operator" means a person who owns land and is responsible for farm management with respect to the production of cotton on such acreage whether produced by his own or other person's(s') labor. Land rented for cash or a fixed commodity payment shall be considered owned by the lessee. (Secs. 506, 516, 52 Stat. 73, as amended, 77, as amended; 7 U. S. C. 1506, 1516. Interpret or apply secs. 507, 509, 52 Stat. 73-75, as amended, Pub. Law 261, 83d Cong.; 7 U. S. C. and Sup. 1507-1509, 1516)

Adopted by the Board of Directors on October 26, 1953.

[SEAL] C. S. LAIDLAW,
*Secretary,*
*Federal Crop Insurance Corporation.*

Approved on October 30, 1953.

JOHN H. DAVIS,
*Assistant Secretary of Agriculture.*

## PART 420—MULTIPLE CROP INSURANCE

### SUBPART—REGULATIONS FOR THE 1950 AND SUCCEEDING CROP YEARS

#### MISCELLANEOUS AMENDMENTS

The above identified regulations, as amended (14 F. R. 5303, 6787, 7827; 15 F. R. 2485, 2622, 3077, 4161, 9032, 9271; 16 F. R. 579, 4300, 4829, 12111, 12765; 17 F. R. 2110, 2385, 3265, 3671, 5082, 5933, 8206, 10537, 11257, 11379; 18 F. R. 151, 440, 3634, 4418, 6282), are hereby amended, effective beginning with the 1954 crop year for counties having a cancellation date between January 1 and July 1, as follows:

1. Paragraph (b) of § 420.23, as amended, is deleted.

2. Section 2 of the policy shown in § 420.33 is amended to read as follows:

2. *Insurable acreage.* For each crop year of the contract any acreage is insurable for a crop only if a coverage for such acreage is shown for that crop on the county actuarial table for that crop year, provided the farming practice followed on such acreage is one for which a coverage was established.

3. Subsection (a) of section 6, as amended, of the policy shown in § 420.33 is amended to read as follows:

(a) Subject to the provision of this section, the contract shall be in effect for the first crop year specified on the application and shall continue in effect for each succeeding crop year until canceled by either the insured or the Corporation. Cancellation may be made for any crop year by either party giving written notice to the other party on or before the cancellation date for such crop year (the cancellation date for any crop year shall be the February 28 of the calendar year in which the insured crop(s) is normally harvested for such crop year): *Provided, however,* That if on the March 31 following any cancellation date any amount due the Corporation remains unpaid, the contract shall terminate as if canceled by the Corporation prior to such cancellation date. Any notice of cancellation by the insured shall be in writing and shall be filed with the county office. The Corporation shall mail any notice of cancellation to the insured's last known address and mailing shall constitute notice to the insured.

4. Section 6, as amended, of the policy shown in § 420.33 is further amended by deleting subsection (c).

5. Section 21 of the policy shown in § 420.33 is amended to read as follows:

21. *Voidance of contract.* The Corporation may void the contract and declare the permium(s) forfeited without waiving any right or remedy including the right to collect any unpaid premium(s) if (1) at any time, either before or after loss, the insured has concealed or misrepresented any material fact or committed any fraud relating to the contract, or (2) the insured fails to give any notice or otherwise fails to comply with the terms of the contract at the time and in the manner prescribed.

6 Subsection (c) of section 24, as amended, of the policy shown in § 420.33 is amended to read as follows:

(c) "County office" means the Corporation's office for the county, shown on the application for insurance or such other office as may be specified by the Corporation from time to time.

7. Section 24, as amended, of the policy shown in § 420.33 is further amended by adding a subsection (j) to read as follows:

(j) "County" (which shall be interpreted as "parish" in Louisiana) means the area shown on the county actuarial table which may include farms located in a local producing area(s) bordering on the county.

8. Section 25, as amended, of the policy shown in § 420.33 is amended to read as follows:

25. *Amount of annual premium.* (a) The premium rate for each insured crop will be established by the Corporation for the coverage and rate area in which the insured acreage is located and will be shown by practice(s) on the county actuarial table on file in the county office. The annual premium for each insurance unit under the contract will be based upon (1) the insured acreage of each insurable crop, (2) the applicable premium rate(s) and (3) the insured interest(s) in each crop at the time of planting. The annual premium for the contract shall be the total of the premiums computed for the insured for all insurance units covered by the contract, and with respect to any insured acreage shall be earned and payable when the insured crop on such acreage is planted.

(b) The premium rate(s) shown on the county actuarial table is based on prompt payment and any amount of the premium which remains unpaid on the day following the discount date (the discount date shall be November 30 for each year of the contract) will be increased by 10 percent, which increased amount shall be the premium balance. Thereafter, at the end of each 12 months' period, 6 percent simple interest shall attach to any amount of the premium balance remaining unpaid. Interest shall not be charged on premiums earned in the 1954 and succeeding crop years except as specified in this section.

(c) The insured's annual premium for any year may be reduced 25 percent if he has had 7 consecutive years of insured crops (immediately preceding the current crop year) without a loss for which an indemnity was paid. Nothing in this paragraph shall create in the insured any right to a reduced premium.

(d) Notwithstanding any other provision of the contract, if in any year a premium is earned and totals less than $10.00 the amount shall be increased to $10.00.

9. Section 26 of the policy shown in § 420.33 is amended to read as follows:

26. *Manner of payment of premium.* (a) Payment on any annual premium shall be made by means of cash or by check, money order, or bank draft payable to the order of the Treasurer of the United States. All checks and drafts will be accepted subject to collection, and no payments shall be regarded as paid unless collection is made.

(b) Any unpaid amount of any premium or any other amount owed the Corporation by the insured may be deducted from any indemnity payable by the Corporation or from any loan or any payment made to the insured under any act of Congress or program administered by the United States Department of Agriculture. There shall be no refund of any annual premium overpayment of less than $1.00 unless written request for such refund is received by the Corporation within one year after the payment thereof.

10. The policy shown in § 420.33 is amended by adding thereto a section 27 to read as follows:

27. *Predetermined prices.* The predetermined prices for valuing production for each insurable crop for the first crop year of the contract shall be those established for that year by the Corporation and shall be shown on the county actuarial table on file in the county office at the time the application for insurance is submitted. For each subsequent crop year the predetermined prices shall be on file in the county office at least 15 days prior to the applicable cancellation date.

11. Paragraph (c) of § 420.34 is amended to read as follows:

(c) The discount date and the cancellation date referred to in the policy; and

(Secs. 506, 516, 52 Stat. 73, as amended, 77, as amended; 7 U. S. C. 1506, 1516. Interpret or apply secs. 507–509, 52 Stat. 73–75, as amended, Pub. Law 261, 83d Cong.; 7 U. S. C. and Sup. 1507–1509, 1516)

Adopted by the Board of Directors on October 26, 1953.

[SEAL] C. S. LAIDLAW,
*Secretary,*
*Federal Crop Insurance Corporation.*

Approved on October 30, 1953.

JOHN H. DAVIS,
*Assistant Secretary of Agriculture.*

[Amdt. 7]

## PART 421—DRY EDIBLE BEAN CROP INSURANCE

### SUBPART—REGULATIONS FOR THE 1950 AND SUCCEEDING CROP YEARS

#### POLICY

The above identified regulations, as amended (14 F. R. 7684; 15 F. R. 2485, 9024; 16 F. R. 3973, 7695, 9302; 17 F. R. 5980, 10537; 18 F. R. 3634), are hereby amended, effective beginning with the 1954 crop year, as follows:

1. Section 2 of the policy shown in § 421.32 is amended to read as follows:

2. *Insurable acreage.* For each crop year of the contract any acreage is insurable only if a coverage for such acreage is shown on the county actuarial table for that crop year, provided the farming practice followed on such acreage is one for which a coverage was established.

2. Subsections (a) and (c) of section 9, as amended, of the policy shown in § 421.32 are amended to read as follows:

(a) Subject to the provisions of this section, the contract shall be in effect for the first crop year specified on the application and shall continue in effect for each succeeding crop year until canceled by either the insured or the Corporation. Cancellation may be made by either party giving written notice to the other party on or before the applicable cancellation date (shown below) preceding the crop year for which the cancellation is to become effective: *Provided, however,* That if 30 days after such cancellation date any amount due the Corporation remains unpaid, the contract shall terminate as if canceled by the Corporation prior to such cancellation date.

| State and county: | Cancellation date |
|---|---|
| Arizona | March 31. |
| California | February 28. |
| Colorado | April 15. |
| Idaho | Do. |
| Michigan | April 30. |
| Nebraska | April 15. |
| New Mexico | March 31. |
| New York | April 30. |
| Wyoming: | |
| Goshen | April 15. |
| All other counties | March 31. |

Any notice of cancellation by the insured shall be in writing and shall be filed with the county office. The Corporation shall mail any notice of cancellation to the insured's last known address and mailing shall constitute notice to the insured.

* * * * *

(c) If the Corporation determines that the county minimum participation requirement established by the Federal Crop Insurance Act, as amended, is not met for any crop year, insurance shall not be in effect for that crop year and the contract shall terminate.

3. Subsection (d) of section 28 of the policy shown in § 421.32 is amended to read as follows:

(d) "County office" means the Corporation's office for the county, shown on the application for insurance or such other office as may be specified by the Corporation from time to time.

4. Section 28 of the policy shown in § 421.32 is further amended by adding a subsection (l) to read as follows:

(l) "County" means the area shown on the county actuarial table which may include farms located in a local producing area(s) bordering on the county.

5. Section 29, as amended, of the policy shown in §421.32 is amended to read as follows:

29. *Amount of annual premium.* (a) The premium rate per acre will be the applicable number of dollars established by the Corporation for the coverage and rate area in which the insured acreage is located and will be shown by practice(s) on the county actuarial table on file in the county office. The annual premium for each insurance unit under the contract will be based upon (1) the insured acreage of beans, (2) the applicable premium rate(s) and (3) the insured interest(s) in the crop at the time of planting. The annual premium for the contract shall be the total of the premiums computed for the insured for all insurance units covered by the contract, and with respect to any insured acreage shall be earned and payable when the beans on such acreage is planted.

(b) The premium rate(s) shown on the county actuarial table is based on prompt payment and any amount of the premium which remains unpaid on the day following the discount date (the discount date shall be November 30 for each year of the contract) will be increased by 10 percent, which increased amount shall be the premium balance. Thereafter, at the end of each 12 months' period, 6 percent simple interest shall attach to any amount of the premium balance remaining unpaid. Interest shall not be charged on premiums earned in the 1954 and succeeding crop years except as specified in this section.

(c) The insured's annual premium for any year may be reduced 25 percent if he has had seven consecutively insured bean crops (immediately preceding the current crop year) without a loss for which an indemnity was paid. If the insured is not eligible for the above premium reduction, his annual premium may be reduced in any year not to exceed 25 percent if it is determined by the Corporation that his accumulated balance, expressed in dollars, of premiums over indemnities on consecutively insured bean crops exceeds his total coverage (computed on the basis of the coverage applicable to threshed acreage). Nothing in this paragraph shall create in the insured any right to a reduced premium.

(d) Notwithstanding any other provision of the contract, if in any year a premium is earned and totals less than $5.00 the amount shall be increased to $5.00.

6. Section 30 of the policy shown in § 421.32 is amended to read as follows:

30. *Manner of payment of premium.* (a) Payment on any annual premium shall be made by means of cash or by check, money order, or bank draft payable to the order of the Treasurer of the United States. All checks and drafts will be accepted subject to collection, and no payment shall be regarded as paid unless collection is made.

(b) Any unpaid amount of any premium or any other amount owed the Corporation by the insured may be deducted from any indemnity payable by the Corporation, or from any loan or any payment made to the insured under any act of Congress or program administered by the United States Department of Agriculture. There shall be no refund of any annual premium overpayment of less than $1.00 unless written request for such refund is received by the Corporation within one year after the payment thereof.

7. Section 421.33 is deleted.

(Secs. 506, 516, 52 Stat. 73, as amended, 77, as amended; 70 U. S. C. 1506, 1516. Interpret or apply secs. 507–509, 52 Stat. 73–75, as amended, Pub. Law 261, 83d Cong.; 7 U. S. C. and Sups. 1507–1509, 1516)

Adopted by the Board of Directors on October 26, 1953.

[SEAL] C. S. LAIDLAW,
*Secretary,*
*Federal Crop Insurance Corporation.*

Approved on October 30, 1953.

JOHN H. DAVIS,
*Assistant Secretary of Agriculture.*

# TITLE 9—ANIMALS AND ANIMAL PRODUCTS

## Chapter I—Bureau of Animal Industry, Department of Agriculture

### Subchapter C—Interstate Transportation of Animals and Poultry

[B. A. I. Order 383, Revised, Amdt 11]

## PART 76—HOG CHOLERA, SWINE PLAGUE, AND OTHER COMMUNICABLE SWINE DISEASES

### SUBPART B—VESICULAR EXANTHEMA

#### DESIGNATION OF AREAS IN WHICH SWINE ARE AFFECTED WITH VESICULAR EXANTHEMA

Pursuant to the authority conferred upon the Administrator of the Agricultural Research Administration by § 76.27 of Subpart B, as amended, Part 76, Title 9, Code of Federal Regulations (18 F. R. 3637), § 76.27a of said Subpart B (18 F. R. 3829, as amended) is hereby amended to read as follows:

§ 76.27a *Designation of areas in which swine are affected with vesicular exanthema.* The following areas are hereby designated as areas in which swine are affected with vesicular exanthema:

The State of California;

The Town of Manchester in Hartford County, in Connecticut; Androscoggin, Cumberland, Kennebec, and York Counties, in Maine;

That area consisting of Hampden, Worcester, Middlesex, Essex, Suffolk, Norfolk, Bristol and Plymouth Counties, in Massachusetts;

Bergen, Hudson, Hunterdon, and Morris Counties, that area consisting of Union, Middlesex, Monmouth, Ocean, Burlington, Camden, Gloucester, and Atlantic Counties, that area in Lower Township in Cape May County lying east of U. S. Highway No. 9, and that area in Dennis Township in Cape May County bounded by the Belleplain State Forest on the south and east and State Highway No. 550 on the north and west and State Highway Spur No. 550 on the west, in New Jersey;

Poughkeepsie Township, in Dutchess County, and that area in Clarkstown Township lying north of New York State Route No. 59, in Rockland County, in New York;

Bucks and Delaware Counties, in Pennsylvania;

Charleston County, in South Carolina;

That area in Atascosa County lying west of State Highway No. 346 and north of State Highway No. 173, and that area in Bell County lying north of U. S. Highway No. 190 and west of State Highways No. 36 and No. 317, in Texas.

*Effective date.* The foregoing amendment shall become effective upon issuance.

Section 76.27 of Subpart B, as amended, Part 76, Title 9, Code of Federal Regulations (18 F. R. 3637), quarantines the areas so designated.

The amendment designates the following as an area in which swine are affected with vasicular exanthema in addition to the areas heretofore designated:

Charleston County, in South Carolina.

Hereafter, the restrictions pertaining to the interstate movement of swine and carcasses, parts and offal of swine from or through quarantined areas contained in 9 CFR, Part 76, Subpart B, as amended (18 F. R. 3636, as amended), apply to this area.

The amendment excludes from the areas heretofore designated as areas in which swine are affected with vesicular exanthema:

Somerset County, in Maine.

The Administrator of the Agricultural Research Administration has determined that swine in this area are no longer affected with the disease, and that the quarantine of such area is no longer required to prevent the dissemination thereof. Accordingly, this area is no longer quarantined under said § 76.27, and the restrictions pertaining to the interstate movement of swine and carcasses, parts and offal of swine from or through quarantined areas contained in 9 CFR, Part 76, Subpart B, as amended, (18 F. R. 3636, as amended), no longer apply to such area. However, the restrictions pertaining to such movement from non-quarantined areas contained in said Subpart B, as amended, apply thereto.

The effect of the amendment is to impose certain further restrictions necessary to prevent the spread of vesicular exanthema, a contagious, infectious, and communicable disease of swine, and to relieve certain restrictions presently imposed. The amendment must be made effective immediately to accomplish its purpose in the public interest and to be of maximum benefit to persons subject to the restrictions which are relieved. Accordingly, under section 4 of the Administrative Procedure Act (5 U. S. C. 1003), it is found upon good cause that notice and other public procedure with respect to the amendment are impracticable and contrary to the public interest and good cause is found for making it effective less than 30 days after publication in the FEDERAL REGISTER.

(Sec. 2, 32 Stat. 792, as amended; 21 U. S. C. 111. Interprets or applies secs. 4, 6, 23 Stat. 32, sec. 1, 32 Stat. 791; 21 U. S. C. 120)

Done at Washington, D. C., this 30th day of October 1953.

[SEAL] M. R. CLARKSON,
*Acting Administrator,*
*Agricultural Research Administration.*

## TITLE 14—CIVIL AVIATION

### Chapter II—Civil Aeronautics Administration, Department of Commerce

[Amdt. 6]

PART 406—CERTIFICATION PROCEDURES

SUBPART B—ISSUANCE OF CERTIFICATES

CREW MEMBER CERTIFICATE

Pursuant to the Convention on International Civil Aviation, Annex 9, as amended, concerning facilitation of international air transportation, the United States and other contracting states have agreed to accept certificates containing specified information for temporary admission of flight crew members or crew members into their respective states. The following new § 406.19 is hereby adopted to provide a procedure for the issuance of such certificates:

§ 406.19 *Crew member certificate*—(a) *Purpose.* This certificate will be issued to facilitate the entry and clearance into ICAO contracting states of United States citizens employed by scheduled air carriers as flight crew members or crew members on U. S.-registered aircraft engaged in scheduled international air transportation, as provided in Annex 9, as amended, to the Convention on International Civil Aviation.

(b) *Application.* An application for this certificate shall be made on an "Application for Crew Member Certificate," Form ACA-2116, and submitted to the Civil Aeronautics Administration Air Carrier Agent in charge of the air carrier by whom the applicant is employed.

(c) *Issuance.* This certificate will be issued on a "Crew Member Certificate," Form ACA-2116.1.

(d) *Surrender.* This certificate will be surrendered for cancellation by the air carrier or the certificate holder to the nearest CAA Aviation Safety Agent upon termination of the holder's assignment in scheduled international air transportation with the air carrier.

(Sec. 205, 52 Stat. 984, as amended; 49 U. S. C. 425. Interpret or apply Articles 22, 23, 37, 61 Stat. 1186, 1190)

This amendment shall become effective December 1, 1953.

[SEAL] F. B. LEE,
*Administrator of Civil Aeronautics.*

[F. R. Doc. 53-9330; Filed, Nov. 4, 1953; 8:45 a. m.]

## TITLE 19—CUSTOMS DUTIES

### Chapter I—Bureau of Customs, Department of the Treasury

[T. D. 53367]

PART 5—CUSTOMS RELATIONS WITH CONTIGUOUS FOREIGN TERRITORY

MANIFESTS, EXAMINATION OF BAGGAGE IN FOREIGN TERRITORY, AND MERCHANDISE IN TRANSIT THROUGH THE UNITED STATES BETWEEN PORTS OF CANADA OR MEXICO

The following amendments to the customs regulations are made (1) to simplify the clearance through customs of baggage which has been examined and passed in foreign territory by the United States customs officer who will release it on arrival in the United States and (2) to simplify the documentation required for certain shipments of in-transit merchandise which are exported in the importing vehicle to the contiguous country from which they arrived.

1. Section 5.1 (b) is amended by inserting the following after the second sentence thereof: "When the procedure for the use of sticker labels in lieu of sealing and special manifesting, authorized by § 5.5 (d) is followed, the total number of pieces of baggage examined and passed in foreign territory by the United States customs officer who will release them upon arrival in the United States may be shown on customs Form 7533-A in lieu of filling in the first four columns of such form."

And by changing the period at the end of the present fourth sentence to a comma and adding "except as provided for by § 5.11 (c),"

(Sec. 459, 46 Stat. 717, as amended; 19 U. S. C. 1459)

2. a. Section 5.5 is amended by redesignating paragraphs (d), (e), and (f) as paragraphs (e), (f), and (g), and inserting a new paragraph (d) to read:

(d) In lieu of sealing and special manifesting as provided for by paragraphs (a) and (b) of this section, sticker labels other than official baggage stamps may be affixed to baggage examined and passed in foreign territory if the baggage is to be released in the United States by the same officer who examined and passed it in the foreign country. Such sticker labels shall bear suitable wording showing that the baggage has been passed by the United States customs.

b. Redesignated paragraph (e) is amended by adding the following sentence: "The provisions of this paragraph for cords and seals shall apply to sticker labels affixed in accordance with paragraph (d) of this section."

3. Section 5.11 is amended by adding a new paragraph (c) to read:

(c) When all the merchandise arriving on one vehicle is to move in transit through the United States in the importing vehicle in a continuing movement, the copy of customs Form 7512 to be retained at the port of first arrival may be prepared to permit its use as a combined inward foreign and in-bond manifest. When customs Form 7512 is to be used in this manner, the foreign port of lading shall be shown and a certificate in the following form shall be executed by the person in charge of the vehicle:

I, the undersigned, certify that this transportation entry and manifest contains, to the best of my knowledge and belief, a just and true account of all the goods, wares, and merchandise, including packages of every kind and nature whatsoever, which constituted the lading of the vehicle named herein when it first arrived within the limits of the United States, and that I have been, since the arrival of the said vehicle within the United States, the person in charge of said vehicle and that no packages whatsoever nor any goods, wares, or merchandise, have been in any way removed from said vehicle since its arrival within the United States.

And I further certify that, if I shall hereafter discover or know of any error, discrepancy, or omission in this entry and manifest, I will immediately and without delay make due report thereof to the collector of the district to whom this report is now delivered.

Dated ----------

Signature ----------

The above prescribed form of certificate, which can be put on a rubber stamp approximately 2" x 5" in size, may be legibly stamped on the form or on a separate paper securely fastened thereto.

(Sec. 553, 46 Stat. 742, as amended; 19 U. S. C. 553)

(R. S. 251, 624, 46 Stat. 759; 19 U. S. C. 66, 1624)

[SEAL] C. A. EMERICK
*Acting Commissioner of Customs.*

Approved: October 29, 1953.

H. CHAPMAN ROSE,
*Acting Secretary of the Treasury.*

[F. R. Doc. 53-9367; Filed, Nov. 4, 1953; 8:51 a. m.]

## TITLE 24—HOUSING AND HOUSING CREDIT

### Chapter II—Federal Housing Administration, Housing and Home Finance Agency

Subchapter B—Property Improvement Loans

PART 201—CLASS 1 AND CLASS 2 PROPERTY IMPROVEMENT LOANS

MISCELLANEOUS AMENDMENTS

1. Section 201.3 (c) is hereby amended to read as follows:

(c) *Payments.* The note shall be payable in equal monthly, semimonthly or weekly installments. The first installment or the final installment may be more or less than the other installments provided that it is not less than one-half or more than one and one-half times the amount of the regular installment. A note may not provide for a first payment less than 6 days nor more than two calendar months from the date of the note. However, if 51 percent or more of the income of the borrower is derived directly from the sale of agricultural crops, commodities, or livestock produced by him, a note may be made payable in installments corresponding to income periods shown on the Credit Application. In such cases, the first payment must be made within 12 months of the date of the note and at least one payment shall be made in each 12 months thereafter: *Provided*, That no two payments shall be more than 12 months apart, and the proportion of total principal to be paid in later years shall not exceed the proportion of total principal payable in earlier years. In lieu of an installment note payable in equal periodic installments a loan may be evidenced by a series of notes provided each is of an equal amount as provided in this section and that each note indicates on its face that it is one of a series signed by the same borrower.

2. Section 201.8 is hereby amended, effective December 1, 1953, to read as follows:

§ 201.8 *Disbursement of loan proceeds*—(a) *Disbursement.* Before disbursing the proceeds of a loan, the insured shall:

(1) *Dealer approval.* Have approved the dealer after such investigation as the insured considers necessary to establish to its satisfaction that the dealer is reliable, financially responsible and qualified to perform satisfactorily the work to be financed and to extend proper service to the customer. This approval shall be evidenced by an application signed and dated by the dealer and signed and dated by the insured on forms approved by the Commissioner. The dealer application, the approval by the insured, together with supporting information and a record of the insured's experience with the loans originated by such dealer shall be in the insured's file. New dealer applications and dealer approvals need not be executed in connection with dealers who have been approved and to whom the insured has disbursed loans during the 12 month period prior to December 1, 1953. For the purpose of this section the term "dealer" means the one who executed the dealer's completion certificate.

(2) *Completion certificates.* Obtain a completion certificate signed by the borrower and a completion certificate signed by the dealer on forms approved by the Commissioner. An insured shall not disburse the proceeds of a loan, if, as an inducement for the consummation of the transaction, the borrower has been given or promised a cash payment or rebate, or it has been represented to the borrower that he will receive a cash bonus or commissions on future sales. In the absence of information to the contrary, the insured may rely upon the dealer's statement in his completion certificate as to such bonus selling. If there are two or more eligible borrowers involved in a transaction, only one signature is required on the borrower's certificate.

(3) *Authorization to pay loan proceeds.* Obtain written authorization from the borrower, if the insured is the payee of the note and the proceeds are to be disbursed to one other than the borrowers.

(4) *Description of improvements.* Obtain a copy of the contract or sales agreement, signed by the borrower and the dealer, describing the type and extent of improvements to be made and the material to be used. Such contract or sales agreement shall be of a type regularly used by the dealer in his business. The signature appearing on the copy of the contract or sales agreement may be a carbon imprint of the signatures appearing on the original.

(5) *Advance notice to applicant.* Mail to the borrower or personally deliver to the borrower written notice of approval of the application for credit on a form approved by the Commissioner. Such notice shall be directed to the borrower prior to disbursement of the loan and in no event less than six calendar days prior to such disbursement. A record of such notice showing the date of mailing or delivery to the borrower shall be in the loan file.

(b) *Precautionary measures.* If the insured has not approved the dealer, as provided in paragraph (a) (1) of this section or has reason to withdraw such approval, the proceeds of a loan shall not be disbursed until:

(1) The insured has verified all statements contained on the borrower's credit application.

(2) The borrower has signed the borrower's completion certificate in the presence of the insured.

(3) The insured has inspected the work performed in every instance when the amount involved is $500 or more, and in at least one out of every three transactions when the amounts involved are less than $500.

(4) The insured has signed a statement to the effect that the above requirements were complied with prior to releasing the proceeds of any such loans. Such statement must accompany each loan report.

(c) *Exceptions.* The provisions of paragraphs (a) and (b) of this section shall not apply to loans made directly to the borrower or borrowers where the proceeds are delivered directly to such borrower or borrowers without the intervention or participation of the dealer or other intermediary in any manner in such disbursement.

3. Section 201.11 (b) is hereby amended to read as follows:

(b) *Claim after default.* Claim may be made after default provided demand has been made upon the debtor for the full unpaid balance of the note.

4. Section 201.11 (c) is hereby amended to read as follows:

(c) *Maximum claim period.* For the purpose of determining when a claim must be filed under the provisions of this section, any payments received on an account, including payments on a judgment predicated thereon, shall be applied to the earliest unpaid installment, and in the case of:

(1) Yearly installment notes, whenever an installment is 12 months in default, claim must be made within 31 days thereafter;

(2) All other installment notes, whenever an installment is 6 months in default, claim shall be made within 31 days thereafter;

(3) Military service cases, if at any time during default a person primarily or secondarily liable for the repayment of any loan is a "person in military service," as such term is defined in the Soldiers' and Sailors' Civil Relief Act of 1940, as amended, the period during which he is in military service shall be excluded in computing the time within which claim must be made for reimbursement under the provisions of this part.

5. Section 201.11 (e) (4) is hereby amended, effective as to claims certified for payment on and after December 1, 1953, to read as follows:

(4) Attorney's fees actually paid not exceeding:

(i) Fifteen percent of the amount collected by the attorney on the defaulted note provided the insured does not waive its claim against the borrower for such fees;

(ii) Twenty-five dollars or 15 percent of the balance due on the note, whichever is the lesser, if a judgment is secured by suit; and

(iii) Fifty dollars plus 5 percent of the balance due on the note as an additional fee where the action is contested and judgment is obtained.

(Sec. 2, 48 Stat. 1246, as amended, 12 U. S. C. and Sup., 1703)

Issued at Washington, D. C., October 28, 1953.

GUY T. O. HOLLYDAY,
*Federal Housing Commissioner.*

[F. R. Doc. 53-9335; Filed, Nov. 4, 1953; 8:45 a. m.]

## TITLE 32A—NATIONAL DEFENSE, APPENDIX

### Chapter I—Office of Defense Mobilization

[Defense Manpower Policy 4, Revised]

DMP 4—PLACEMENT OF PROCUREMENT AND FACILITIES IN AREAS OF CURRENT OR IMMINENT LABOR SURPLUS

I. *Introduction.* The aim of the mobilization program is to develop and maintain the necessary military and economic strength to carry out the policy of the United States to discourage and, if need be, oppose acts of aggression and promote peace. Success of the mobilization program requires efficient use of all our resources, including manpower and facilities, which are preserved through practice of the skills of both management and workers.

A primary aim of Federal manpower policy is to encourage full utilization of existing production facilities and workers in preference to creating new plants or

moving workers, thus assisting to maintain economic balance and employment stability. When large numbers of workers move to already tight areas, heavy burdens are placed on community facilities—schools, hospitals, housing, transportation, utilities, etc. On the other hand, when unemployment develops in certain areas, unemployment compensation costs increase and plants, tools and workers' skills remain idle and unable to contribute to our mobilization program.

Full utilization of the skills or facilities available in less concentrated industrial areas also assists in making our productive resources less vulnerable to the possibility of attack.

II. *Purpose.* It is the purpose of this Defense Manpower Policy No. 4 to direct attention to the potentialities of areas of substantial labor surplus, hereafter referred to as labor surplus areas, for the placement of procurement contracts or the location of new plants or facilities, and to assign responsibilities to specified departments and agencies of the Government to carry out the policy stated below.

III. *Policy.* It is the policy of the Federal Government to encourage the placing of contracts and facilities in areas of current or imminent labor surplus, and to assist such areas in making the best use of their available resources in order to achieve the following objectives:

a. To preserve management and employee skills necessary to the fulfillment of government contracts and purchases;

b. To maintain productive facilities;

c. To improve utilization of the nation's total manpower potential by making use of the manpower resources of each area;

d. To help assure timely delivery of required goods and services and to promote readiness for expanded effort by locating procurement where the needed manpower and facilities are fully available; and

e. To reduce the vulnerability of defense related and essential civilian industries to air attack in the event of war.

IV. *Implementation.* By virtue of the authority vested in me by Executive Order 10480 and to supplement the National Manpower Mobilization Policy of January 17, 1951, and Defense Manpower Policy No. 1 of August 2, 1951, and to carry out the purpose and policy objectives set forth above, the following assignments of responsibilities are made to the specified departments and agencies of the Government:

A. The Department of Labor shall:

1. Classify areas having a current or imminent substantial surplus of labor, under standards to be established by the Secretary of Labor.

2. In cooperation with the States and labor surplus areas, provide labor market data and related economic information in efforts to assist in the initiation of industrial expansion programs in these areas.

3. Identify skills which are in surplus supply within such areas and make this information available to firms requiring such skills and interested in establishing new plants and facilities.

4. Identify occupations and skills for which labor will be needed by new or expanding industries, and in collaboration with other governmental agencies make assistance available to area institutions and manpower users in developing on-the-job apprentice or other training programs for developing skills of the workforce.

B. All procurement agencies shall:

1. Use their best efforts to award negotiated procurement contracts to contractors located within labor surplus areas to the extent that procurement objectives will permit; provided, that in no case will price differentials be paid for the purpose of carrying out this policy.

2. Where deemed appropriate, set aside portions of procurements for negotiation, at prices no higher than those paid on the balance of these procurements, exclusively with firms located in classified labor surplus areas; provided that a substantial proportion of the production on these contracts will be performed within labor surplus areas.

3. Assure that firms in labor surplus areas which are on appropriate bidders lists will be given the opportunity to submit bids or proposals on all procurements for which they are qualified and on which small business joint-determinations have not been made. Whenever the number of firms on a bidders list is excessive, there will be included a representative number of firms from labor surplus areas.

4. In the event of tie bids or offers on any procurement, award the contract to the firm located in a labor surplus area, other things being equal.

5. Encourage prime contractors to award subcontracts to firms in labor surplus areas.

6. Cooperate with the other agencies listed herein in achieving the objectives of this policy.

C. The Department of Commerce shall:

1. Through its field offices, assist manufacturers in labor surplus areas in obtaining information on probable government procurement needs and procedures to be followed in submitting proposals.

2. Render technical assistance to labor surplus areas and organizations in such areas desirous of diversifying their economies by developing and expanding industry.

D. The Small Business Administration shall:

1. Make available to small business concerns in labor surplus areas all of its services, endeavor to insure opportunity for maximum participation by such concerns in government procurement, and give consideration to the needs of these concerns in the making of joint-determinations with government procurement agencies.

E. The Regional Defense Mobilization Committees shall:

1. Coordinate the field activities of their member agencies in carrying out the purpose of this policy and make recommendations to their member agencies on additional activities to achieve such purposes.

F. There is hereby created within the Office of Defense Mobilization a Surplus Manpower Committee:

1. This committee shall be chaired by the Assistant Director for Manpower of the Office of Defense Mobilization and shall include representation from the Department of Defense, including the three Military Departments, Department of Commerce, Department of Labor, General Services Administration, and Small Business Administration.

2. The committee shall advise the Director of the Office of Defense Mobilization and its member agencies on policies, procedures and activities in existence or needed to carry out the purposes of this policy.

3. When an entire industry, which sells a significant proportion of its production to the Government, is generally depressed or has a significant proportion of its production units located in areas of substantial labor surplus, the Committee may make appropriate recommendations relative to that industry in lieu of recommendations relative to specific geographical areas. In such cases, after notice to and hearing of interested parties, the Director of the Office of Defense Mobilization will give consideration to appropriate measures applicable to the entire industry.

G. All agencies assigned responsibilities under this policy shall submit quarterly reports on their activities in connection therewith to the Office of Defense Mobilization, and shall submit such additional information as may be necessary.

H. All existing Notifications of labor surplus areas under Defense Manpower Policy No. 4 are hereby superseded by the list of areas classified by the Department of Labor pursuant to this revised policy. Pending their review by the Surplus Manpower Committee, Notifications No. 38, 39, 53, 57, and 58, dealing with the placement of procurement with the textile, shoe, apparel, shipbuilding and petroleum and petroleum products industries, are continued in effect to the extent that they are not inconsistent with this revised policy.

I. This revised policy shall take effect on November 5, 1953.

OFFICE OF DEFENSE MOBILIZATION,
ARTHUR S. FLEMMING,
*Director.*

[F. R. Doc. 53-9423; Filed, Nov. 4 1953, 10:50 a. m.]

## TITLE 50—WILDLIFE

### Chapter I—Fish and Wildlife Service, Department of the Interior

#### Subchapter B—Hunting and Possession of Wildlife

#### PART 6—MIGRATORY BIRDS AND CERTAIN GAME MAMMALS

#### COMPENSATORY EXTENSIONS OF CERTAIN MIGRATORY GAME BIRD SEASONS

*Basis and purpose.* A request has been received from the State of New York for an extension of the woodcock seasons by the number of days sportsmen were not permitted to hunt such birds due to emergency State action closing extensive areas to shooting as a forest fire prevention measure. It has been determined that the slight compensatory extensions sought are not likely to result in a diminution of the birds to any greater extent than was contemplated for the original period.

Accordingly, pursuant to authority conferred upon me by § 6.4 of the Migratory Bird Treaty Act Regulations (16 F. R. 7513), the seasons fixed by the amendments to such regulations approved August 21, 1953 (18 F. R. 5175) are subject to shooting hours and other applicable provisions of the current Federal regulations, extended as follows:

Woodcock from November 5 to November 8 in that part of New York north of the line described in footnote 7, Schedule (5) *Atlantic Flyway States*, of § 6.4, Title 50, Code of Federal Regulations, as amended August 21, 1953 (18 F. R. 5175), and elsewhere in the State (except Long Island where no hunting days were lost) from November 19 to November 22, all dates inclusive, an extension of 4 days in each of these areas.

Since these amendments are relaxations of existing regulations, notice and public procedure thereon are not required and they shall become effective immediately.

(Sec. 3, 40 Stat. 755, as amended; 16 U. S. C. 704. Interprets or applies E. O. 10250, June 5, 1951, 16 F. R. 5385; 3 CFR, 1951 Supp.)

ALBERT M. DAY,
*Acting Director,*
*Fish and Wildlife Service.*

NOVEMBER 2, 1953.

# PROPOSED RULE MAKING

## DEPARTMENT OF AGRICULTURE

### Production and Marketing Administration

### [ 7 CFR Part 913 ]

#### HANDLING OF MILK IN GREATER KANSAS CITY MARKETING AREA

#### DECISION WITH RESPECT TO PROPOSED MARKETING AGREEMENT AND PROPOSED ORDER, AMENDING ORDER, AS AMENDED

Pursuant to the provisions of the Agricultural Marketing Agreement Act of 1937, as amended (7 U. S. C. 601 et seq.), and the applicable rules of practice and procedure, as amended, governing proceedings to formulate marketing agreements and marketing orders (7 CFR Part 900), a public hearing was conducted at Kansas City, Missouri, on August 14–15, 1953, pursuant to notice thereof which was issued on August 6, 1953 (18 F. R. 4708). Upon the basis of the evidence introduced at the hearing and the record thereof, the Assistant Administrator, Production and Marketing Administration, on August 27, 1953, filed with the Hearing Clerk, United States Department of Agriculture, his recommended decision and opportunity to file written exceptions thereto was published in the FEDERAL REGISTER on September 2, 1953 (18 F. R. 5302).

The material issues of record related to:

1. The price for Class I milk through March 1954; and

2. The definition of a pool plant.

*Findings and conclusions.* The findings and conclusions of the recommended decision of the Assistant Administrator issued August 27, 1953 (18 F. R. 5302, F. R. Doc. 53-7684) are adopted as the findings and conclusions of this decision with the addition of the following to be inserted before the last paragraph of those findings and conclusions with respect to Issue No. 1:

Particular exception was taken by producers to this finding in the recommended decision of the Assistant Administrator that supplemental milk supplies were available from outside the normal milkshed of the Kansas City marketing area. The point was made, in the exceptions, that the order prices should be such as to result in an adequate supply of milk from locally inspected sources at all times.

Milk production is variable to a considerable extent due to reasons other than the price for milk, and in fact, it is impossible to achieve an exact balance at all times between a market's needs and capacity as against the local production. There will be occasions when the market is somewhat short, and others when it is more than sufficiently supplied. Under these circumstances, although it is the objective of a milk marketing order to provide a price mechanism which will balance supply and demand, it would be uneconomical and unsettling of market conditions if prices were to change over short periods in an attempt to maintain an exactly adequate supply at all times. Sometimes prices would be extremely high; at other times they would be extremely low. For, strictly following the argument given by exceptors, it would be as necessary to reduce prices to eliminate temporary excesses as it would be to increase them under the conditions of temporary shortage.

The finding with reference to the availability of supplemental supplies was made in this context. If a temporary shortage situation should develop, milk from supplemental sources would be available while prices resulting from the supply-demand adjustment were increasing in order to induce additional supplies from regular sources.

*General findings.* (a) The proposed marketing agreement and the order as hereby proposed to be amended, and all of the terms and conditions thereof, will tend to effectuate the declared policy of the act;

(b) The parity prices of milk as determined pursuant to section 2 of the act are not reasonable in view of the price of feeds, available supplies of feeds, and other economic conditions which affect market supply of and demand for milk in the marketing area, and the minimum prices specified in the proposed marketing agreement and in the order, as hereby proposed to be amended, are such prices as will reflect the aforesaid factors, insure a sufficient quantity of pure and wholesome milk, and be in the public interest; and

(c) The proposed marketing agreement and the order, as hereby proposed to be amended, will regulate the handling of milk in the same manner as, and will be applicable only to persons in the respective classes of industrial and commercial activity, specified in a marketing agreement upon which a hearing has been held.

*Ruling on exceptions.* Within the period reserved therefor, exceptions were filed to certain of the findings, conclusions and actions recommended by the Assistant Administrator. In arriving at the findings, conclusions, and regulatory provisions of this decision, such exceptions were carefully and fully considered in conjunction with the record evidence pertaining thereto. To the extent that findings, conclusions and actions decided upon herein are at variance with any of the exceptions, such exceptions are overruled.

*Determination of representative period.* The month of August 1953 is hereby determined to be the representative period for the purpose of ascertaining whether the issuance of an order amending the order, as amended, regulating the handling of milk in the Greater Kansas City marketing area in the manner set forth in the attached amending order is approved or favored by producers who during such period were engaged in the production of milk for sale in the marketing area specified in such order.

*Marketing agreement and order.* Annexed hereto and made a part hereof are two documents entitled "Marketing Agreement Regulating the Handling of Milk in the Greater Kansas City Marketing Area," and "Order Amending the Order, as Amended, Regulating the Handling of Milk in the Greater Kansas City Marketing Area," which have been decided upon as the detailed and appropriate means of effectuating the foregoing conclusions. These documents shall not become effective unless and until the requirements of § 900.14 of the rules of practice and procedure, as amended, governing proceedings to formulate marketing agreements and orders have been met.

*It is hereby ordered,* That all of this decision, except the attached marketing agreement, be published in the FEDERAL REGISTER. The regulatory provisions of said marketing agreement are identical with those contained in the order as hereby proposed to be amended by the

attached order which will be published with this decision.

This decision filed at Washington, D. C., this 30th day of October 1953.

[SEAL] JOHN H. DAVIS,
*Assistant Secretary of Agriculture.*

*Order Amending the Order, as Amended Regulating the Handling of Milk in the Greater Kansas City Marketing Area*

§ 913.0 *Findings and determinations.* The findings and determinations hereinafter set forth are supplementary and in addition to the findings and determinations previously made in connection with the issuance of the aforesaid order and of each of the previously issued amendments thereto; and all of said previous findings and determinations are hereby ratified and affirmed, except insofar as such findings and determinations may be in conflict with the findings and determinations set forth herein.

(a) *Findings upon the basis of the hearing record.* Pursuant to the provisions of the Agricultural Marketing Agreement Act of 1937, as amended (7 U. S. C. 601 et seq.), and the applicable rules of practice and procedure, as amended, governing the formulation of marketing agreements and marketing orders (7 CFR Part 900), a public hearing was held upon certain proposed amendments to the tentative marketing agreement and to the order, as amended, regulating the handling of milk in the Greater Kansas City marketing area. Upon the basis of the evidence introduced at such hearing and the record thereof, it is found that:

(1) The said order, as amended, and as hereby further amended, and all of the terms and conditions thereof, will tend to effectuate the declared policy of the act;

(2) The parity prices of milk as determined pursuant to section 2 of the act are not reasonable in view of the price of feeds, and other economic conditions which affect market supply of and demand for milk in the marketing area, and the minimum prices specified in the order, as amended, and as hereby further amended, are such prices as will reflect the aforesaid factors, insure a sufficient quantity of pure and wholesome milk, and be in the public interest; and

(3) The said order, as amended, and as hereby further amended, regulates the handling of milk in the same manner as, and is applicable only to persons in the respective classes of industrial and commercial activity, specified in a marketing agreement upon which a hearing has been held.

*Order relative to handling.* It is therefore ordered that on and after the effective date hereof the handling of milk in the Greater Kansas City marketing area shall be in conformity to and compliance with the terms and conditions of the aforesaid order, as amended, and as hereby further amended, and the aforesaid order, as amended, is hereby further amended as follows:

1. Delete § 913.10 and substitute therefor the following:

§ 913.10 *Pool plant.* "Pool plant" means an approved plant other than the plant of a producer-handler:

(a) During any delivery period within which an amount of milk equal to 15 percent or more of such plant's receipts of milk from dairy farmers who meet the specifications (other than delivery to a pool plant) of § 913.7 is disposed of from such plant as Class I milk on routes operated in the marketing area;

(b) During any delivery period of September, October, November, December, January, or February within which an amount of milk equal to 30 percent or more of such plant's receipts of milk from dairy farmers who meet the specifications (other than delivery to a pool plant) of § 913.7 is transferred in bulk to a plant described in paragraph (a) of this section. Any such plant which is a pool plant in each of the delivery periods of September, October, November, December, January, and February shall be a pool plant for each of the following months of March, April, May, June, July, and August, regardless of the quantity of milk then disposed of to other pool plants, if a written request for pool plant status for such six months' period is received from the operator of such plant by the market administrator before March 1; or

(c) During any delivery period within which such plant is operated by a cooperative association, and 75 percent or more of the milk delivered during the delivery period by producers who are members of such association is received at the pool plants of other handlers.

If a handler operates more than one approved plant, the percentage requirements of this definition shall apply to the combined receipts and disposition of such multiple plant operation except that no plant which was not an approved plant during each of the preceding delivery periods of September through February shall be a pool plant as a part of such multiple plant operation during any of the delivery periods of March through August unless such multiple plant operation qualified under paragraph (a) of this section for pool plant status for such delivery period.

[F. R. Doc. 53-9346; Filed, Nov. 4, 1953; 8:48 a. m.]

## CIVIL AERONAUTICS BOARD

## [ 14 CFR Parts 40, 41, 42, 45, 61 ]

[Draft Release No. 53-23]

DELEGATION OF AUTHORITY TO ADMINISTRATOR TO PERMIT AIR CARRIERS UNDER CONTRACT TO THE MILITARY SERVICES TO DEVIATE FROM THE CIVIL AIR REGULATIONS

NOTICE OF PROPOSED RULE MAKING

Pursuant to the authority delegated by the Civil Aeronautics Board to the Bureau of Safety Regulation, notice is hereby given that the Bureau will propose to the Board a revision and extension of the authority granted by Special Civil Air Regulation SR-385B as hereinafter set forth.

Interested persons may participate in the making of the proposed rule by submitting such written data, views, or arguments as they may desire. Communications should be submitted in duplicate to the Civil Aeronautics Board, attention Bureau of Safety Regulation, Washington 25, D. C. In order to insure their consideration by the Board before taking further action on the proposed rule, communications must be received by December 7, 1953. Copies of such communications will be available after December 9, 1953, for examination by interested persons at the Docket Section of the Board, Room 5412, Department of Commerce Building, Washington, D. C.

On July 31, 1953, Special Civil Air Regulation SR-385A was adopted extending until November 1, 1953, the authority of the Administrator to permit air carriers under contract to the military services to deviate from Parts 40, 41, 42, 45, and 61 of the Civil Air Regulations. This extension was for only a short period because of the need to fully explore the basis for certain representations made to the Board as to the impropriety of such a delegation of authority, particularly without limitation and without means for review by the Board. This authority has been further extended by SR-385B until February 1, 1954.

To assist in determining whether the need for continuing such authority still exists, a meeting was held in Washington, D. C., which interested industry and government representatives attended, to discuss the entire problem. As a result of the comment received during this meeting, the Bureau believes that the same conditions that gave rise to the delegation of authority to the Administrator continue to exist, and that because of the special problems inherent in military contract operations it is necessary to continue the delegation of authority to the Administrator to permit deviations from the Civil Air Regulations in such operations. However, it appears desirable to incorporate means for Board review in those instances where the deviation is to continue for more than a 90-day period. In view of this, it is proposed herein that the Administrator be authorized to permit deviations from the Civil Air Regulations as in the past but that if the deviation authority is to remain effective for more than 90 days, it shall be subject to review by the Board. Thus, any deviation authority which is currently outstanding should be subject to review by the Board 90 days after the effective date of this regulation. It is intended that deviation authority shall continue to remain in effect until terminated by the Board after the expiration of the above 90-day period unless otherwise terminated by the Administrator.

In addition to the previous delegation of authority, it has been recommended and is considered desirable that the Administrator be given authority to grant deviations from the Civil Air Regulations in the event of any emergency or disaster requiring the transportation of persons or supplies. In such instances, immediate action may be required which necessitates a deviation from the Civil Air Regulations, and it is considered that permission to deviate in such cases can best be handled by the Administrator.

This revised delegation of authority is being proposed as a Special Civil Air Regulation to be effective for a period of one year. At the end of this time these problems and the effectiveness of the procedures provided in the proposed rule will be re-examined for the purpose of considering the incorporation of the substance of the rule in the operating parts.

Notice is hereby given that it is proposed to promulgate a Special Civil Air Regulation to provide as follows:

1. Contrary provisions of the Civil Air Regulations notwithstanding, the Administrator may, upon application by an air carrier, authorize an air carrier under contract to the military services, or an air carrier furnishing civil aircraft or flight crews to another air carrier for use in operations conducted pursuant to a contract with the military services, or an air carrier proposing to conduct operations under conditions of an emergency necessitating the transportation of persons or supplies for the protection of life or property, to deviate from the applicable provisions of Parts 40 (including revised Part 40), 41, 42, 45, and 61 to the extent that he finds upon investigation a deviation from those regulations is necessary for the expeditious conduct of such operations.

2. Any deviation authority granted by the Administrator pursuant to this regulation shall be limited to those operations conducted pursuant to military contracts or an emergency as determined by the Administrator and shall not be applicable to any other type of operation.

3. The Administrator shall, in any authorization granted pursuant to this regulation, specify the terms, conditions, and limitations of the authorization of deviation and each carrier shall, in the conduct of operations pursuant to military contracts or a declared emergency comply with such terms, conditions, and limitations.

4. No deviation authority initially granted by the Administrator pursuant to this regulation shall be effective for more than 90 days. When deviation authority in excess of 90 days is desired, appropriate notice will be transmitted to the Civil Aeronautics Board by the Civil Aeronautics Administration. Continuation of deviation authority in excess of 90 days shall be subject to review by the Civil Aeronautics Board. Unless the Board determines that such deviation authority should not be granted for a period in excess of 90 days, the Administrator may continue such deviation authority in effect. Authorizations for deviation in existence on the effective date of this regulation shall not continue for more than 90 days after such effective date unless notice is given in accordance with the provisions of this paragraph.

It is proposed that this Special Civil Air Regulation remain in effect for a period of one year unless sooner rescinded or superseded by the Board.

This Special Civil Air Regulation is proposed under the authority of Title VI of the Civil Aeronautics Act of 1938, as amended. The proposal may be changed in the light of comments received in response to this notice of proposed rule making.

(Sec. 205, 52 Stat. 984; 49 U. S. C. 425. Interpret or apply secs. 601-610, 52 Stat. 1007-1012; 49 U. S. C. 551-560)

Dated: October 29, 1953, at Washington, D. C.

By the Bureau of Safety Regulation.

[SEAL] JOHN M. CHAMBERLAIN,
*Director.*

[F. R. Doc. 53-9266; Filed, Nov. 4, 1953; 8:51 a. m.]

## [14 CFR Part 221]

[Economic Reg. Draft Release 62-A]

TARIFFS OF AIR CARRIERS

LIABILITY RULES FOR PERSONAL INJURY AND DEATH; CLARIFICATION TO INDICATE FILING OF SUCH RULES NOT REQUIRED

OCTOBER 29, 1953.

By notice dated July 22, 1953 (Economic Regulations Draft Release No. 62), published on July 25, 1953, at 18 F. R. 4386, the Board gave notice that it has under consideration the proposed amendment of § 221.4 (g) of Part 221 of the Economic Regulations (14 CFR 221) clarifying that the regulations do not require the filing of tariff liability rules for personal injury and death. Reference is made to that notice for the terms of the proposed rule and further explanation thereof. Copies of Draft Release No. 62 may be obtained from the Secretary, Civil Aeronautics Board, Washington 25, D. C.

The Board having received requests which it believes warrant such action, notice is hereby given that the time for the receipt of comments on the proposed rule has been extended to November 24, 1953 and that consideration of the proposed rule has been set down for oral argument at 10:00 a. m., e. s. t., November 24, 1953, in Room 5042, Department of Commerce Building, Washington, D. C. Oral argument will be limited to one full day for all interested persons, who are urged to combine their presentations and speak through a single representative wherever possible. Those desiring to be heard are requested to inform F. W. Brown, Chief Hearing Examiner, Civil Aeronautics Board, prior to November 18, 1953, indicating any arrangements they have made with other persons for combined presentations through a single representative and stating the amount of time desired.

In addition to argument concerning the general substance of the proposed rule, the Board invites specific comment with respect to the effect of the proposed rule upon foreign air transportation.

Oral presentation may be in addition to or in lieu of written submission pursuant to the previous notice (Draft Release No. 62), which is hereby amended to provide that all relevant material and communications received on or before November 24, 1953, will be considered by the Board before taking final action on the proposed rule.

By the Civil Aeronautics Board

[SEAL] M. C. MULLIGAN,
*Secretary.*

# NOTICES

## DEPARTMENT OF THE INTERIOR

### Bureau of Land Management

OREGON

SMALL TRACT CLASSIFICATION ORDER NO. 2

OCTOBER 27, 1953.

1. Pursuant to the authority delegated to me in section 2.21 of Order No. 427 by the Director, Bureau of Land Management, approved August 16, 1950, 15 F. R. 5641, I hereby classify the following described lands under the Small Tract Act of June 1, 1938 (52 Stat. 609; 43 U. S. C. 682 (a)) as amended, for lease and sale for homesite purposes:

OREGON—WILLAMETTE MERIDIAN

T. 22 S., R. 10 E.,
Sec. 14,
Lots 60 to 62, inclusive,
Lots 64 to 91, inclusive, in the SE¼ NW¼,
Lots 92 to 123, inclusive, in the NE¼ SW¼.

The lots described are located approximately 29 miles south of Bend and immediately east of the town of Lapine in Deschutes County, Oregon.

2. This order shall not otherwise become effective to change the status of the lands described until 10:00 a. m. on the 35th day after the date of this order. At that time the lands shall subject to valid existing rights become subject to application as follows:

(a) *Ninety-one day period for preference-right filings.* For a period of 91 days, commencing at the hour and on the day specified above, the lands affected by this order shall be subject to application by qualified veterans of World War II. All applications filed under this paragraph either at or before 10:00 a. m., on the 35th day after the date of this order shall be treated as though filed simultaneously at that time. All applications filed under this paragraph after 10:00 a. m., on the 35th day, shall be considered in the order of filing.

[1] This order shall not become effective unless and until the requirements of § 900.14 of the rules of practice and procedure, as amended, governing proceedings to formulate marketing agreements and orders have been met.

(b) Commencing at 10:00 a. m., on the 126th day after the date of this order, any lands remaining shall become subject to application under the Small Tract Act by the public generally. All such applications filed either at or before 10:00 a. m., on the 126th day, shall be treated as though filed simultaneously at the hour specified on such 126th day. All applications filed thereafter shall be considered in the order of filing.

A veteran shall accompany his application with a complete photostat, or other copy (both sides) of his certificate of honorable discharge, or of an official document of his branch of service which shows clearly his honorable discharge as defined in § 181.36 of Title 43 of the Code of Federal Regulations or constitutes evidence of other facts upon which the claim for preference is based and which shows clearly the period of service. Other persons claiming credit for service of veterans must furnish like proof in support of their claims. Persons asserting preference rights through settlement or otherwise, and those having equitable claims, shall accompany their applications by duly corroborated statements in support thereof, setting forth in detail all facts relevant to their claims.

3. Leases will be issued for a period of five years, at an annual rental of $10.00, payable for the entire lease period, in advance of the issuance of the lease. Leases will contain an option to purchase clause at the appraised price, application for which may be filed at or after the expiration of one year from the date the lease is issued and within the five year period.

4. The tracts leased will be subject to right-of-way not exceeding 16½ feet in width along or near near the boundary for road purposes and public utilities. Such road rights-of-way may be utilized by the Federal Government, or the State, County or municipality in which the tract is situated or by any agency thereof. The rights-of-way in the discretion of the authorized officer of the Bureau of Land Management may be definitely located prior to the issuance of the patent. If not so located, they may be located subject to location after patent is issued.

5. All inquiries relating to these lands should be addressed to the Manager, Oregon Land Office, Bureau of Land Management, Swan Island, Portland 18, Oregon.

W. G. GUERNSEY,
*Regional Administrator.*

[F. R. Doc. 53-9334; Filed, Nov. 4, 1953; 8:45 a. m.]

### Office of the Secretary

[Order 2726, Amdt. 1]

INDUSTRIAL SPECIALIST IN CHARGE OF INDUSTRY AND FINANCE

DELEGATION OF AUTHORITY TO ACT AS ACTING ADMINISTRATOR, DEFENSE SOLID FUELS ADMINISTRATION

OCTOBER 30, 1953.

Section 7 of Order No. 2726 is amended to read as follows:

SEC. 7. *Acting Administrator, Defense Solid Fuels Administration.* The Industrial Specialist in Charge of Industry and Finance shall perform the duties of the Administrator in case of the death, resignation, absence or sickness of the Administrator. When acting under the authority of this section he shall sign documents under the title "Acting Administrator".

DOUGLAS MCKAY,
*Secretary of the Interior.*

[F. R. Doc. 53-9333; Filed, Nov. 4, 1953; 8:45 a. m.]

## DEPARTMENT OF COMMERCE

### Civil Aeronautics Administration

[Amdt. 23]

ORGANIZATION AND FUNCTIONS

ESTABLISHMENT OF AIRPORT DISTRICT OFFICE AT MIAMI, FLA.

In accordance with the public information requirements of the Administrative Procedure Act, the description of Organization and Functions of the Civil Aeronautics Administration is hereby amended.

This amendment establishes an Airport District Office at Miami, Florida. Prior to this amendment the office was a branch of the Airport District Office at Atlanta, Georgia.

Section 43 (g) (3) (ii), published on July 23, 1953, in 18 F. R. 4345, is revised to read:

SEC. 43. *Regions 1–6.* • • •
(g) *Airports division.* • • •
(3) *Airport district offices.* • • •
(ii) *Locations and areas served.* • • •

*Region 2:* • • •
Miami, Fla., Building 514, Miami International Airport—Florida, Puerto Rico, and Virgin Islands.

• • • • •

This amendment shall become effective upon publication in the FEDERAL REGISTER.

[SEAL] F. B. LEE,
*Administrator of Civil Aeronautics.*

## DEPARTMENT OF AGRICULTURE

### Production and Marketing Administration

PEANUTS

NOTICE OF REDELEGATION OF FINAL AUTHORITY BY THE FLORIDA STATE PRODUCTION AND MARKETING ADMINISTRATION COMMITTEE

Section 729.530 of the Marketing Quota Regulations for the 1954 Crop of Peanuts (18 F. R. 6372), issued pursuant to the marketing quota provisions of the Agricultural Adjustment Act of 1938, as amended (7 U. S. C. 1301–1376), provides that any authority delegated to the State Production and Marketing Administration Committee by the regulations may be redelegated by the State committee. In accordance with section 3 (a) (1) of the Administrative Procedure Act (5 U. S. C. 1002 (a)), which requires delegations of final authority to be published in the FEDERAL REGISTER, there are set out herein the redelegations of final authority which have been made by the Florida State Production and Marketing Administration Committee of authority vested in such committee by the Secretary of Agriculture in the regulations referred to above. Shown below are the sections of the regulations in which such authority appears and the person to whom the authority has been redelegated:

FLORIDA

Sections 729.511 (1) 2, 729.517 (b) 5, 729.518, 729.520, 729.522 (a), 729.524 (b), 729.527 (a), and 729.528—State Administrative Officer or Acting State Administrative Officer.

(Sec. 375, 52 Stat. 66, as amended; 7 U. S. C. 1375. Interpret or apply secs. 301, 358–359, 361–368, 373, 374; 52 Stat. 38, 62, 65 as amended, 55 Stat. 88, as amended; 66 Stat. 27; 7 U. S. C. 1301, 1358, 1359, 1361–1368, 1373, 1374)

Issued at Washington, D. C., this 30th day of October 1953.

## HOUSING AND HOME FINANCE AGENCY

### Public Housing Administration

CENTRAL OFFICE

DESCRIPTION OF AGENCY AND PROGRAMS AND FINAL DELEGATIONS OF AUTHORITY

Section II *Central Office organization and final delegations of authority to Central Office officials* is amended as follows:

1. Paragraph 1 a is amended to read as follows:

a. • • • The Commissioner has designated the First Assistant Commissioner to assist him in the general administration and coordination of all phases of Public Housing Administration activities, to formulate and develop basic policies and procedures, to resolve basic problems in connection therewith. The following • • •

2. Paragraph 1 g, delegating authority to certain officials to serve as Acting Commissioner, is hereby revoked.

Date approved: October 30, 1953.

[SEAL] CHARLES E. SLUSSER,
*Commissioner.*

[F. R. Doc. 53-9336; Filed, Nov. 4, 1953; 8:46 a. m.]

CENTRAL OFFICE

DESCRIPTION OF AGENCY AND PROGRAMS AND FINAL DELEGATIONS OF AUTHORITY

Section II *Central Office organization and final delegations of authority to Central Office officials* is amended as follows:

Paragraph f is amended as follows:

f. *Attesting officers.* Effective October 28, 1953, the Director or the Acting Director of the Office Services Branch, the Assistant Director of the Office Services Branch, and the Administrative Assistant to the Legal Division, are each designated Attesting Officer in respect to all documents other than those by means of which the Public Housing Administration divests itself of interest in real property. In respect to the last named type of document, the Director of the Production and Document Control Branch and the Assistant Director thereof are each designated Attesting Officer. The Attesting Officer shall affix the official seal to such documents as may require its application and is authorized to certify that copies of documents, leases, contracts and other papers, duly approved, are identical with the originals on file in the Central Office.

Date approved: October 30, 1953.

[SEAL] CHARLES E. SLUSSER,
*Commissioner.*

## INTERSTATE COMMERCE COMMISSION

[4th Sec. Application 28607]

PHOSPHORIC ACID FROM CHICAGO, CHICAGO HEIGHTS, AND JOLIET, ILL., TO KANSAS CITY, MO.-KANS.

APPLICATION FOR RELIEF

NOVEMBER 2, 1953.

The Commission is in receipt of the above-entitled and numbered application for relief from the long-and-short-haul provision of section 4 (1) of the Interstate Commerce Act.

Filed by: W. J. Prueter, Agent, for carriers parties to his tariff I. C. C. No. A-3733.

Commodities involved: Phosphoric acid, tank-car loads.

From: Chicago, Chicago Heights, and Joliet, Illinois.

To: Kansas City, Mo.-Kans.

Grounds for relief: Competition with rail carriers and circuitous routes.

Schedules filed containing proposed rates: W. J. Prueter's tariff I. C. C. No. A-3733, supp. 95.

Any interested person desiring the Commission to hold a hearing upon such application shall request the Commission in writing so to do within 15 days from the date of this notice. As provided by the general rules of practice of the Commission, Rule 73, persons other than applicants should fairly disclose their interest, and the position they intend to take at the hearing with respect to the application. Otherwise the Commission, in its discretion, may proceed to investigate and determine the matters involved in such application without further or formal hearing. If because of an emergency a grant of temporary relief is found to be necessary before the expiration of the 15-day period, a hearing, upon a request filed within that period, may be held subsequently.

By the Commission.

[SEAL] GEORGE W. LAIRD,
*Secretary.*

[F. R. Doc. 53-9351; Filed, Nov. 4, 1953; 8:50 a. m.]

[4th Sec. Application 28608]

SULPHURIC ACID FROM CHICAGO AND JOLIET, ILL., TO KANSAS CITY, MO.-KANS.

APPLICATION FOR RELIEF

NOVEMBER 2, 1953.

The Commission is in receipt of the above-entitled and numbered application for relief from the long-and-short-haul provision of section 4 (1) of the Interstate Commerce Act.

Filed by: W. J. Prueter, Agent, for carriers parties to his tariff I. C. C. No. A-3733.

Commodities involved: Sulphuric acid, tank-car loads.

From: Chicago and Joliet, Ill.

To: Kansas City, Mo.-Kans.

Grounds for relief: Competition with rail carriers and circuitous routes.

Schedules filed containing proposed rates: W. J. Prueter's tariff I. C. C. No. A-3733, supp. 95.

Any interested person desiring the Commission to hold a hearing upon such application shall request the Commission in writing so to do within 15 days from the date of this notice. As provided by the general rules of practice of the Commission, Rule 73, persons other than applicants should fairly disclose their interest, and the position they intend to take at the hearing with respect to the application. Otherwise the Commission, in its discretion, may proceed to investigate and determine the matters involved in such application without further or formal hearing. If because of an emergency a grant of temporary relief is found to be necessary before the expiration of the 15-day period, a hearing, upon a request filed within that period, may be held subsequently.

[4th Sec. Application 28609]

PULPBOARD AND FIBREBOARD FROM BOGALUSA, LA., TO HOUSTON, TEX.

APPLICATION FOR RELIEF

NOVEMBER 2, 1953.

The Commission is in receipt of the above-entitled and numbered application for relief from the long-and-short-haul provision of section 4 (1) of the Interstate Commerce Act.

Filed by: F. C. Kratzmeir, Agent, for the Chicago, Rock Island and Pacific Railroad Company and other carriers.

Commodities involved: Pulpboard and fibreboard, carloads.

From: Bogalusa, La.

To: Houston, Tex.

Grounds for relief: Competition with rail carriers and circuitous routes.

Schedules filed containing proposed rates: F. C. Kratzmeir's tariff I. C. C. No. 4063, supp. 24.

Any interested person desiring the Commission to hold a hearing upon such application shall request the Commission in writing so to do within 15 days from the date of this notice. As provided by the general rules of practice of the Commission, Rule 73, persons other than applicants should fairly disclose their interest, and the position they intend to take at the hearing with respect to the application. Otherwise the Commission, in its discretion, may proceed to investigate and determine the matters involved in such application without further or formal hearing. [4th Sec. Application 28611]

CAUSTIC SODA FROM MEMPHIS, TENN., TO CINCINNATI, OHIO, LOUISVILLE, KY., AND POINTS IN CENTRAL AND ILLINOIS TERRITORIES

APPLICATION FOR RELIEF

NOVEMBER 2, 1953.

The Commission is in receipt of the above-entitled and numbered application for relief from the long-and-short-haul provision of section 4 (1) of the Interstate Commerce Act.

Filed by: R. E. Boyle, Jr., Agent, for carriers parties to Agent C. A. Spanninger's tariff I. C. C. No. 1351.

Commodities involved: Sodium (soda), caustic (sodium hydroxide), liquid, tank-car loads.

From: Memphis, Tenn.

To: Cincinnati, Ohio, Louisville, Ky., and points in central and Illinois territories.

Grounds for relief: Rail competition, circuity, market competition, and to apply over short tariff routes rates constructed on the basis of the short line distance formula.

Schedules filed containing proposed rates: C. A. Spaninger's tariff I. C. C. No. 1351, supp. 34.

Any interested person desiring the Commission to hold a hearing upon such application shall request the Commission in writing so to do within 15 days from the date of this notice. As provided by the general rules of practice of the Commission, Rule 73, persons other than applicants should fairly disclose their interest, and the position they intend to take at the hearing with respect to the application. Otherwise the Commission, in its discretion, may proceed to investigate and determine the matters involved in such application without further or formal hearing. If because of an emergency a grant of temporary relief is found to be necessary before the expiration of the 15-day period, a hearing, upon a request filed within that period, may be held subsequently.

ORGANIZATION OF DIVISIONS AND BOARDS AND ASSIGNMENT OF WORK

DUTIES AND RESPONSIBILITIES OF CHAIRMAN

OCTOBER 30, 1953.

The Interstate Commerce Commission announces the following change in the Commission's Organization Minutes relating to the Organization of Divisions and Boards and Assignment of Work, under authority of section 17 of the Interstate Commerce Act:

The section appearing under the heading Duties and Responsibilities of the Chairman of the Commission has been amended to read as follows:

The following duties and responsibilities are delegated to the Chairman (or, in his absence, to the Acting Chairman who shall be the available senior Commissioner in point of service) to be exercised in additional to his statutory duties and any other duties that may be assigned or delegated to him:

1. He shall be the executive head of the Commission.

2. He shall preside at all sessions of the Commission, and shall see that every vote and official act of the Commission required by law to be recorded is accurately and promptly recorded by the Secretary or the person designated by the Commission for such purpose.

3. Except regular sessions, which shall be provided for by general regulation of the Commission, he shall call the Commission into special session whenever in his opinion any matter or business of the Commission so requires, but he shall, in any event, call a special session for the consideration of any matter or business upon request of a majority of the members.

4. He shall exercise general control over the Commission's argument calendar and conference agenda.

5. Except in instances where the duty is otherwise delegated or provided for, he shall act as correspondent and spokesman for the Commission in all matters where an official expression of the Commission is required.

6. He shall (a) bring to the attention of any Commissioner, division, or board any delay or failure in the work under his or its supervision, (b) report periodically, not less than once every six months, to the Commission on the state of the Commission's work, and (c) recommend to the Commission ways and means of correcting or preventing avoidable delays in the performance of any work or the disposition of any official matter which he is unable otherwise to have remedied.

7. He shall be ex officio Chairman of the Committee on Legislation and Rules and a member of Division One.

8. He shall be relieved, during his chairmanship, of any regular assignment as a member of a division other than an administrative division.

9. In any case in which it appears desirable, he may designate an additional Commissioner or Commissioners to sit with a division.

10. He may designate a Commissioner to fill a vacancy on any Committee until the Commission otherwise orders.

11. Pursuant to the general objectives and broad policies, or to specific instructions of the Commission, he shall represent the Commission in supervising, guiding and directing the Managing Director in the performance of the Managing Director's duties, and the Chief Counsel and Secretary in the performance of their quasi-judicial and quasi-legislative duties. He shall serve as the channel through which the Managing Director, the Chief Counsel and the Secretary account to the Commission for performance of their duties, authorities and responsibilities; and as the channel through which the Managing Director, Chief Counsel and Secretary submit recommendations to the Commission.

[SEAL] GEORGE W. LAIRD,
*Secretary.*

## INTERNATIONAL JOINT COMMISSION

[Docket No. 67]

UNITED STATES AND CANADA

HEARINGS ON LEVELS OF LAKE ONTARIO

The International Joint Commission having been directed by the Governments of the United States and Canada to investigate the various factors which affect the fluctuations of water levels on Lake Ontario, will hold public hearings in Rochester, New York, at 10:00 a. m. on Tuesday, November 17, 1953, in the Chamber of Commerce Building, and at Hamilton, Ontario, at 10:00 a. m. on Wednesday, November 18, 1953, in the City Hall, Council Chambers, at which all interested parties are invited to attend.

At these hearings the International Joint Commission wishes to obtain information concerning the possibilities of bringing about a more beneficial range of stage on Lake Ontario through operation of the works in the International Rapids Section of the St. Lawrence River which were approved by the Commission on October 29, 1952.

Fifty copies of statements should be filed with the Secretaries at the hearings.

[F. R. Doc. 53-9347; Filed, Nov. 4, 1953; 8:49 a. m.]

UNITED STATES AND CANADA

HEARING ON KOOTENAY VALLEY DAMAGE CLAIMS

An International Joint Commission hearing will be held in the County Court House at Bonners Ferry, Idaho, beginning at 10:00 a. m., Monday, November 30, 1953, to obtain evidence on any damage that may have been suffered by citizens of the United States and Associations of such citizens as a result of storage of water in Kootenay Lake above elevation 1745.32 feet by the West Kootenay Power and Light Company, Limited, and the Consolidated Mining and Smelting Company of Canada, Limited, under the provisions of the Commission's order of August 5, 1949, Condition 10 of which obligates the above-named companies, pursuant to Article VIII of the Boundary Waters Treaty signed January 11, 1909, to indemnify any such citizens or other United States interests for injury or damage they may have suffered.

The Commission has designated and delegated authority to Commissioners George Spence of Canada and Roger B. McWhorter of the United States to conduct the hearing and obtain the evidence needed by the Commission to pass judgment on pending damage claims as provided in Condition 10 of said order of August 5, 1949.

JESSE B. ELLIS,
*Secretary, United States Section.*
*Washington, D. C.*
E. M. SUTHERLAND,
*Secretary, Canadian Section.*
*Ottawa, Canada.*

## TITLE 3—THE PRESIDENT

### EXECUTIVE ORDER 10498

DELEGATING TO THE SECRETARIES OF THE MILITARY DEPARTMENTS AND THE SECRETARY OF THE TREASURY CERTAIN AUTHORITY VESTED IN THE PRESIDENT BY THE UNIFORM CODE OF MILITARY JUSTICE

By virtue of the authority vested in me by Article 140 of the Uniform Code of Military Justice (64 Stat. 107, 145), and as President of the United States and Commander in Chief of the armed forces of the United States, it is ordered as follows:

The authority vested in the President by Articles 71 (a) and 74 (a) of the Uniform Code of Military Justice to remit or suspend any part or amount of the unexecuted portion of any sentence extending to death which, as approved by the President, has been commuted to a less punishment, is hereby delegated to the Secretary of the Army, the Secretary of the Navy, the Secretary of the Air Force and, except when the Coast Guard is operating as a part of the Navy, the Secretary of the Treasury, respectively, as to persons convicted by military tribunals under their jurisdiction.

### EXECUTIVE ORDER 10499

DELEGATING FUNCTIONS CONFERRED UPON THE PRESIDENT BY SECTION 8 OF THE UNIFORMED SERVICES CONTINGENCY OPTION ACT OF 1953

By virtue of the authority vested in me by section 301 of title 3 of the United States Code, and as President of the United States, it is ordered as follows:

SECTION 1. Except as otherwise provided in this order, the Secretary of Defense is hereby authorized and empowered to perform, without the approval, ratification, or other action of the President, the functions vested in the President by section 8 of the Uniformed Services Contingency Option Act of 1953, approved August 8, 1953 (Public Law 239, 83d Congress), hereinafter referred to as the Act. The Secretary of Defense, after appropriate consultation with the Secretaries of the Treasury, Commerce, and Health, Education, and Welfare, shall prepare for each fiscal year a consolidated report on operations and financing of the benefits authorized by the Act and shall present such report to the President not later than four months following the close of the fiscal year, for transmittal by the President to the Congress.

SEC. 2. The Secretary of the Army, the Secretary of the Navy, the Secretary of the Air Force, the Secretary of the Treasury, the Secretary of Commerce, and the Secretary of Health, Education, and Welfare are hereby severally authorized and empowered to perform, without the approval, ratification, or other action of the President, the function vested in the President by section 8 of the Act of prescribing regulations for the administration of the Act; provided that the regulations prescribed by any such Secretary shall relate only to the Department of which the Secretary is the head.

SEC. 3. The regulations prescribed by the said Secretaries under section 2 of this order shall be subject to the approval of the Secretary of Defense; shall be designed to achieve the uniform, equitable, and economical administration of the Act; shall include uniform tables of actuarial equivalents and provision that term insurance values shall be computed by uniform methods prescribed by the Board of Actuaries provided for in section 8 of the Act; and, to the extent deemed necessary, shall include (a) procedures for informing personnel of their rights, for submitting elections and claims, and for reconsideration of determinations, and (b) definitions of terms.

SEC. 4. Functions under section 8 of the Act with respect to the selection of a member of the Board of Actuaries from among the membership of the Society of Actuaries and the fixing of his compensation are reserved to the President.

SEC. 5. The meaning of the terms "functions" and "perform" as used in this order shall be the same as the mean-

## EXECUTIVE ORDER 10500

DESIGNATION OF THE POWER AUTHORITY OF THE STATE OF NEW YORK AND ESTABLISHMENT OF THE UNITED STATES SECTION OF THE ST. LAWRENCE RIVER JOINT BOARD OF ENGINEERS

WHEREAS pursuant to the provisions of the Boundary Waters Treaty of January 11, 1909 (36 Stat. 2448), the Government of the United States of America and the Government of Canada on June 30, 1952, filed concurrent and complementary applications with the International Joint Commission for an Order of Approval of the construction, jointly by entities to be designated by the respective Governments, of certain works for the development of power in the International Rapids Section of the St. Lawrence River and of the maintenance and operation of such works; and

WHEREAS the Commission on October 29, 1952, issued an Order of Approval for the construction, maintenance, and operation of such works jointly by The Hydro-Electric Power Commission of Ontario and by an entity to be designated by the Government of the United States, subject to the terms and conditions contained in that Order of Approval; and

WHEREAS condition (g) of the Order of Approval reads in part as follows:

In accordance with the Applications, the establishment by the Governments of Canada and of the United States of a Joint Board of Engineers to be known as the St. Lawrence River Joint Board of Engineers (hereinafter referred to as the "Joint Board of Engineers") consisting of an equal number of representatives of Canada and the United States to be designated by the respective Governments, is approved. The duties of the Joint Board of Engineers shall be to review and coordinate, and, if both Governments so authorize, approve the plans and specifications of the works and the programs of construction thereof submitted for the approval of the respective Governments as specified above, and to assure the construction of the works in accordance therewith as approved.

• • •

and

WHEREAS the Federal Power Commission on July 15, 1953, issued a license (hereinafter referred to as the License) to the Power Authority of the State of New York for the construction, maintenance, and operation of Project No. 2000, which project represents that portion of the works for the development of power in the International Rapids Section of the St. Lawrence River located within the United States:

NOW, THEREFORE, by virtue of the authority vested in me by the Constitution and statutes, and as President of the United States, it is hereby ordered as follows:

SECTION 1. *Designation of the Power Authority of the State of New York.* The Power Authority of the State of New York is hereby declared to be the designee of the Government of the United States of America for the construction of the works referred to in the Order of Approval of the International Joint Commission of October 29, 1952.

SEC. 2. *Establishment of United States Section of St. Lawrence River Joint Board of Engineers.* There is hereby established the United States Section of the St. Lawrence River Joint Board of Engineers, composed of two members and hereinafter referred to as the United States Section. The Secretary of the Army and the Chairman of the Federal Power Commission are hereby designated members. Each may designate an alternate to act for him as member of the United States Section.

SEC. 3. *Duties of the United States Section.* The United States Section shall represent the Government of the United States on the Joint Board of Engineers in the performance of the duties specified in condition (g) of the Order of Approval, and is authorized to act with the Canadian Section in the approval of the plans and specifications of the works and the programs of construction thereof, submitted for approval of the respective Governments as required by the Order of Approval, and to assure the construction of the works in accordance with such approval.

SEC. 4. *Assistance to the United States Section.* The Department of the Army and the Federal Power Commission are authorized to furnish such assistance, including facilities, supplies and personnel, to the United States Section as may be consonant with law and necessary for the purpose of effectuating this order.

SEC. 5. *Reports to the President.* The United States Section shall submit its final report to the President upon the completion of construction and shall submit such interim reports as may appear to be desirable.

SEC. 6. *Effective date.* This order shall be effective upon the date that the License becomes final.

DWIGHT D. EISENHOWER

THE WHITE HOUSE,
*November 4, 1953.*

# RULES AND REGULATIONS

## TITLE 7—AGRICULTURE

### Chapter IX—Production and Marketing Administration (Marketing Agreements and Orders), Department of Agriculture

[Navel Orange Reg. 1]

PART 914—NAVEL ORANGES GROWN IN ARIZONA AND DESIGNATED PART OF CALIFORNIA

LIMITATION OF HANDLING

§ 914.301 *Navel Orange Regulation 1*—(a) *Findings.* (1) Pursuant to the marketing agreement and Order No. 14 (18 F. R. 5638), regulating the handling of navel oranges grown in Arizona and designated part of California, effective September 22, 1953, under the applicable provisions of the Agricultural Marketing Agreement Act of 1937, as amended (7 U. S. C. 601 et seq.), and upon the basis of the recommendation and information submitted by the Navel Orange Administrative Committee, established under the said marketing agreement and order, and upon other available information, it is hereby found that the limitation of handling of such navel oranges, as hereinafter provided, will tend to effectuate the declared policy of the act.

(2) It is hereby further found that it is impracticable and contrary to the public interest to give preliminary notice, engage in public rule-making procedure, and postpone the effective date of this section until 30 days after publication thereof in the FEDERAL REGISTER (60 Stat. 237; 5 U. S. C. 1001 et seq.) because the time intervening between the date when information upon which this section is based became available and the time when this section must become effective in order to effectuate the declared policy of the act is insufficient, and a reasonable time is permitted, under the circumstances, for preparation

for such effective time; and good cause exists for making the provisions of this section effective as hereinafter set forth. The Navel Orange Administrative Committee held an open meeting on October 29, 1953, after giving due notice thereof, to consider supply and market conditions for navel oranges and the need for regulation; interested persons were afforded an opportunity to submit information and views at this meeting; the recommendation and supporting information for regulation during the period specified in this section was promptly submitted to the Department after such meeting was held; the provisions of this section, including its effective time, are identical with the aforesaid recommendation of the committee, and information concerning such provisions and effective time has been disseminated among handlers of such navel oranges; it is necessary, in order to effectuate the declared policy of the act, to make this section effective during the period herein specified; and compliance with this section will not require any special preparation on the part of persons subject thereto which cannot be completed on or before the effective date of this section.

(b) *Order.* (1) During the period beginning at 12:01 a. m., P. s. t., November 8, 1953, and ending at 12:01 a. m., P. s. t., February 1, 1954, no handler shall handle any Navel oranges, grown in District 4, which are of a size smaller than 2.31 inches in diameter, which shall be the largest measurement at a right angle to a straight line running from the stem to the blossom end of the fruit, except that a tolerance of 5 percent, by count, of oranges smaller than such minimum size, but not less than 2.20 inches in diameter, shall be permitted: *Provided*, That in determining the percentage of oranges which are smaller than 2.31 inches in diameter, such percentage shall be based only on those oranges which are of a size 2.43 inches in diameter and smaller, but oranges in any container must average not less than a diameter of 2.375 inches. The aforesaid tolerance is on a container basis but individual packages in any lot may contain not more than double the tolerance specified: *Provided*, That the average for the entire lot is within the tolerance specified: *Provided further*, That at least one orange which does not meet the requirements shall be permitted in any one package.

(2) As used in this section, "handler," "handle," and "District 4," shall have the same meaning as when used in said marketing agreement and order.

(Sec. 5, 49 Stat. 753, as amended; 7 U. S. C. and Sup. 608c)

Done at Washington, D. C., this 3d day of November 1953.

[SEAL] S. R. SMITH,
*Director, Fruit and Vegetable Branch, Production and Marketing Administration.*

## TITLE 16—COMMERCIAL PRACTICES

### Chapter I—Federal Trade Commission

[Docket 6105]

PART 3—DIGEST OF CEASE AND DESIST ORDERS

AMERICAN LABOR DIGEST

Subpart—*Advertising falsely or misleadingly:* § 3.15 *Business status, advantages, or connections:* Customer connection; location; § 3.135 *Nature:* Product or service; § 3.205 *Scientific or other relevant facts;* § 3.250 *Success, use or standing.* Subpart—*Enforcing dealings or payments wrongfully:* § 3.1045 *Enforcing dealings or payments wrongfully.* Subpart—*Misrepresenting oneself and goods*—Business status, advantages or connections: § 3.1395 *Customer connection;* § 3.1475 *Location;* Goods: § 3.1685 *Nature;* § 3.1740 *Scientific or other relevant facts;* § 3.1755 *Success, use or standing.* Subpart—*Offering unfair, improper and deceptive inducements to purchase or deal:* § 3.1928 *Customer connection or action;* § 3.2063 *Scientific or other relevant facts.* In connection with the publication of the American Labor Digest, or any other similar publication, and in connection with the offering for sale and sale of advertising space in said American Labor Digest and the distribution thereof in commerce: (1) Representing, directly or by implication: (a) That the American Labor Digest is a regular monthly publication or that single copies thereof may be purchased; (b) that the American Labor Digest has subscribers, is supported by subscriptions, is distributed to subscribers, or to the general reading public; (c) that the American Labor Digest is a publication representing labor or is supported or recognized by labor or any labor organization or labor union; (d) that respondent maintains an office in Washington, D. C., or any other city when such is not the fact; (e) that any advertisement for which respondent is requesting payment through statements of account or otherwise has been inserted with the authorization of the advertiser contrary to the fact; (f) that any advertisement appearing in a prior edition of respondent's publication has been inserted with the authorization of the advertiser or paid for by him contrary to the fact; and (2) requiring or demanding payment for advertisements which have not been authorized or approved; prohibited.

(Sec. 6, 38 Stat. 722; 15 U. S. C. 46. Interpret or apply sec. 5, 38 Stat. 719, as amended; 15 U. S. C. 45) [Cease and desist order, Charles Samuel Bernstein d. b. a. American Labor Digest, Baltimore, Md., Docket 6105, October 6, 1953]

*In the Matter of Charles Samuel Bernstein, an Individual, Doing Business as American Labor Digest*

This proceeding was heard by James A. Purcell, hearing examiner, upon the complaint of the Commission, and respondent's answer, in which respondent admitted all of the material allegations of fact set forth in said complaint and specifically waived all intervening procedure and further hearing as to said facts.

Thereafter, the proceeding regularly came on for final consideration by said examiner, theretofore duly designated by the Commission, upon said complaint and answer, and said examiner, having duly considered the record in the matter, and having found that the proceeding was in the interest of the public, made his initial decision comprising certain findings as to the facts,[1] conclusions drawn therefrom,[1] and order to cease and desist.

Thereafter, following the Commission's review of said initial decision, the matter was disposed of by "Decision of the Commission and Order to File Report of Compliance", dated October 6, 1953, as follows:

This matter coming on to be heard by the Commission upon its review of the hearing examiner's initial decision herein; and

The Commission having duly considered the entire record and being of the opinion that said initial decision is adequate and appropriate to dispose of the proceeding:

*It is ordered*, That the attached initial decision of the hearing examiner[1] shall on the 6th day of October, 1953, become the decision of the Commission.

*It is further ordered*, That the respondent, Charles Samuel Bernstein, shall, within sixty (60) days after service upon him of this order, file with the Commission a report in writing setting forth in detail the manner and form in which he has complied with the order to cease and desist.

The order to cease and desist in said initial decision, thus made the decision of the Commission, is as follows:

*It is ordered*, That the respondent, Charles Samuel Bernstein, an individual, his agents, representatives and employees, in connection with the publication of the American Labor Digest, or any other similar publication, and in connection with the offering for sale and sale of advertising space in said American Labor Digest and the distribution thereof in commerce, as "commerce" is defined in the Federal Trade Commission Act, do forthwith cease and desist from:

1. Representing, directly or by implication:

(a) That the American Labor Digest is a regular monthly publication or that single copies thereof may be purchased;

(b) That the American Labor Digest has subscribers, is supported by subscriptions, is distributed to subscribers, or to the general reading public;

(c) That the American Labor Digest is a publication representing labor or is supported or recognized by labor or any labor organization or labor union;

(d) That respondent maintains an office in Washington, D. C., or any other city when such is not the fact;

(e) That any advertisement for which respondent is requesting payment through statements of account or otherwise has been inserted with the authorization of the advertiser contrary to the fact;

(f) That any advertisement appearing in a prior edition of respondent's publication has been inserted with the authorization of the advertiser or paid for by him contrary to the fact.

2. Requiring or demanding payment for advertisements which have not been authorized or approved.

Issued: October 6, 1953.

By the Commission.

PART 3—DIGEST OF CEASE AND DESIST ORDERS

BLOTTING PAPER MANUFACTURERS ASSN. ET AL.

Subpart—*Aiding, assisting and abetting unfair or unlawful act or practice:* § 3.290 *Aiding, assisting and abetting unfair or unlawful act or practice.* Subpart — *Combining or conspiring:* § 3.400 *To discriminate or stabilize prices through basing-point or delivered-price systems;* § 3.430 *To enhance, maintain or unify prices.* Subpart—*Selling and quoting on systematic, price-matching basis:* § 3.2193 *Zone, freight equalization and other delivered-price systems.* In connection with the sale and distribution of blotting paper and on the part of respondent association, and its officers, and on the part of the six corporate respondents, and their corporate officers, etc., entering into, continuing, cooperating in, or carrying out, any planned, common course of action, understanding, agreement, combination, or conspiracy between and among any two or more of said respondents, or between any one or more of said respondents and persons engaged in any line of commerce as to ordinarily compete with any of said respondents to (1) fix, establish, or maintain by any manner whatever uniform prices, discounts, terms, or conditions of sale of blotting paper; (2) use in the quoting of prices on or in the sale of blotting paper, the differentials in price for variance in color, weight, size, trim, packaging, type or quantity of blotting paper heretofore fixed or established; (3) fix, establish or maintain any differentials in price for any variance in color, weight, size, finish, trim, packaging, type, or quantity of blotting paper; (4) use in quoting prices on, or in the sale of blotting paper, the geographical zones or the price differentials between such zones heretofore fixed, or fix, establish, or maintain any geographical areas or zones for pricing purposes or any differentials in price between any such areas or zones for use in quoting prices on or in the sale of blotting paper; and (5) use or maintain the trade practices heretofore formulated and agreed upon, or agree upon or formulate and use any trade practices which specify prices or differentials in prices to be used in quoting prices on, or in the sale of blotting paper, or any similar set of rules or formula which results in uniform identical prices or fixed variances in prices; prohibited.

(Sec. 6, 38 Stat. 722; 15 U. S. C. 46. Interpret or apply sec. 5, 38 Stat. 719, as amended; 15 U. S. C. 45) [Cease and desist order, The Blotting Paper Manufacturers Association et al., New York, N. Y., Docket 6107, October 8, 1953]

*In the Matter of the Blotting Paper Manufacturers Association, Paul Travis, Individually and as President of Respondent Association; Graham A. Carlton, Individually and as Vice President of Respondent Association; Eric G. Lagerloff, Individually and as Secretary and Treasurer of Respondent Association; Joseph Parker & Son Co., a Corporation; The Wrenn Paper Company, a Corporation; The Rochester Paper Company, a Corporation; Albemarle Paper Manufacturing Company, a Corporation; Standard Paper Manufacturing Company, a Corporation; and Mead Corporation, a Corporation, Respondents*

This proceeding was instituted by complaint which charged respondents with the use of unfair methods of competition and unfair acts and practices in violation of the provisions of the Federal Trade Commission Act.

It was disposed of, as announced by the Commission's "Notice" dated October 9, 1953, through the consent settlement procedure provided in Rule V of the Commission's rules of practice as follows:

The consent settlement tendered by the parties in this proceeding, a copy of which is served herewith, was accepted by the Commission on October 8, 1953, and ordered entered of record as the Commission's findings as to the facts,[1] conclusion,[1] and order in disposition of this proceeding.

Said order to cease and desist, thus entered of record, following the findings as to the facts and conclusion, reads as follows:

*It is ordered*, That the respondents The Blotting Paper Manufacturers Association, and its officers; Paul Travis, individually and as President of respondent Association; Graham A. Carlton, individually and as Vice President of respondent Association; Eric G. Lagerloef, individually and as Secretary and Treasurer of respondent Association; Joseph Parker & Son Co., a corporation; The Wrenn Paper Company, a corporation; The Rochester Paper Company, a corporation; Albemarle Paper Manufacturing Company, a corporation; Standard Paper Manufacturing Company, a corporation; and Mead Corporation, a corporation, and the corporate respondents' officers, agents, representatives and employees, directly or through any corporate or other device, in connection with the sale and distribution of blotting paper, do forthwith cease and desist from entering into, continuing, cooperating in, or carrying out, any planned, common course of action, understanding, agreement, combination, or conspiracy between and among any two or more of said respondents, or between any one or more of said respondents and persons engaged in any line of commerce as to ordinarily compete with any of said respondents to do or perform any of the following acts:

1. Fixing, establishing, or maintaining by any manner whatever uniform prices, discounts, terms or conditions of sale of blotting paper.

2. Using in the quoting of prices on or in the sale of blotting paper, the differentials in price for variance in color, weight, size, trim, packaging, type or quantity of blotting paper heretofore fixed or established; or,

3. Fixing, establishing or maintaining any differentials in price for any variance in color, weight, size, finish, trim, packaging, type, or quantity of blotting paper.

4. Using in quoting prices on, or in the sale of blotting paper, the geographical zones or the price differentials between such zones heretofore fixed, or fixing, establishing, or maintaining any geographical areas or zones for pricing purposes or any differentials in price between any such areas or zones for use in quoting prices on or in the sale of blotting paper.

5. Using or maintaining the trade practices heretofore formulated and agreed upon, or agreeing upon of formulating and using any trade practices which specify prices or differentials in prices to be used in quoting prices on, or in the sale of blotting paper, or any similar set of rules or formula which results in uniform identical prices or fixed variances in prices.

*It is further ordered*, That the respondents shall within sixty (60) days after service upon them of this order file with the Commission a report in writing setting forth in detail the manner and form in which they have complied with this order.

The foregoing consent settlement is hereby accepted by the Federal Trade Commission and ordered entered of record on this 8th day of October 1953.

Issued: October 9, 1953.

By the direction of the Commission.

[SEAL] ALEX. AKERMAN, JR.,
*Secretary.*

[Docket 6108]

PART 3—DIGEST OF CEASE AND DESIST ORDERS

BENNETT COAT CO., INC., ET AL.

Subpart—*Misbranding or mislabeling:* § 3.1190 *Composition: Wool Products Labeling Act;* § 3.1325 *Source or origin*—Maker or seller—Wool Products Labeling Act. Subpart—*Neglecting, unfairly or deceptively, to make material disclosure:* § 3.1845 *Composition*—Wool Products Labeling Act; § 3.1900 *Source or origin*—Wool Products Labeling Act. In connection with the introduction or manufacture for introduction into commerce, or the offering for sale, sale, transportation or distribution in commerce, of ladies'

coats or other "wool products" as such products are defined in and subject to the Wool Products Labeling Act of 1939, which products contain, purport to contain, or in any way are represented as containing "wool", "reprocessed wool" or "reused wool", as those terms are defined in said act, misbranding such products by: (1) Falsely or deceptively stamping, tagging, labeling or otherwise identifying such products as to the character or amount of the constituent fibers included therein; (2) failing to affix securely to or place on each such product a stamp, tag, label or other means of identification showing in a clear and conspicuous manner: (a) The percentage of the total fiber weight of such wool product, exclusive of ornamentation not exceeding five per centum of said total fiber weight, of (1) wool, (2) reprocessed wool, (3) reused wool, (4) each fiber other than wool where said percentage by weight of such fiber is five per centum or more, and (5) the aggregate of all other fibers; (b) the maximum percentage of the total weight of such wool product of any non-fibrous loading, filling, or adulterating matter; (c) the name or the registered identification number of the manufacturer of such wool product or of one or more persons engaged in introducing such wool product into commerce, or in the offering for sale, sale, transportation, distribution or delivery for shipment thereof in commerce, as "commerce" is defined in the Wool Products Labeling Act of 1939; and (3) failing to set forth separately on the required stamp, tag, label or other means of identification the character and amount of the constituent fibers contained in the interlinings of such wool products as provided in Rule 24 of the rules and regulations promulgated under said Wool Products Labeling Act of 1939; prohibited, subject to the proviso, however, that the foregoing provisions concerning misbranding shall not be construed to prohibit acts permitted by paragraphs (a) and (b) of section 3 of the Wool Products Labeling Act of 1939; and to the further provision that nothing contained in the order shall be construed as limiting any applicable provisions of said act or the rules and regulations promulgated thereunder.

(Sec. 6, 38 Stat. 722, sec. 6, 54 Stat. 1131; 15 U. S. C. 46, 68d. Interpret or apply sec. 5, 38 Stat. 719, as amended, secs. 2–5, 54 Stat. 1128–1130; 15 U. S. C. 45, 68–68c) [Cease and desist order, Bennett Coat Co., Inc., et al., New York, N. Y., Docket 6108, October 6, 1953]

*In the Matter of Bennett Coat Co., Inc., a Corporation; and George Tlumak and Louis I. Krieger, Individually*

This proceeding was heard by William L. Pack, hearing examiner, upon the complaint of the Commission, and respondents' answer, in which they admitted all of the material allegations of fact set forth in the complaint and waived all intervening procedure and further hearings as to such facts.

Thereafter, the proceeding regularly came on for final consideration by said examiner, theretofore duly designated by the Commission, upon the complaint and answer, and said examiner, having duly considered the matter, and having found that the proceeding was in the interest of the public, made his initial decision comprising certain findings as to the facts,[1] conclusion drawn therefrom,[1] and order to cease and desist.

Thereafter, following the Commission's review of said initial decision, the matter was disposed of by "Decision of the Commission and Order to File Report of Compliance", dated October 6, 1953, as follows:

This matter coming on to be heard by the Commission upon its review of the hearing examiner's initial decision herein; and

The Commission having duly considered the entire record and being of the opinion that said initial decision is adequate and appropriate to dispose of the proceeding:

*It is ordered*, That the attached initial decision of the hearing examiner[1] shall on the 6th day of October, 1953, become the decision of the Commission.

*It is further ordered*, That the respondents, Bennett Coat Co., Inc., a corporation, and George Tlumak and Louis I. Krieger, shall within sixty (60) days after service upon them of this order, file with the Commission a report in writing setting forth in detail the manner and form in which they have complied with the order to cease and desist.

The order to cease and desist in said initial decision, thus made the decision of the Commission, is as follows:

*It is ordered*, That respondent Bennett Coat Co., Inc., a corporation, and its officers, and respondents George Tlumak and Louis I. Krieger, individually, and respondents' respective representatives, agents and employees, directly or through any corporate or other device, in connection with the introduction or manufacture for introduction into commerce, or the offering for sale, sale, transportation or distribution in commerce, as "commerce" is defined in the Federal Trade Commission Act and the Wool Products Labeling Act of 1939, of ladies' coats or other "wool products" as such products are defined in and subject to the Wool Products Labeling Act of 1939, which products contain, purport to contain, or in any way are represented as containing "wool", "reprocessed wool" or "reused wool", as those terms are defined in said act, do forthwith cease and desist from misbranding such products by:

1. Falsely or deceptively stamping, tagging, labeling or otherwise identifying such products as to the character or amount of the constituent fibers included therein;

2. Failing to affix securely to or place on each such product a stamp, tag, label or other means of identification showing in a clear and conspicuous manner:

(a) The percentage of the total fiber weight of such wool product, exclusive of ornamentation not exceeding five percentum of said total fiber weight, of (1) wool, (2) reprocessed wool, (3) reused wool, (4) each fiber other than wool where said percentage by weight of such fiber is five percentum or more, and (5) the aggregate of all other fibers;

(b) The maximum percentage of the total weight of such wool product of any non-fibrous loading, filling, or adulterating matter;

(c) The name or the registered identification number of the manufacturer of such wool product or of one or more persons engaged in introducing such wool product into commerce, or in the offering for sale, sale, transportation, distribution or delivery for shipment thereof in commerce, as "commerce" is defined in the Wool Products Labeling Act of 1939.

3. Failing to set forth separately on the required stamp, tag, label or other means of identification the character and amount of the constituent fibers contained in the interlinings of such wool products as provided in Rule 24 of the rules and regulations promulgated under said Wool Products Labeling Act of 1939.

*Provided*, That the foregoing provisions concerning misbranding shall not be construed to prohibit acts permitted by paragraphs (a) and (b) of section 3 of the Wool Products Labeling Act of 1939. *And provided further*, That nothing contained in this order shall be construed as limiting any applicable provisions of said act or the rules and regulations promulgated thereunder.

Issued: October 6, 1953.

By the Commission.

[SEAL] ALEX. AKERMAN, Jr., *Secretary.*

## TITLE 38—PENSIONS, BONUSES, AND VETERANS' RELIEF

### Chapter I—Veterans' Administration

PART 21—VOCATIONAL REHABILITATION AND EDUCATION

SUBPART E—VETERANS' READJUSTMENT ASSISTANCE ACT OF 1952

MISCELLANEOUS AMENDMENTS

1. In paragraph (a) of § 21.2005, a new subparagraph (15) is added as follows:

§ 21.2005 *Definitions.* (a) • • •

(15) The term "non-veteran-student" means a person who is neither receiving educational or training benefits under Public Laws 16 or 346, 78th Congress, as amended, Public Law 894, 81st Congress, as amended, or Public Law 550, 82d Congress, nor is having all or any part of his tuition, fees, or other charges paid to or for him by the educational institution.

2. In § 21.2011, paragraphs (b) and (c) are amended to read as follows.

§ 21.2011 *Determinations respecting active service requirements.* • • •

(b) *Questionable discharges.* In all cases where the discharge is neither honorable nor dishonorable, and it is not clear whether the circumstances under which the veteran was discharged or released from active duty might bar eligibility to education or training, the question will be referred by memorandum to the adjudication division (regional office), to the compensation and pension service (Veterans Benefits Office, District of Columbia cases), for appropriate determination, prior to initiating further action toward the issuance of a Certificate for Education and Training.

(c) *Discharges for disability.* When an application for education or training is received and the veteran had fewer than 90 days' service as defined in paragraph (d) of this section, but was discharged for disability, the Vocational rehabilitation and education activity will refer the facts in the case to the adjudication division (regional office cases), or to the compensation and pension service (Veterans Benefits Office, District of Columbia, cases), for development of disability service data and a formal memorandum rating as to whether such discharge was by reason of an actual service-incurred injury or disability.

• • • • • •

3. In § 21.2014, paragraph (b) (4) is amended to read as follows:

§ 21.2014 *Duration of veteran's education or training.* • • •

(b) *Limitations and extensions.* • • •

(4) In apprentice or other training on the job, and institutional on-farm training courses, entitlement will not be extended under any circumstances.

• • • • • •

4. In § 21.2015, paragraphs (b) and (c) are amended to read as follows:

§ 21.2015 *Considerations respecting training under other laws administered by the Veterans' Administration.* • • •

(b) *Training under Part VII, Veterans Regulation 1 (a), following training under Public Law 550, 82d Congress.* (1) For the purpose of preventing the pyramiding of benefits, a veteran who enters, continues to pursue for a period of more than 30 days, or resumes training under this law after need for vocational rehabilitation has been established will be limited to a total period of training under both this law and Part VII which will not exceed:

(i) The time that normally would have been required to train the veteran to employability in the objective selected had he chosen training under Part VII when he became eligible therefor; or

(ii) The total of the veteran's original entitlement under this law,

whichever is the greater.

(2) When a veteran while in training or during a period of interruption for a valid reason under this law becomes eligible under Part VII and is determined to be in need of vocational rehabilitation, subject to the limitations of subparagraph (1) of this paragraph if applicable, there shall be prescribed and provided whatever course of rehabilitation is needed to restore his employability notwithstanding any education or training he may have received under any laws administered by the Veterans' Administration. If the period of time required to rehabilitate the veteran under Part VII combined with the total period of training which the veteran has received under all other laws administered by the Veterans' Administration will exceed 48 months, the provisions of § 21.206 will be for application.

(c) *Educational and vocational guidance required for veterans eligible under both Part VII, Veterans Regulation 1 (a), and Public Law 550, 82d Congress.* (1) When a veteran who has basic eligibility under Part VII applies for education or training under this law, he will be notified to report for required educational and vocational guidance prior to action on his application, and, if he does report, a determination will be made as to whether he is in need of vocational rehabilitation: *Provided*, That the veteran will not be required to report for educational and vocational guidance if a determination as to need for vocational rehabilitation has previously been made on the basis of a disability resulting from service on or after June 27, 1950. If need is determined to exist, the right of the veteran to select a program under this law will not be abridged, but any further benefit under Part VII will be subject to the limitations of paragraph (b) (1) of this section.

(2) When a veteran while in training or during a period of interruption for a valid reason under this law becomes eligible under Part VII, he will be notified to report for required educational and vocational guidance, and, if he does report, a determination will be made as to whether he is in need of vocational rehabilitation. If need is determined to exist, the right of the veteran to continue training under this law will not thereby be abridged, but any further benefit under Part VII will be subject to the limitations of paragraph (b) (1) of this section.

(3) If the veteran, upon due notification, willfully or through neglect, fails to report for educational and vocational guidance as required in subparagraphs (1) and (2) of this paragraph, or refuses to cooperate in the counseling procedure to the extent necessary to determine whether need exists, and thereafter enters, continues to pursue, or resumes training under this law, his eligibility under Part VII will be forfeited. When it is established that a veteran's failure to report was due to reasons beyond his control, his eligibility will not be forfeited, but if such veteran enters, continues to pursue, or resumes training under this law without reporting for educational and vocational guidance and at a later date applies for vocational rehabilitation under Part VII, further benefits under Part VII will be subject to the limitations of paragraph (b) (1) of this section in the same manner as though need for vocational rehabilitation had been determined to exist.

(i) If it is found that the veteran was ill, hospitalized, or incompetent at the time he was requested to report, his failure to report will not be held to constitute willfulness or neglect.

(4) When the veteran's physical or mental condition is such that it is not practicable to provide educational and vocational guidance or that the vocational rehabilitation board established in the regional office under the provisions of § 21.715 determines that training is not medically feasible for him, he will be informed that upon the basis of medical opinion it is recommended that he defer training until his condition improves to such extent that medical feasibility of training may be established and educational and vocational guidance may be completed. If, after being provided such information, the veteran persists in his desire for action upon his application, it will be approved, if otherwise in order, and if the veteran enters, continues to pursue, or resumes training under this law without completing required educational and vocational guidance future benefits under Part VII will be subject to the limitations contained in paragraph (b) (1) of this section in the same manner as though need for vocational rehabilitation had been determined to exist.

(5) For the purposes of this paragraph, a veteran will be presumed to have basic eligibility under Part VII when a Veterans' Administration claims activity has determined that compensation is payable under the provisions of Part I, Veterans Regulation 1 (a), as amended, or would be except for the receipt of retirement pay, and the veteran has been notified to that effect.

(6) A veteran who has basic eligibility under Part VII at the time of application for or who becomes eligible under Part VII while in training under this law or in a valid interrupted status, and who is in a foreign country (other than the Republic of the Philippines) either at the time of application for benefits under the law or determination of basic eligibility under Part VII will not be requested to report for educational and vocational guidance. However, such veteran will be notified that any further benefit under Part VII will be subject to the limitations of paragraph (b) (1) of this section, if he continues training under this law.

• • • • • •

5. In paragraph (d) of § 21.2032, a new subparagraph (1) is added as follows:

§ 21.2032 *Change of program.* • • •

(d) *Adjustments not considered a change of program.* • • •

(1) When the predetermined and identified objective is a baccalaureate degree requiring the completion of a 4-year undergraduate curriculum in an institution of higher learning, the objective shall be considered to be the completion of a 4-year undergraduate curriculum leading to a baccalaureate degree, although a particular curriculum or degree objective such as a bachelor of science degree in agriculture may have been designated by the veteran on his application or by the institution on the enrollment certification. Therefore, where a veteran and an institution desire to revise the specific undergraduate degree objective which had been designated by the institution on the veteran's enrollment certification to another undergraduate degree objective (for example, from a B. S. degree in agriculture to an A. B. degree in liberal arts), the determination of whether such a revision constitutes a change of program will depend upon whether there is involved any extension of the time originally required to be expended for completion of the veteran's program arising either by reason of factors affecting acceptance of pre-

viously determined credit hours toward the newly designated degree objective, or otherwise. When such a revision involves no extension of the time originally required to be expended for completion of the veteran's program no change of program is involved, but the institution must certify to the Veterans' Administration for record purposes:

(i) That the change does not involve any such extension in point of time; and

(ii) The designation of the revised degree objective to which the veteran has changed.

The certification in each such case to be made on VA Form 7–1996a at the end of the month during which such change was made. When such a revision is proposed involving an extension of the time originally required to be expended for completion of the veteran's program, a request for approval of a change of program must be forwarded by the veteran to the Veterans' Administration prior to effecting the revision since such a proposed revision will constitute a change of program under the law.

* * * * *

6. In paragraph (a) of § 21.2035, the introduction and subparagraphs (2), (3), and (4) are amended to read as follows:

§ 21.2035 *Minimum number of nonveteran-students required.* (a) The Administrator is not authorized to approve the enrollment or reenrollment (except for the purpose of resuming training after an interruption during a period when no instruction was given by the institution) of any eligible veteran in any nonaccredited course below the college level offered by a proprietary profit or proprietary nonprofit educational institution, for any period during which the Administrator finds that more than 85 percent of the students enrolled in the course are having all or any part of their tuition, fees, or other charges paid to or for them by the educational institution or the Veterans' Administration under Part VII or Part VIII of Veterans Regulation 1 (a), as amended, (38 U. S. C. ch. 12), or under the provisions of Public Law 894, 81st Congress, as amended, Public Law 550, 82d Congress, or all of them.

* * * * *

(2) In determining that the proper ratio exists:

(i) Each part-time student will be counted on the basis of the ratio that the part-time training bears to full-time training. Such determinations may be made by converting all part-time students to the equivalent of full-time students or by adding the total number of hours per week for which nonveteran-students are enrolled and the total number of hours per week for which all students are enrolled and determining the percentage ratio of total hours for nonveteran-students to the total hours of all students.

(ii) Where the course is given in two or more sections which are offered at the same or different hours of the day or week, the total enrollment for all sections of the course will be considered.

(iii) The ratio of nonveteran-students to the total number of students shall be determined for each course approved separately as a course by the State approving agency except that:

(*a*) Where a course identical in total instructional hours is approved by the State approving agency to be offered on a full-time and on a part-time basis as separately approved courses the simultaneous combined enrollment in the full-time and part-time courses will be considered as the total enrollment for the course.

(*b*) Where the same course is offered on different class schedules and the State approves each class schedule separately as a course the simultaneous combined enrollment in all such separately approved courses shall be considered as the total enrollment for the course.

(*c*) Where a State approving agency approves as a separate course a comprehensive course which is made up of the subject matter either currently or previously offered by the institution as separate independent unit courses or curricula the completion of which constitutes a normal terminal point, the ratio of nonveteran-students to the total number of students will be computed on the basis of the combined total number of full-time equivalent students pursuing any subject, or group or groups of subjects included within the comprehensive course, regardless of the name or names of the courses for which such students are enrolled by the institution. A veteran whose currently pursued program of study consists of a separate independent unit course or curriculum included in such a comprehensive course and who requests and has approved a change of program which consists of normal progression within the comprehensive course shall not be denied continuation in the course because of the percentage limitation.

(iv) In a school offering flight training courses the actual hours of logged instructional time for enrolled students (eliminating plane rental time for which no bona fide instruction was furnished by the school) will provide the basis for the determination. Compliance with this requirement of the law with respect to the ratio of at least 15 percent nonveteran-students will be determined for each course, controlled and noncontrolled, on the basis of logged hours of instructional flight time furnished by the institution during the 30-day period immediately preceding the date the veteran is to be enrolled. The certification required under section (3), part IV of VA Form 7–1999, will not be completed by the flight institution, unless during such 30-day period the institution furnished in the same course in which the veteran is to be enrolled no less than 15 percent of the total course logged instructional flight hours to bona fide nonveteran-students. In making this determination, the institution will for each controlled and noncontrolled course:

(*a*) Recognize as a nonveteran-student only those students whose enrollment has been accepted for the specific purpose of qualifying for a CAA pilot rating not already held by the nonveteran; and

(*b*) Include in the total hours of flight training furnished during the preceding 30-day period only those hours which were furnished to nonveteran-students for the purpose of qualifying for the CAA rating examination appropriate to the course of training, and for which the nonveterans have made or will make payment.

(3) A school will be deemed to be a proprietary nonprofit school when it is privately owned and operated whether by an individual, or individuals, or by a corporation, and when it is exempt from taxation under paragraph (6), section 101, of the Internal Revenue Code.

(4) At the time an eligible veteran is enrolled in an approved nonaccredited course below the college level offered by a proprietary profit or proprietary nonprofit educational institution, an authorized employee or official of the institution furnishing such course shall certify to the Veterans' Administration on VA Form 7–1999 that, at the time of the enrollment of the individual veteran for which the certification is made, not more than 85 percent of the students then enrolled in the course are having all or any part of their tuition, fees, or other charges paid to or for them by the educational institution or the Veterans' Administration under Part VII or Part VIII of Veterans Regulation 1 (a), as amended, or Public Law 550, 82d Congress. The determination as to the percentage ratio shall be made pursuant to the provisions of this section. In any case where it appears that the certification by an authorized employee or official of an institution has been made improperly, the provisions of § 21.2208 (d) shall be applied. If it is determined by the committee on educational allowances that the false report was not the result of a knowing or willful act of the institution, payments to veterans already enrolled therein will not be discontinued. However, if it is determined that the false report was the result of a knowing or willful act of the institution payments to all veterans enrolled in the institution under the law will be discontinued pursuant to the provisions of § 21.2208 (d), and the matter will be further processed pursuant to the provisions of § 21.2307.

7. Section 21.2037 is revised to read as follows:

§ 21.2037 *Institutions listed by Attorney General.* (a) The Administrator will not approve enrollment of, nor payment of an education or training allowance to, any eligible veteran in any course in an educational institution or training establishment while such institution or establishment is listed by the Attorney General under Executive Order No. 10450.

(b) The director, training facilities service, will furnish promptly to each regional office and each State approving agency current information on the schools and establishments listed by the Attorney General under Executive Order No. 10450.

8. In paragraph (a) of § 21.2203, a new subparagraph (5) is added as follows:

§ 21.2203 *Approval of accredited courses*—(a) *Accredited courses.* * * *

(5) Under the provisions of subparagraph (1) (i) of this paragraph, any curriculum offered by a college or university which is a member of one of the nationally recognized accrediting agencies or associations and which curriculum leads to a degree, diploma, or certificate will be accepted by the Veterans' Administration as an accredited course when approved as such by the State approving agency. Approval of the individual subjects, required or elective, which are designated by the institution as a part of the curriculum leading to the degree, diploma, or certificate will not be necessary. Such approval may include noncredit subjects as are prescribed by the institution as a required part of the curriculum leading to the degree, diploma, or certificate, whether for individual students who may need the course to make up an entrance deficiency or for any other purpose.

9. In § 21.2208, paragraph (d) is amended to read as follows:

§ 21.2208 *Disapproval of courses and discontinuance of allowances under Public Law 550, 82d Congress.* * * *

(d) (1) Notwithstanding the approval of a course by a State approving agency, the Administrator, pursuant to section 256 (b) of the law, is authorized to discontinue the education and training allowance of any eligible veteran if he finds that the course of education or training in which such veteran is enrolled fails to meet any of the requirements of the law, or if he finds that the educational institution or training establishment offering such course has violated any provision of the law or has failed to meet any of its requirements.

(2) When it has been determined as provided in this paragraph that one or more of the following conditions exist, the education and training allowance of all eligible veterans enrolled in the course or courses offered by an educational institution or training establishment will be discontinued pursuant to such responsibility and authority and the manager will not thereafter approve the enrollment or reenrollment of any eligible veteran therein unless specifically authorized in advance to do so by the Assistant Deputy Administrator for Vocational Rehabilitation and Education.

(i) The educational institution or training establishment has willfully and knowingly made a false report or certification concerning a veteran or his course or training resulting in an improper payment of allowances to the veteran.

(ii) The educational institution or training establishment has willfully and knowingly failed to report to the Veterans' Administration excessive absences from a course or discontinuance or interruption of a course by a veteran, which failure resulted in improper payment of allowances to the veteran.

(iii) The educational institution or training establishment through gross negligence has submitted improper and incorrect reports which caused improper payment of allowances to veterans. This condition will not be found to exist where the improper report occurs only in an isolated instance or instances, or where it is the first occurrence and the educational institution or training establishment has not been notified previously in writing, or where the improper report or reports represent a very small proportion of the reports submitted by the educational institution or training establishment and may be attributed to clerical errors and are shown not to be the result of the failure of the educational institution or training establishment to provide a recording and reporting procedure which under normal circumstances would have resulted in proper reports to the Veterans' Administration.

(iv) The educational institution or training establishment after written notice of a violation of a provision of the law or of a fallure of the course to meet a specific requirement of the law other than one of the approval criteria, has failed to correct the situation within 30 days of date of such notice or has knowingly and willfully repeated the violation.

(v) A proprietary educational institution, profit or nonprofit, willfully and knowingly has falsely certified in connection with the enrollment of a veteran in a nonaccredited course below the college level, that not more than 85 percent of the students enrolled in the course at the time of the certification are having all or any part of their tuition and fees paid to or for them by the educational institution or the Veterans' Administration under Part VII or Part VIII of Veterans Regulation 1 (a) or this law.

(vi) The educational institution willfully and knowingly has charged or received from an eligible veteran any amount in excess of the established charges for tuition and fees which the educational institution requires similarly circumstances nonveterans enrolled in the same course to pay, except as provided in § 21.2067.

(vii) The educational institution or training establishment fails or refuses to make available for examination to duly authorized representatives of the Government records and accounts pertaining to the training of eligible veterans enrolled therein under the law.

(viii) When in accordance with section 256 (b) of the law the requirements of section 251, 252, or 254 of the law with regard to courses of education or training are not being met in respect to a substantial number of veterans and, written notice having been given to the State approving agency as to specific requirements not being met, the failures have not been eliminated within 30 days after such notice.

(3) There shall be established in each regional office a committee on educational allowances comprised of 3 staff employees of the regional office, one of whom shall be the chief of the vocational rehabilitation and education division and the others as designated by the manager. There is hereby delegated to the committee on educational allowances the authority to determine that the education and training allowance of all eligible veterans enrolled in a course or courses offered by an educational institution or training establishment shall be discontinued when the committee finds any one of the conditions set forth in subparagraph (2) (i) through (vii) of this paragraph to exist. The decision of the committee relating to any one of the conditions set forth in subparagraph (2) (i) through (vii) of this paragraph with respect to the discontinuance of allowances shall be the final administrative determination of the Veterans' Administration unless within a period of 30 days following such decision there is filed with the Assistant Deputy Administrator for Vocational Rehabilitation and Education by the manager of the regional office, the educational institution or the training establishment, a written request for a review of such decision setting forth the alleged errors of fact or conclusion with a brief of the points relied upon to establish such error. In any case where a request for a review is filed within 30 days, the final administrative decision will be made in accordance with the provisions of § 21.2209.

(4) Where the manager reasonably establishes that a condition exists as set forth in subparagraph (2) of this paragraph which would require the discontinuance of the education and training allowance of all eligible veterans enrolled in a course or courses offered by an educational institution or training establishment, he will refer the matter immediately to the committee on educational allowances for action as provided in subparagraph (8) of this paragraph. Where a case is referred to the committee because of the condition set forth in subparagraph (2) (viii) of this paragraph and the committee finds, after a hearing if requested, that the requirements of section 251, 252, or 254 of the law are not being met with respect to a substantial number of veterans, a report of the committee's findings and the basis therefor and its recommended decision will be forwarded to the Assistant Deputy Administrator for Vocational Rehabilitation and Education for final administrative decision as provided in § 21.2209.

(5) Where the manager finds that the course apparently fails to meet the requirements of the law or that an educational institution or training establishment has apparently violated any provision of the law or has failed to meet any of its requirements and where such failure or violation does not involve any of the specific criteria upon which the approval of the course was based or it is not one which would cause the discontinuance of the education and training allowance to all eligible veterans as set forth in subparagraph (2) of this paragraph, the manager, unless the matter has already been satisfactorily adjusted through a visit of an educational benefits representative or otherwise, will forward to the educational institution or training establishment a summary of the facts and his conclusions, advising the educational institution or training establishment of the asserted failure or violation. The educational institution or training establishment will be requested to report to the Veterans' Administration within 30 days from the date of the notice as

to the correction or noncorrection of the asserted failure or violation or to submit a rebuttal of the reported failure or violation. If the educational institution or training establishment takes proper corrective action, any appropriate adjustments in individual veterans' cases will be made by the vocational rehabilitation and education division and the case will not be referred to the committee on educational allowances. If the reply of the educational institution or training establishment discloses that the failure or violation is not corrected or if no reply is received within 30 days of the date of notification, the case will be referred to the committee on educational allowances for action as provided in subparagraph (8) of this paragraph on the day following the date of receipt of the reply or the day following the expiration of the 30-day period, whichever is earlier.

(6) Where the manager finds that an educational institution, training establishment, or course apparently fails to meet any one of the specific criteria provided in section 251, 252, or 254 of the law upon the basis of which the course was approved by the State approving agency for the enrollment of veterans, he shall forward immediately to the appropriate State approving agency a summary of the facts and his conclusions advising that further action by the Veterans' Administration will be held in abeyance for a period of 30 calendar days to enable the State approving agency to ascertain the facts and report to the Veterans' Administration as to its findings and conclusions and any action taken with respect thereto and as a result thereof. Where the action taken by the State approving agency results in disapproval, the case will not be referred to the committee on educational allowances but payments to veterans will be discontinued effective the date the notice of disapproval is received in the Veterans' Administration or the effective date of the disapproval, whichever is later. If, as a result of the action by the State approving agency, the failure or violation is eliminated or corrected, any appropriate adjustments in individual veterans' cases will be made by the vocational rehabilitation and education division and the case will not be referred to the committee on educational allowances. Where the State approving agency fails to act by the end of the 30-day period or if the approval is continued where, in the opinion of the manager, the failure or violation has not been eliminated or corrected, the case will be referred to the committee on educational allowances for action as provided in subparagraph (8) of this paragraph.

(7) Where the manager finds that an accredited course or an educational institution offering such course apparently fails to meet either of the specific criteria provided in section 253 (b) of the law upon the basis of which the course was approved by the State approving agency for the enrollment of veterans, he shall forward immediately to the appropriate State approving agency a summary of the facts to enable the State approving agency to make any inquiry or to take any action deemed by it to be necessary. Where the action taken by the State approving agency results in disapproval, payments to veterans will be discontinued effective the date the notice of disapproval is received in the Veterans' Administration or the effective date of the disapproval, whichever is later. If, as a result of the action by the State approving agency, approval of the educational institution or course is continued, the decision of the State approving agency will be considered to be final.

(8) In all cases referred by the manager for consideration of the committee on educational allowances, the committee will arrange for a hearing to be held within 15 calendar days from the date of receipt. The educational institution or training establishment (and the State approving agency where a specific approval criterion as provided in section 251, 252, or 254 of the law is involved) will be advised immediately in writing of the date and place of the hearing and reason therefor, and of the opportunity to appear before the committee on educational allowances and present arguments or briefs in the matter of the asserted failure or violation or to submit a written statement thereof prior to the date of the hearing. The educational institution or training establishment may be represented by counsel but no expenses of counsel or witnesses for the educational institution or training establishment will be borne by the Veterans' Administration. A record of the hearing will be made and a copy given to the educational institution or training establishment and the State approving agency. By unanimous or majority concurrence of its members, the committee on educational allowances shall render a decision or recommend a decision, as appropriate, within a period of not more than 7 calendar days after the date on which the hearing is held. Such decision or recommended decision will be in accordance with the facts established by a preponderance of evidence, provided that in any case of a course approved under section 251, 252, or 254 of the law, where the question is limited to the exercise of judgment as to quality and content of the course of instruction, the adequacy of instructional equipment, space, and material or the educational experience and qualifications of directors, administrators, instructors, and trainers, the evaluation of the State agency will be accepted unless it is clearly and unmistakably established that the requirements of the law are not being met. The decision or recommended decision of the committee shall be in writing and shall include a concise resume of the facts and will set forth clearly a conclusion as to whether payments of allowances shall be discontinued as to veterans already enrolled and withheld as to veterans not already enrolled. The educational institution or training establishment shall be furnished by the manager with a copy of the decision of the committee on educational allowances relating to any one of the conditions set forth in subparagraph (2) (i) through (vii) of this paragraph, and will be informed of the finality of such decision unless a review is requested as provided in § 21.2209. A copy of a recommended decision of the committee on educational allowances relating to the condition set forth in subparagraph (2) (viii) of this paragraph shall be furnished by the manager to the State approving agency and such agency will be informed of the further action to be taken by the Veterans' Administration. In any case, a copy of the final administrative decision of the Assistant Deputy Administrator for Vocational Rehabilitation and Education shall be furnished by the manager to the educational institution or training establishment and the State approving agency.

(9) In any case where payments of allowances are discontinued because of any one of the conditions set forth in subparagraph (2) of this paragraph, the effective date of such discontinuance will be the date on which a decision was made by the committee on educational allowances, except that, for the condition set forth in subparagraph (2) (viii) of this paragraph, the effective date of discontinuance will be the date notice of final decision by the Assistant Deputy Administrator for Vocational Rehabilitation and Education is received in the regional office.

(10) In any case where payments of allowances are discontinued or the application of a veteran for entrance or reentrance into training is denied because of any of the conditions set forth in subparagraph (2) of this paragraph, the veteran will be informed of the reasons for discontinuance or denial and that his rights to education and training benefits are not otherwise affected.

(11) Adjustments made in the payments of education and training allowances to individual veterans to bring such payments in accord with the established dates of attendance, appropriate full or part-time rates, and like matters are the responsibility of the authorizing officer. In any such case where appeal is timely filed by the veteran for appellate review, the case is for consideration by the board of veterans appeals, the committee on educational allowances having no jurisdiction.

10. A new § 21.2209 is added as follows:

§ 21.2209 *Review of decisions of the committee on educational allowances.* Where the Assistant Deputy Administrator for Vocational Rehabilitation and Education receives from the manager of the regional office, the educational institution, or training establishment, a written request for review of a decision of the committee on educational allowances within a period of 30 days following such decision, or where he receives a recommended decision relating to the condition set forth in § 21.2208 (d) (2) (viii), the interested parties will be afforded an opportunity to appear at a hearing to offer testimony or arguments before a panel instituted for such purpose. The panel will be comprised of one staff employee of the office of the Assistant Deputy Administrator for Vocational Rehabilitation and Education and two designated consultants who are not employees of the Veterans' Administration and will be responsible for reviewing all evidence and testimony and for making a recommendation to the Assistant Deputy Administrator for Vocational Rehabilitation and Education as to the proposed decision. The concurrence of the Assistant Deputy Administrator for Vocational Rehabilitation and Education with a unanimous or majority recommendation of the panel will constitute the final administrative decision of the Veterans' Administration. If the Assistant Deputy Administrator for Vocational Rehabilitation and Education does not concur with the unanimous or majority recommendation of a panel, the matter will be referred by appropriate memorandum to the Administrator for final decision.

11. In § 21.2302, paragraph (h) is amended to read as follows:

§ 21.2302 *Conflicting interests.* * * *

(h) There is hereby delegated to the Assistant Deputy Administrator for Vocational Rehabilitation and Education the authority to grant waivers in the case of any employee who meets the criteria set forth in paragraph (g) of this section and to deny all requests for waivers which do not meet such criteria, except those requests which, in the opinion of the Assistant Deputy Administrator for Vocational Rehabilitation and Education, should be submitted to the Administrator for final decision. The Administrator reserves the right to grant waivers in the case of any employee who does not meet all of the criteria set forth in paragraph (g) of this section, when he determines that no detriment will result to the United States or to eligible veterans by reason of the interest or connection of the officer or employee involved.

12. In § 21.2303, paragraphs (a) (1) and (c) (1) and (2) are amended to read as follows:

§ 21.2303 Reports by institutions—(a) *Certification forms required.* * * *

(1) The enrollment or reenrollment of a veteran shall be certified by the educational institution or training establishment on VA Form 7–1999.

(i) If the veteran is enrolled in an institution of higher learning in an undergraduate curriculum leading to a degree objective, it is expected that the institution's certification of enrollment will designate the specific curriculum or degree objective for which the veteran is enrolled, e. g., A. B. liberal arts, B. S. engineering, B. S. business administration, etc., except that where it is the practice of the institution to enroll students originally in the "lower division" with the selection of the specific field of specialization for the baccalaureate degree objective postponed until the completion of the lower division curriculum, the institution shall certify to the Veterans' Administration as the name of the veteran's course "Lower division—baccalaureate degree," and such a certification will be deemed adequate for Veterans' Administration purposes: *Provided, however,* That at the time of the veteran's next enrollment in his program immediately following the completion of the lower division curriculum, the institution shall certify to the Veterans' Administration the exact degree objective for which the veteran becomes enrolled. This adjustment in the name of the veteran's objective under these circumstances will not be considered to be a change of program.

(ii) If the veteran is enrolled in a junior college, the institution shall certify to the Veterans' Administration the established curriculum in which he is enrolled, e. g., prelaw, preengineering, associate of arts, etc., irrespective of the fact that the veteran may have indicated on his application for a program of education or training that his program objective was a 4-year undergraduate college course leading to a baccalaureate degree.

* * * * *

(c) *Administrative allowance for preparation of reports and certifications.* (1) The Administrator shall pay to each educational institution which is required to submit reports and certifications to the Veterans' Administration under Public Law 550, 82d Congress, an allowance at the rate of $1.50 per month for each eligible veteran enrolled in and attending such institution to assist the educational institution in defraying the expense of preparing and submitting such reports and certifications: *Provided,* That pursuant to the provisions of Public Law 149, 83d Congress, the allowance to be paid to the educational institution for reports and certifications covering attendance on and after September 1, 1953, to and including June 30, 1954, shall be $1.00 per month for each eligible veteran enrolled in and attending the institution.

(2) The amount of such allowance to be paid each eligible institution shall be computed on the basis of $1.50 or $1.00 as provided in subparagraph (1) of this paragraph for each required certification of training actually received by the Veterans' Administration for the reporting period.

* * * * *

13. In § 21.2305, that portion of paragraph (a) preceding subparagraph (1) is amended to read as follows:

§ 21.2305 *Overpayments of education and training allowances and other Veterans' Administration benefits.* (a) Where a veteran has failed to make arrangements with the finance activity to restore or refund an outstanding overpayment of benefits made under laws administered by the Veterans' Administration, and due the Government, the educational benefits activity may not thereafter reenter the veteran into training so long as the overpayment is outstanding. In any such instance, the educational benefits activity will be responsible for giving proper notification to the veteran and the institution.

* * * * *

14. In § 21.2306, paragraph (e) is amended and a new paragraph (f) is added as follows:

§ 21.2306 *Examination of records.* * * *

(e) Each training establishment which is enrolling or has enrolled eligible veterans under Public Law 550, 82d Congress, shall, upon request by duly authorized representatives of the Veterans' Administration or other Federal agencies, make available for examination all appropriate records pertaining to such training including, but not limited to, payroll records, records of progress, and records of attendance.

(f) Failure to make such records available as provided in this section shall be grounds for discontinuing the payment of education or training allowances to veterans enrolled under Public Law 550 in such educational institutions or training establishments. (See § 21.2208.)

15. Section 21.2307 is revised to read as follows:

§ 21.2307 *False or misleading statements.* The Veterans' Administration shall not make any payments under Public Law 550, 82d Congress, to any person found by the Veterans' Administration to have willfully submitted any false or misleading claim. In each case where the manager of a regional office finds that an educational institution or training establishment has willfully submitted a false or misleading claim, or where a veteran, with the complicity of an educational institution or training establishment has submitted such a claim, the manager shall make a complete report of the facts of the case to the appropriate State approving agency and, where deemed advisable, to the United States District Attorney, for appropriate action. The latter shall be done in accordance with existing Veterans' Administration Regulations by the chief attorney or the General Counsel, if he is of the opinion that there is a basis for either civil or criminal action.

16. In paragraph (a) of § 21.2308, the unnumbered portions following subparagraphs (4) and (6) are amended to read as follows:

§ 21.2308 *Criminal penalties and forfeitures; forfeiture of rights.* (a) * * *

(4) * * *

such employee shall refer the case of the chief attorney within a regional office or the General Counsel, if in central office, who, after such preliminary investigation as may be necessary, will determine

* * * * *

(6) * * *

In the event of affirmative finding as to subparagraph (5) of this paragraph, the chief attorney, or the General Counsel, will refer the case to the United States Attorney or to the Department of Justice, as the case may be, for consideration or any necessary action; and, if the finding as to subparagraph (6) of this paragraph be in the affirmative, that is, that the forfeiture provisions of Public 2, 72d Congress, are involved, will refer the case to the appropriate adjudication officer for reference to the committee on waivers and forfeitures of central office.

(Sec. 261, 66 Stat. 678)

This regulation is effective November 6, 1953.

[SEAL] CHARLES W. CURRAN,
*Acting Chief,*
*General Administrative Division.*

### [ 7 CFR Part 61 ]

COTTONSEED SOLD OR OFFERED FOR SALE FOR CRUSHING PURPOSES (INSPECTION, SAMPLING, AND CERTIFICATION)

REVISION OF FEES FOR REVIEW GRADING OF COTTONSEED

By virtue of the authority vested in me by order of the Secretary of Agriculture dated August 7, 1953 (18 F. R. 4839), notice is hereby given that the United States Department of Agriculture is considering amending § 61.46 of the regulations governing cottonseed sold or offered for sale for crushing purposes (7 CFR, Part 61), pursuant to the authority contained in the Department of Agriculture Appropriation Act, 1954 (Pub. Law 156, 83rd Cong., approved July 28, 1953).

Under the proposed amendment the fee for the review of the grading of any lot of cottonseed would be increased from $6.00 to $9.00. Of each such fee collected $1.00 would be covered into the Treasury of the United States and $4.00 disbursed to each of the two licensed chemists designated to make reanalyses of the seed. This change is proposed because the operating expenses of licensed chemists in connection with the performance of their duties incident to review gradings have increased substantially since June 1943—the effective date of the $6.00 fee. The prevailing fee charged by licensed chemists for an analysis of a cottonseed sample is approximately $4.00.

Section 61.46 would be changed to read as follows under the proposed amendment:

§ 61.46 *Fees for review of grading of cottonseed.* For the review of the grading of any lot of cottonseed the fee shall be $9.00. Remittance to cover such fee, in the form of a certified check, draft, or money order payable to the Treasurer of the United States, shall accompany each application for review. Of each such fee collected $1.00 shall be covered into the Treasury and $4.00 disbursed to each of the two licensed chemists designated to make reanalyses of such seed.

Any interested person who wishes to submit written data, views, or arguments concerning the proposed amendment may do so by filing them with the Director, Cotton Branch, Production and Marketing Administration, United States Department of Agriculture, Washington 25, D. C., not later than 15 days after publication of this notice in the FEDERAL REGISTER.

Done at Washington, D. C., this 2d day of November 1953.

[SEAL] HOWARD H. GORDON,
*Administrator.*

[F. R. Doc. 53-9401; Filed, Nov. 5, 1953; 8:52 a. m.]

## FEDERAL COMMUNICATIONS COMMISSION

### [ 47 CFR Parts 7, 8 ]

[Docket No. 10724]

STATIONS ON LAND AND SHIPBOARD IN MARITIME SERVICES

EXTENSION OF TIME FOR FILING COMMENTS

In the matter of amendment of Parts 7 and 8 of the Commission's rules to delete authority for operation in the Mississippi River system areas by coast stations and ship stations, on currently assignable frequencies for telephony within the band 4000 kc to 18,000 kc; and to include authority for operation by such stations on other frequencies for telephony within the same band; Docket 10724.

The American Waterways Operators, Inc., has requested a forty-five day extension of time in which to comment on the subject docket involving the plan of frequency assignments to be utilized on the "Rivers" maritime mobile system.

The Commission is of the opinion that an extension of this length of time will seriously handicap the overall solution of several National frequency problems involving other services. However in an effort to permit sufficient time for the American Waterways Operators, Inc., to assemble their comments, an extension of two weeks is being made.

The original date for filing comments was November 4, 1953. This time is hereby extended to November 18, 1953.

Adopted: November 2, 1953.

Released: November 3, 1953.

FEDERAL COMMUNICATIONS COMMISSION,
[SEAL] WM. P. MASSING,
*Acting Secretary.*

## FEDERAL COMMUNICATIONS COMMISSION

[Docket No. 10734]

ARCTIC RADIO TELEPHONE CO.

ORDER ASSIGNING MATTER FOR HEARING

In the matter of revocation of license of Aeronautical and Aeronautical Fixed Station KXD6/KWX75, Arctic Radio Telephone Company, P. O. Box 1601, Anchorage, Alaska; Docket No. 10734.

The Commission having under consideration alleged violations of the Communications Act of 1934, as amended, and the terms of the license wilfully committed by the licensee of the above-described station;

It appearing, that the above-designated licensee has wilfully transferred the control of Station KXD6/KWX75 in violation of section 310 (b) of the Communications Act of 1934, as amended, and the expressed terms of the license, by leasing the station to the Standard Oil Company, installing it on the premises of that Company's agent and permitting it to be operated by the said agent;

It further appearing, that the above station is being operated as a facility duplicating the service of Station KWS7/KWF74 in violation of the expressed terms of the license, by being operated at an unauthorized location;

*It is ordered*, Pursuant to section 312 (c) of the Communications Act of 1934, as amended, that Arctic Radio Telephone Company show cause why the license of its Aeronautical and Aeronautical Fixed Station KXD6/KWX75 should not be revoked; and

*It is further ordered*, That a hearing in this matter will be held in Washington, D. C., on the 14th day of December, 1953, in order to determine whether an order revoking said license should be issued and that Arctic Radio Telephone Company is herewith called upon to appear at this hearing and give evidence upon the matters specified herein; [1] and

*It is further ordered*, That the Acting Secretary shall mail a copy of this order to the licensee by Registered Mail—Return Receipt Requested.

Adopted: October 29, 1953.

Released: November 2, 1953.

FEDERAL COMMUNICATIONS COMMISSION,
[SEAL] WM. P. MASSING,
*Acting Secretary.*

[F. R. Doc. 53-9405; Filed, Nov. 5, 1953; 8:53 a. m.]

[1] Section 1.402 of the Commission's rules provides that in order to avail himself of the opportunity to appear before the Commission at the time and place specified in the Show Cause Order, the licensee shall within thirty (30) days from the date of receipt of this order inform the Commission in writing whether he will appear or whether he waives his rights to a hearing. Waiver of a hearing may be accompanied by a statement of reasons why said licensee believes that an Order of Revocation should not be issued. A waiver unaccompanied by such a statement will be deemed to be an admission of the allegations specified in this order. Failure to respond within the above 30-day period, or failure to appear at the hearing, will be deemed to be a waiver of the right to a hearing and an admission of the allegations specified in the Order to Show Cause.

[1] Section 1.402 of the Commission's rules provides that in order to avail himself of the opportunity to appear before the Commission at the time and place specified in the Show Cause Order, the licensee shall within thirty (30) days from the date of receipt of this order inform the Commission in writing whether he will appear or whether he waives his rights to a hearing. Waiver of a hearing may be accompanied by a statement of reasons why said licensee believes that an Order of Revocation should not be issued. A waiver unaccompanied by such a statement will be deemed to be an admission of the allegations specified in this order. Failure to respond within the above 30-day period, or failure to appear at the hearing, will be deemed to be a waiver of the right to a hearing and an admission of the allegations specified in the Order to Show Cause.

STATEMENTS OF ORGANIZATION, DELEGATIONS OF AUTHORITY AND PUBLIC INFORMATION

AMATEUR AND COMMERCIAL RADIO OPERATOR EXAMINATION POINTS

In the matter of amendment of 0.213 (c) regarding amateur and commercial radio operator examination points.

The Commission having under consideration a modification of its amateur and commercial radio operator license examination points; and

It appearing, that the number of examinations given at certain points does not warrant further scheduling of examinations at such points and at certain other points examinations may be given annually rather than semiannually; and

*It is ordered*, Pursuant to authority delegated to the Secretary after having secured approval of the Field Engineering and Monitoring Bureau and pursuant to authority contained in section 4 (i) and 303 (r) of the Communications Act of 1934 as amended and section 3 (a) of the Administrative Procedure Act that section 0.213 (c) of the Commission's rules be amended as set forth below effective immediately.

Adopted: October 30, 1953.

Released: October 30, 1953.

FEDERAL COMMUNICATIONS COMMISSION,
[SEAL] WM. P. MASSING,
*Acting Secretary.*

Amend Section 0.213 (c) to read as follows:

Sec. 0.213 (c) Radio Operator Examinations are given frequently under announced schedules at the Commission's Washington examination office at Room 104, Briggs Building, Twenty-second and E Streets NW., Washington 25, D. C. and at each of the Commission's field offices listed in section 0.40. Examinations are also given frequently, by appointment, at the Commission's offices at the following points: Savannah, Ga.; San Diego, Calif.; Tampa, Fla.; Mobile, Ala.; Juneau, Alaska; and Anchorage, Alaska.

Examinations are also given at less frequent intervals at the places named below, which are visited for that purpose by Commission examiners from the district offices. For current schedules, exact time, place, and other details, inquiry should be addressed to the office conducting examinations at the chosen point.

## DEPARTMENT OF COMMERCE

### Civil Aeronautics Administration

[Amdt. 27]

ORGANIZATION AND FUNCTIONS

CONVERSION OF AVIATION SAFETY DISTRICT OFFICE AT SAN JUAN, P. R., TO INTERNATIONAL FIELD OFFICE

In accordance with the public information requirements of the Administrative Procedure Act, the description of the Organization and Functions of the Civil Aeronautics Administration is hereby amended. The purpose of this amendment is to discontinue the CAA Aviation Safety District Office at San Juan, P. R., and to establish in its place a CAA International Field Office. The area served by the CAA International Field Office at San Juan, P. R., shall include Puerto Rico, the Virgin Islands, the Dominican Republic, Haiti, the Lesser Antilles (British and French), Trinidad, and British, French and Dutch Guiana.

1. Section 43 (h) (4) (ii), published on October 15, 1953, in 18 F. R. 6571, is amended by deleting from the table for Region II the line which reads: "Puerto Rico, San Juan, Room 226, Hangar 20, Isla Grande Airport, P. O. Box 4764, (C)".

2. Section 44 (c) (2) (ii), published on August 9, 1952, in 17 F. R. 7307, is amended by adding to the list of CAA International Field Offices the following:

San Juan, P. R., CAA International Field Office, Room 226, Hangar 20, Isla Grande Airport, San Juan, P. R. (P. O. Box 4764, Isla Grande Airport, San Juan, P. R.)

This amendment shall become effective upon publication in the FEDERAL REGISTER.

## FEDERAL POWER COMMISSION

[Docket No. E-6499]

DELAWARE POWER AND LIGHT CO. ET AL.

NOTICE OF POSTPONEMENT OF HEARING

OCTOBER 30, 1953.

In the matter of Delaware Power and Light Company, the Eastern Shore Public Service Company of Maryland, Eastern Shore Public Service Company of Virginia; Docket E-6499.

Upon consideration of the request by Counsel for Delaware Power & Light Company filed October 27, 1953, for a continuance of the hearing now scheduled to commence on November 23, 1953:

Notice is hereby given that the hearing in the above-designated matter is postponed to be held on December 10, 1953, at 10:00 a. m., in the Commission's Hearing Room, 441 G Street NW., Washington, D. C., and the date upon which the respondent companies are required to submit the cost of service study, rates, etc., is postponed to November 23, 1953.

*Secretary.*

[F. R. Doc. 53-9371; Filed, Nov. 5, 1953; 8:45 a. m.]

[Docket No. E-6529]

WEST PENN POWER CO.

NOTICE OF APPLICATION

OCTOBER 30, 1953.

Take notice that on October 29, 1953, an application was filed with the Federal Power Commission pursuant to section 203 of the Federal Power Act by the West Penn Power Company (hereinafter called West Penn), a corporation organized under the laws of the Commonwealth of Pennsylvania and doing business in the States of West Virginia and Pennsylvania, with its principal business office at Pittsburgh, Pennsylvania, seeking an order authorizing West Penn to acquire from the Natrona Light and Power Company of Pennsylvania (hereinafter called Natrona), a Pennsylvania corporation with its principal business office at Philadelphia, Pennsylvania, all of the latter's electric transmission and distribution facilities situated in the Borough of Brackenridge and the Township of Harrison, Allegheny County, Pennsylvania, except that part of the transmission and the distribution plant which is located on the plant site of Pennsylvania Salt Manufacturing Company and used solely for the purpose of distributing electric current to its manufacturing operations. West Penn proposes to buy and Natrona proposes to sell said transmission and distribution facilities for a cash consideration of $508,000, subject to certain adjustments; all as more fully appears in the application on file with the Commission.

Any person desiring to be heard to make any protest with respect to said application, should on or before the 20th day of November 1953, file with the Federal Power Commission, Washington 25, D. C., the objection or protest in accordance with the Commission's rules of practice and procedure.

The application is on file with the Commission for public inspection.

[SEAL] LEON M. FUQUAY,
*Secretary.*

[F. R. Doc. 53-9372; Filed, Nov. 5, 1953; 8:45 a. m.]

[Docket No. E-6530]

LAKE SUPERIOR DISTRICT POWER CO.

NOTICE OF APPLICATION

OCTOBER 30, 1953.

Take notice that on October 29, 1953 an application was filed with the Federal Power Commission pursuant to section 203 of the Federal Power Act by the Lake Superior District Power Company (hereinafter called Lake Superior), a corporation organized under the laws of the State of Wisconsin and doing business in the States of Michigan and Wisconsin, with its principal business office at Ashland, Wisconsin, seeking an order authorizing the merger of its facilities with those of Northern Wisconsin Power Company (hereinafter called Northern Wisconsin), a Wisconsin corporation with its principal place of business at Ashland, Wisconsin.

Lake Superior, as owner of all of the outstanding capital stock of Northern Wisconsin, will consolidate the electric operating facilities of the latter with its electric operating facilities with no substantial change in the present use of the facilities of either Northern Wisconsin or Lake Superior. The transmission systems of both companies are presently physically connected and Lake Superior, as the surviving corporation, proposes to continue to render the service heretofore rendered by Northern Wisconsin; all as more fully appears in the application on file with the Commission.

Any person desiring to be heard or to make any protest with respect to said application, should on or before the 20th day of November 1953, file with the Federal Power Commission, Washington 25, D. C., a petition or protest in accordance with the Commission's rules of practice and procedure. The application is on file with the Commission for public inspection.

[Docket Nos. G-2016, G-2297]

SOUTHERN COUNTIES GAS CO. OF CALIFORNIA

ORDER SUSPENDING PROPOSED RATE SCHEDULES AND CONSOLIDATING PROCEEDINGS

On September 30, 1953, Southern Counties Gas Company of California (Southern) filed Third Revised Sheet No. 4 and Fourth Revised Sheet No. 5 to its FPC Gas Tariff, Original Volume No. 1, containing increased rates and charges which are proposed to be made effective as of November 1, 1953.

The proposed revision would result in an estimated increase of $21,000 in the presently effective rates and charges to the San Diego Gas and Electric Company (San Diego) based on Southern's sales for the twelve-month period ending June 30, 1953. This proposed increase arises in connection with a proposed change in rate form which Southern alleges is necessary. The new filing retains the cost of service facility charge associated with the Moreno-Rainbow lateral used exclusively to serve San Diego and introduces a demand-commodity type rate for the present fixed main line facility charge and commodity charge.

The increased rates and charges and the change in the form of the rate provided in said proposed Third Revised Sheet No. 4, and Fourth Revised Sheet No. 5 as filed on September 30, 1953, have not been shown to be justified, and may be unjust or unreasonable.

By order issued August 1, 1952, the Commission suspended Southern's proposed rate increase of $495,000 in Docket No. G-2016 pending hearing and decision as to the lawfulness of such rates. Thereafter, by order of the Commission the proposed rates were allowed to go into effect under bond effective January 1, 1953. The present filing constitutes a further increase above the rates now in effect under bond.

Inasmuch as the issues involved in both dockets relate to the lawfulness of the rate charged for gas sold by Southern to San Diego, it is appropriate to consolidate the matters for hearing and disposition.

The Commission finds: It is necessary and proper in the public interest and to aid in the enforcement of the provisions of the Natural Gas Act that the above-docketed proceedings be consolidated and that the Commission enter upon a hearing, pursuant to the authority contained in section 4 of such act, concerning the lawfulness of (a) Southern's FPC Gas Tariff, Original Volume No. 1, as amended by Second Revised Sheet No. 4 and Third Revised Sheet No. 5 and as proposed to be amended by Third Revised Sheet No. 4 and Fourth Revised Sheet No. 5 and (b) service agreements under said tariff, and that said Third Revised Sheet No. 4 and Fourth Revised Sheet No. 5 and the rate schedules therein contained be suspended as hereinafter provided and the use thereof be deferred pending hearing and decision thereon.

The Commission orders:

(A) The matters involved in the above-docketed proceedings be and they hereby are consolidated for purposes of hearing and disposition.

(B) Pursuant to the authority contained in section 4 of the Natural Gas Act, a public hearing be held at a time and place to be fixed by further order of the Commission concerning the lawfulness of the rates, charges, and classifications contained in Southern's FPC Gas Tariff, Original Volume No. 1, as amended by Second Revised Sheet No. 4 and Third Revised Sheet No. 5 and as proposed to be amended by Third Revised Sheet No. 4 and Fourth Revised Sheet No. 5.

(C) Pending such hearing and decision thereon, Third Revised Sheet No. 4 and Fourth Revised Sheet No. 5 to Southern's FPC Gas Tariff, Original Volume No. 1, be and the same are hereby suspended and the use thereof is deferred until April 1, 1954, unless otherwise ordered by the Commission, and until such further time thereafter as said proposed sheets may be made effective in the manner prescribed by the Natural Gas Act.

(D) Interested State commissions may participate as provided by §§ 1.8 and 1.37 (f) (18 CFR 1.8 and 1.37 (f)) of the Commission's rules of practice and procedure.

Adopted: October 29, 1953.

Issued: October 30, 1953.

By the Commission.

[Docket No. G-2218]

FREDERICK GAS CO., INC.

ORDER FIXING DATE OF HEARING

Frederick Gas Company, Inc. (Applicant), a corporation with its principal place of business at 55 East Patrick Street, Frederick, Maryland, on July 23, 1953, filed an application as supplemented on October 12, 1953, for a certificate of public convenience and necessity pursuant to section 7 of the Natural Gas Act, authorizing Applicant to sell natural gas to the Washington Gas Light Company of Maryland, Inc., or Washington Gas Light Company, for resale to customers along that portion of Applicant's transmission gas pipeline located in Montgomery County, Maryland, as described in the application on file with the Commission and open to public inspection.

The Commission finds:

(1) This proceeding is a proper one for disposition under the provisions of § 1.32 (b) (18 CFR 1.32 (b)) of the Commission's rules of practice and procedure, Applicant having requested that the application be heard under the shortened procedure provided by the aforesaid rule for noncontested proceedings, and no request to be heard, protest, or petition having been filed subsequent to the giving of due notice of the filing of the application, including publication in the FEDERAL REGISTER on August 8, 1953 (18 F. R. 4736).

(2) It is reasonable and in the public interest and good cause exists for fixing the date of hearing in this proceeding less than 15 days after publication of this order in the FEDERAL REGISTER.

The Commission orders:

(A) Pursuant to the authority contained in and subject to the jurisdiction conferred upon the Federal Power Commission by sections 7 and 15 of the Natural Gas Act, and the Commission's rules of practice and procedure, a hearing be held on November 9, 1953, at 9:30 a. m., e. s. t., in the Hearing Room of the Federal Power Commission, 441 G Street NW., Washington, D. C., concerning the matters involved and the issues presented by the application herein: *Provided, however*, That the Commission may, after a noncontested hearing, dispose of the proceeding pursuant to provisions of § 1.32 (b) of the Commission's rules of practice and procedure.

(B) Interested State commissions may participate as provided by §§ 1.8 and 1.37 (f) (18 CFR 1.8 and 1.37 (f)) of the said rules of practice and procedure.

Adopted: October 29, 1953.

Issued: October 30, 1953.

By the Commission.

[SEAL] LEON M. FUQUAY, *Secretary.*

[Docket No. G-2219]

TEXAS ILLINOIS NATURAL GAS PIPELINE CO.

ORDER FIXING DATE OF HEARING

The Commission, by order issued July 29, 1953, in the above matter, provided for hearing at a time and place to be fixed by further order, and suspended and deferred the use until January 1, 1954, of Second Revised Sheets Nos. 5, 6, 9, and 10 and First Revised Sheets Nos. 11 and 12–A to Texas Illinois Natural Gas Pipeline Company's FPC Gas Tariff, Original Volume No. 1.

The Commission finds: It is necessary and proper in the public interest that the hearing be held, pursuant to the authority contained in section 4 of the act, concerning the lawfulness of Texas Illinois' FPC Gas Tariff, Original Volume No. 1, as proposed to be amended by Second Revised Sheets Nos. 5, 6, 9 and 10 and First Revised Sheets Nos. 11 and 12–A, at the time and place hereinafter ordered.

The Commission orders:

(A) Pursuant to the authority contained in section 4 of the Natural Gas Act, a public hearing be held, commencing February 1, 1954, at 10:00 a. m. e. s. t., in the Hearing Room of the Federal Power Commission, 441 G Street NW., Washington, D. C., concerning the lawfulness of the rates, charges, classifications and services contained in Texas Illinois Natural Gas Pipeline Company's FPC Gas Tariff, Original Volume No. 1, as proposed to be amended by Second Revised Sheets Nos. 5, 6, 9, and 10 and First Revised Sheets Nos. 11 and 12–A.

(B) At the hearing, the parties, including Commission Staff Counsel, may reserve cross-examination until after Texas Illinois has presented and completed its case-in-chief.

(C) Texas Illinois, on or before January 22, 1954, shall serve upon all parties copies of the testimony and exhibits it proposes to offer at the time of hearing, including five (5) copies upon Commission Staff Counsel.

(D) Interested State commissions may participate as provided by §§ 1.8 and 1.37 (f) (18 CFR 1.8 and 1.37 (f)) of the Commission's rules of practice and procedure.

Adopted: October 29, 1953.

Issued: October 30, 1953.

By the Commission.

[Docket No. G-2265]

CITIES SERVICE GAS CO.

ORDER FIXING DATE OF HEARING

Cities Service Gas Company (Applicant), a Delaware corporation having its principal place of business in Oklahoma City, Oklahoma, on October 5, 1953 filed an application for a certificate of public convenience and necessity pursuant to section 7 of the Natural Gas Act, for authority to construct and operate approximately 17,000 feet of 4-inch pipe line extending westerly from a point of connection with its 12-inch pipe line to Grandview Air Force Base in Cass County, Missouri, all as more fully described in the application on file with the Commission and open to public inspection.

Applicant has requested that its application be heard under the shortened procedure provided by § 1.32 (b) of the Commission's rules of practice and procedure (18 CFR 1.32 (b)) for noncontested proceedings.

Notice of the filing of the application has been given, including publication in the FEDERAL REGISTER on October 21, 1953 (18 F. R. 6693).

The Commission finds: This proceeding is a proper one for disposition under the provisions of § 1.32 (b) (18 CFR 1.32 (b)) of the Commission's rules of practice and procedure.

The Commission orders:

(A) Pursuant to the authority contained in and subject to the jurisdiction conferred upon the Federal Power Commission by sections 7 and 15 of the Natural Gas Act, and the Commission's rules of practice and procedure, a public hearing be held on November 19, 1953, at 9:45 a. m., e. s. t., in a Hearing Room of the Federal Power Commission, 441 G Street NW., Washington, D. C., concerning the matters involved and issues presented by such application: *Provided, however*, That the Commission may, after a noncontested hearing, forthwith dispose of the proceeding pursuant to the provisions of § 1.32 (b) of the Commission's rules of practice and procedure.

(b) Interested State commissions may participate as provided by §§ 1.8 and 1.37 (f) (18 CFR 1.8 and 1.37 (f)) of such rules of practice and procedure.

Adopted: October 29, 1953.

Issued: October 30, 1953.

By the Commission.

## SECURITIES AND EXCHANGE COMMISSION

[File Nos. 31-613, 31-615, 31-616, 70-3141]

CLEVELAND-CLIFFS IRON CO. AND CLIFFS POWER AND LIGHT CO.

ORDER GRANTING APPLICATIONS WITH RESPECT TO ACQUISITION OF COMMON STOCK OF NONAFFILIATED ELECTRIC UTILITY COMPANY AND REQUESTING EXEMPTIONS; ORDER DISMISSING APPLICATION REQUESTING EXEMPTION

OCTOBER 30, 1953.

In the matter of The Cleveland-Cliffs Iron Company, File No. 70-3141, File No. 31-613; The Cliffs Power and Light Company, File No. 31-616.

The Cleveland-Cliffs Iron Company ("Cliffs Iron"), an exempt holding company, and The Cliffs Power and Light Company ("Power Company"), an electric utility company and a wholly-owned subsidiary of Cliffs Iron, having filed applications, and amendments thereto, requesting (a) approval pursuant to sections 9 (a) (2) and 10 of the Public Utility Holding Company Act of 1935 ("act") of the indirect acquisition by Cliffs Iron, through Power Company, of one-half of the capital stock of Upper Peninsula Generating Company ("Generating Company"), a nonaffiliated electric utility company (File No. 70-3141), and (b) exemption pursuant to sections 3 (a) (1) (File No. 31-616), 3 (a) (3) (A) (File No. 31-615), and 3 (a) (3) (B) (File No. 31-613) of themselves, as holding companies, and of their subsidiaries, as such, from the provisions of the act;

Due notice having been given of the filing of the said applications and a hearing thereon not having been requested of, or ordered by the Commission; and the Commission having examined said applications, as amended, and finding that with respect to said applications other than that filed for exemption under section 3 (a) (3) (B) the applicable provisions of the act are satisfied and not observing any basis for adverse findings with respect to the indirect acquisition by Cliffs Iron of the capital stock of Generating Company, and deeming that under existing circumstances the granting of the applications for exemption pursuant to sections 3 (a) (1) and 3 (a) (3) (A) would not be detrimental to the public interest or the interest of investors and consumers; and Cliffs Iron having stated that upon acquisition by Cliffs Power of the stock of Generating Company, as proposed, an exemption to Cliffs Iron under section 3 (a) (3) (B) will no longer be available;

Applicants having requested that the Commission's order to be entered herein become effective upon issuance, and it appearing that the estimated fees and expenses in connection with the acquisition of the stock of Generating Company, aggregating $4,267.50, including legal fees of $2,000, are not unreasonable;

*It is ordered*, Pursuant to Rule U-23 and the applicable provisions of the act that Cliffs Iron's application, as amended, to acquire indirectly one-half of the capital stock of Generating Company be, and the same hereby is, granted forthwith, subject to the terms and conditions provided in Rule U-24.

*It is further ordered*, That the applications, as amended, of Cliffs Iron and of Power Company for exemption pursuant to sections 3 (a) (1) and 3 (a) (3) (A) be, and the same hereby are, granted forthwith.

*It is further ordered*, That Cliffs Iron's application for exemption pursuant to section 3 (a) (3) (B) be, and the same hereby is, dismissed, without prejudice.

By the Commission.

[File No. 31-614]

AMERICAN & FOREIGN POWER CO., INC.

ORDER GRANTING EXEMPTIONS

NOVEMBER 2, 1953.

American & Foreign Power Company Inc. ("Foreign Power"), a registered holding company and a subsidiary of Electric Bond and Share Company, also a registered holding company, having filed an application requesting exemption of itself, as a holding company, and itself and its direct and indirect subsidiaries, as subsidiaries, from the provisions of the Public Utility Holding Company Act of 1935 ("act") pursuant to sections 3 (a) (5) and 3 (b) thereof; and

Foreign Power having waived the 30-day waiting period and having requested that the Commission's order herein become effective as soon as practicable; and

Due notice of the filing of said application having been given and no hearing thereon having been ordered by or re-

quested of the Commission, and Foreign Power having agreed that the granting of said application shall not constitute the release of any jurisdiction heretofore reserved by the Commission, in its order dated June 5, 1953 (Holding Company Act Release No. 11976), over fees and expenses concerning the proceedings in respect of the applicant under section 11 (e) of the act, and the Commission having examined the said application and the statements contained therein and having found that the applicable standards of sections 3 (a) (5) and 3 (b) are satisfied and deeming that under existing circumstances the granting of said application would not be detrimental to the public interest or the interest of investors and consumers:

*It is hereby ordered*, That the application of Foreign Power be, and the same hereby is, granted.

*It is further ordered*, That this order shall become effective upon issuance.

By the Commission.

[SEAL] ORVAL L. DUBOIS, *Secretary.*

[File No. 70-3144]

WEST PENN ELECTRIC CO.

NOTICE REGARDING OPEN MARKET ACQUISITIONS OF SECURITIES OF SUBSIDIARY

NOVEMBER 2, 1953.

Notice is hereby given that an application has been filed with this Commission, pursuant to the Public Utility Holding Company Act of 1935 (the "act"), by West Penn Electric Company ("West Penn Electric"), a registered holding company. West Penn Electric has designated sections 9 and 10 of the act as applicable to the proposed transactions which are summarized as follows:

West Penn Electric proposes to purchase in the open market up to, and not in excess of, 600 additional shares of common stock of West Penn Power Company, its subsidiary. West Penn Electric presently owns 3,345,767 shares, or approximately 94.983 percent, of the common stock of West Penn Power Company. The proposed acquisition of additional shares would be accomplished prior to October 1, 1954, and would result in West Penn Electric owning at least 95 percent of such stock. During the preceding twelve months, the reported "over-the-counter" bid prices have ranged from a high of $43 per share to a low of $34.50 per share. The closing bid and asked prices on October 16, 1953 were $39.25 and $40.25, respectively. West Penn Electric would incur no expenses in connection with the proposed acquisition other than usual and customary brokerage commission.

The application states that no State or Federal commission, other than this Commission and the Public Service Commission of Maryland, has jurisdiction over the proposed transactions. West Penn Electric requests that the Commission's order herein become effective upon issuance.

Notice is further given that any interested person may, not later than November 13, 1953, at 5:30 p. m., e. s. t., request in writing that a hearing be held on such matter, stating the nature of his interest, the reasons for such request, and the issues of fact or law, if any, raised by said application which he desires to controvert; or he may request that he be notified if the Commission should order a hearing thereon. Any such request should be addressed: Secretary, Securities and Exchange Commission, 425 Second Street NW., Washington 25, D. C. At any time after said date said application, as filed or as amended, may be granted as provided in Rule U-23 of the rules and regulations promulgated under the act, or the Commission may exempt such transactions as provided in Rule U-20 (a) and Rule U-100 thereof.

By the Commission.

[SEAL] ORVAL L. DUBOIS, *Secretary.*

## GENERAL SERVICES ADMINISTRATION

SECRETARY OF DEFENSE

DELEGATION OF AUTHORITY WITH REGARD TO DISPOSAL OF PORTION OF WATER DISTRIBUTION SYSTEM, ROBINS AIR FORCE BASE, GEORGIA

1. Pursuant to authority vested in me by the provisions of the Federal Property and Administrative Services Act of 1949, as amended (hereinafter referred to as "the act"), I hereby authorize the Secretary of Defense to determine whether the property known as a portion of the water distribution system at Robins Air Force Base, Georgia, is required for the needs and responsibilities of Federal agencies and, should the property be determined to be surplus to the needs of the Federal Government, to dispose of such property by means deemed advantageous to the United States.

2. Prior to such determination and disposal of the property, the Secretary of Defense shall take such steps as may be appropriate to determine whether any Federal agency has need therefor and, if so, shall transfer the property to such agency upon such terms as to reimbursement as may be prescribed in accordance with the provisions of section 202 (a) of the act, as amended.

3. The authority conferred herein shall be exercised in accordance with the act and regulations of this Administration issued pursuant thereto.

4. The authority delegated herein may be redelegated to any officer or employee of the Department of Defense.

5. This delegation of authority shall be effective as of the date hereof.

Dated: November 3, 1953.

## INTERSTATE COMMERCE COMMISSION

[4th Sec. Application 28606]

LUMBER, SASH, AND DOORS BETWEEN IOWA POINTS

APPLICATION FOR RELIEF

NOVEMBER 2, 1953.

The Commission is in receipt of the above-entitled and numbered application for relief from the long-and-short-haul provision of section 4 (1) of the Interstate Commerce Act.

Filed by: W. J. Prueter, Agent, for the Chicago, Burlington & Quincy Railroad Company and Des Moines and Central Iowa Railway Company.

Commodities involved: Lumber, also sash and doors, carloads.

From: Clinton, Iowa.

To: Des Moines and Highland Park, Iowa.

Grounds for relief: Competition with rail carriers and circuitous routes.

Schedules filed containing proposed rates: Chicago, Burlington & Quincy Railroad tariff I. C. C. No. 20343, supp. 2.

Any interested person desiring the Commission to hold a hearing upon such application shall request the Commission in writing so to do within 15 days from the date of this notice. As provided by the general rules of practice of the Commission, Rule 73, persons other than applicants should fairly disclose their interest, and the position they intend to take at the hearing with respect to the application. Otherwise the Commission, in its discretion, may proceed to investigate and determine the matters involved in such application without further or formal hearing. If because of an emergency a grant of temporary relief is found to be necessary before the expiration of the 15-day period, a hearing, upon a request filed within that period, may be held subsequently.

By the Commission.

[4th Sec. Application 28610]

PLASTER FROM BLUE RAPIDS, KANS., TO THE SOUTHWEST

APPLICATION FOR RELIEF

NOVEMBER 2, 1953.

The Commission is in receipt of the above-entitled and numbered application for relief from the long-and-short-haul provision of section 4 (1) of the Interstate Commerce Act.

Filed by: F. C. Kratzmeir, Agent, for carriers parties to his tariff I. C. C. No. 4031.

Commodities involved: Plaster and related articles, carloads.

From: Blue Rapids, Kans.

To: Points in southwestern territory.

Grounds for relief: Rail competition, circuity, and to apply over short tariff routes rates constructed on the basis of the short line distance formula.

Schedules filed containing proposed rates: F. C. Kratzmeir's tariff I. C. C. No. 4031, supp. 20.

Any interested person desiring the Commission to hold a hearing upon such application shall request the Commission in writing so to do within 15 days from the date of this notice. As provided by the general rules of practice of the Commission, Rule 73, persons other than applicants should fairly disclose their interest, and the position they intend to take at the hearing with respect to the application. Otherwise the Commission, in its discretion, may proceed to investigate and determine the matters involved in such application without further or formal hearing. If because of an emergency a grant of temporary relief is found to be necessary before the expiration of the 15-day period, a hearing, upon a request filed within that period, may be held subsequently.

PAPER AND RELATED ARTICLES FROM ATLANTA, GA., AND POINTS TAKING SAME RATES TO LOUISVILLE, KY.

APPLICATION FOR RELIEF

NOVEMBER 3, 1953.

The Commission is in receipt of the above-entitled and numbered application for relief from the long-and-short-haul provision of section 4 (1) of the Interstate Commerce Act.

Filed by: R. E. Boyle, Jr., Agent, for Atlanta and West Point Rail Road Company and other carriers.

Commodities involved: Paper and related articles, carloads.

From: Atlanta, Ga., and points taking same rates.

To: Louisville, Ky.

Grounds for relief: Competition with rail carriers and circuitous routes.

Schedules filed containing proposed rates: C. A. Spaninger, Agent, I. C. C. No. 1218, supp. 52.

Any interested person desiring the Commission to hold a hearing upon such application shall request the Commission in writing so to do within 15 days from the date of this notice. As provided by the general rules of practice of the Commission, Rule 73, persons other than applicants should fairly disclose their interest, and the position they intend to take at the hearing with respect to the application. Otherwise the Commission, in its discretion, may proceed to investigate and determine the matters involved in such application without further or formal hearing. If because of an emergency a grant of temporary relief is found to be necessary before the expiration of the 15-day period, a hearing, upon a request filed within that period, may be held subsequently.

By the Commission.

[SEAL] GEORGE W. LAIRD, *Secretary.*

# FEDERAL REGISTER

VOLUME 18 NUMBER 219

*Washington, Saturday, November 7, 1953*

## TITLE 7—AGRICULTURE

### Chapter IX—Production and Marketing Administration (Marketing Agreements and Orders), Department of Agriculture

[Lemon Reg. 510]

PART 953—LEMONS GROWN IN CALIFORNIA AND ARIZONA

LIMITATION OF SHIPMENTS

§ 953.617 *Lemon Regulation 510*—(a) *Findings.* (1) Pursuant to the marketing agreement, as amended, and Order No. 53, as amended (7 CFR Part 953), regulating the handling of lemons grown in the State of California or in the State of Arizona, effective under the applicable provisions of the Agricultural Marketing Agreement Act of 1937, as amended (7 U. S. C. 601 et seq.), and upon the basis of the recommendation and information submitted by the Lemon Administrative Committee, established under the said amended marketing agreement and order, and upon other available information, it is hereby found that the limitation of the quantity of such lemons which may be handled, as hereinafter provided, will tend to effectuate the declared policy of the act.

(2) It is hereby further found that it is impracticable and contrary to the public interest to give preliminary notice, engage in public rule-making procedure, and postpone the effective date of this section until 30 days after publication thereof in the FEDERAL REGISTER (60 Stat. 237; 5 U. S. C. 1001 et seq.) because the time intervening between the date when information upon which this section is based became available and the time when this section must become effective in order to effectuate the declared policy of the act is insufficient, and a reasonable time is permitted, under the circumstances, for preparation for such effective time; and good cause exists for making the provisions of this section effective as hereinafter set forth. Shipments of lemons, grown in the State of California or in the State of Arizona, are currently subject to regulation pursuant to said amended marketing agreement and order; the recommendation and supporting information for regulation during the period specified in this section was promptly submitted to the Department after an open meeting of the Lemon Administrative Committee on November 4, 1953, such meeting was held, after giving due notice thereof to consider recommendations for regulation, and interested persons were afforded an opportunity to submit their views at this meeting; the provisions of this section, including its effective time, are identical with the aforesaid recommendation of the committee, and information concerning such provisions and effective time has been disseminated among handlers of such lemons; it is necessary, in order to effectuate the declared policy of the act, to make this section effective during the period hereinafter specified; and compliance with this section will not require any special preparation on the part of persons subject thereto which cannot be completed by the effective time thereof.

(b) *Order.* (1) The quantity of lemons grown in the State of California or in the State of Arizona which may be handled during the period beginning at 12:01 a. m., P. s. t., November 8, 1953, and ending at 12:01 a. m., P. s. t., November 15, 1953, is hereby fixed as follows:

(i) District 1: Unlimited movement;

(ii) District 2: 223 carloads;

(iii) District 3: 12 carloads.

(2) The prorate base of each handler who has made application therefor, as provided in the said amended marketing agreement and order, is hereby fixed in accordance with the prorate base schedule which is attached to Lemon Regulation 509 (18 F. R. 6868) and made a part hereof by this reference.

(3) As used in this section, "handled," "handler," "carloads," "prorate base," "District 1," "District 2," and "District 3," shall have the same meaning as when used in the said amended marketing agreement and order.

(Sec. 5, 49 Stat. 753, as amended; 7 U. S. C. and Sup. 608c)

Done at Washington, D. C., this 5th day of November 1953.

[SEAL] S. R. SMITH, *Director, Fruit and Vegetable Branch, Production and Marketing Administration.*

### Chapter XI—Agricultural Conservation Program (Agricultural Adjustment), Department of Agriculture

[ACP—1954, Supp. 2]

PART 1101—NATIONAL AGRICULTURAL CONSERVATION

SUBPART—1954

STATE FUNDS

Pursuant to the authority vested in the Secretary of Agriculture under sections 7–17 of the Soil Conservation and Domestic Allotment Act, as amended, and the Department of Agriculture Appropriation Act, 1954, the 1954 National Agricultural Conservation Program, issued August 3, 1953 (18 F. R. 4643), as amended August 3, 1953 (18 F. R. 4761) is further amended as follows:

Section 1101.502 is amended to read as follows:

§ 1101.502 *State funds.* (a) Funds available for conservation practices will be distributed among States on the basis of their conservation needs, but the proportion allocated for use in any State shall not be reduced more than 15 percent from its proportionate 1953 distribution. The allocation of funds among the States is as follows:

| | |
|---|---|
| Alabama | $4, 540, 000 |
| Alaska | 21, 000 |
| Arizona | 1, 127, 000 |
| Arkansas | 3, 548, 000 |
| California | 3, 979 000 |
| Colorado | 2, 507, 000 |
| Connecticut | 376, 000 |
| Delaware | 292 000 |
| Florida | 1, 811, 000 |
| Georgia | 5, 3?4 000 |
| Hawaii | 140, 000 |
| Idaho | 1, 289 000 |
| Illinois | 6, 217, 000 |
| Indiana | 4, 004, 000 |
| Iowa | 6, 762, 000 |
| Kansas | 4, 926, 000 |
| Kentucky | 4, 725, 000 |
| Louisiana | 3, 126, 000 |
| Maine | 739, 000 |
| Maryland | 987, 000 |
| Massachusetts | 407, 000 |
| Michigan | 3, 582, 000 |
| Minnesota | 4, 331, 000 |
| Mississippi | 4, 827, 000 |
| Missouri | 6, 745, 000 |
| Montana | 2, 714, 000 |
| Nebraska | 4, 631, 000 |
| Nevada | 237, 000 |
| New Hampshire | 375, 000 |
| New Jersey | 549, 000 |
| New Mexico | 1, 382, 000 |
| New York | 3, 578, 000 |
| North Carolina | 4, 701, 000 |
| North Dakota | 3, 443, 000 |
| Ohio | 4, 183, 000 |
| Oklahoma | 5, 564, 000 |
| Oregon | 1, 637, 000 |
| Pennsylvania | 3, 800, 000 |
| Puerto Rico | 633, 000 |
| Rhode Island | 63, 000 |
| South Carolina | 2, 516, 000 |
| South Dakota | 3, 586, 000 |
| Tennessee | 3, 988, 000 |
| Texas | 14, 384, 000 |
| Utah | 981, 000 |
| Vermont | 795, 000 |
| Virgin Islands | 9, 000 |
| Virginia | 3, 208, 000 |
| Washington | 1, 792, 000 |
| West Virginia | 1, 196, 000 |
| Wisconsin | 4, 012, 000 |
| Wyoming | 1, 521, 000 |
| Total | 151, 800, 000 |

(b) The apportionment shown in this section does not include the amount set aside for administrative expenses, the amount required for increases in small Federal cost-shares in § 1101.576, and the amount set aside for the Naval Stores Conservation Program.

(Sec. 4, 49 Stat. 164; 16 U. S. C. 590d. Interpret or apply secs. 7–17, 49 Stat. 1148, as amended, Pub. Law 156, 83d Cong; 16 U. S. C. 590g–590q)

Done at Washington, D. C., this 4th day of November 1953.

[SEAL] J. EARL COKE,
*Acting Secretary of Agriculture.*

[F. R. Doc. 53-9476; Filed, Nov. 6, 1953; 8:57 a. m.]

## TITLE 14—CIVIL AVIATION

### Chapter II—Civil Aeronautics Administration, Department of Commerce

[Amdt. 48]

PART 610—MINIMUM EN ROUTE IFR ALTITUDES

MISCELLANEOUS AMENDMENTS

The minimum en route IFR altitudes appearing hereinafter have been coordinated with interested members of the industry in the regions concerned insofar as practicable. The altitudes are adopted without delay in order to provide for safety in air commerce. Compliance with the notice, procedures, and effective date provisions of section 4 of the Administrative Procedure Act would be impracticable and contrary to the public interest, and therefore is not required.

Part 610 is amended as follows:

1. Section 610.12 *Green civil airway No. 2* is amended to read in part:

| From— | To— | Minimum altitude |
|---|---|---|
| Lansing, Mich. (LFR). | White Lake (INT), Mich. | 2,900 |
| White Lake (INT), Mich. | Detroit, Mich. (LFR) | 2,200 |

2. Section 610.18 *Green civil airway No. 8* is amended to read in part:

| From— | To— | Minimum altitude |
|---|---|---|
| Cold Bay, Alaska (LFR). | King Salmon, Alaska (LFR). | 4,000 |

3. Section 610.105 *Amber civil airway No. 5* is amended to read in part:

| From— | To— | Minimum altitude |
|---|---|---|
| Memphis, Tenn. (LFR | Cuba (INT), Tenn. | 2,300 |
| Cuba (INT) Tenn. | Advance, Mo. (LFR) | 2,000 |

4. Section 610.210 *Red civil airway No. 10* is amended to eliminate:

| From— | To— | Minimum altitude |
|---|---|---|
| Pueblo, Colo. (LFR) | Purgatoire River (INT), Colo. | 7,500 |
| Purgatoire River (INT), Colo. | Dalhart, Tex. (LF/RBN). | 8,900 |
| Dalhart, Tex. (LF/RBN). | Amarillo, Tex. (LFR). | 5,300 |

5. Section 610.220 *Red civil airway No. 20* is amended to read in part:

| From— | To— | Minimum altitude |
|---|---|---|
| Lansing, Mich. (LFR) | Flint, Mich. (LF/RBN). | 2,900 |

6. Section 610.228 *Red civil airway No. 28* is amended to read in part:

| From— | To— | Minimum altitude |
|---|---|---|
| Lansing, Mich. (LFR) | Int. 309°–129° mag. brg. Lansing, Mich. (LFR) and W ers, Salem, Mich. (VAR). | 2,900 |
| Int. 309°–129° mag. brg. Lansing, Mich. (LFR) and W ers, Salem, Mich. (VAR). | Int. 309°–129° mag. brg. Lansing, Mich (LFR) and S ers Salem, Mich. (VAR). | 2,300 |

7. Section 610.277 *Red civil airway No. 77* is amended to read in part:

| From— | To— | Minimum altitude |
|---|---|---|
| Tappahannock, Va. (LFR). | Millville, N. J. (LFR) | 1,500 |

8. Section 610.277 *Red civil airway No. 77* is amended by adding:

| From— | To— | Minimum altitude |
|---|---|---|
| Greensboro, N. C. (LFR). | Lynchburg, Va. (LFR). | 2,500 |

9. Section 610.281 *Red civil airway No. 81* is amended to read in part:

| From— | To— | Minimum altitude |
|---|---|---|
| Lansing, Mich. (LFR) | Chelsea (INT), Mich | 2,900 |
| Chelsea (INT), Mich. | Manchester (INT), Mich. | 2,300 |

10. Section 610.626 *Blue civil airway No. 26* is amended to read in part:

| From— | To— | Minimum altitude |
|---|---|---|
| Nenana, Alaska (LFR)[1] | Nenabank (INT), Alaska. | 2,600 |

[1] 7,000'—Minimum crossing altitude at Nenana (LFR), southbound.

11. Section 610.630 *Blue civil airway No. 30* is amended by adding:

| From— | To— | Minimum altitude |
|---|---|---|
| Amarillo, Tex. (LFR). | Dalhart, Tex. (LF/RBN). | 5,300 |
| Dalhart, Tex. (LF/RBN). | Purgatoire River (INT), Colo. | 8,900 |
| Purgatoire River (INT), Colo. | Pueblo, Colo. (LFR). | 7,500 |

12. Section 610.632 *Blue civil airway No. 32* is amended to read in part:

| From— | To— | Minimum altitude |
|---|---|---|
| Skwentna, Alaska (LFR).[1] | Talkeetna, Alaska (LF/RBN). | 5,000 |

[1] 4,100'—Minimum crossing altitude at Skwentna (LFR), northeast-bound.

13. Section 610.646 *Blue civil airway No. 46* is amended to read in part:

| From— | To— | Minimum altitude |
|---|---|---|
| Memphis, Tenn. (LFR). | Int. 005°–185° mag. brg. Memphis, Tenn. (LFR) and 211°–031° mag. brg. Dyersburg, Tenn. (LF/RBN). | 2,300 |
| Int. 005°–185° mag. brg. Memphis, Tenn. (LFR) and 211°–031° mag. brg. Dyersburg, Tenn. (LF/RBN). | Dyersburg, Tenn. (LF/RBN). | 2,000 |

14. Section 610.663 *Blue civil airway No. 63* is added to read:

| From— | To— | Minimum altitude |
|---|---|---|
| Concord, N. H. (LFR). | Laconia, N. H. (LF/RBN). | 4,000 |

15. Section 610.665 *Blue civil airway No. 65* is added to read:

| From— | To— | Minimum altitude |
|---|---|---|
| Shuyak, Alaska (LF/RBN). | Anchor Point (INT), Alaska. | 4,000 |

16. Section 610.1001 *Direct routes, United States,* is amended by adding:

| From— | To— | Minimum altitude |
|---|---|---|
| Farley, Kans. (LF/RBN). | Topeka, Kans. (LF/RBN). | 2,500 |
| Farley, Kans. (LF/RBN). | St. Joseph, Mo. (LFR). | 2,400 |
| Farley, Kans. (LF/RBN). | De Soto (INT), Kans | 2,400 |
| De Soto (INT), Kans. | Topeka, Kans. (LF/RBN). | 2,500 |
| Belton (INT), Mo. | Liberty, Mo. (LF/RBN). | 2,400 |
| Columbia, Mo. (LFR). | Olathe, Kans. (LFR) | 2,400 |
| Dyersburg, Tenn. (LF/RBN). | Memphis, Tenn. (LFR). | 2,300 |

17. Section 610.6001 *VOR civil airway No. 1* is added to read:

| From— | To— | Minimum altitude |
|---|---|---|
| Norfolk, Va. (VAR). | Salisbury, Md. (VOR). | 1,500 |
| Salisbury, Md. (VOR). | Atlantic City, N. J. (VAR). | 1,500 |
| Atlantic City, N. J. (VAR). | Matawan, N. J. (VAR). | 1,500 |

## TITLE 32—NATIONAL DEFENSE

### Chapter VII—Department of the Air Force

Subchapter F—Reserve Forces

PART 861—OFFICERS' RESERVE

Subchapter J—Procurement Procedures

PART 1006—CONTRACT FORMS AND CLAUSES

POINT-GAINING ACTIVITIES FOR AIR FORCE RESERVISTS; ABSTRACT OF BID FORMS

1. Paragraphs (e) and (f) of § 861.32 (13 F. R. 2404) are changed as follows:

§ 861.32 *Definitions.* For the purpose of §§ 861.31 to 861.36, the following definitions apply:

* * * * *

(e) *Training period.* A duly authorized period of instruction performed by persons who are training as individuals. Such training will be of at least two hours' duration and normally will be of four hours' duration. Two training periods if conducted within one calendar day must total at least eight hours. This term will include authorized attendance at a scheduled class of instruction under the contract school training program.

(f) *Unit training assembly.* A duly authorized and scheduled period of instruction conducted by Table of Organization, Table of Distribution, and Non-Table of Organization composite-type units. Such unit training assemblies will be of at least two and normally four hours' duration. Two training assemblies if conducted in one calendar day must total at least eight hours.

* * * * *

2. Paragraph (d) of § 861.35 (18 F. R. 2405) is changed as follows:

§ 861.35 *Basis for award and supporting evidence.* The basic Air Force form on which points will be recorded is AF Form 190, "USAF Reserve Personnel Record Card." Entries will not be made in individual AF Forms 190 which are not supported by one or more of the following properly authenticated documents:

* * * * *

(d) *DD Form 214, "Report of Separation from the Armed Forces of the United States," or DD Form 220, "Active Duty Report".* For credit for active duty.

* * * * *

[AFR 45-15A and B] (Sec. 251, 66 Stat. 495; 50 U. S. C. 1042. Interpret or apply secs. 101-259, 601-603, 66 Stat. 481-498, 501; 50 U. S. C. 901-1010; 1091-1093)

3. Section 1006.1421 (18 F. R. 4836) is changed to read as follows:

§ 1006.1421 *Abstract of bid forms.* (a) AF Form 1044, Abstract of Bids. This form consists of one sheet printed on one side on translucent paper. Translucent paper makes possible the typing of one Abstract of Bids and reproduction by ozalid process to get distribution copies.

(b) AF Form 1045, Abstract of Bids (Insert Sheet). This form consists of one sheet printed on one side on translucent paper, and is used when there are more than ten items, to eliminate the use of additional Abstract of Bid forms.

(c) AF Form 1046, Abstract of Bids (Continuation Sheet). This form consists of one sheet printed on one side of translucent paper and is used, when required, for certificates and pre-award deviations and comments.

(d) AF Forms 1044, 1045, and 1046 replace WD Forms 14, Abstract of Bids (short form); WD Form 29, Abstract of Bids (long form); and WD Form 29A, Abstract of Bids (long form—continuation sheet), which are obsolete.

4. Section 1006.1422, *Abstract of bids (long form); WD Form 29,* is deleted.

5. Section 1006.1423, *Abstract of bids (long form—continuation sheet); WD Form 29A,* is deleted.

[AFL 70-102G] (R. S. 161, sec. 202, 61 Stat. 500, as amended; 5 U. S. C. 22, 171a. Interpret or apply 62 Stat. 21; 41 U. S. C. 151-161)

[SEAL] K. E. THIEBAUD,
*Colonel, U. S. Air Force,*
*Air Adjutant General.*

# PROPOSED RULE MAKING

## DEPARTMENT OF AGRICULTURE

### Production and Marketing Administration

[9 CFR Part 201]

REVISION OF REGULATIONS UNDER PACKERS AND STOCKYARDS ACT

NOTICE OF PROPOSED RULE MAKING

Pursuant to a notice published in the FEDERAL REGISTER on August 20, 1952 (17 F. R. 7602), public hearings were held in nine different cities during September, 1952, to consider the advisability of revising the regulations issued under the Packers and Stockyards Act, 1921, as amended and supplemented (9 CFR 201 et seq.; 7 U. S. C. 181 et seq.). At the request of interested persons an additional hearing was held in Washington, D. C., on September 22, 1952. At such hearings all interested persons were afforded an opportunity to appear and be heard, in person or by attorney, upon the advisability of revising such regulations. At the conclusion of the hearings all interested persons were advised that they might submit written statements concerning the proposed revision on or before October 10, 1952, and legal briefs concerning the proposed revision on or before November 15, 1952. Numerous written statements and legal briefs have been filed by interested persons. The notice of hearings stated that after such hearings had been held and all testimony and material presented thereat had been considered, a notice of proposed rule making setting forth any proposed amendments to the regulations would be published in the FEDERAL REGISTER and that all interested persons would be afforded a reasonable opportunity to submit their views, arguments, and data, in writing, on such proposals prior to the issuance of the final revision of the regulations.

Accordingly, notice is hereby given pursuant to section 4 (a) of the Administrative Procedure Act (5 U. S. C. 1003 (a)), that the Secretary of Agriculture is considering revising the regulations under the Packers and Stockyards Act, 1921, as amended and supplemented (9 CFR 201 et seq.; 7 U. S. C. 181 et seq.), to read as follows:

DEFINITIONS

Sec.
201.1 Meaning of words.
201.2 Terms defined.

ADMINISTRATION

201.3 Authority.

APPLICABILITY OF INDUSTRY RULES

201.4 Bylaws, rules and regulations, and requirements of exchanges, associations, or other organizations; applicability, establishment.

POSTING STOCKYARDS

201.5 Investigation, notice, and posting of stockyards.
201.6 Investigation, notice, and deposting of stockyards.
201.7 Change in name, address, management, control, or ownership to be reported by stockyard owner.

DESIGNATION OF LIVE POULTRY MARKETS

201.8 Investigation.
201.9 Publication.

REGISTRATION

201.10 Requirements and procedures.
201.11 Officers, agents, and employees of registrants whose registrations have been suspended or revoked.
201.12 Registrants whose registrations have been suspended or revoked.
201.13 Registrants to report changes in name, address, control, or ownership.

LICENSING

201.14 Requirements and procedures.
201.15 Licensee must maintain satisfactory financial condition or furnish surety bond or equivalent.
201.16 Licensee to report changes in name, address, control, or ownership.

SCHEDULES OF RATES AND CHARGES

201.17 Requirements as to filing by stockyard owners and market agencies; use of term "yardage" in stockyard schedules.
201.18 Requirements as to filing by licensees.
201.19 Size, style, and number of copies.
201.20 Numbering, arrangement, and substance of schedules and amendments.
201.21 Rules or regulations affecting rates and charges.
201.22 Time and place stockyard owners, market agencies, and licensees are to file schedules and amendments.
201.23 Joint schedules.
201.24 Prescribed rates, charges, practices, and regulations.
201.25 Proposed increases in existing charges must be supported by specific data.
201.26 Form.

GENERAL BONDING PROVISIONS

201.27 Underwriter; substantial equivalents in lieu of bonds.
201.28 Duplicates of bonds or equivalents to be filed with the Chief, Washington, D. C.

MARKET AGENCY AND DEALER BONDS

201.29 Market agencies and dealers to file on or before commencing operations.
201.30 Amount of market agency and dealer bonds.
201.31 Conditions in market agency and dealer bonds.
201.32 Trustee in market agency and dealer bonds.
201.33 Persons damaged may maintain suit to recover on market agency and dealer bonds.
201.34 Termination of market agency and dealer bonds.

LICENSEE BONDS

201.35 Standards for bonds submitted by applicants for licenses and licensees.
201.36 Trustee in licensee bonds.
201.37 Persons damaged may maintain suit to recover on licensee bonds.
201.38 Termination of licensee bonds.

PROCEEDS OF SALE

201.39 Payment to be made to consignor or shipper by market agencies and licensees; exceptions.
201.40 Market agencies and licensees not to use shippers' proceeds or funds received for purchases on commission for own purposes through "bank float" or otherwise.
201.41 Market agencies and licensees to make faithful and prompt accounting to consignors or shippers or other interested persons of whom they have knowledge.
201.42 Custodial accounts for shippers' proceeds.

ACCOUNTS AND RECORDS

201.43 Market agencies and licensees to make prompt accounting and transmittal of net proceeds.
201.44 Market agencies and licensees to render prompt accounting for purchases on order.
201.45 Market agencies and licensees to make records available for inspection by owners, consignors, and purchasers.
201.46 Stockyard owners, registrants, and licensees to keep daily record.
201.47 Market agencies and licensees to disclose business relationships, if any, with purchasers.
201.48 Sellers of live poultry to issue sales tickets at designated markets.
201.49 Requirements regarding scale tickets evidencing weighing of livestock or live poultry.
201.50 Records; disposition.
201.51 Contracts; stockyard owners to furnish copies of.
201.52 Information as to sales on commission or agency basis not to be furnished to unauthorized parties.

TRADE PRACTICES

201.53 Livestock and live poultry market conditions and prices; persons subject to act not to circulate misleading reports.
201.54 Gratuities.
201.55 Purchases and sales to be made on actual weights.
201.56 Filling orders; price to be paid.
201.57 Livestock sold at auction; purchases from consignments.
201.58 Sales to be to highest bidder without intermingling and not conditioned on sales of other consignments.
201.59 Taking consignments into own account; accounting; resales.
201.60 Consignments on commission; sale of livestock.
201.61 Market agencies engaged in selling livestock on commission.
201.62 Using consigned livestock to fill orders.
201.63 Consignments; when not to be solicited.
201.64 Consignments; guarantees not to be given.
201.65 Restrictions on employment of salesmen on split commission basis.
201.66 Market agencies not to employ packers or dealers.
201.67 Packers or dealers not to own or finance selling agencies.
201.68 Packers not to own or finance order buyers.
201.69 Furnishing information to competitor buyers.
201.70 Restriction or limitation of competition between packers and dealers prohibited.

SERVICES

201.71 Accurate weights.
201.72 Scales; testing of.
201.73 Scale operators to be competent.
201.74 Scales; reports of tests and inspections.
201.75 Scales; repairs, adjustments, or replacements after inspection.
201.76 Reweighing.
201.77 Weighing for purposes other than purchase or sale.
201.78 Packer scales.
201.79 Facilities and assignment of pens.
201.80 Stockyard facilities or services to be furnished only to unsuspended, properly registered, and bonded parties.
201.81 Suspended or revoked registrants or licensees.
201.82 Livestock; care and promptness in yarding, feeding, watering, weighing, and handling.
201.83 Live poultry; care and promptness in feeding, watering, weighing, transporting, and handling.
201.84 Feed and water furnished livestock or live poultry.
201.85 Livestock auctions; requirements as to accommodations and persons entering auction ring.

INSPECTION OF BRANDS

201.86 Application for authorization by State agencies and duly organized State livestock associations; requisites.
201.87 Two or more applications from same State; procedure.
201.88 Registration and filing of schedules.
201.89 Records of authorized agencies or associations.
201.90 Fees; deduction and accounting.
201.91 Inspections; reciprocal arrangements by authorized agencies or associations.
201.92 Maintenance of identity of consignments; inspection to be expedited.
201.93 Existing contracts between authorized agencies; recognition and continuation.

GENERAL

201.94 Information as to business; furnishing of by packers, stockyard owners, registrants, and licensees.
201.95 Inspection of records and property of packers, stockyard owners, registrants, and licensees.
201.96 Packers, stockyard owners, registrants, or licensees; information concerning business not to be divulged.
201.97 Annual reports.

AUTHORITY: §§ 201.1 to 201.97 issued under Packers and Stockyards Act, 1921, as amended and supplemented, 7 U. S. C. 181 et seq.

DEFINITIONS

§ 201.1 *Meaning of words.* Words used in this part in the singular form shall be deemed to import the plural, and vice versa, as the case may demand.

§ 201.2 *Terms defined.* The definitions of terms contained in the act shall apply to such terms when used in the regulations in this part. In addition, unless the context otherwise requires, the following terms shall be construed, respectively, to mean:

(a) "Act" means the Packers and Stockyards Act, 1921, as amended and supplemented (7 U. S. C. 181 et seq.).

(b) "Department" means the United States Department of Agriculture.

(c) "Secretary" means the Secretary of Agriculture or any person authorized to act in his stead.

(d) "Administration" means the Production and Marketing Administration of the Department.

(e) "Administrator" means the Administrator of the Administration or any person authorized to act in his stead.

(f) "Assistant Administrator" means the Assistant Administrator for Marketing of the Administration or any person authorized to act in his stead.

(g) "Livestock Branch" means the Livestock Branch of the Administration.

(h) "Director" means the Director of the Livestock Branch or any person authorized to act in his stead.

(i) "Division" means the Packers and Stockyards Division of the Livestock Branch.

(j) "Chief" means the Chief of the Division or any person authorized to act in his stead.

(k) "District Supervisor" means the District Supervisor of the Division for a given district or any person authorized to act in his stead.

(l) "Person" means individuals, partnerships, corporations, and associations.

(m) "Registrant" means any person registered pursuant to the provisions of the act and the regulations in this part.

(n) "Licenses" means any person licensed pursuant to the provisions of the act and the regulations in this part.

(o) "Posted Stockyard" means a livestock market determined by the Secretary to come within the definition of the term "stockyard" contained in section 302 of the act, notice of which determination shall have been given pursuant to such section.

(p) "Designation" means the designation of a city, and the markets and places in or near such city, pursuant to the provisions of title V of the act.

(q) "Schedule" means a tariff of rates and charges filed by stockyard owners, market agencies, and licensees.

ADMINISTRATION

§ 201.3 *Authority.* The Administrator shall perform such duties as the Secretary may require in enforcing the provisions of the act and the regulations in this part.

APPLICABILITY OF INDUSTRY RULES

§ 201.4 *Bylaws, rules and regulations, and requirements of exchanges, associations, or other organizations; applicability, establishment.* (a) The regulations in this part shall not prevent the legitimate application or enforcement of any valid bylaw, rule or regulation, or requirement of any exchange, association, or other organization, or any other valid law, rule or regulation, or requirement to which any packer, stockyard owner, market agency, dealer, or licensee shall be subject which is not inconsistent or in conflict with the act and the regulations in this part.

(b) Market agencies selling livestock on commission shall not, in carrying out the statutory duty imposed upon them by section 307 of title III of the act, permit dealers, packers, or others representing interests which conflict with those of consignors, to participate, directly or indirectly, in the establishment or determination of regulations or practices governing the responsibilities, duties, or obligations of such market agencies to their consignors.

POSTING STOCKYARDS

§ 201.5 *Investigation, notice, and posting of stockyards.* After it has been determined, as provided in section 302 (b) of the act, that a stockyard comes within the definition of that term contained in section 302 (a), posting of a stockyard shall be accomplished by (a) giving notice of such determination to the stockyard owner by registered mail or in person, and (b) giving notice thereof to the public by posting copies of such notice in at least three conspicuous places at such stockyard and by publication of the determination in the FEDERAL REGISTER. A stockyard so posted shall remain subject to the provisions of the act and the regulations in this part until the stockyard has been deposted.

§ 201.6 *Investigation, notice, and deposting of stockyards.* After it has been determined, as provided in section 302 (b) of the act, that a stockyard no longer comes within the definition of that term contained in section 302 (a), deposting of a stockyard shall be accomplished by (a) giving notice of such determination to the stockyard owner by registered mail or in person, and (b) giving notice thereof to the public by posting copies of such notice in at least three conspicuous places at such stockyard and by publication of the determination in the FEDERAL REGISTER.

§ 201.7 *Change in name, address, management, control, or ownership to be reported by stockyard owner.* Whenever any change is made in the name or address or in the management or nature or in the substantial control or ownership of the business of a posted stockyard, the owner of such stockyard shall report such change in writing to the Chief at Washington, D. C., within ten days after making such change.

DESIGNATION OF LIVE POULTRY MARKETS

§ 201.8 *Investigation.* Such investigation as may be deemed necessary for the purpose of ascertaining whether a city, and markets and places in or near such city, shall be designated under title V of the act shall be made by the Administration.

§ 201.9 *Publication.* After it has been determined by the Secretary that a city, and markets and places in or near such city, should be designated under the provisions of title V of the act, public announcement thereof shall be made by publication in the FEDERAL REGISTER and one or more trade journals or newspapers.

REGISTRATION

§ 201.10 *Requirements and procedures.* (a) Any person desiring to register as a market agency or dealer in compliance with the act shall furnish the information required by the Chief on forms of application for registration, copies of which will be furnished by the Chief or any District Supervisor on request, and shall, concurrently with the filing of such properly executed application, file the bond required in § 201.29.

(b) Each application for registration shall be filed in duplicate with the District Supervisor for the district in which the applicant proposes to operate, who shall promptly mail the original to the Director at Washington, D. C., and post the duplicate in a conspicuous place at the stockyard at which the applicant proposes to operate. Within 15 days from the date of such posting any interested person may file, in duplicate, a protest with the District Supervisor, a copy of which the District Supervisor shall promptly mail to the Director. After the expiration of such 15-day period, the Director shall record the registration of an applicant unless he shall have reason to believe that the application for registration should be denied because the applicant, in the case of an application for registration as a market agency, is unfit to engage in such activity by reason of the fact that the applicant is financially unable to fulfill the obligations that he would incur as a market agency or is clearly incapable of performing the services required of a market agency, or because the applicant, in the case of an application for registration as a market agency or dealer, is unfit to engage in the activity for which he has made application by reason of the fact that the applicant has within two years prior to filing his application engaged in a dishonest or fraudulent practice of the character prohibited by the act. In the event the Director has reason to so believe he promptly shall cause an administrative proceeding to be instituted, in which the applicant will be afforded opportunity for full hearing, for the purpose of showing cause why the application for registration should not be denied. In the event it is determined that the application should be denied, the applicant shall not be precluded as soon as conditions warrant from again applying for registration.

(c) Financial ability may be established by an applicant for registration as a market agency upon a showing that he has sufficient free working capital to pay normal expenses incident to operation of the type of business in which the applicant proposes to engage for a period of at least one month and, if the applicant proposes to purchase livestock on a commission basis for the accounts of others, that he has additional free working capital sufficient to finance such order buying transactions.

(d) Each registered market agency shall at all times maintain a financial condition at least equivalent to that required for recording of a registration or in lieu thereof furnish additional bond coverage or its equivalent.

(e) Any person regularly employed on salary, or other comparable method of compensation, by a packer to buy livestock at posted stockyards for such packer shall be subject to the registration requirements of the act and the regulations in this part. Such persons shall be registered as dealers to purchase livestock for slaughter only.

(f) Notwithstanding the foregoing provisions of this section, the Director may, if he deems it appropriate, without further procedure, record the registration of an applicant temporarily pending the completion of the 15-day protest period provided for in paragraph (b) of this section. Such temporary registration may be cancelled at any time by the Director.

(g) On or after July 1, 1954, no market agency engaged in selling livestock on an agency basis shall act in the capacity of clearing agency.

§ 201.11 *Officers, agents, and employees of registrants whose registrations have been suspended or revoked.* Any person who has been or is an officer, agent, or employee of a registrant whose registration has been suspended or revoked and who was responsible for or participated in the violation on which the order of suspension or revocation was based may not register within the period during which the order of suspension or revocation is in effect.

§ 201.12 *Registrants whose registrations have been suspended or revoked.* Any person whose registration has been suspended or revoked may not again register in his own name or in any other manner within the period during which the order of suspension or revocation is in effect, and no partnership, firm, or corporation in which any such person has a substantial financial interest will be registered during such period.

§ 201.13 *Registrants to report changes in name, address, control, or ownership.* Whenever any change is made in the name or address or in the management or nature or in the substantial control or ownership of the business of a registrant, such registrant shall report such change in writing to the Chief at Washington, D. C., within ten days after making such change.

LICENSING

§ 201.14 *Requirements and procedures.* An application for a license pursuant to section 502 (b) of the act may be made by any person subject to the licensing provisions of the act by properly filling out and delivering to the Chief at Washington, D. C., by mail or otherwise, a properly executed form of application. Copies of such form will be furnished by the Chief on request. A license will be issued to any applicant furnishing the required information unless the Secretary finds after opportunity for hearing that such applicant is unfit to engage in the activity for which he has made application by reason of his having at any time within two years prior to his application engaged in any practice of the character prohibited by the act or because he is financially unable to fulfill the obligations he would incur as a licensee. Financial ability may be established upon a showing by the applicant that he has current assets equal to his current liabilities, and, in addition thereto, sufficient free working capital to equal twenty-five (25) percent of his average weekly purchases and sales of live poultry according to his books and records or according to such volume of business as may be reasonably anticipated in case of a new business. If the applicant fails to make such a showing, consideration will be given to a showing of other assets and other liabilities and other factors relating to his ability to fulfill his financial obligations which would be incurred as a licensee and to his reputation and integrity. If the applicant fails to make a satisfactory showing of financial ability, a license will be granted upon his executing and maintaining a satisfactory surety bond or equivalent thereof to a suitable trustee, in accordance with the provisions of §§ 201.35 to 201.38, inclusive.

§ 201.15 *Licensee must maintain satisfactory financial condition or furnish surety bond or equivalent.* The granting of a license hereunder is conditioned on the licensee maintaining at all times a financial condition at least equivalent to that required for the issuance of a license or in lieu thereof maintaining a satisfactory surety bond or its equivalent. The failure of a licensee to maintain such a financial condition or surety bond will render his license subject to suspension or revocation.

§ 201.16 *Licensee to report changes in name, address, control, or ownership.* Whenever any change is made in the name or address or in the management or nature or in the substantial control or ownership of the business of a licensee, such licensee shall report such change in writing to the Chief at Washington, D. C., within ten days after making such change.

SCHEDULES OF RATES AND CHARGES

§ 201.17 *Requirements as to filing by stockyard owners and market agencies; use of term "yardage" in stockyard schedules.* (a) Each stockyard owner and market agency shall plainly state in the schedule of rates and charges filed by the stockyard owner or market agency the effective date of the schedule, a description of the services rendered, the basis for classifying livestock by species or by weight, the stockyards at which the schedule applies, the name and business address of the stockyard owner or market agency, the kind of livestock covered by the schedule, and the conditions under which the services will be rendered and the rates or charges will be applied.

(b) The term "yardage" shall be used in schedules of rates and charges filed by stockyard owners to describe the basic stockyard facilities and services furnished, and shall, unless otherwise indicated therein, include: the use of suitable facilities for the safe and expeditious receiving, handling, feeding, watering, holding, sorting, selling, buying, weighing, delivery, and shipment of livestock; the services necessary and incident to the receiving of livestock at the place of unloading; the furnishing of receipts for livestock to the carrier or consignor upon request; the delivery of livestock to the consignee; the obtaining of receipts evidencing delivery of livestock to the sales pens assigned to the consignee; the furnishing of sufficient potable water for livestock; the initial weighing of livestock when sold and delivered to scales; the issuance of scale tickets showing actual weight and other pertinent information concerning the livestock weighed; the removal of livestock from scales after weighing and delivery to holding pens; the holding of livestock for a reasonable time pending delivery or shipment to buyers; the delivery of livestock to buyers; and the obtaining of receipts for livestock delivered to buyers. Consignors, market agencies, dealers, packers, buyers, or other users of stockyard facilities and services requiring special facilities or services in addition to the basic facilities and services furnished at the stockyard may be required to pay a reasonable charge for such special facilities and services in addition to basic yardage charges.

§ 201.18 *Requirements as to filing by licensees.* Each licensee furnishing services or providing facilities for which a charge is made shall plainly state in the schedule of rates and charges filed by such licensee the effective date of the schedule, the city, place, or market at which the schedule applies, the name and business address of the licensee, the nature of the services or facilities furnished, and the terms or conditions under which the services or facilities will be furnished and the rates and charges will be applied.

§ 201.19 *Size, style, and number of copies.* Schedules of rates and charges and amendments thereto of stockyard owners, market agencies, and licensees shall be printed or typed on paper which is approximately 8 by 11 inches in size, the lines of print or type being horizontal to the 8-inch dimension. Three copies of each such schedule or amendment, one copy of which shall be signed by the stockyard owner, market agency, or licensee filing the same, shall be filed as provided in § 201.22.

§ 201.20 *Numbering, arrangement, and substance of schedules and amendments.* The schedules of each stockyard owner, market agency, and licensee shall be designated by successive numbers as filed. Each such schedule shall be divided into sections to cover the various classes of services or facilities furnished by the stockyard owner, market agency, or licensee. Each amendment of such schedule shall be numbered and shall show the number of the schedule of which it is an amendment. Each such amendment shall in its body make adequate reference to the sections of the schedule which are amended, and shall set forth in full such sections as amended or supplemented. Each amendment shall indicate the numbers of the amendments to the original schedule that remain in effect. After a stockyard owner, market agency, or licensee has filed thirty (30) amendments to its schedule, any further change in the rates or charges shall be embodied in a new schedule which shall contain all rates and charges then in effect: *Provided, however,* That not more than ten (10) amendments relating to charges other than for feed may be filed without filing and publishing a new schedule.

§ 201.21 *Rules or regulations affecting rates and charges.* Each stockyard owner, market agency, and licensee shall set out in its schedule of rates and charges every rule or regulation which in any way changes or affects any rate or charge or the value of the services furnished thereunder and shall designate the rates or charges affected by each such rule or regulation.

§ 201.22 *Time and place stockyard owners, market agencies, and licensees are to file schedules and amendments.* Duplicate copies of all schedules and rules or regulations and amendments or supplements thereto required to be filed under the act by market agencies and stockyard owners shall be kept open for public inspection at their places of business. Licensees shall post duplicate copies of all schedules of rates, charges, and rentals in a conspicuous location in their places of business where they may be readily observed by any interested person. Unless the requirement as to filing and notice is specifically waived, as provided for in section 306 (c) of the act, all amendments to schedules or rules or regulations changing a rate or charge shall be filed with the Chief at Washington, D. C., not less than ten (10) days before the effective date thereof: *Provided, however,* That in the case of a tariff supplement which relates only to changes in feed charges, determined on a cost plus specified margin basis as provided for in the basic tariff schedule of the stockyard involved, such tariff supplement shall be filed with supporting data, disclosing the average cost of the feed on hand, with the District Supervisor for the district in which the stockyard filing the supplement is located, and such supplement shall become effective two (2) days thereafter.

§ 201.23 *Joint Schedules.* If the same schedule is to be observed by more than one market agency or licensee, one schedule will suffice for all market agencies or licensees at any one stockyard, city, place, or market observing it whose names and business addresses are shown on it, together with the name of the organization, if any, by which adopted: *Provided,* That at least one copy of such schedule or amendment thereto is signed in ink by each of the market agencies or licensees observing the same and is filed with the Chief at Washington, D. C., and each market agency and licensee complies with the posting requirements of § 201.22.

§ 201.24 *Prescribed rates, charges, practices, and regulations.* After the effective date of any general order issued by the Secretary prescribing rates, charges, practices, or regulations governing the rendition of stockyard services or the selling or buying of livestock on a commission basis at a stockyard, or governing the rendition of any service or the use of any facilities in a city, place, or market, designated by the Secretary under title V of the act, every market agency operating at such stockyard and every licensee operating in such city, place, or market shall conform to such order.

§ 201.25 *Proposed increases in existing charges must be supported by specific data.* Each stockyard owner, market agency, and licensee proposing an increase in existing charges, either by supplement or amendment to a filed tariff or by submission of a new tariff, shall forward with the supplement, amendment, or tariff proposing the increase information as to the reasons for the proposed increase and shall furnish specific and detailed data on which the proposed increase is based together with such additional information as the Director may require.

§ 201.26 *Form.* The schedules of each stockyard owner, market agency, and licensee shall be substantially in the form set out below:

Tariff or Schedule of Charges No. ---- or Amendment No. ---- to Tariff or Schedule of Charges No. ---- of ----------
(Operator's name)
----------
(Operator's business address)

----------
(Name posted stockyard or designated market where charges apply)

----------
(Location of posted stockyard or designated market where charges apply)

Issued ----------
Effective ----------
(Not less than ten days after receipt in Washington office)

(Insert here, dividing into sections, the various classes of service performed by the stockyard owner or operator, market agency, or licensee, the kind of livestock or live poultry concerning which services are performed, the nature of the services, and the terms or conditions under which the services are rendered.)

----------
(Operator's name)
(Signed by) ----------
(Owner, partner, or official designation)

GENERAL BONDING PROVISIONS

§ 201.27 *Underwriter; substantial equivalents in lieu of bonds.* The surety on bonds maintained under §§ 201.29 to 201.38 shall be a surety company approved by the United States Treasury Department for bonds executed to the United States. Except as otherwise provided in § 201.29, any other form of indemnity which is found by the Chief to afford protection substantially equivalent to that of a surety bond may be accepted in lieu of a bond. The requirements of §§ 201.28 to 201.38 shall be applicable to equivalents furnished in lieu of bonds.

§ 201.28 *Duplicates of bonds or equivalents to be filed with the Chief, Washington, D. C.* Fully executed duplicates of bonds or equivalents maintained under §§ 201.29 to 201.38 shall be filed with the Chief at Washington, D. C.

MARKET AGENCY AND DEALER BONDS

§ 201.29 *Market agencies and dealers to file on or before commencing operations.* Every market agency and dealer, except packer buyers registered as dealers to purchase livestock for slaughter only, shall, on or before the date of commencement of operations, execute and thereafter maintain, or cause to be executed and thereafter maintained, a reasonable bond, to a suitable trustee, to secure the performance of obligations incurred as such market agency or dealer at posted stockyards: *Provided,* That on or after July 1, 1954, the only bond equivalent that may be filed by an applicant to operate as a market agency, selling on commission, shall be one representing a pledge of fully negotiable bonds of the United States Government. The bond of every registrant, acting in the capacity of clearing agency, and thereby being responsible for the financial obligations of other registrants, shall show the name of the person for whom the clearing agency holds itself out to be responsible and whose obligations are covered by the bond. Any person registered as both a market agency and a dealer shall file a bond to cover his market agency operations and a separate bond to cover his dealer operations.

§ 201.30 *Amount of market agency and dealer bonds.* Except as hereinafter otherwise provided, the amount of each market agency and dealer bond shall be not less than the nearest multiple of one thousand dollars ($1,000) above the average amount of sales or purchases, or both, of livestock by such market agency or dealer at posted stockyards or, in the absence of segregated records, all sales and purchases, during a period equivalent to two business days, based on the total number of the business days, and the total amount of such sales or purchases, or both, in the preceding 12 months, or in such part thereof in which such market agency or dealer did business, if any. For the purpose of this computation, 260 shall be deemed the number of business days in any year. When the principal part of the livestock handled by a market agency or dealer is sold or purchased at public auction, the amount of the bond shall be not less than the nearest multiple of one thousand dollars ($1,000) above an amount determined by dividing the total value of the livestock sold or purchased, or both, at auction at posted stockyards or, in the absence of segregated records, all sales and purchases during the preceding 12 months, or such part thereof as the market agency or dealer was engaged in business, by the actual number of auction sales at which livestock was sold or purchased by the market agency or dealer, but in no instance shall the divisor be greater than 130. In no case shall the amount of bond be less than five thousand dollars ($5,000). When the sales or purchases, or both, calculated as hereinbefore specified, exceed fifty thousand dollars ($50,000) the amount of the bond need not exceed fifty thousand dollars ($50,000) plus ten (10) percent of the excess. Whenever the Chief finds any bond required by §§ 201.29 to 201.34 to be inadequate, such bond upon notice, shall be adjusted to meet the requirements of this section. An applicant for registration as a mar-

ket agency who fails to meet the financial requirements of § 201.10 shall furnish, in addition to such bond coverage, additional bond coverage equal to the amount by which he fails to meet such financial requirements. If a person applying for registration as a market agency or dealer has been engaged in the business of handling livestock in such capacity prior to the date of the application, the value of the livestock so handled, if representative of his future operations, shall be used in computing the amount of bond in accordance with the provisions of this section.

§ 201.31 *Conditions in market agency and dealer bonds.* Each market agency and dealer bond shall contain conditions applicable to the activity or activities in which the person or persons named as principal in the bond propose to engage, which conditions shall be as follows or in terms to provide equivalent protection.

(a) When the principal sells on commission: If the said principal shall safely keep and faithfully and promptly account for and pay to the owners or their duly authorized agents the proceeds of sales of all livestock received for sale on a commission basis by the said principal at a public stockyard as defined in the Packers and Stockyards Act.

(b) When the principal buys on commission: If the said principal shall faithfully and promptly execute all orders for purchases of livestock undertaken by said principal on a commission basis, on behalf of buyers, at a public stockyard as defined in the Packers and Stockyards Act, and shall safely keep and properly disburse all funds coming into the hands of said principal for the purpose of making such livestock purchases, paying for all livestock so purchased.

(c) When the principal operates as a dealer (trader): If the said principal shall pay, when due, to the person or persons entitled thereto the purchase price for all livestock purchased by said principal at a public stockyard as defined in the Packers and Stockyards Act.

(d) When the principal "clears" and thus is responsible for the obligations of other registrants: If the said principal, acting in the capacity of broker or clearing agency, and thereby being responsible for the financial obligations of other registrants at a public stockyard as defined in the Packers and Stockyards Act, viz: (insert here the names of such registrants) ---------- shall (1) pay, when due, to the person or persons entitled thereto the purchase price for all livestock purchased by such other registrants; (2) safely keep and properly disburse all funds coming into the hands of said principal for the purpose of making such purchases; and (3) safely keep and faithfully and promptly account for and pay to the owners or their duly authorized agents the proceeds of sales of all livestock received for sale on a commission basis by such other registrants for whom said principal acts as broker or clearing agency.

§ 201.32 *Trustee in market agency and dealer bonds.* Bonds shall be in favor of a financially responsible, disinterested trustee, satisfactory to the Chief. Secretaries or other officers of livestock exchanges or of similar trade associations, and banks and trust companies, or their officers, are deemed suitable trustees.

§ 201.33 *Persons damaged may maintain suit to recover on market agency and dealer bonds.* Each bond shall contain a provision that any person damaged by failure of the principal to comply with the condition clauses of the bond may maintain suit to recover on the bond even though such person is not a party named in the bond.

§ 201.34 *Termination of market agency and dealer bonds.* Each bond shall contain a provision requiring that at least ten days' notice in writing be given to the Chief at Washington, D. C., by the party terminating such bond in order to effect its termination.

LICENSEE BONDS

§ 201.35 *Standards for bonds submitted by applicants for licenses and licensees.* Surety bonds submitted by applicants for licenses and by licensees as provided for by §§ 201.14 and 201.15 shall meet the following standards:

(a) Each licensee bond shall contain conditions applicable to the activity or activities in which the person or persons named as principal in the bond propose to engage, which conditions shall be as follows or in terms to provide equivalent protection.

(1) When the applicant or licensee sells live poultry on a commission or agency basis, the bond shall contain the following clause:

> If the said principal shall safely keep and faithfully and promptly account for and pay to the owners or their duly authorized agents the proceeds of sales of all live poultry received for sale on a commission basis by the said principal in his capacity as a licensee.

(2) When the applicant or licensee operates as a dealer, the bond shall contain the following clause:

> If the said principal shall pay when due, to the person or persons entitled thereto the purchase price of all live poultry purchased by said principal in his capacity as a licensee.

(b) The amount of such bond shall be at least equal to the amount by which the applicant or licensee has failed to meet the financial requirements of the regulations in this part.

§ 201.36 *Trustee in licensee bonds.* Bonds shall be in favor of a financially responsible, disinterested trustee, satisfactory to the Chief. Secretaries of trade associations, and banks and trust companies, or their officers, are deemed suitable trustees.

§ 201.37 *Persons damaged may maintain suit to recover on licensee bonds.* Each bond shall contain a provision that any person damaged by failure of the principal to comply with the condition clauses of the bond may maintain suit to recover on the bond even though such person is not a party named in the bond.

§ 201.38 *Termination of licensee bonds.* Each bond shall contain a provision requiring that at least ten days' notice in writing be given to the Chief at Washington, D. C., by the party terminating such bond in order to effect its termination.

PROCEEDS OF SALE

§ 201.39 *Payment to be made to consignor or shipper by market agency or licensees; exceptions.* (a) No market agency or licensee shall, except as provided in paragraph (b) of this section, pay the net proceeds or any part thereof, arising from the sale of livestock or live poultry consigned to it for sale, to any person other than the consignor or shipper of such livestock or live poultry except upon an order from the Secretary or a court of competent jurisdiction, unless (1) such market agency or licensee has reason to believe that such person is the owner of the livestock or live poultry, (2) such person holds a valid, unsatisfied mortgage or lien upon the particular livestock or live poultry, or (3) such person holds a written order authorizing such payment executed by the owner at the time of or immediately following the consignment of such livestock or live poultry.

(b) The net proceeds arising from the sale of livestock, the ownership of which has been questioned by a market agency duly authorized to inspect brands, marks, and other identifying characteristics of livestock may be paid in accordance with the directions of such brand inspection agency if the laws of the State from which such livestock originated or was shipped to market make provision for payment of the proceeds in the manner directed by the brand inspection agency and if the market agency to which the livestock was consigned, and the consignor or consignors concerned, are unable to establish the ownership of the livestock within a reasonable period of time, not to exceed 60 days after sale.

§ 201.40 *Market agencies or licensees not to use shippers' proceeds or funds received for purchases on commission for own purposes through "bank float" or otherwise.* No market agency or licensee engaged in selling or buying livestock or live poultry on a commission or agency basis shall, except in accordance with separate, specific, prior, written authorization given by its consignors or shippers, use shippers' proceeds or funds received for the purchase of livestock or live poultry on order for purposes of its own either through recourse to the so-called "float" in the bank account in which the proceeds or funds are deposited or in any other manner.

§ 201.41 *Market agencies and licensees to make faithful and prompt accounting to consignors or shippers or other interested persons of whom they have knowledge.* No market agency or licensee shall make such use or disposition of funds in its possession or control as will endanger or impair the faithful and prompt accounting for and payment of such portion thereof as may be due the consignor or shipper of livestock or live poultry or other persons having an interest therein of which interest such market agency or licensee has knowledge.

§ 201.42 *Custodial accounts for shippers' proceeds.* Every market agency and licensee shall, except when gross proceeds are handled in accordance with separate, specific, prior, written authorization given by its consignors or shippers, deposit the gross proceeds received from the sale of livestock or live poultry handled on a commission or agency basis in a separate bank account designated as follows (using the name of "John Doe Commission Company" as an example): "John Doe Commission Company—Custodial Account for Shippers' Proceeds": Such account shall be drawn on only for payment of the net proceeds to the consignor or shipper, or such other person or persons whom such market agency or licensee has knowledge is entitled thereto, and to obtain therefrom the sums due the market agency or licensee as compensation for its services, as set out in its tariffs, and for such sums as are necessary to pay all legal charges against the consignment of livestock or live poultry which a market agency or licensee may, in its capacity as agent, be required to pay for and on behalf of the consignor or shipper. The market agency or licensee in each case shall keep such accounts and records as will at all times disclose the names of the consignors and the amount due and payable to each from funds in the Custodial Account for Shippers' Proceeds. For the proper maintenance of such accounts and in order to expedite examination thereof by duly authorized representatives of the Secretary, the market agency or licensee in each case shall keep the accounts in a manner which will clearly reflect the handling of the funds in compliance with the requirements of this section.

ACCOUNTS AND RECORDS

§ 201.43 *Market agencies and licensees to make prompt accounting and transmittal of net proceeds.* Each market agency shall, before the close of the next business day following the sale of any livestock consigned to it for sale, transmit or deliver to the consignor or shipper of the livestock, or his duly authorized agent, in the absence of any knowledge that any other person, or persons, has any interest in the livestock, the net proceeds received from the sale and a true written account of such sale, showing the number, weight, and price of each kind of animal sold, the name of the purchaser, the date of sale, the commission, yardage, and other lawful charges, and such other facts as may be necessary to complete the account and show fully the true nature of the transaction. Each licensee, acting as a broker, factor, or commission merchant, shall, before the close of the next business day following the sale of live poultry consigned to it for sale, transmit or deliver to the consignor or shipper of the live poultry, or his duly authorized agent, in the absence of any knowledge that any other person, or persons, has any interest in the live poultry, the net proceeds received from the sale and a true written account of such sale showing the number of pounds and the price of each kind of poultry sold, the date of sale, the name of the purchaser, the commission, and other lawful charges, and such other facts as may be necessary to complete the account and show fully the true nature of the transaction.

§ 201.44 *Market agencies and licensees to render prompt accounting for purchases on order.* Each market agency and licensee shall, promptly following the purchase of livestock or live poultry on a commission or agency basis, transmit or deliver to the person for whose account such purchase was made, or his duly authorized agent, a true written account of the purchase showing the number, weight, and price of each kind of animal purchased, or the weight and price of each kind of live poultry purchased, the names of the persons from whom purchased, the date of purchase, the commission and other lawful charges, and such other facts as may be necessary to complete the account and show fully the true nature of the transaction.

§ 201.45 *Market agencies and licensees to make records available for inspection by owners, consignors, and purchasers.* Each market agency and licensee engaged in the business of selling or buying livestock or live poultry on a commission or agency basis shall, on request from an owner, consignor, or purchaser, make available copies of bills covering charges paid by such market agency or licensee for and on behalf of the owner, consignor, or purchaser which were deducted from the gross proceeds of the sale of livestock or live poultry or added to the purchase price thereof when accounting for the sale or purchase.

§ 201.46 *Stockyard owners, registrants, and licensees to keep daily record.* (a) Each stockyard owner, in addition to other necessary records, shall make and keep an accurate record of the number of head of each class of livestock received, shipped, or disposed of locally each day. Each registrant buying or selling livestock on a commission basis or otherwise, in addition to other necessary records, shall make and keep an accurate record of the number and weight of livestock bought, sold, or otherwise disposed of each business day, the prices paid or received therefor, and the charges made for services.

(b) Each licensee buying or selling live poultry on a commission basis or otherwise, in addition to other necessary records, shall make and keep an accurate record of the number of pounds of live poultry bought or sold each business day, the prices paid or received therefor, and the charges made for services and facilities.

§ 201.47 *Market agencies and licensees to disclose business relationships, if any, with purchasers.* No market agency or licensee acting as a broker, factor, or commission merchant shall knowingly sell or dispose of consigned livestock or live poultry to any person in whose business such market agency or licensee, or any stockholder, owner, officer, or employee thereof, has a financial interest, or to any person who has a financial interest in such market agency or licensee, unless the market agency or licensee discloses on the acounts of sales issued to the consignors concerned the nature of the relationship existing between the market agency or licensee and the buyers of the livestock or live poultry and then only if the livestock or live poultry has been offered for sale on the open market and the purchaser's bid exceeds that of other bidders. The provisions of this section shall not be construed to permit any transaction prohibited by §§ 201.57 and 201.69 relating to sales of livestock or live poultry out of consignments to owners, officers, agents, or employees of market agencies or licensees to which the livestock or live poultry was consigned.

§ 201.48 *Sellers of live poultry to issue sales tickets at designated markets.* With respect to each purchase or sale of live poultry by licensees at designated markets a ticket shall be prepared by the seller at the time of sale. Each ticket shall show the name of the designated market, the date of the transaction, the names of the seller and buyer, the number of coops, kinds of poultry, price per pound, and such terms and conditions as the parties may agree upon. Each ticket shall be legibly signed by the seller and the buyer or authorized representatives thereof and when thus signed shall constitute the contract of purchase and sale. One copy of such ticket shall be retained by the seller. On request a copy shall be furnished to the buyer. A copy shall be transmitted with an accounting of the sale to the owner or consignor of the live poultry if the transaction is one on an agency basis. Settlement between seller and buyer shall be on the basis of the duly executed and signed tickets required by this section unless good cause is shown for settlement on some other basis.

§ 201.49 *Requirements regarding scale tickets evidencing weighing of livestock or live poultry.* When livestock or live poultry is weighed for purposes of purchase or sale, a scale ticket shall be issued which shall show the name of the agency performing the weighing service, the date of the weighing, the number of the scale or other information identifying the scale upon which the weighing is performed, the name of the seller, the name of the buyer, and the name of the consignor, or understandable abbreviations of such names. In the case of livestock, in addition to the information referred to in this section, the scale ticket shall show the number of head, kind, and actual weight of the livestock, the amount of dockage, if any, and the name or initials of the person who weighed the livestock. In the case of live poultry, in addition to the information referred to in this section, the scale ticket shall show the number of coops weighed, the gross, tare, and net weights, and the name or initials of the person operating the scale at the time the weighing is done. At posted stockyards only stockyard owners, or State agencies registered as market agencies (when weighing is required to be performed by State agencies) shall weigh livestock and execute and issue scale tickets. In live poultry marketing areas designated under the act only licensees

shall weigh live poultry and execute and issue scale tickets. Scale tickets issued under this section shall be in triplicate form, serially numbered, and if such tickets are used on a type-registering beam they shall conform to the specifications of the National Bureau of Standards. One copy shall be retained by the stockyard owner, market agency, or licensee issuing the same, and one copy shall be furnished to the seller and one copy to the buyer. Duly authenticated copies shall be furnished on request to any owner or consignor of livestock or live poultry. No change in weight shall be made except upon a reweighing of the livestock or live poultry. In the case of an error of the weighmaster in preparing the scale ticket, other than in the weight, he shall prepare a corrected scale ticket showing the corrections made and stating on the back thereof the reasons for such changes. In the event of an error in the preparation of a scale ticket, other than in the weight, due to misinformation having been furnished by the seller or buyer, the weighmaster upon request of the seller or buyer shall issue another ticket bearing appropriate corrections or a correction slip which shall show thereon the changes made and on the back thereof the reasons for such changes. Before such correction ticket or slip shall be issued the weighmaster shall require the person requesting the change to sign such ticket or slip. The correction ticket or slip shall be attached to the original ticket, bear the same serial number, and show on its face that it is a correction ticket or slip.

§ 201.50 *Records; disposition.* No stockyard owner, registrant, or licensee shall destroy or dispose of any books, records, documents, or papers which contain, explain, or modify transactions in his business under the act, without the consent in writing of the Chief.

§ 201.51 *Contracts; stockyard owners to furnish copies of.* Each stockyard owner shall furnish to the Chief at Washington, D. C., true copies of all contracts, and amendments thereof, between such stockyard owner and packing, rendering, serum, fertilizer, or other establishments relating to the business of the stockyard owner, except when it is shown that copies of such documents in the form in which they are effective are already in the possession of the United States Government at Washington, D. C., and available to the Secretary.

§ 201.52 *Information as to sales on commission or agency basis not to be furnished to unauthorized parties.* No market agency or licensee, in connection with the sale of livestock or live poultry on a commission or agency basis, shall give to any person, except a person authorized by the Assistant Administrator to obtain such information or a person who has a financial interest in the consignment or a statement in writing from the owner thereof authorizing the market agency or licensee to furnish such information, any copy of an account of sale or other paper or information which will reveal to such person information relating to the price at which livestock or live poultry was sold or the amount of the net proceeds thereof remitted to the owner or consignor: *Provided, however,* That this shall not prevent a market agency or licensee from furnishing to a trucker, hauling livestock or live poultry for hire, information as to the weight of such livestock or live poultry in order that the trucker may have the necessary facts on which to base his hauling charges: *And provided further,* That this shall not prevent a market agency or licensee from giving to recognized market news reporting services such information as may be necessary to enable such reporting services to furnish the public with market news data.

TRADE PRACTICES

§ 201.53 *Livestock and live poultry market conditions and prices; persons subject to act not to circulate misleading reports.* No packer, stockyard owner, registrant, or licensee shall knowingly make, issue, or circulate any false or misleading report, record, or representation concerning livestock or live poultry market conditions or the price or sale of any livestock or live poultry.

§ 201.54 *Gratuities.* (a) No stockyard owner, or market agency or licensee engaged in the business of selling or buying livestock or live poultry on a commission basis or otherwise, shall give any trucker delivering livestock or live poultry for owners or consignors any gratuities, money, meals, or things of value except advertising novelties having a total value not in excess of 50 percent. This regulation shall not preclude loans by a stockyard owner, market agency, or licensee to a trucker or shipper of livestock or live poultry which are evidenced by an interest-bearing note, properly secured, and having a definite due date.

(b) No stockyard owner shall receive, or knowingly permit any officer, agent, or employee of the stockyard to receive, from any market agency, dealer, packer, or other user of such stockyard, and no market agency, dealer, or packer shall offer, make, or give to any stockyard owner, or to any officer, agent, or employee of a stockyard, any gift, payment, loan, or other consideration, except the established charges for, or in connection with, the furnishing of stockyard services.

(c) No market agency, engaged in selling or buying livestock on a commission basis or otherwise, shall receive, or knowingly permit any owner, officer, agent, or employee of the market agency to receive, from any consignor, principal, dealer, packer, or other user of such market agency services, and no dealer, packer, or market agency shall offer, make, or give to any owner, officer, agent, or employee of a market agency, any gift, payment, loan, or other consideration except the established charges for, or in connection with, the furnishing of market agency services.

§ 201.55 *Purchases and sales to be made on actual weights.* When livestock or live poultry is bought or sold on a weight basis by persons subject to the provisions of the act, settlement therefor shall be on the basis of the weight shown on the scale ticket or correction ticket, as the case may be. Any weight figures shown on accounts of sale, accounts of purchase, invoices, bills, or statements issued by persons subject to the act shall be actual weights obtained on stockyard scales, in the case of livestock, or on scales operated by licensees, in the case of live poultry, at the place and at the time of the consummation of the transactions in question or, if not, shall be appropriately explained on the accountings, bills, or statements issued.

§ 201.56 *Filling orders; price to be paid.* No market agency engaged in the business of selling and buying livestock on a commission basis shall use any livestock consigned to it for sale to fill orders, except as provided in § 201.62, and then only at a price higher than the highest available bid on such livestock after it has been offered for sale on the open market in the customary manner.

§ 201.57 *Livestock sold at auctions; purchases from consignments.* (a) No market agency engaged in selling consigned livestock at auction shall permit its owners, officers, agents, or employees to purchase livestock from consignments for resale for their own speculative accounts, nor shall it permit its owners, officers, agents, or employees to enter into any agreements, relationships, or associations with other parties whereby such owners, officers, agents, or employees shall share, directly or indirectly, in profits realized from resale of livestock purchased out of consignments; nor shall such market agency permit auctioneers or weighmasters, or other employees performing duties of comparable responsibility in connection with the actual conduct of auction sales by the market agency, to purchase livestock out of consignments for any purpose for their own account. This shall not preclude employees of the market agency, whose duties in connection with the selling of livestock by auction do not involve the making of determinations or decisions directly affecting the interests of consignors, from purchasing livestock from consignments for their own accounts for purposes other than speculative resale, provided all such purchases are made by such employees bidding openly and competitively at auction against other buyers and, on the accounts of sale issued, disclosure is made to the consignors concerned of the relationship of the buyers to the market agency.

(b) No market agency engaged in selling livestock at auction shall weigh livestock from its consignments to a dealer account it maintains except when necessary to protect the legitimate interests of consignors and then only after having complied with the requirements of § 201.59. Whenever consigned livestock is offered for sale at auction and is bought by the market agency, or by any person in whose business the market agency has a financial interest, the name of the buyer shall be publicly announced by the market agency at the conclusion of the transaction with respect to such livestock and the accounts of sales furnished the consignors concerned shall disclose the information required by

§ 201.47. The provisions of this section shall not preclude bona fide owners or consignors of livestock from exercising such rights as are conferred on them by the laws of the State in which the auction market is located relating to sales of livestock at auction.

§ 201.58 *Sales to be to highest bidder without intermingling and not conditioned on sales of other consignments.* Every market agency and licensee engaged in the business of selling livestock or live poultry on a commission or agency basis shall offer the livestock or live poultry consigned to it for sale on the open market and shall sell such livestock or live poultry at the highest available bid. In all instances the market agency or licensee shall sell each consignment of livestock or live poultry on its merits and shall not intermingle, prior to sale and for purpose of sale, the livestock or live poultry belonging to one consignor with the livestock or live poultry belonging to another and different consignor unless the consent of the several consignors has been obtained in advance. A market agency or licensee shall not make the sale of one consignment of livestock or live poultry conditional on the sale of another and different consignment of livestock or live poultry without the consent of the owners. If livestock or live poultry belonging to different owners is graded and sold in lots, settlement shall be on the basis of the weight shown on the scale ticket or correction ticket, as the case may be, issued at the time the livestock or live poultry is weighed or graded.

§ 201.59 *Taking consignments into own account; accounting; resales.* If a person registered to operate both as a market agency and dealer, or licensed under the act, takes to his own account livestock or live poultry consigned to him for sale on a commission or agency basis, he shall do so only after he has offered such livestock or live poultry for sale on the open market in the customary manner, and then such livestock or live poultry shall be taken into his account only at a price higher than the highest available bid. In such event the market agency or licensee, in accounting to the owner or consignor of the livestock or live poultry, shall show on the account of sale as the purchaser of the livestock or live poultry the full, true, and correct name of the market agency or licensee. In the event a market agency or licensee takes to its account livestock or live poultry belonging to one owner and resells such livestock or live poultry in one lot on the same day at a price higher than that remitted to the owner, such additional price shall be remitted to the owner in a separate accounting.

§ 201.60 *Consignments on commissions; sale of livestock.*—(a) *Consignments on commission; officer, agent, or employee of consignee not to purchase from.* No market agency or licensee, except as provided in § 201.57, shall sell any consigned livestock or live poultry to any owner, officer, agent, or employee of the market agency or licensee for his own account, or enter, or permit any such owner, officer, agent, or employee, to enter, into any agreement, relationship, or association with anyone whereby such market agency or licensee, or any owner, officer, agent, or employee thereof, shares in the profits realized from the resale of livestock or live poultry purchased from a consignment to such market agency or licensee.

(b) *Sale of livestock belonging to a market agency or its officers or employees.* No market agency shall sell livestock belonging to it or to its owners, officers, agents, or employees, or sell livestock in which it or its owners, officers, agents, or employees have an ownership interest, in such manner as to prejudice the interests of consignors who have consigned livestock to the market agency for sale for their accounts.

§ 201.61 *Market agencies engaged in selling livestock on commission.*—(a) *Market agencies engaged in selling livestock on commission not to finance or clear dealers.* No market agency registered to sell livestock on commission shall finance, clear, or furnish bookkeeping or similar services to a dealer; nor shall such a market agency enter into any agreement, relationship, or association with dealers or other buyers which might have a tendency to lessen the loyalty of the market agency to its consignors or impair the quality of its selling services. This shall not preclude a market agency registered to sell and to buy livestock on a commission basis from purchasing livestock on order for buyers, provided such orders are handled in accordance with the requirements of §§ 201.56 and 201.62.

(b) *Market agencies engaged in purchasing livestock on commission not to purchase livestock from clearees to fill orders.* No market agency registered to buy livestock on commision shall, in filling orders, purchase livestock from dealers whose operations it clears, nor shall it enter into any agreement, relationship, or association with dealers or others which will impair the quality of the buying services furnished its principals.

§ 201.62 *Using consigned livestock to fill orders.* Whenever a market agency uses livestock consigned to it for sale to fill, in whole or in part, an order which it has received from a buyer, the market agency shall be presumed with respect to such livestock to be acting solely as the agent of the consignor and shall collect for its services only the selling commissions provided in its tariff: *Provided,* That to offset expenses incurred by market agencies in soliciting bids on consigned livestock from off-the-market buyers, all the market agencies at a stockyard may provide in their tariffs for assessing such buyers a uniform expense charge not to exceed one-half of the order-buying charges in effect at the market.

§ 201.63 *Consignments; when not to be solicited.* No market agency or licensee shall solicit consignments of livestock or live poultry at or on stockyard premises or in designated areas or after such livestock or live poultry has been billed or consigned to a market agency or licensee and is in course of transportation for delivery to the consignee at a posted stockyard or in a designated area.

§ 201.64 *Consignments; guarantees not to be given.* No market agency or licensee, in soliciting consignments of livestock or live poultry, shall guarantee to the owner or consignor thereof that such livestock or live poultry will be sold at a specific price or prices if consigned to the market agency or licensee for sale on a commission basis.

§ 201.65 *Restrictions on employment of salesmen on split commission basis.* No market agency engaged in selling livestock on a commission basis for the accounts of consignors shall employ a livestock salesman under an agreement or arrangement whereby such salesman is to assume the responsibility of selling a species or class of livestock received by the market agency from all consignors but whose compensation is to be based on a split of only those commission charges assessed consignors considered to be "followers" of the particular salesman. This shall not preclude a market agency handling a small volume of livestock of a certain species from employing a salesman to sell such species under an agreement or arrangement whereby the compensation for such salesman's services is to be based on a split of the commissions realized by the market agency from all consignors whose livestock the salesman is to sell; nor shall it preclude a market agency from making incentive payments, or bonus payments, to salesmen based on the over-all operating results of the market agency.

§ 201.66 *Market agencies not to employ packers or dealers.* No market agency engaged in selling livestock on a commission basis for the accounts of consignors or in purchasing livestock on a commission basis for the accounts of principals shall, after having accepted delivery of consignments, or after having accepted orders from buyers, and until the completion of the weighing of the livestock to buyers, utilize the services of packers or separately registered dealers, or their employees, in the furnishing by such market agency of its services.

§ 201.67 *Packers or dealers not to own or finance selling agencies.* No packer subject to the act, or separately registered dealer, shall have an ownership interest in, finance, or participate in the management or operation of a market agency registered to sell livestock at posted stockyards on a commission basis; nor shall such a market agency permit such a packer, or separately registered dealer, to have an ownership interest in, finance, or participate in the management or operation of such market agency.

§ 201.68 *Packers not to own or finance order buyers.* No packer subject to the act shall have an ownership interest in, finance, or participate in the management or operation of a market agency registered to purchase livestock at posted stockyards on a commission basis; nor shall such a market agency permit a packer to have an ownership interest in, finance, or participate in the

management or operation of such market agency.

§ 201.69 *Furnishing information to competitor buyers.* No packer, dealer, or order buyer, engaged in purchasing livestock at a posted stockyard in person, or through employed buyers, shall, prior to, or during the conduct of, his buying operations at such stockyard, furnish competitor packers, dealers, order buyers, or their buyers or representatives, similarly engaged in buying livestock at the stockyard, with information concerning his proposed buying operations at the stockyard, such as the species, classes, volume of livestock to be purchased, or prices to be paid; nor shall such packer, dealer, or order buyer furnish any other buying information to competitor buyers for the purpose or with the effect of restricting or limiting competition, manipulating livestock prices, or controlling the movement of livestock through posted stockyards.

§ 201.70 *Restriction or limitation of competition between packers and dealers prohibited.* Each packer subject to the act shall conduct his buying operations at posted stockyards, and at other locations, in competition with, and independently of, other packers. Each packer and dealer engaged in purchasing livestock at posted stockyards, in person or through employed buyers, shall conduct his buying operations at such stockyards in competition with, and independently of, other packers and dealers similarly engaged.

SERVICES

§ 201.71 *Accurate weights.* Each stockyard owner, market agency, or licensee who weighs livestock at a posted stockyard or live poultry in a designated area shall install, maintain, and operate the scales used for such weighing so as to insure accurate weights.

§ 201.72 *Scales; testing of.* Each stockyard owner, market agency, or licensee who weighs livestock at a posted stockyard or live poultry in a designated area for purposes of purchase or sale or who furnishes scales for such purposes shall cause such scales to be tested properly by competent agencies at suitable intervals in accordance with instructions of the Chief, copies of which will be furnished to each stockyard owner, market agency, or licensee.

§ 201.73 *Scale operators to be competent.* Stockyard owners, market agencies, and licensees shall employ only competent persons of good character and known integrity to operate scales at posted stockyards or in designated areas for weighing livestock or live poultry for the purpose of purchase or sale. They shall require such employees to operate the scales in accordance with instructions of the Chief, copies of which will be furnished to each stockyard owner, a market agency, or licensee who employs persons to operate scales used for the purposes herein indicated. They also shall require such employees to "rotate" in their weighing assignments at stockyards operating three or more scales. Any person found to be operating scales incorrectly, carelessly, in violation of instructions, or in such manner as to favor or injure any party or agency through incorrect weighing or incorrect weight recording shall be removed from his weighing duties.

§ 201.74 *Scales; reports of tests and inspections.* Each stockyard owner, market agency, or licensee who weighs livestock at a posted stockyard or live poultry in a designated area for purposes of purchase or sale, shall furnish reports of tests and inspections of scales used for such purposes on forms which will be furnished by the Chief on request. The stockyard owner, market agency, or licensee shall retain one copy of such form when executed, shall cause one copy to be retained by the agency conducting the test and inspection of the scales, and shall deliver the third copy to the District Supervisor having charge of the work under the act in the particular district in which the scales being tested are located. In case the test and inspection of scales as herein required are conducted by an agency of a State or municipality or other governmental subdivision, the forms ordinarily used by such agency for reporting tests and inspections of scales shall be accepted in lieu of the forms furnished for this purpose by the Chief: *Provided*, That the test and inspection forms used by the State or other governmental agency contain substantially the same information as that required by the official form.

§ 201.75 *Scales; repairs, adjustments, or replacements after inspection.* No scale shall be used by any stockyard owner, market agency, or licensee, at a posted stockyard or in a designated area, unless it has been found upon test and inspection to be in a condition to give accurate weights. If any repairs, adjustments, or replacements are made upon such a scale it shall not be placed in use until it has again been tested and inspected in accordance with the regulations in this part.

§ 201.76 *Reweighing.* Stockyard owners, market agencies, and licensees, or their employees, shall reweigh livestock or live poultry on request of duly authorized representatives of the Secretary.

§ 201.77 *Weighing for purposes other than purchase or sale.* Every stockyard owner, market agency, and licensee who weighs livestock or live poultry, at a posted stockyard or in a designated area, for purposes other than purchase or sale shall show on the scale tickets or other records used in connection with such weights the fact that they are not weights for the purpose of purchase or sale.

§ 201.78 *Packer scales.* Packers owning or operating scales on which livestock is weighed for purposes of purchase in commerce for slaughter shall install, maintain, and operate such scales so as to insure accurate weights. They shall cause such scales to be tested properly by competent agencies at suitable intervals in accordance with instructions of the Chief and shall submit to the District Supervisor copies of reports on at least two scale tests made during the year. They shall employ only competent persons of good character and known integrity to operate such scales and shall require such employees to operate the scales in accordance with instructions of the Chief. Any employee found to be operating scales incorrectly, carelessly, in violation of instructions, or in such manner as to favor or injure any party or agency through incorrect weighing or incorrect weight recording shall be removed from his weighing duties. For each draft of livestock weighed for purposes of purchase or sale a scale ticket shall be issued showing, in addition to the weight of the livestock and the amount of dockage, if any, the name of the seller, the name of the buyer, the species, number of head, initials of weigher, and date of weighing. Scale tickets shall be executed at least in duplicate, one copy being supplied the seller and one copy being retained by the packer for a period of not less than six months. Scale tickets printed on type-registering weighbeams shall conform to the specifications of the National Bureau of Standards. No scale shall be used by any packer in weighing livestock for purchase unless it has been found, upon test and inspection, to be in condition to yield accurate weights. If any repairs, adjustments, or replacements are made upon such a scale it shall not be used until it has been retested and found accurate.

§ 201.79 *Facilities and assignment of pens—(a) Facilities and services at posted stockyards or designated cities, markets, or places; discrimination prohibited.* No stockyard owner shall discriminate unfairly with respect to the utilization of pens, alleys, buildings, or facilities for the yarding, weighing, or handling of livestock, or of space for packing, rendering, and other establishments, or otherwise in furnishing services and facilities at his stockyard. No licensee shall discriminate unfairly with respect to the utilization of facilities for the handling of live poultry at designated cities, markets, or places, or discriminate unfairly in the weighing or handling of live poultry or otherwise in furnishing services and facilities thereat.

(b) *Assignment of pens and facilities.* Every stockyard owner shall assign to market agencies engaged in selling livestock on a commission basis at the stockyard and dealers engaged in buying and selling livestock at the stockyard, without unfair or unjust discrimination, reasonable pens and facilities to be used in connection with the holding, feeding, watering, sorting, or selling of livestock consigned to market agencies or the buying, selling, or receiving of livestock by dealers at such stockyard: *Provided*, That if conditions warrant the stockyard owner may assign reasonable pens or other facilities to be used jointly or in common by two or more of such dealers. Each market agency and dealer shall make application to the stockyard owner for, and obtain an assignment of, necessary pens and facilities prior to commencing operations at the stockyard. Assignments of pens and facilities shall be made, reviewed annually or oftener, if conditions warrant, and adjusted or changed, in number or location, on the basis of the volume and kind of livestock handled, the number, size, character, and kind of consignments received or lots purchased, the seniority of the market agency or dealer, the operating conditions of the stockyard, and other pertinent considerations: *Provided*, That no assignment, adjustment, or change shall unfairly or unjustly discriminate against any market agency or dealer or impair the efficiency of operations or the reasonableness of stockyard services furnished patrons of the market.

(c) *Dealers required to operate in assigned pens.* Dealers engaged in buying and selling livestock at a posted stockyard shall receive, handle, feed, water, hold, sort, trade on, or sell all livestock bought or received by them at such stockyard, and otherwise carry on their dealer operations, in pens and facilities assigned to them by the stockyard owner. This shall not prohibit dealers from consigning livestock to, or bona fide planting livestock with, registered market agencies at the stockyard for sale: *Provided*, That, if conditions at a particular market require such action, the market agencies and the stockyard owner shall prescribe reasonable hours within which dealer-owned livestock may be held in pens assigned to the market agencies.

§ 201.80 *Stockyard facilities or services to be furnished only to unsuspended, properly registered, and bonded parties.* No stockyard owner or operator shall, after notice, furnish services or facilities at his stockyard to any person who attempts to engage in the business of a market agency or dealer at his stockyard without being properly registered and bonded as required by the act and the regulations in this part or whose registration is under suspension.

§ 201.81 *Suspended or revoked registrants or licensees.* No packer, registrant, or licensee shall, after notice, employ any person whose registration or license has been suspended or revoked to perform activities at a posted stockyard or in a designated area during the period of such suspension or revocation. No registrant or licensee shall, at a posted stockyard or in a designated area, after notice, furnish services or facilities or sell livestock or live poultry to or buy livestock or live poultry from any person required by the act and the regulations in this part to be registered and bonded, or licensed, who is not so registered and bonded, or licensed, or whose registration or license is suspended or revoked.

§ 201.82 *Livestock; care and promptness in yarding, feeding, watering, weighing, and handling.* Each stockyard owner and registrant shall exercise reasonable care and promptness in respect to yarding, feeding, watering, weighing, or otherwise handling livestock to prevent waste of feed, shrinkage, injury, death, or other avoidable loss.

§ 201.83 *Live poultry; care and promptness in feeding, watering, weighing, transporting, and handling.* Each licensee shall exercise reasonable care and promptness in respect to unloading, placing in coops, feeding, watering, weighing, transporting, or otherwise handling live poultry to prevent waste of feed, shrinkage, injury, death, or other avoidable loss.

§ 201.84 *Feed and water furnished livestock or live poultry.* Each stockyard owner, market agency, or licensee, who furnishes feed or water to livestock at posted stockyards or live poultry in designated areas shall see that it is wholesome and fit for the purpose. They shall collect for feed so furnished according to actual or carefully estimated weight only and in accordance with their schedules of rates and charges filed under the act.

§ 201.85 *Livestock auctions; requirements as to accommodations and persons entering auction ring.* Stockyard owners and market agencies shall furnish adequate accommodations for the public to see and place bids on livestock offered for sale at auction; but only those persons whose presence is necessary to the proper handling, buying, or selling of the livestock shall be permitted in the auction ring while the auction is in progress.

INSPECTION OF BRANDS

§ 201.86 *Application for authorization by State agencies and duly organized State livestock associations; requisites.* A department or agency of a State, or a duly organized livestock association of a State, in which branding or marking of livestock, or both, as a means of establishing ownership prevails by custom or statute, which desires to obtain an authorization to charge and collect at any stockyard subject to the provisions of the act a reasonable and nondiscriminatory fee for the inspection of brands, marks, and other identifying characteristics of livestock originating in or shipped from such State for the purpose of determining the ownership of such livestock shall file with the Assistant Administrator an application in writing for such authorization. The application shall set forth clearly facts showing the necessity for inspection and shall show that branding or marking, or both branding and marking, livestock as a means of establishing ownership prevails by custom or statute in the State. The application shall set forth additional information, including facts showing the experience, extent and efficiency of the organization, possession of necessary records, and any other factor relating to the ability of the applicant to perform the proposed service and, in addition, in the case of a duly organized livestock association, the financial responsibility of the applicant and evidence of its organization. The application shall further state the names of the stockyards at which the applicant proposes to perform this service and the fee which the applicant proposes to charge for rendering the service.

§ 201.87 *Two or more applications from same State; procedure.* In case two or more applications for authorizations to collect a fee for the inspection of brands, marks, and other identifying characteristics of livestock, for the purpose of determining the ownership of such livestock, are received from the same State, and the facts set forth in the applications show such action to be necessary in order to reach a proper determination, a hearing will be held in conformity with the applicable rules of practice governing proceedings under the act.

§ 201.88 *Registration and filing of schedules.* Upon the issuance of an authorization to an agency or an association, said agency or association shall register in accordance with the provisions of § 201.10 and shall file a schedule of its rates and charges for performing the service in the manner and form prescribed by §§ 201.17 to 201.26, inclusive.

§ 201.89 *Records of authorized agencies or associations.* Authorized agencies or associations shall maintain adequate records showing in detail the income derived from the collection of authorized fees, the disbursement of such funds as expenses for conducting the services, the inspections performed, and the results thereof, including records showing a full description of brands, marks, and other identifying characteristics of livestock which have been inspected. They shall also maintain currently records of the brands, marks, and other identifying characteristics of livestock located in the State from which such agency or association will operate, and with reference to which the authorization has been granted.

§ 201.90 *Fees; deduction and accounting.* Persons registered as market agencies selling livestock on a commission basis, at stockyards where an agency or association has been authorized under the provisions of section 317 (a) of the act to collect a reasonable fee for the inspection of brands, marks, and other identifying characteristics of livestock, shall deduct from the proceeds of the sale of such livestock on which such inspection has been performed the fee as set forth in the tariffs filed by the agency or association and in effect at the time the services are rendered and shall pay over to the authorized agency or association the amount of such fees. Said market agencies in accounting to the owner or consignor of the livestock on which such fees are collected shall clearly show the amounts deducted from the proceeds for the payment of such fees and the purpose for which the payments are being made. All other persons receiving at posted stockyards livestock which is subject to inspection by an agency or association which has been authorized under the provisions of section 317 (a) of the act to collect a reasonable fee for the inspection of brands, marks, and other identifying characteristics of livestock, shall pay, upon demand, to such agency or association the fees authorized by the act to be assessed and collected.

§ 201.91 *Inspections; reciprocal arrangements by authorized agencies or associations.* An authorized agency or association may make arrangements with an association or associations in the same or in another State, where branding or marking livestock prevails by custom or statute to perform inspection service at posted stockyards on such terms and conditions as may be approved by the Assistant Administrator:

*Provided*, That such arrangements will tend to further the purposes of the act and will not result in duplication of charges or services.

§ 201.92 *Maintenance of identity of consignments; inspection to be expedited.* All persons having custody at a posted stockyard of livestock subject to inspection shall make it available to the inspection agency authorized under the act in such manner as to preserve the identity of the consignment until inspection has been completed. Agencies authorized to conduct such inspection shall perform the work as soon after receipt of the livestock as practicable and as rapidly as is reasonably possible in order to prevent delay in marketing, shrinkage in weight, or other avoidable losses.

§ 201.93 *Existing contracts between authorized agencies; recognition and continuation.* The provisions of existing contracts between agencies authorized to collect fees and market agencies engaged in selling livestock on a commission basis, with reference to disposition of proceeds arising from the sale of livestock as to which ownership has been questioned, shall not be affected by the regulations in this part to the extent that such contracts contain no provisions which are in conflict with the act or such regulations. Copies of all such contracts shall be filed promptly with the Chief at Washington, D. C.

GENERAL

§ 201.94 *Information as to business; furnishing of by packers, stockyard owners, registrants, and licensees.* Each packer, stockyard owner, registrant, and licensee shall give to the Secretary or his duly authorized representatives in writing or otherwise, and under oath or affirmation if requested by such representatives, any information concerning the business of the packer, stockyard owner, registrant, or licensee which may be required in order to carry out the provisions of the act and the regulations in this part within such reasonable time as may be specified in the request for such information.

§ 201.95 *Inspection of records and property of packers, stockyard owners, registrants, and licensees.* Each packer, stockyard owner, registrant, and licensee shall, upon proper request during ordinary business hours, permit authorized representatives of the Secretary to enter the place of business and examine all records requested pertaining to the business of the packer, stockyard owner, registrant, or licensee as such, and to make copies thereof, and inspect such property of persons subject to the act as is necessary to carry out the provisions of the act and the regulations in this part. Any necessary facilities for such examination of records and inspection of property shall be extended to authorized representatives of the Secretary by the packer, stockyard owner, registrant, or licensee, his agents and employees.

§ 201.96 *Packers, stockyard owners, registrants, or licensees; information concerning business not to be divulged.* No agent or employee of the United States shall, without the consent of the packer, stockyard owner, registrant, or licensee concerned, divulge or make known in any manner, except to such other agent or employee of the United States as may be required to have such knowledge in the regular course of his official duties or except insofar as he may be directed by the Secretary or by a court of competent jurisdiction, any facts or information regarding the business of any packer, stockyard owner, registrant, or licensee which may come to the knowledge of such agent or employee through any examination or inspection of the business or records of the packer, stockyard owner, registrant, or licensee or through any information given by the packer, stockyard owner, registrant, or licensee pursuant to the act and regulations in this part.

§ 201.97 *Annual reports.* Every packer, stockyard owner, market agency, dealer, and licensee shall file annually with the Division a report on prescribed forms not later than March 15 following the calendar year end or, if the records are kept on a fiscal year basis, not later than 60 days after the close of his fiscal year. The Chief on good cause shown or on his own motion may waive the filing of such reports in particular cases.

Any person who desires to submit written data, views, or arguments concerning the proposed revision may do so by filing them with the Director of the Livestock Branch, Production and Marketing Administration, United States Department of Agriculture, Washington 25, D. C., within 30 days after the publication of this notice in the FEDERAL REGISTER. (7 U. S. C. 181 et seq).

Done at Washington, D. C., this 3d day of November 1953.

[SEAL] JOHN H. DAVIS,
*Acting Secretary of Agriculture.*

[F. R. Doc. 53-9424; Filed, Nov. 6, 1953; 8:49 a. m.]

## ATOMIC ENERGY COMMISSION

### [10 CFR Part 30]

RADIOISOTOPE DISTRIBUTION

NOTICE OF PROPOSED RULE MAKING

Pursuant to the Atomic Energy Act of 1946 as amended (Pub. Law 585, 79th Cong.; 60 Stat. 755 ff) and to section 4 (a) of the Administrative Procedure Act of 1946 as amended (Pub. Law 404, 79th Cong.), notice is hereby given that an amendment to Title 10, Chapter I, Part 30, Code of Federal Regulations, entitled "Radioisotope Distribution" will be issued by the Atomic Energy Commission, to be effective December 15, 1953.

It is proposed that this amendment will read substantially as follows:

Title 10, Chapter I, Part 30, Code of Federal Regulations, entitled "Radioisotope Distribution" is hereby amended in the following respect effective December 15, 1953:

1. Amend § 30.2 by adding the following:

(l) *Research and development.* "Research and development" means theoretical analysis, exploration, and experimentation, and the extension of investigative findings and theories of a scientific or technical nature into practical application for experimental and demonstration purposes, including the experimental production and testing of models, devices, equipment, materials, and processes. "Research and development" as used in this part does not include the internal or external administration of radioisotopes, or the radiation therefrom, to human beings.

(m) *Human use.* "Human use" means the internal or external administration of radioisotopes, or the radiation therefrom, to human beings.

(n) *General authorization.* "General authorization" means an authorization that is issued for the procurement of any quantity of any radioisotope of atomic number 3 to 83 for the use or uses designated therein.

2. Amend § 30.13 by deleting paragraph (a) and substituting therefor the following new paragraph:

§ 30.13 *Items and quantities.* (a) Sections 30.20 through 30.53, inclusive, do not apply to any item listed in § 30.70 *Schedule A*, nor to any quantity listed in § 30.71 *Schedule B: Provided*, That no person shall, except as otherwise permitted by the regulations contained in this part, effect an increase in the radioactivity of said scheduled items or quantities by adding other radioactive material thereto, by combining the radioisotopes from two or more such items or quantities, or by altering them in any other manner so as to increase thereby the rate of radiation exposure of himself or others above the original rate therefrom: *Provided further*, That no person shall administer externally or internally, or direct the administration of, said scheduled items or quantities to a human being for any purpose, including but not limited to diagnostic, therapeutic, and research purposes, except as permitted by a valid authorization.

3. Amend § 30.21 to read as follows:

§ 30.21 *Requirements for the approval of applications*—(a) *Requirements of general applicability.* A domestic application for radioisotopes procurement will not be approved unless:

(1) The radioisotope is requested for one or more of the following purposes: Research or development, human use (including medical therapy), industrial uses, processing or making of compounds, or such other useful applications as may be developed;

(2) The applicant has suitable equipment and facilities for the protection of health and safety (such as handling devices, work areas, shields, measuring and monitoring instruments); and

(3) The applicant has suitably trained and experienced personnel and is otherwise qualified to use radioisotopes for the requested purpose.

(b) *Special requirements applicable to human uses by institutions.* An application by an institution for authorization to procure radioisotopes, other than sealed sources, for human use will not be approved unless:

(1) The applicant satisfies the general requirements specified in paragraph (a) of this section;

(2) The institution has appointed a medical isotopes committee of at least three members to evaluate all proposals for research, diagnosis, and therapeutic use of radioisotopes within that institution. Membership of the committee should include physicians expert in internal medicine, hematology, therapeutic radiology, and a person experienced in assay of radioisotopes and protection against ionizing radiations;

(3) The institution possesses adequate facilities for the clinical care of patients;

(4) The physician designated on the application as the individual user is licensed by a state or territory of the United States or the District of Columbia to dispense drugs in the practice of medicine, and has substantial experience in the proposed use, the handling and administration of radioisotopes and, where applicable, the clinical management of radioactive patients; and

(5) The applicant, if the application is for a general authorization, has also (i) previously received a reasonable number of authorizations for radioisotope procurement for a variety of radioisotopes for a variety of human uses; (ii) appointed a radiological safety officer who will advise on or be available for advice and assistance on radiological safety problems; and (iii) appointed a medical isotope committee (see subparagraph (2) of this paragraph) which will review and approve, in advance of purchase of radioisotopes, proposals for human uses.

(c) *Special requirements applicable to human uses by individual physicians.* An application by a physician for authorization to procure radioisotopes, other than sealed sources, for human use will not be approved unless:

(1) The applicant satisfies the general requirements specified in paragraph (a) of this section;

(2) The applicant is a physician licensed by a state or territory of the United States or the District of Columbia to dispense drugs in the practice of medicine;

(3) The applicant has access to a hospital possessing adequate facilities to hospitalize and monitor the applicant's radioactive patients whenever it is advisable; and

(4) The applicant has extensive experience in the proposed use, the handling and administration of radioisotopes, and where applicable, the clinical management of radioactive patients. (The physician shall furnish suitable evidence of such experience with his application. A statement from the medical isotope committee in the institution where he acquired his experience, indicating its amount and nature, may be submtted as evidence of such experience.)

(d) *Special requirements applicable to human use of sealed sources.* An application for authorization to procure radioisotopes in sealed sources for human use will not be approved unless:

(1) The applicant satisfies the general requirements specified in paragraph (a) of this section; and

(2) The applicant or, if the application is made by an institution, the individual user (i) has specialized training in the therapeutic use of the radioactive device considered (teletherapy unit, beta applicator, etc.) or has experience equivalent to such training; and (ii) is a physician licensed by a state or territory of the United States or the District of Columbia to dispense drugs in the practice of medicine.

(e) *Special requirements applicable to general authorizations for use in research and development.* An application for a general authorization to procure radioisotopes for use in research and development will not be approved unless:

(1) The applicant satisfies the general requirements specified in paragraph (a) of this section;

(2) The applicant has received a reasonable number of authorizations for radioisotope procurement for a variety of radioisotopes for a variety of research and development uses;

(3) The applicant has established an isotope committee (composed of such persons as a radiological safety officer, a representative of the business office, and one or more persons trained or experienced in the safe use of radioactive materials) which will review and approve, in advance of purchase of radioisotopes, proposals for such uses; and

(4) The applicant has appointed a radiological safety officer who will advise on or be available for advice and assistance on radiological safety problems.

(f) *Special requirements applicable to general authorizations for processing.* An application for a general authorization to procure radioisotopes for use in processing for distribution to other authorized persons will not be approved unless:

(1) The applicant satisfies the general requirements specified in paragraph (a) of this section;

(2) The applicant has received a reasonable number of authorizations for radioisotope procurement for processing, resale, and distribution of a variety of radioisotopes; and

(3) The applicant has appointed a radiological safety officer who will advise on or be available for advice and assistance on radiological safety problems.

4. Amend § 30.30 to read as follows:

§ 30.30 *Issuance of authorizations.* Upon approval of an application, the Commission will issue an Authorization for Radioisotope Procurement, Form AEC-374. The authorization shall be the only valid approval for procurement, and its issuance shall be based upon the representations made in the application and shall be subject to and in accordance with the regulation in this part and the terms and conditions stated in the application. Authorizations are issued for the procurement only of the radioisotope or radioisotopes specified in the authorization, in the quantity or quantities specified and for the use or uses designated therein.

5. Amend § 30.32 to read as follows:

§ 30.32 *Expiration.* An authorization shall expire at the end of the period stated therein without the necessity of notice or warning from the Commission. The holder thereof shall neither order nor receive radioisotopes after the expiration of such authorization and no person shall transfer radioisotopes to another person after the expiration date of the transferee's authorization. Expiration of a holder's authorization does not affect his authority to retain possession of previously acquired radioisotopes for the use or uses specified in the authorization and subject to all the conditions and limitations incorporated therein, or otherwise imposed by this part.

6. Amend § 30.54 to read as follows:

§ 30.54 *Inspections and tests.* Each person who possesses or uses radioisotopes shall permit the Commission, at all reasonable times, to make such inspections and tests as the Commission deems appropriate or necessary for enforcement of the regulations in this part, including, but not limited to, inspections and tests of (a) radioisotopes being used, (b) facilities wherein radioisotopes are used or stored, (c) radiation detection and monitoring instruments, (d) equipment or devices utilizing radioisotopes or used in connection with the utilization of radioisotopes, and (e) radioisotopes waste disposal methods.

Interested parties are given an opportunity to submit their views and other relevant information with respect to the proposed amendment in writing to the United States Atomic Energy Commission, Division of Research, at 19th Street and Constitution Avenue, NW., Washington 25, D. C., within thirty (30) days from the date of publication of this notice of intention in the daily issue of the FEDERAL REGISTER.

Dated at Washington, D. C., this 26th day of October 1953.

MARION W. BOYER,
*General Manager.*

## DEPARTMENT OF THE INTERIOR

### Bureau of Reclamation

GUNNISON-ARKANSAS PROJECT, COLORADO

ORDER OF REVOCATION

FEBRUARY 12, 1953.

Pursuant to the authority delegated by Departmental Order No. 2515 of April 7, 1949 (14 F. R. 1937), I hereby revoke Departmental Order of April 25, 1941, in so far as said order affects the following described land; provided, however, that such revocation shall not affect the withdrawal of any other lands by said order or affect any other orders withdrawing or reserving the land hereinafter described:

SIXTH PRINCIPAL MERIDIAN, COLORADO

T. 21 S., R. 68 W.,
Sec. 13, SW¼NE¼.
T. 19 S., R. 70 W.,
Sec. 7, SW½SW¼.
T. 18 S., R. 72 W.,
Sec. 14, S½NE¼, SE¼NW¼, S½,
Sec. 15, SE¼SW¼, E½SE¼, SW¼SE¼,
Sec. 20, SE¼NE¼, E½SE¼, SW¼SE¼,
Sec. 21, NE¼, E½NW¼, SW¼NW¼, N½SW¼, SW¼SW¼,
Sec. 22, N½N½, S½NW¼,
Sec. 23, NW¼NE¼, NE¼SE¼,
Sec. 24, SW¼,
Sec. 25, W½NE¼, SE¼NE¼, E½NW¼, SE¼,
Sec. 29, NE¼, S½NW¼, NW¼SW¼, NW¼SE¼,
Sec. 30, S½N½, N½S½.
T. 18 S., R. 73 W.,
Sec. 25, SE¼NE¼, S½,
Sec. 26, S½NE¼, SE¼NW¼, S½,
Sec. 27, SE¼SE¼,
Sec. 33, E½SE¼,
Sec. 34, E½NE¼, SW¼NE¼, SE¼NW¼, SW¼, W½SE¼, NE¼SE¼,
Sec. 35, N½NW¼, SW¼NW¼.
T. 19 S., R. 73 W.,
Sec. 3, W½NW¼,
Sec. 4, NE¼NE¼, S½N½, N½S½,
Sec. 4, SW¼SW¼,
Sec. 5, S½,
Sec. 6, SE¼SE¼,
Sec. 7, E½E½,
Sec. 8, N½N½, SW¼NW¼, NW¼SW¼.

The above area aggregates 5280 acres.

G. W. LINEWEAVER,
*Assistant Commissioner.*

NOVEMBER 2, 1953.

I concur. The records of the Bureau of Land Management will be noted accordingly.

The lands are primarily suitable for grazing. It is unlikely that they will be classified for any other use but any application that is filed will be considered on its merits.

This order shall not otherwise become effective to change the status of the described lands until 10:00 a. m. on the 35th day after the date of this order. At that time the said lands shall become subject to application, petition, location and selection, subject to valid existing rights, the provisions of existing withdrawals, the requirements of applicable laws, and the 91-day preference right filing period for veterans and others entitled to preference under the act of September 27, 1944 (58 Stat 747; 43 U. S. C. 279–284), as amended.

Information showing the periods during which and the conditions under which veterans and others may file applications for these lands may be obtained on request from the Manager of the Land and Survey Office, Denver, Colorado.

EDWARD WOOZLEY,
*Director,*
*Bureau of Land Management.*

GREEN RIVER PROJECT, UTAH

ORDER OF REVOCATION

JULY 29, 1953.

Pursuant to the authority delegated by Departmental Order No. 2515 of April 7, 1949 (14 F. R. 1937), I hereby revoke Departmental Order of April 30, 1921, insofar as said order affects the following described lands; provided, however, that such revocation shall not affect the withdrawal of any other lands by said order or affect any other orders withdrawing or reserving the lands hereinafter described:

SALT LAKE BASE AND MERIDIAN, UTAH

T. 21 S., R. 14 E.,
Sec. 12: SW¼, W½SE¼ and SE¼SE¼.
T. 20 S., R. 15 E.,
Sec. 24: All (unsurveyed),
Sec. 25: Lots 1 to 4 incl., W½E½ and W½,
Sec. 26: all (unsurveyed).
T. 21 S., R. 15 E.,
Sec. 1: Lots 1 to 19 incl., SW¼ and W½SE¼,
Sec. 2: Lots 1 to 16 incl., and S½,
Sec. 3: Lots 1 to 16 incl., and S½,
Sec. 4: Lots 1 to 16 incl., and S½,
Sec. 5: Lots 1 to 19 incl., and S½,
Sec. 6: Lots 1 to 21 incl., E½SW¼ and SE¼,
Sec. 8: NE¼, E½NW¼ and NW¼NW¼,
Secs. 9, 10, and 11: All,
Sec. 12: Lots 1 to 4 incl., W½E½ and W½,
Sec. 13: NW¼NE¼, NE¼NW¼ and NW¼SW¼,
Sec. 14: N½N½,
Sec. 15: N½NE¼ and S½NW¼,
Sec. 16: All,
Sec. 17: SW¼NW¼, SW¼ and W½SE¼,
Sec. 18: Lots 1 to 4 incl., S½NE¼, E½W½ and SE¼,
Sec. 19: Lots 1 to 4 incl., E½ and E½W½,
Secs. 20 and 21: All,
Sec. 22: N½NE¼, SE¼NE¼, NE¼NW¼ and S½,
Sec. 23: S½,
Sec. 24: Lot 1 and NW¼NE¼,
Sec. 25: Lots 1 to 4 incl., W½E½ and W½,
Secs. 26 to 29 incl., and 32 to 35 incl.: All,
Sec. 36: Lots 1 and 2, W½NE¼, W½ and SE¼.
T. 22 S., R. 15 E.,
Sec. 1: Lots 1 to 4 incl., S½N½ and S½,
Sec. 2: Lots 1 to 4 incl., S½N½ and S½,
Sec. 3: Lots 1 to 4 incl., S½N½ and S½,
Sec. 4: Lots 1 to 4 incl., S½N½ and S½.
T. 20 S., R. 16 E.,
Sec. 3: Lots 6 to 14 incl.,
Sec. 9: Lots 1 to 7 incl., NE¼, E½NW¼, SW¼NW¼, N½SW¼ and NW¼SE¼,
Sec. 10: Lots 2, 3, 4, 5, and 7,
Sec. 14: All,
Sec. 15: S½SW¼ and SE¼SE¼,
Sec. 16: Lots 1 to 5 incl., NE¼NE¼, S½NE¼, SE¼NW¼, NE¼SW¼, S½SW¼ and SE¼,
Sec. 17: Lots 1 to 8 incl., and SW¼,
Sec. 18: E½ and NE¼NW¼,
Sec. 19: Lot 4, SE¼NE¼, W½E½, E½SW¼ and NE¼SE¼,
Sec. 20: Lots 1 to 5 incl., SW¼NE¼, W½ and W½SE¼,
Sec. 21: Lots 1 and 2, E½, NW¼ and NE¼SW¼,
Sec. 22: E½NE¼, SW¼NE¼, NW¼ and S½,
Secs. 23, 26 and 27: All,
Sec. 28: Lot 1 and NE¼,
Sec. 29: Lots 1 to 8 incl., W½NE¼ and W½,
Sec. 30: E½,
Sec. 31: E½,
Sec. 32: Lots 1 to 15 incl., E½NE¼ and NW¼NW¼,
Sec. 33: Lot 4, W½NW¼ and NW¼SW¼,
Sec. 34: Lots 1 to 4 incl., NE¼, E½NW¼ and N½S½,
Sec. 35: Lots 1 to 4 incl., N½ and N½S½,
Sec. 36: Lots 1 to 4 incl., N½ and N½S½.
T. 21 S., R. 16 E.,
Sec. 1: Lots 2, 3, 6, 11, and 17 to 20 incl., and S½,
Sec. 2: Lots 1 to 20 incl., and S½,
Sec. 3: Lots 1 to 18 and 20 to 24 incl., NE¼SW¼, N½SE¼, and SE¼SE¼,
Sec. 4: Lots 1 to 20 incl., SW¼, NW¼SE¼ and S½SE¼,
Sec. 5: Lots 1, 2, 8, 15 and 17 to 20 incl., S½SW¼ and N½SE¼,
Sec. 6: Lots 1 to 22 incl., E½SW¼ and SE¼,
Sec. 7: Lots 1 to 4 incl., E½ and E½W½,
Sec. 8: NE¼, N½NW¼, SE¼NW¼ and SE¼SW¼,
Sec. 9: Lots 1 to 5 incl., NE¼NE¼, W½NE¼ and W½,
Sec. 10: Lots 1 to 9 incl., N½NW¼ and S½S½,
Sec. 11: All,
Sec. 12: NE¼, W½ and N½SE¼,
Sec. 13: NW¼NE¼, S½NE¼, NW¼, N½S½ and SE¼SE¼.
Sec. 14: N½, SW¼ and W½SE¼,
Sec. 15: Lots 1 to 6 incl., E½ and NE¼NW¼,
Sec. 16: Lots 1 and 2, W½NE¼, W½ and SE¼,
Sec. 17: All,
Sec. 18: Lots 1 to 4 incl., E½ and E½W½,
T. 21 S., R. 17 E.,
Sec. 4: Lots 1 to 10 incl., 15 and 16, SE¼SW¼, NE¼SE¼ and SW¼SE¼,
Sec. 5: Lots 1 to 16 incl., SW¼ and W½SE¼,
Sec. 6: Lots 1, 8, 9, 15, and 16, and SE¼,
Sec. 7: Lots 1, 2, and 3, NE¼, E½NW¼ and NE¼SW¼,
Sec. 8: N½, NE¼SW¼ and SW¼SW¼,
Sec. 9: SE¼NE¼ and SE¼NW¼,
Sec. 10: NW¼,
Sec. 16: All,
Sec. 17: S½SE¼,
Sec. 22: S½NE¼, N½NW¼, SE¼NW¼, NE¼SW¼ and N½SE¼.

The above areas contain approximately 51,572.14 acres.

G. W. LINEWEAVER,
*Assistant Commissioner.*

NOVEMBER 2, 1953.

I concur. The records of the Bureau of Land Management will be noted accordingly.

The land is primarily suitable for grazing. It is unlikely that it will be classified for any other disposition, but any application that is filed will be considered on its merits. The lands will not be subject to occupancy or disposition until they have been classified.

This order shall not become effective to change the status of the described lands until 10:00 a. m. on the 35th day after the date of this order. At that time the said lands shall become subject to application, petition, location and selection, subject to valid existing rights, the provisions of existing withdrawals, the requirements of applicable laws, and the 91-day preference right filing period for veterans and others entitled to preference under the act of September 27, 1944 (58 Stat. 747; 43 U. S. C. 279–284) as amended.

Information showing the periods during which and the conditions under which veterans and others may file applications for these lands may be obtained on request from the Manager of the Land and Survey Office at Salt Lake City, Utah.

EDWARD WOOZLEY,
*Director,*
*Bureau of Land Management.*

COLORADO RIVER STORAGE AND YUMA PROJECTS, ARIZONA

ORDER OF REVOCATION

JANUARY 9, 1953.

Pursuant to the authority delegated by Departmental Order No. 2515 of April 7, 1949 (14 F. R. 1937), I hereby revoke Departmental Orders of January 31, 1903, September 8, 1903, February 19, 1929, and March 14, 1929, insofar as said orders affect the following described lands: *Provided, however,* That such revocation shall not affect the withdrawal of any other lands by said orders or affect any other orders withdrawing or reserving the land hereinafter described.

GILA AND SALT RIVER MERIDIAN, ARIZONA

T. 3 N., R. 21 W.,
Secs. 19 to 21, incl., and 28 to 33, incl., all unsurveyed.
T. 4 N., R. 21 W.,
Secs. 19 to 21, incl., and 28 to 33, incl., all.
T. 1 N., R. 22 W., unsurveyed, all township.
T. 2 N., R. 22 W.,
Secs. 1, 2, 11 to 14, incl., 21 to 28, incl., and 33 to 36, incl., all.
T. 1 N., R. 23 W.,
Secs. 25, 26, 35 and 36, all.
T. 5 S., R. 21 W.,
Secs. 1 to 6, incl., 8 to 16, incl., 21 to 28, incl., and 33 to 36, incl., all.
T. 6 S., R. 21 W.,
Secs. 1, 2, 3, 10 to 15, incl., 22 to 27, incl., 34, 35 and 36, all.
T. 1 S., R. 23 W., unsurveyed,
Secs. 4, 9, 16, 21 and 33, all.
T. 2 S., R. 23 W., unsurveyed,
Secs. 4, 9, 16, 21, 28 and 33 all.

The above area aggregates approximately 84,410.00 acres.

G. W. LINEWEAVER,
*Assistant Commissioner.*

NOVEMBER 2, 1953.

I concur. The records of the Bureau of Land Management will be noted accordingly.

1. The following-described lands are included in the withdrawal made by Public Land Order No. 848 of July 1, 1952 for use of the Department of the Army in connection with the Yuma Test Station:

GILA AND SALT RIVER MERIDIAN

T. 1 N., R. 22 W., unsurveyed.
T. 5 S., R. 21 W.,
Secs. 1 to 6, inclusive,
Secs. 8 to 16, inclusive,
Secs. 21 to 28, inclusive,
Secs. 33 to 36, inclusive.
T. 6 S., R. 21 W., unsurveyed.
Secs. 1, 2 and 3,
Secs. 10 to 15, inclusive,
Secs. 22 to 27, inclusive,
Secs. 34 to 36, inclusive.

2. The remaining lands released from withdrawal by this order are in an area which is primarily of rough and mountainous topography. They are primarily suitable for grazing. It is unlikely that they will be classified for any other use, but any application that is filed will be considered on its merits.

This order shall not otherwise become effective to change the status of the lands referred to in this paragraph until 10:00 a. m., on the 35th day after the date of this order. At that time the said lands shall become subject to application, petition, location and selection, subject to valid existing rights, the provisions of existing withdrawals, the requirements of applicable laws, and the 91-day preference right filing period for veterans and others entitled to preference under the act of September 27, 1944 (58 Stat. 747; 43 U. S. C. 279–284) as amended.

Information showing the periods during which and the conditions under which veterans and others may file applications for these lands may be obtained on request from the Manager of the Land and Survey Office, Phoenix, Arizona.

EDWARD WOOZLEY,
*Director,*
*Bureau of Land Management.*

### Office of the Secretary

AREAS WITHIN THE OUTER CONTINENTAL SHELF

AMENDMENT OF NOTICE TO HOLDERS OF STATE LEASES

The Notice to Holders of State Leases issued by the Acting Secretary of the Interior on September 18, 1953, and published in the FEDERAL REGISTER on September 25, 1953 (18 F. R. 5714), is hereby amended by adding the following paragraph at the end thereof:

(12) If the holder of a mineral lease attempts in good faith to meet all the requirements of section 6 (a) of the Outer Continental Shelf Lands Act before the close of business on November 5, 1953, but fails to pay in full before then the sum which the Secretary or his authorized representative hereafter determines to be due and payable under sections 6 (a) (4) and 6 (a) (9) of the act, the time within which to pay such sum in full is hereby extended until 30 days after the receipt of notice sent by registered letter to the holder of the lease at his last known address of the sum so determined to be due and payable.

ORME LEWIS,
*Assistant Secretary of the Interior.*

ALLOCATION OF FUNDS FOR LOANS

SEPTEMBER 25, 1953.

Pursuant to Section 3 (c) of the Rural Electrification Act of 1936 and upon information and data in the files of the Rural Electrification Administration I hereby determine that the number of farms not receiving central station electric service for each State and the number of such farms for the United States at the beginning of the current fiscal year are as set forth in the following schedule, and I hereby allot from the sum of $67,500,000, being fifty per centum of the total sum made available for the current fiscal year, the respective sums for loans in the several States as hereinafter set forth.

| | Farms without central station electric service July 1, 1953 | Allotment for loans during the fiscal year ending June 30, 1954 |
|---|---|---|
| United States | 493,674 | $67,500,000 |
| [illegible] | 30,656 | 4,191,592 |
| [illegible] | 975 | 130,577 |
| [illegible] | 31,282 | 4,277,185 |
| [illegible] | 7,095 | 1,000,156 |

## DEPARTMENT OF COMMERCE

### Federal Maritime Board

FJELL LINE, ET AL.

NOTICE OF AGREEMENT FILED FOR APPROVAL

Notice is hereby given that the following described agreement has been filed with the Board for approval pursuant to section 15 of the Shipping Act, 1916, as amended; 39 Stat. 733, 46 U. S. C. section 814.

Agreement No. 8180 between carriers comprising the Fjell Line and Swedish Chicago Line, joint services, and Swedish American Line and Transatlantic Steamship Co., Ltd., joint service, provides for the creation of a conference to be known as the U. S. Great Lakes, Scandinavian and Baltic Eastbound Conference, for the establishment and maintenance of agreed rates, charges and practices for or in connection with the transportation of cargo in the eastbound trade from ports of the Great Lakes of the United States to ports in Norway, Sweden, Denmark, Finland, Danzig Free State, Estonia, Iceland, Latvia, Lithuania, Poland, and to Continental and Russian ports served via the Baltic.

Interested parties may inspect this agreement and obtain copies thereof at the Regulation Office, Federal Maritime Board, Washington, D. C., and may submit, within 20 days after publication of this notice in the FEDERAL REGISTER, written statements with reference to this agreement and their position as to approval, disapproval, or modification, together with request for hearing should such hearing be desired.

Dated: November 4, 1953.

By order of the Federal Maritime Board.

[SEAL] A. J. WILLIAMS,
*Secretary.*

[F. R. Doc. 53-9434; Filed, Nov. 6, 1953; 8:50 a. m.]

## FEDERAL POWER COMMISSION

[Docket No. G-1676]

SOUTHERN NATURAL GAS CO.

NOTICE OF ORDER ISSUING CERTIFICATE OF PUBLIC CONVENIENCE AND NECESSITY

NOVEMBER 3, 1953.

Notice is hereby given that on November 2, 1953, the Federal Power Commission issued its order adopted October 29, 1953, amending order of September 4, 1952 (17 F. R. 8197) issuing certificate of public convenience and necessity in the above-entitled matter.

[SEAL] LEON M. FUQUAY,
*Secretary.*

[F. R. Doc. 53-9417; Filed, Nov. 6, 1953; 8:47 a. m.]

---

[Docket No. G-1928]

PERMIAN BASIN PIPELINE CO.

NOTICE OF PETITION TO AMEND ORDER ISSUING CERTIFICATE OF PUBLIC CONVENIENCE AND NECESSITY

NOVEMBER 3, 1953.

Take notice that on October 12, 1953, Permian Basin Pipeline Company (Permian), filed a petition to amend the order of May 1, 1953, issuing it a certificate of public convenience and necessity in the above-entitled matter.

Such petition states that among the facilities authorized to be constructed by such order was a 16-inch transmission pipe line beginning in the Mitchell Gas Field, Pecos County, Texas, and extending to the Plymouth Compressor Station in Upton County, Texas. The petition seeks amendment of the certificate to authorize construction of a 20-inch line in lieu of the 16-inch line. Permian states that the 20-inch line will reduce its ultimate costs for construct-

ing facilities and will provide additional pipe line capacity.

Answers may be filed with the Federal Power Commission, in accordance with the Commission's rules of practice and procedure (18 CFR 1.9), on or before the 15th day of November 1953. The petition is on file with the Commission and open to public inspection.

[SEAL] LEON M. FUQUAY, *Secretary.*

[F. R. Doc. 53-9415; Filed, Nov. 6, 1953; 8:47 a. m.]

---

[Docket No. G-2010]

NORTHERN NATURAL GAS CO.

NOTICE OF ORDER ISSUING CERTIFICATE OF PUBLIC CONVENIENCE AND NECESSITY

NOVEMBER 3, 1953.

Notice is hereby given that on November 2, 1953, the Federal Power Commission issued its order adopted October 29, 1953, amending order of July 30, 1953 (18 F. R. 4841), issuing certificate of public convenience and necessity in the above-entitled matter.

[SEAL] LEON M. FUQUAY, *Secretary.*

[F. R. Doc. 53-9418; Filed, Nov. 6, 1953; 8:47 a. m.]

---

[Docket No. G-2191]

ARKANSAS-OKLAHOMA GAS CO.

NOTICE OF FINDINGS AND ORDER

NOVEMBER 3, 1953.

Notice is hereby given that on November 2, 1953, the Federal Power Commission issued its order adopted October 29, 1953, issuing certificate of public convenience and necessity and permitting and approving abandonment of facilities in the above-entitled matter.

[SEAL] LEON M. FUQUAY, *Secretary.*

[F. R. Doc. 53-9419; Filed, Nov. 6, 1953; 8:48 a. m.]

---

[Docket No. G-2293]

ALGONQUIN GAS TRANSMISSION CO.

NOTICE OF APPLICATION

NOVEMBER 3, 1953.

Take notice that Algonquin Gas Transmission Company (Applicant), a Delaware Corporation, with its principal place of business in Boston, Massachusetts filed, on October 26, 1953, an application for a certificate of public convenience and necessity pursuant to section 7 of the Natural Gas Act, authorizing the construction and operation of the following natural-gas facilities:

(1) A 2-inch tap valve on Applicant's Fall River 8" Lateral line at Station 177+00, Tiverton, Rhode Island.

(2) 40 feet of $2\frac{3}{8}$" O. D. pipeline connecting the Fall River Lateral with proposed meter station.

(3) 1 positive displacement type meter and regulator to be housed in a 6' x 8' corrugated iron building.

Total estimated cost of facilities is $4,980, including land, acquisitions, contingencies, supervision and engineering.

The facilities are proposed to be used to sell and deliver a maximum of 50 Mcf per day to the Tiverton Gas Company.

Protests or petitions to intervene may be filed with the Federal Power Commission, Washington 25, D. C., in accordance with the rules of practice and procedure (18 CFR 1.8 or 1.10) on or before the 23d day of November.

Applicant requests that this matter be considered under the shortened hearing procedure provided for in § 1.32 of the rules of practice and procedure.

This application is on file with the Commission for public inspection.

[SEAL] LEON M. FUQUAY, *Secretary.*

[F. R. Doc. 53-9416; Filed, Nov. 6, 1953; 8:47 a. m.]

## INTERSTATE COMMERCE COMMISSION

[4th Sec. Application 28617]

BRICK AND RELATED ARTICLES FROM SOUTHERN TERRITORY TO VIENNA, HERNDON, LEESBURG AND PURCELLVILLE, VA.

APPLICATION FOR RELIEF

NOVEMBER 4, 1953.

The Commission is in receipt of the above-entitled and numbered application for relief from the long-and-short-haul provision of section 4 (1) of the Interstate Commerce Act.

Filed by: R. E. Boyle, Jr., Agent, for carriers parties to schedule listed below.

Commodities involved: Brick and related articles, carloads.

From: Producing points in southern territory.

To: Vienna, Herndon, Leesburg, and Purcellville, Va.

Grounds for relief: Rail competition, circuitous routes, and to maintain grouping.

Schedules filed containing proposed rates: C. A. Spaninger, Agent, I. C. C. No. 1278, supp. 38.

Any interested person desiring the Commission to hold a hearing upon such application shall request the Commission in writing so to do within 15 days from the date of this notice. As provided by the general rules of practice of the Commission, Rule 73, persons other than applicants should fairly disclose their interest, and the position they intend to take at the hearing with respect to the application. Otherwise the Commission, in its discretion, may proceed to investigate and determine the matters involved in such application without further or formal hearing. If because of an emergency a grant of temporary relief is found to be necessary before the expiration of the 15-day period, a hearing, upon a request filed within that period, may be held subsequently.

By the Commission.

[SEAL] GEORGE W. LAIRD, *Secretary.*

[F. R. Doc. 53-9422; Filed, Nov. 6, 1953; 8:48 a. m.]

---

[Sec. 5a Application 49]

CENTRAL AND SOUTHERN MOTOR FREIGHT TRAFFIC ASSOCIATION, INC.

APPLICATION FOR APPROVAL OF AGREEMENT

NOVEMBER 4, 1953.

The Commission is in receipt of the above-entitled and numbered application for approval of an agreement under the provisions of section 5a of the Interstate Commerce Act.

Filed November 2, 1953 by: R. L. Weck, Attorney-in-Fact, 420 West Jefferson Street, Louisville 2, Ky.

Agreement involved: Agreement between and among common carriers by motor vehicle, members of the Central and Southern Motor Freight Tariff Association, Inc., relating to rates, exceptions to classifications, ratings, rules, regulations or practices, governing the transportation of property between points within Central Territory, generally including the States of Illinois, Indiana, Iowa, Michigan, Missouri, Ohio, the western portion of Wisconsin, as generally described in Central Territory Motor Carrier Rates, 8 M. C. C. 233 and 24 M. C. C. 69, on the one hand, and, on the other, Southern Territory, generally including the States of Alabama, Arkansas (Helena and West Helena only), Florida, Georgia, Kentucky, Louisiana (east of the Mississippi River), Mississippi, North Carolina, South Carolina, Tennessee, and the southern portion of Virginia, generally described in State of Alabama, et al. v. New York Central Railroad Company, et al., 235 I. C. C. 255, 265; and procedures for the joint initiation, consideration, and establishment thereof.

The complete application may be inspected at the office of the Commission in Washington, D. C.

Any interested person desiring the Commission to hold a hearing upon such application shall request the Commission in writing so to do within 20 days from the date of this notice. As provided by the general rules of practice of the Commission, persons other than applicants should fairly disclose their interest, and the position they intend to take at the hearing with respect to the application. Otherwise the Commission, in its discretion, may proceed to investigate and determine the matters involved in such application without further or formal hearing.

By the Commission, Division 2.

[SEAL] GEORGE W. LAIRD, *Secretary.*

# FEDERAL REGISTER

VOLUME 18 NUMBER 220

*Washington, Tuesday, November 10, 1953*

## TITLE 3—THE PRESIDENT

### PROCLAMATION 3035

ARMISTICE DAY, 1953

BY THE PRESIDENT OF THE UNITED STATES OF AMERICA

A PROCLAMATION

WHEREAS November 11, 1953, marks the thirty-fifth anniversary of the signing of the Armistice which ended the bitter hostilities of World War I and served as a beacon of hope to all humanity that peace would prevail on the earth; and

WHEREAS the sons of the heroes of Chateau-Thierry, Saint Mihiel, and the Argonne had scarcely come of age when they were called upon to meet new aggressors at Omaha Beach, Anzio, Iwo Jima, Heartbreak Ridge, and elsewhere, and to give their lives, many of them, before new armistices could still the fighting and give renewed opportunity for establishing a true peace; and

WHEREAS the Congress, by a concurrent resolution of June 4, 1926 (44 Stat. 1982), requested the President to issue a proclamation calling for the observance each year of the anniversary of the signing of the Armistice on November 11, 1918, and, by an act approved May 13, 1938 (52 Stat. 351), made November 11 of each year a legal holiday, and provided that the day should be dedicated to the cause of world peace and should be known as Armistice Day; and

WHEREAS it is a wise custom to rededicate ourselves each year at this time to the prevention of armed conflict among nations:

NOW, THEREFORE, I, DWIGHT D. EISENHOWER, President of the United States of America, do hereby invite and urge the people of the Nation to devote themselves anew on Wednesday, November 11, 1953, to the task of promoting with fervor and zeal a permanent peace among all the peoples of the earth. I also direct the appropriate officials of the Government to arrange for the display of the flag of the United States on all public buildings on that day.

IN WITNESS WHEREOF, I have hereunto set my hand and caused the Seal of the United States of America to be affixed.

DONE at the City of Washington this Fifth day of November in the year of our Lord nineteen hundred and [SEAL] fifty-three, and of the Independence of the United States of America the one hundred and seventy-eighth.

DWIGHT D. EISENHOWER

By the President:

WALTER B. SMITH,
*Acting Secretary of State.*

### EXECUTIVE ORDER 10501

SAFEGUARDING OFFICIAL INFORMATION IN THE INTERESTS OF THE DEFENSE OF THE UNITED STATES

WHEREAS it is essential that the citizens of the United States be informed concerning the activities of their government; and

WHEREAS the interests of national defense require the preservation of the ability of the United States to protect and defend itself against all hostile or destructive action by covert or overt means, including espionage as well as military action; and

WHEREAS it is essential that certain official information affecting the national defense be protected uniformly against unauthorized disclosure:

NOW, THEREFORE, by virtue of the authority vested in me by the Constitution and statutes, and as President of the United States, and deeming such action necessary in the best interests of the national security, it is hereby ordered as follows

SECTION 1. *Classification Categories.* Official information which requires protection in the interests of national defense shall be limited to three categories of classification, which in descending order of importance shall carry one of the following designations: Top Secret, Secret, or Confidential. No other designation shall be used to classify defense information, including military information, as requiring protection in the interests of national defense, except as

Part 259 — 7059

expressly provided by statute. These categories are defined as follows:

(a) *Top Secret.* Except as may be expressly provided by statute, the use of the classification Top Secret shall be authorized, by appropriate authority, only for defense information or material which requires the highest degree of protection. The Top Secret classification shall be applied only to that information or material the defense aspect of which is paramount, and the unauthorized disclosure of which could result in exceptionally grave damage to the Nation such as leading to a definite break in diplomatic relations affecting the defense of the United States, an armed attack against the United States or its allies, a war, or the compromise of military or defense plans, or intelligence operations, or scientific or technological developments vital to the national defense.

(b) *Secret.* Except as may be expressly provided by statute, the use of the classification Secret shall be authorized, by appropriate authority, only for defense information or material the unauthorized disclosure of which could result in serious damage to the Nation, such as by jeopardizing the international relations of the United States, endangering the effectiveness of a program or policy of vital importance to the national defense, or compromising important military or defense plans, scientific or technological developments important to national defense, or information revealing important intelligence operations.

(c) *Confidential.* Except as may be expressly provided by statute, the use of the classification Confidential shall be authorized, by appropriate authority, only for defense information or material the unauthorized disclosure of which could be prejudicial to the defense interests of the nation.

SEC. 2. *Limitation of Authority to Classify.* The authority to classify defense information or material under this order shall be limited in the departments and agencies of the executive branch as hereinafter specified. Departments and agencies subject to the specified limitations shall be designated by the President:

(a) In those departments and agencies having no direct responsibility for national defense there shall be no authority for original classification of information or material under this order.

(b) In those departments and agencies having partial but not primary responsibility for matters pertaining to national defense the authority for original classification of information or material under this order shall be exercised only by the head of the department or agency, without delegation.

(c) In those departments and agencies not affected by the provisions of subsection (a) and (b), above, the authority for original classification of information or material under this order shall be exercised only by responsible officers or employees, who shall be specifically designated for this purpose. Heads of such departments and agencies shall limit the delegation of authority to classify as severely as is consistent with the orderly and expeditious transaction of Government business.

SEC. 3. *Classification.* Persons designated to have authority for original classification of information or material which requires protection in the interests of national defense under this order shall be held responsible for its proper classification in accordance with the definitions of the three categories in section 1, hereof. Unnecessary classification and over-classification shall be scrupulously avoided. The following special rules shall be observed in classification of defense information or material:

(a) *Documents in General.* Documents shall be classified according to their own content and not necessarily according to their relationship to other documents. References to classified material which do not reveal classified defense information shall not be classified.

(b) *Physically Connected Documents.* The classification of a file or group of physically connected documents shall be at least as high as that of the most highly classified document therein. Documents separated from the file or group shall be handled in accordance with their individual defense classification.

(c) *Multiple Classification.* A document, product, or substance shall bear a classification at least as high as that of its highest classified component. The document, product, or substance shall bear only one over-all classification, notwithstanding that pages, paragraphs, sections, or components thereof bear different classifications.

(d) *Transmittal Letters.* A letter transmitting defense information shall be classified at least as high as its highest classified enclosure.

(e) *Information Originated by a Foreign Government or Organization.* Defense information of a classified nature furnished to the United States by a foreign government or international organization shall be assigned a classification which will assure a degree of protection equivalent to or greater than that required by the government or international organization which furnished the information.

SEC. 4. *Declassification, Downgrading, or Upgrading.* Heads of departments or agencies originating classified material shall designate persons to be responsible for continuing review of such classified material for the purpose of declassifying or downgrading it whenever national defense considerations permit, and for receiving requests for such review from all sources. Formal procedures shall be established to provide specific means for prompt review of classified material and its declassification or downgrading in order to preserve the effectiveness and integrity of the classification system and to eliminate accumulation of classified material which no longer requires protection in the defense interest. The following special rules shall be observed with respect to changes of classification of defense material:

(a) *Automatic Changes.* To the fullest extent practicable, the classifying authority shall indicate on the material (except telegrams) at the time of original classification that after a specified event or date, or upon removal of classified enclosures, the material will be downgraded or declassified.

(b) *Non-Automatic Changes.* The persons designated to receive requests for review of classified material may downgrade or declassify such material when circumstances no longer warrant its retention in its original classification provided the consent of the appropriate classifying authority has been obtained. The downgrading or declassification of extracts from or paraphrases of classified documents shall also require the consent of the appropriate classifying authority unless the agency making such extracts knows positively that they warrant a classification lower than that of the document from which extracted, or that they are not classified.

(c) *Material Officially Transferred.* In the case of material transferred by or pursuant to statute or Executive order from one department or agency to another for the latter's use and as part of its official files or property, as distinguished from transfers merely for purposes of storage, the receiving department or agency shall be deemed to be the classifying authority for all purposes under this order, including declassification and downgrading.

(d) *Material Not Officially Transferred.* When any department or agency has in its possession any classified material which has become five years old, and it appears (1) that such material originated in an agency which has since become defunct and whose files and other property have not been officially transferred to another department or agency within the meaning of subsection (c), above, or (2) that it is impossible for the possessing department or agency to identify the originating agency, and (3) a review of the material indicates that it should be downgraded or declassified, the said possessing department or agency shall have power to declassify or downgrade such material. If it appears probable that another department or agency may have a substantial interest in whether the classification of any particular information should be maintained, the possessing department or agency shall not exercise the power conferred upon it by this subsection, except with the consent of the other department or agency, until thirty days after it has notified such other department or agency of the nature of the material and of its intention to de-

classify or downgrade the same. During such thirty-day period the other department or agency may, if it so desires, express its objections to declassifying or downgrading the particular material, but the power to make the ultimate decision shall reside in the possessing department or agency.

(e) *Classified Telegrams.* Such telegrams shall not be referred to, extracted from, paraphrased, downgraded, declassified, or disseminated, except in accordance with special regulations issued by the head of the originating department or agency. Classified telegrams transmitted over cryptographic systems shall be handled in accordance with the regulations of the transmitting department or agency.

(f) *Downgrading.* If the recipient of classified material believes that it has been classified too highly, he may make a request to the reviewing official who may downgrade or declassify the material after obtaining the consent of the appropriate classifying authority.

(g) *Upgrading.* If the recipient of unclassified material believes that it should be classified, or if the recipient of classified material believes that its classification is not sufficiently protective, it shall be safeguarded in accordance with the classification deemed appropriate and a request made to the reviewing official, who may classify the material or upgrade the classification after obtaining the consent of the appropriate classifying authority.

(h) *Notification of Change in Classification.* The reviewing official taking action to declassify, downgrade, or upgrade classified material shall notify all addressees to whom the material was originally transmitted.

SEC. 5. *Marking of Classified Material.* After a determination of the proper defense classification to be assigned has been made in accordance with the provisions of this order, the classified material shall be marked as follows:

(a) *Bound Documents.* The assigned defense classification on bound documents, such as books or pamphlets, the pages of which are permanently and securely fastened together, shall be conspicuously marked or stamped on the outside of the front cover, on the title page, on the first page, on the back page and on the outside of the back cover. In each case the markings shall be applied to the top and bottom of the page or cover.

(b) *Unbound Documents.* The assigned defense classification on unbound documents, such as letters, memoranda, reports, telegrams, and other similar documents, the pages of which are not permanently and securely fastened together, shall be conspicuously marked or stamped at the top and bottom of each page, in such manner that the marking will be clearly visible when the pages are clipped or stapled together.

(c) *Charts, Maps, and Drawings.* Classified charts, maps, and drawings shall carry the defense classification marking under the legend, title block, or scale in such manner that it will be reproduced on all copies made therefrom. Such classification shall also be marked at the top and bottom in each instance.

(d) *Photographs, Films and Recordings.* Classified photographs, films, and recordings, and their containers, shall be conspicuously and appropriately marked with the assigned defense classification.

(e) *Products or Substances.* The assigned defense classification shall be conspicuously marked on classified products or substances, if possible, and on their containers, if possible, or, if the article or container cannot be marked, written notification of such classification shall be furnished to recipients of such products or substances.

(f) *Reproductions.* All copies or reproductions of classified material shall be appropriately marked or stamped in the same manner as the original thereof.

(g) *Unclassified Material.* Normally, unclassified material shall not be marked or stamped *Unclassified* unless it is essential to convey to a recipient of such material that it has been examined specifically with a view to imposing a defense classification and has been determined not to require such classification.

(h) *Change or Removal of Classification.* Whenever classified material is declassified, downgraded, or upgraded, the material shall be marked or stamped in a prominent place to reflect the change in classification, the authority for the action, the date of action, and the identity of the person or unit taking the action. In addition, the old classification marking shall be cancelled and the new classification (if any) substituted therefor. *Automatic* change in classification shall be indicated by the appropriate classifying authority through marking or stamping in a prominent place to reflect information specified in subsection 4 (a) hereof.

(i) *Material Furnished Persons not in the Executive Branch of the Government.* When classified material affecting the national defense is furnished authorized persons, in or out of Federal service, other than those in the executive branch, the following notation, in addition to the assigned classification marking, shall whenever practicable be placed on the material, on its container, or on the written notification of its assigned classification:

> This material contains information affecting the national defense of the United States within the meaning of the espionage laws, Title 18, U. S. C., Secs. 793 and 794, the transmission or revelation of which in any manner to an unauthorized person is prohibited by law.

Use of alternative marking concerning "Restricted Data" as defined by the Atomic Energy Act is authorized when appropriate.

SEC. 6. *Custody and Safekeeping.* The possession or use of classified defense information or material shall be limited to locations where facilities for secure storage or protection thereof are available by means of which unauthorized persons are prevented from gaining access thereto. Whenever such information or material is not under the personal supervision of its custodian, whether during or outside of working hours, the following physical or mechanical means shall be taken to protect it:

(a) *Storage of Top Secret Material.* Top Secret defense material shall be protected in storage by the most secure facilities possible. Normally it will be stored in a safe or a safe-type steel file container having a three-position, dial-type, combination lock, and being of such weight, size, construction, or installation as to minimize the possibility of surreptitious entry, physical theft, damage by fire, or tampering. The head of a department or agency may approve other storage facilities for this material which offer comparable or better protection, such as an alarmed area, a vault, a secure vault-type room, or an area under close surveillance of an armed guard.

(b) *Secret and Confidential Material.* These categories of defense material may be stored in a manner authorized for Top Secret material, or in metal file cabinets equipped with steel lockbar and an approved three combination dial-type padlock from which the manufacturer's identification numbers have been obliterated, or in comparably secure facilities approved by the head of the department or agency.

(c) *Other Classified Material.* Heads of departments and agencies shall prescribe such protective facilities as may be necessary in their departments or agencies for material originating under statutory provisions requiring protection of certain information.

(d) *Changes of Lock Combinations.* Combinations on locks of safekeeping equipment shall be changed, only by persons having appropriate security clearance, whenever such equipment is placed in use after procurement from the manufacturer or other sources, whenever a person knowing the combination is transferred from the office to which the equipment is assigned, or whenever the combination has been subjected to compromise, and at least once every year. Knowledge of combinations shall be limited to the minimum number of persons necessary for operating purposes. Records of combinations shall be classified no lower than the highest category of classified defense material authorized for storage in the safekeeping equipment concerned.

(e) *Custodian's Responsibilities.* Custodians of classified defense material shall be responsible for providing the best possible protection and accountability for such material at all times and particularly for securely locking classified material in approved safekeeping equipment whenever it is not in use or under direct supervision of authorized employees. Custodians shall follow procedures which insure that unauthorized persons do not gain access to classified defense information or material by sight or sound, and classified information shall not be discussed with or in the presence of unauthorized persons.

(f) *Telephone Conversations.* Defense information classified in the three categories under the provisions of this order shall not be revealed in telephone conversations, except as may be authorized under section 8 hereof with respect to the transmission of Secret and Confidential material over certain military communications circuits.

(g) *Loss or Subjection to Compromise.* Any person in the executive branch who has knowledge of the loss or possible subjection to compromise of classified defense information shall promptly report the circumstances to a designated official of his agency, and the latter shall take appropriate action forthwith, including advice to the originating department or agency.

SEC. 7. *Accountability and Dissemination.* Knowledge or possession of classified defense information shall be permitted only to persons whose official duties require such access in the interest of promoting national defense and only if they have been determined to be trustworthy. Proper control of dissemination of classified defense information shall be maintained at all times, including good accountability records of classified defense information documents, and severe limitation on the number of such documents originated as well as the number of copies thereof reproduced. The number of copies of classified defense information documents shall be kept to a minimum to decrease the risk of compromise of the information contained in such documents and the financial burden on the Government in protecting such documents. The following special rules shall be observed in connection with accountability for and dissemination of defense information or material:

(a) *Accountability Procedures.* Heads of departments and agencies shall prescribe such accountability procedures as are necessary to control effectively the dissemination of classified defense information, with particularly severe control on material classified Top Secret under this order. Top Secret Control Officers shall be designated, as required, to receive, maintain accountability registers of, and dispatch Top Secret material.

(b) *Dissemination Outside the Executive Branch.* Classified defense information shall not be disseminated outside the executive branch except under conditions and through channels authorized by the head of the disseminating department or agency, even though the person or agency to which dissemination of such information is proposed to be made may have been solely or partly responsible for its production.

(c) *Information Originating in Another Department or Agency.* Except as otherwise provided by section 102 of the National Security Act of July 26, 1947, c. 343, 61 Stat. 498, as amended, 50 U. S. C. sec. 403, classified defense information originating in another department or agency shall not be disseminated outside the receiving department or agency without the consent of the originating department or agency. Documents and material containing defense information which are classified Top Secret or Secret shall not be reproduced without the consent of the originating department or agency.

SEC. 8. *Transmission.* For transmission outside of a department or agency, classified defense material of the three categories originated under the provisions of this order shall be prepared and transmitted as follows:

(a) *Preparation for Transmission.* Such material shall be enclosed in opaque inner and outer covers. The inner cover shall be a sealed wrapper or envelope plainly marked with the assigned classification and address. The outer cover shall be sealed and addressed with no indication of the classification of its contents. A receipt form shall be attached to or enclosed in the inner cover, except that Confidential material shall require a receipt only if the sender deems it necessary. The receipt form shall identify the addressor, addressee, and the document, but shall contain no classified information. It shall be signed by the proper recipient and returned to the sender.

(b) *Transmitting Top Secret Material.* The transmission of Top Secret material shall be effected preferably by direct contact of officials concerned, or, alternatively, by specifically designated personnel, by State Department diplomatic pouch, by a messenger-courier system especially created for that purpose, or by electric means in encrypted form; or in the case of information transmitted by the Federal Bureau of Investigation, such means of transmission may be used as are currently approved by the Director, Federal Bureau of Investigation, unless express reservation to the contrary is made in exceptional cases by the originating agency.

(c) *Transmitting Secret Material.* Secret material shall be transmitted within the continental United States by one of the means established for Top Secret material, by an authorized courier, by United States registered mail, or by protected commercial express, air or surface. Secret material may be transmitted outside the continental limits of the United States by one of the means established for Top Secret material, by commanders or masters of vessels of United States registry, or by United States Post Office registered mail through Army, Navy, or Air Force postal facilities, provided that the material does not at any time pass out of United States Government control and does not pass through a foreign postal system. Secret material may, however, be transmitted between United States Government and/or Canadian Government installations in continental United States, Canada, and Alaska by United States and Canadian registered mail with registered mail receipt. In an emergency, Secret material may also be transmitted over military communications circuits in accordance with regulations promulgated for such purpose by the Secretary of Defense.

(d) *Transmitting Confidential Material.* Confidential defense material shall be transmitted within the United States by one of the means established for higher classifications, by registered mail, or by express or freight under such specific conditions as may be prescribed by the head of the department or agency concerned. Outside the continental United States, Confidential defense material shall be transmitted in the same manner as authorized for higher classifications.

(e) *Within an Agency.* Preparation of classified defense material for transmission, and transmission of it, within a department or agency shall be governed by regulations, issued by the head of the department or agency, insuring a degree of security equivalent to that outlined above for transmission outside a department or agency.

SEC. 9. *Disposal and Destruction.* Documentary record material made or received by a department or agency in connection with transaction of public business and preserved as evidence of the organization, functions, policies, operations, decisions, procedures or other activities of any department or agency of the Government, or because of the informational value of the data contained therein, may be destroyed only in accordance with the act of July 7, 1943, c. 192, 57 Stat. 380, as amended, 44 U. S. C. 366–380. Non-record classified material, consisting of extra copies and duplicates including shorthand notes, preliminary drafts, used carbon paper, and other material of similar temporary nature, may be destroyed, under procedures established by the head of the department or agency which meet the following requirements, as soon as it has served its purpose:

(a) *Methods of Destruction.* Classified defense material shall be destroyed by burning in the presence of an appropriate official or by other methods authorized by the head of an agency provided the resulting destruction is equally complete.

(b) *Records of Destruction.* Appropriate accountability records maintained in the department or agency shall reflect the destruction of classified defense material.

SEC. 10. *Orientation and Inspection.* To promote the basic purposes of this order, heads of those departments and agencies originating or handling classified defense information shall designate experienced persons to coordinate and supervise the activities applicable to their departments or agencies under this order. Persons so designated shall maintain active training and orientation programs for employees concerned with classified defense information to impress each such employee with his individual responsibility for exercising vigilance and care in complying with the provisions of this order. Such persons shall be authorized on behalf of the heads of the departments and agencies to establish adequate and active inspection programs to the end that the provisions of this order are administered effectively.

SEC. 11. *Interpretation of Regulations by the Attorney General.* The Attorney General, upon request of the head of a department or agency or his duly designated representative, shall personally or through authorized representatives of the Department of Justice render an interpretation of these regulations in connection with any problems arising out of their administration.

SEC. 12. *Statutory Requirements.* Nothing in this order shall be construed to authorize the dissemination, handling or transmission of classified information contrary to the provisions of any statute.

SEC. 13. *"Restricted Data" as Defined in the Atomic Energy Act.* Nothing in this order shall supersede any requirements made by or under the Atomic Energy Act of August 1, 1946, as amended. "Restricted Data" as defined by the said act shall be handled, protected, classified, downgraded, and declassified in conformity with the provisions of the Atomic Energy Act of 1946, as amended, and the regulations of the Atomic Energy Commission.

SEC. 14. *Combat Operations.* The provisions of this order with regard to dissemination, transmission, or safekeeping of classified defense information or material may be so modified in connection with combat or combat-related operations as the Secretary of Defense may by regulations prescribe.

SEC. 15. *Exceptional Cases.* When, in an exceptional case, a person or agency not authorized to classify defense information originates information which is believed to require classification, such person or agency shall protect that information in the manner prescribed by this order for that category of classified defense information into which it is believed to fall, and shall transmit the information forthwith, under appropriate safeguards, to the department, agency, or person having both the authority to classify information and a direct official interest in the information (preferably, that department, agency, or person to which the information would be transmitted in the ordinary course of business), with a request that such department, agency, or person classify the information.

SEC. 16. *Review to Insure That Information is Not Improperly Withheld Hereunder.* The President shall designate a member of his staff who shall receive, consider, and take action upon, suggestions or complaints from non-Governmental sources relating to the operation of this order.

SEC. 17. *Review to Insure Safeguarding of Classified Defense Information.* The National Security Council shall conduct a continuing review of the implementation of this order to insure that classified defense information is properly safeguarded, in conformity herewith.

SEC. 18. *Review Within Departments and Agencies.* The head of each department and agency shall designate a member or members of his staff who shall conduct a continuing review of the implementation of this order within the department or agency concerned to insure that no information is withheld hereunder which the people of the United States have a right to know, and to insure that classified defense information is properly safeguarded in conformity herewith.

SEC. 19. *Revocation of Executive Order No. 10290.* Executive Order No. 10290 of September 24, 1951 is revoked as of the effective date of this order.

SEC. 20. *Effective Date.* This order shall become effective on December 15, 1953.

DWIGHT D. EISENHOWER

THE WHITE HOUSE,
*November 5, 1953.*

# RULES AND REGULATIONS

## TITLE 7—AGRICULTURE

### Chapter IX—Production and Marketing Administration (Marketing Agreements and Orders), Department of Agriculture

[Navel Orange Reg. 2]

PART 914—NAVEL ORANGES GROWN IN ARIZONA AND DESIGNATED PART OF CALIFORNIA

LIMITATION OF HANDLING

§ 914.302 *Navel Orange Regulation 2*—(a) *Findings.* (1) Pursuant to the marketing agreement and Order No. 14 (18 F. R. 5638), regulating the handling of navel oranges grown in Arizona and designated part of California, effective September 22, 1953, under the applicable provisions of the Agricultural Marketing Agreement Act of 1937, as amended (7 U. S. C. 601 et seq.), and upon the basis of the recommendation and information submitted by the Navel Orange Administrative Committee, established under the said marketing agreement and order, and upon other available information, it is hereby found that the limitation of handling of such navel oranges, as hereinafter provided, will tend to effectuate the declared policy of the act.

(2) It is hereby further found that it is impracticable and contrary to the public interest to give preliminary notice, engage in public rule-making procedure, and postpone the effective date of this section until 30 days after publication thereof in the FEDERAL REGISTER (60 Stat. 237; 5 U. S. C. 1001 et seq.) because the time intervening between the date when information upon which this section is based became available and the time when this section must become effective in order to effectuate the declared policy of the act is insufficient, and a reasonable time is permitted, under the circumstances, for preparation for such effective time; and good cause exists for making the provisions of this section effective as hereinafter set forth. The Navel Orange Administrative Committee held an open meeing on November 5, 1953, after giving due notice thereof, to consider supply and market conditions for navel oranges and the need for regulation; interested persons were afforded an opportunity to submit information and views at this meeting; the recommendation and supporting information for regulation during the period specified herein was promptly submitted to the Department after such meeting was held; the provisions of this section, including its effective time, are identical with the aforesaid recommendation of the committee, and information concerning such provisions and effective time has been disseminated among handlers of such navel oranges; it is necessary, in order to effectuate the declared policy of the act, to make this section effective during the period herein specified; and compliance with this section will not require any special preparation on the part of persons subject thereto which cannot be completed on or before the effective date hereof.

(b) *Order.* (1) The quantity of navel oranges grown in Arizona and designated part of California which may be handled during the period beginning at 12:01 a. m., P. s. t., November 8, 1953, and ending at 12:01 a. m., P. s. t., November 15, 1953, is hereby fixed as follows:

(i) District 1: Unlimited movement;

(ii) District 2: Unlimited movement;

(iii) District 3: Unlimited movement;

(iv) District 4: 50 carloads.

(2) The prorate base of each handler who has made application therefor, as provided in the said marketing agreement and order, is hereby fixed in accordance with the prorate base schedule which is attached hereto and made a part hereof by this reference.

(3) As used in this section "handled," "handler," "carloads," "prorate base," "District 1," "District 2," "District 3," and "District 4" shall have the same meaning as when used in said marketing agreement and order.

[Sec. 5, 49 Stat. 753, as amended; 7 U. S. C. and Sup. 608c]

Done at Washington, D. C., this 6th day of November 1953.

[SEAL] S. R. SMITH,
*Director, Fruit and Vegetable Branch, Production and Marketing Administration.*

PRORATE BASE SCHEDULE

[12:01 a. m., P. s. t., Nov. 8, 1953, to 12:01 a. m., P. s. t., Nov. 15, 1953]

NAVEL ORANGES

*Prorate District No. 4*

| Handler | Prorate base (percent) |
|---|---|
| Total | 100.0000 |
| Placentia Cooperative Orange Association | 28.8477 |
| Richgrove-Jasmine Citrus Association | 17.4229 |
| B. & L. Citrus Distributors | 5.0424 |
| Edison Citrus Co., Inc | 43.6943 |
| Kim, Charles | 2.5503 |
| Toy, Chin | 2.4424 |

[959.309, Amdt. 1]

PART 959—IRISH POTATOES GROWN IN THE COUNTIES OF CROOK, DESCHUTES, JEFFERSON, KLAMATH, AND LAKE IN OREGON AND MODOC AND SISKIYOU IN CALIFORNIA

LIMITATION OF SHIPMENTS

*Findings.* (a) Pursuant to Marketing Agreement No. 114 and Order No. 59, as amended (7 CFR Part 959), regulating the handling of Irish potatoes grown in the counties of Crook, Deschutes, Jefferson, Klamath, and Lake in the State of Oregon and Modoc and Siskiyou in the State of California, effective under the applicable provisions of the Agricultural Marketing Agreement Act of 1937, as amended (48 Stat. 31, as amended; 7 U. S. C. 601 et seq.), and upon the basis of the recommendation and information submitted by the Oregon-California Potato Committee, established pursuant to said marketing agreement and amended order, and upon other available information, it is hereby found that the amendment to the limitation of shipments, as hereinafter provided, will tend to effectuate the declared policy of the act.

(b) It is hereby found that it is impracticable and contrary to the public interest to give preliminary notice, engage in public rule-making procedure, and postpone the effective date of this amendment until 30 days after publication in the FEDERAL REGISTER (5 U. S. C. 1001 et seq.) in that (1) the time intervening between the date when information upon which this amendment is based became available and the time when this amendment must become effective in order to effectuate the declared policy of the act is insufficient, (2) more orderly marketing in the public interest, than would otherwise prevail, will be promoted by regulating the shipment of potatoes, in the manner set forth below, on and after the effective date of this amendment, and (3) this amendment relieves restriction on the handling of Irish potatoes grown in the aforesaid production area.

*Order as amended.* The provisions of § 959.309 (b) (1) (FEDERAL REGISTER, August 29, and October 22, 1953, 18 F. R. 5163, 6697) are hereby amended to read as follows:

(1) During the period November 6, 1953 to June 30, 1954, both dates inclusive, no handler shall ship potatoes which do not meet the requirements of the U. S. No. 2, or better grade, and which are less than 2 inches minimum diameter or 4 ounces minimum weight, as such terms, grades, and sizes are defined in the U. S. Standards for Potatoes (§ 51.566 of this title), including the tolerances set forth therein.

[Sec. 5, 49 Stat. 753, as amended; 7 U. S. C. and Sup. 608c]

Done at Washington, D. C., this 5th day of November 1953 to become effective November 6, 1953.

[SEAL] S. R. SMITH,
*Director, Fruit and Vegetable Branch, Production and Marketing Administration.*

[F. R. Doc. 53-9505; Filed, Nov. 9, 1953; 8:50 a. m.]

## TITLE 14—CIVIL AVIATION

### Chapter I—Civil Aeronautics Board

[Supp. 17]

PART 60—AIR TRAFFIC RULES

CRUISING ALTITUDES WITHIN CONTROL ZONES AND CONTROL AREAS (VFR)

In § 60.32 and the note thereto, the Civil Aeronautics Board authorized the Administrator of Civil Aeronautics to specify "odd and even" thousand foot altitudes for aircraft operated in level cruising flight at 3,000 feet or more above the surface within control zones and control areas. Since the effective date of that section, such altitudes have been published in the CAA Flight Information Manual and shown on appropriate Radio Facility Charts for the information and guidance of all pilots.

The following rules merely adopt the existing odd and even altitudes specified in the Flight Information Manual and the appropriate Radio Facility Charts as regulations of the Administrator. These rules are being made effective without alteration of the altitudes and without delay in order to provide a uniform and uninterrupted standard for the safety of aircraft engaged in air commerce. Compliance with the notice, procedures, and effective date provisions of section 4 of the Administrative Procedures Act would be impracticable and unnecessary.

A new § 60.32–1 is adopted to read:

§ 60.32–1 *Odd or even altitudes on civil airways (CAA rules which apply to § 60.32 (a)).* When an aircraft is operated in level cruising flight at 3,000 feet or more above the surface, within the boundaries of a civil airway, it shall be flown at the following altitudes:

(a) Red or green airway—Eastbound, odd thousand-foot altitudes (3,000; 5,000; etc.)—Westbound, even thousand-foot altitudes (4,000; 6,000; etc.)

(b) Amber or blue airway—Northbound, odd thousand-foot altitudes (3,000; 5,000; etc.)—Southbound, even thousand-foot altitudes (4,000; 6,000; etc.)

(c) Even numbered VOR airway—Eastbound, odd thousand-foot altitudes (3,000; 5,000; etc.)—Westbound, even thousand-foot altitudes (4,000; 6,000; etc.)

(d) Odd numbered VOR airway—Northbound, odd thousand-foot altitudes (3,000; 5,000; etc.)—Southbound, even thousand-foot altitudes (4,000; 6,000; etc.)

(e) Exceptions to the rules stated in paragraphs (a) through (d) of this section are:

(1) Where a color airway coincides with a VOR airway, the color airway shall take preference, and the odd or even altitude rule for the appropriate color airway shall apply.

(2) (i) Where no color airway is involved and an even and odd VOR airway coincide, the even numbered VOR airway shall take preference, and the odd or even altitude rule for the even numbered VOR airway shall apply.

NOTE: The odd or even altitude rule applicable to an airway is determined by the direction of the airway between its two terminal points, without regard to the direction of any segment or portion of the airway. Example: A green airway has one terminal point in California and the other in New York, but in Ohio a portion between fixes runs due north and south. In this case, the odd or even altitude rule for a flight eastbound or westbound applies to the entire flight along the airway.

(ii) "Odd or even" altitude indicators for the airways are also shown on Radio Facility Charts.

(Sec. 205, 52 Stat. 984, as amended, 49 U. S. C. 425. Interprets or applies Sec. 601, 52 Stat. 1007, as amended; 49 U. S. C. 551)

This supplement shall become effective upon publication in the FEDERAL REGISTER.

[SEAL] F. B. LEE,
*Administrator of Civil Aeronautics.*

[F. R. Doc. 53-9480; Filed, Nov. 9, 1953; 8:46 a. m.]

### Chapter II—Civil Aeronautics Administration, Department of Commerce

[Amdt. 20]

PART 600—DESIGNATION OF CIVIL AIRWAYS

BLUE CIVIL AIRWAY 28

The civil airway alteration appearing hereinafter has been coordinated with the civil operators involved, the Army, the Navy, and the Air Force, through the Air Coordinating Committee, Airspace Subcommittee, and is adopted to become effective when indicated in order to promote safety of the flying public. Compliance with the notice, procedures, and effective date provisions of section 4 of the Administrative Procedure Act would be impracticable and contrary to public interest and therefore is not required.

Part 600 is amended as follows:

1. Section 600.628 is amended to read:

§ 600.628 *Blue civil airway No. 28 (Charleston, S. C., to Bulls Gap, Tenn.).* From the Charleston, S. C., radio range station via the intersection of the northwest course of the Charleston, S. C., radio range and the southeast course of the Columbia, S. C., radio range; Columbia, S. C., radio range station; the intersection of the west course of the Columbia, S. C., radio range and the southeast course of the Spartanburg, S. C., radio range; Spartanburg, S. C., radio range station to the intersection of the northwest course of the Spartanburg, S. C. radio range and the northeast course of the Knoxville, Tenn., radio range.

(Sec. 205, 52 Stat. 984, as amended; 49 U. S. C. 425. Interprets or applies sec. 302, 52 Stat. 985, as amended; 49 U. S. C. 452)

This amendment shall become effective 0001, e. s. t., November 17, 1953.

[SEAL] S. A. KEMP,
*Acting Administrator of Civil Aeronautics.*

[F. R. Doc. 53-9478; Filed, Nov. 9, 1953; 8:45 a. m.]

[Amdt. 20]

PART 601—DESIGNATION OF CONTROL AREAS, CONTROL ZONES, AND REPORTING POINTS

BLUE CIVIL AIRWAY 28

The control area and reporting point alterations appearing hereinafter have been coordinated with the civil operators involved, the Army, the Navy, and the Air Force, through the Air Coordinating Committee, Airspace Subcommittee, and are adopted to become effective when indicated in order to promote safety of the flying public. Compliance with the notice, procedures, and effective date provisions of section 4 of the Administrative Procedure Act would be impracticable and contrary to public interest and therefore is not required.

Part 601 is amended as follows:

1. Section 601.628 is amended by changing the caption to read: "*Blue civil airway No. 28 control areas (Charleston, S. C., to Bulls Gap, Tenn.)*."

2. Section 601.4028 is amended by changing the caption to read: "*Blue Civil Airway No. 28 (Charleston, S. C., to Bulls Gap, Tenn.)*."

(Sec. 205, 52 Stat. 984, as amended; 49 U. S. C. 425. Interprets or applies sec. 601, 52 Stat. 1007, as amended; 49 U. S. C. 551)

This amendment shall become effective 0001 e. s. t. November 17, 1953.

[SEAL] S. A. KEMP,
*Acting Administrator of Civil Aeronautics.*

[F. R. Doc. 53-9479; Filed, Nov. 9, 1953; 8:46 a. m.]

[Amdt. 64]

PART 608—DANGER AREAS

ALTERATIONS

The danger area alterations appearing hereinafter have been coordinated with the civil operators involved, the Army, the Navy, and the Air Force, through the Air Coordinating Committee, Airspace Subcommittee, and are adopted to become effective when indicated in order to promote safety of the flying public. Since a military function of the United States is involved, compliance with the notice, procedures, and effective date provisions of section 4 of the Administrative Procedure Act is not required.

Part 608 is amended as follows:

1. In § 608.14, the Antioch, California, area (D-264), published on July 16, 1949, in 14 F. R. 4288, amended on October 14, 1950, in 15 F. R. 6908, and on December 13, 1952, in 17 F. R. 11256, is further amended by changing the "Using Agency" column to read: "COMNABS, 12th Naval District".

2. In § 608.14, the Boullion Mountains, California, area (D-344), published on August 23, 1951, in 16 F. R. 8448, is amended by changing the "Using Agency" column to read: "CG, Marine Barracks, Camp Pendleton, California".

3. In § 608.14, the Chocolate Mountains, California, area (D-304), published on March 17, 1950, in 15 F. R. 1510, amended on December 13, 1952, in 17 F. R. 11256, and on June 12, 1953, in 18 F. R. 3364, is further amended by changing the "Using Agency" column to read: "COM, 11th Naval District, San Diego, California".

4. In § 608.14, a Cuddeback Dry Lake, California, area is added to read:

| Name and location (chart) | Description by geographical coordinates | Designated altitudes | Time of designation | Using agency |
|---|---|---|---|---|
| CUDDEBACK DRY LAKE (D-417) (Los Angeles Chart). | N. boundary: lat. 35°25'00" N.; S. boundary: lat. 35°15'00" N.; E. boundary: long. 117°21'30" W.; W. boundary: long. 117°26'00" W. | Surface to unlimited. | Daylight hours. | George AFB, Victorville, Calif. |

5. In § 608.14, the Trona, California, area (D-277), published on November 3, 1949, in 14 F. R. 6676, and amended on May 10, 1951, in 16 F. R. 4311, is further amended by changing the "Using Agency" column to read: "NOTS, Inyokern, California".

6. In § 608.14, the Vernalis, California, area (D-280), published on January 24, 1952, in 17 F. R. 716, is amended by changing the "Using Agency" column to read: "COMNABS, 12th Naval District and Ames Aeronautical Laboratory, San Francisco, California".

7. In § 608.36, the Black Rock Desert, Nevada, area (D-266), published on July 16 1949, in 14 F. R. 4293, and amended on December 13, 1952, in 17 F. R. 11256, is further amended by changing the "Using Agency" column to read: "COMNABS, 12th Naval District".

8. In § 608.36, the Fallon, Nevada, areas (D-267, D-268, D-269, D-270), published on May 20, 1952, in 17 F. R. 4558, amended on July 16, 1952, in 17 F. R. 6428, and on February 28, 1953, in 18 F. R. 1155, are further amended by changing the "Using Agency" column for each of the four areas to read: "COMNABS, 12th Naval District".

9. In § 608.36, the Sahwave Mountains, Nevada, area (D-430), published on February 17, 1953, in 18 F. R. 931, is amended by changing the "Using Agency" column to read: "COMNABS, 12th Naval District".

10. In § 608.41, the Long Shoal Point, North Carolina, area (D-128), published on January 24, 1952, in 17 F. R. 716, is amended by changing the "Using Agency" column to read: "COMAIRLANT, Norfolk, Virginia".

11. In § 608.55, the Admiralty Inlet, Washington, area (D-231), published on July 16, 1949, in 14 F. R. 4297, is amended by changing the "Using Agency" column to read: "NAS, Whidbey Island, Washington".

12. In § 608.55, the Juan de Fuca, Washington, area (D-236), published on January 19, 1951, in 16 F. R. 496, is amended by changing the "Using Agency" column to read: "NAS, Whidbey Island, Washington".

13. In § 608.55, the Queets, Washington, area (D-239), published on July 14, 1949, in 14 F. R. 3886, is amended by changing the "Using Agency" column to read: "NAS, Whidbey Island, Washington".

14. In § 608.55, the Rosario Strait, Washington, area (D-232), published on July 16, 1949, in 14 F. R. 4297, is amended by changing the "Using Agency" column to read: "NAS, Whidbey Island, Washington".

15. In § 608.55, the Waldron Island, Washington, area (D-234), published on July 16, 1949, in 14 F. R. 4297, is amended by changing the "Using Agency" column to read: "NAS, Whidbey Island, Washington".

16. In § 608.55, the Whidbey Island, Washington, area (D-233), published on July 16, 1949, in 14 F. R. 4297, is amended by changing the "Using Agency" column to read: "NAS, Whidbey Island, Washington".

(Sec. 205, 52 Stat. 984, as amended 49 U. S. C. 425. Interprets or applies sec. 601, 52 Stat. 1007, as amended; 49 U. S. C. 551)

This amendment shall become effective on November 10, 1953.

[SEAL] F. B. LEE,
*Administrator of Civil Aeronautics.*

## TITLE 16—COMMERCIAL PRACTICES

### Chapter I—Federal Trade Commission

Subchapter B—Trade Practice Conference Rules

[File No. 21-178]

PART 37—WOOL STOCK INDUSTRY

RESCISSION OF PART

Whereas, on August 22, 1931, the Commission promulgated trade practice rules for the Wool Stock Industry, codified in the Code of Federal Regulations (Title 16, Part 37); and whereas said rules contain provisions which do not accurately reflect existing requirements of law, and proceedings for the revision thereof do not appear to be warranted in the public interest:

*It is ordered*, That the said rules (16 CFR Part 37) be and the same are hereby rescinded.

(Sec. 6, 38 Stat. 722; 15 U. S. C. 46)

Issued: November 4, 1953.

By the Commission.

[SEAL] ALEX AKERMAN, JR.,
*Secretary.*

[F. R. Doc. 53-9487; Filed, Nov. 9, 1953; 8:47 a. m.]

## TITLE 24—HOUSING AND HOUSING CREDIT

### Chapter I—Home Loan Bank Board, Housing and Home Finance Agency

Subchapter D—Federal Savings and Loan Insurance Corporation

[6536]

PART 163—OPERATIONS

REGULAR CREDITS

NOVEMBER 4, 1953

Resolved that, pursuant to § 108.11 of the General Regulations of the Home Loan Bank Board (24 CFR 108.11) and § 167.1 of the rules and regulations for insurance of accounts (24 CFR 167.1), § 163.13 of the rules and regulations for insurance of accounts (24 CFR 163.13) is hereby amended, effective November 10, 1953, by inserting the following provision after the first sentence thereof: "If, upon the expiration of twenty years from the date its accounts were insured, the Federal insurance reserve account of any insured institution is less than 5 percent but not less than 3 percent of all insured accounts, such institution may earmark undivided profits in an amount which, when combined with the amount in its Federal insurance reserve account will equal 5 percent of all insured accounts, and the funds so earmarked shall be considered a part of the Federal insurance reserve and be subject to all the limitations which apply thereto until such reserve account, exclusive of the funds so earmarked, equals 5 percent of all insured accounts: *Provided*, That the date of compliance with this section for each such insured institution shall be not later than the close of the semi-annual period following the twentieth anniversary date of its insurance of accounts."

So that the section, as amended, shall read as follows:

§ 163.13 *Regular credits.* Each insured institution shall thereafter credit to its Federal insurance reserve, during each of its fiscal years, an amount equal to at least three-tenths of 1 percent of all insured accounts outstanding at the beginning of such fiscal year; and shall build up the Federal insurance reserve to an amount equal to at least 2½ percent of all insured accounts within thirteen years from the effective date of insurance and to an amount equal to at least 5 percent of all insured accounts within twenty years from such date: *Provided*, That credits to the Federal insurance reserve need not be made whenever such insurance reserve account equals or exceeds the minimum amounts required by this section. If, upon the expiration of twenty years from the date its accounts were insured, the Federal insurance reserve account of any insured institution is less than 5 percent but not less than 3 percent of all insured accounts, such institution may earmark undivided profits in an amount which, when combined with the amount in its Federal insurance reserve account will equal 5 percent of all insured accounts, and the funds so earmarked shall be considered a part of the Federal insurance reserve and be subject to all the limitations which apply thereto until such reserve account, exclusive of the funds so earmarked, equals 5 percent of all insured accounts: *Provided*, That the date of compliance with this section for each such insured institution shall be not later that the close of the semi-annual period following the twentieth anniversary date of its insurance of accounts. If for any reason, the Federal insurance reserve account of any institution which has been insured for at least twenty years is thereafter reduced to less that 5 percent of all insured accounts, such institution shall transfer to its Federal insurance reserve account, for each dividend period, at least 25 percent of its net operating income before the declaration of dividends or the payment of interest on savings, until its Federal insurance reserve account is again equal to at least 5 percent of all insured accounts.

Resolved further that, as this amendment operates to relieve a restriction, it is found that it is not necessary to issue such regulation with notice and public procedure thereon under § 108.12 of the general regulations of the Home Loan Bank Board (24 CFR 108.12) or section 4 (a) of the Administrative Procedure Act, and that the effective date limitation of section 4 (c) of said act is not applicable.

(Sec. 402, 48 Stat. 1256, as amended; 12 U. S. C. 1725. Interprets or applies sec. 403, 48 Stat. 1257, as amended; 12 U. S. C. 1726)

By the Home Loan Bank Board.

J. FRANCIS MOORE,
*Secretary.*

[F. R. Doc. 53-9502; Filed, Nov. 9, 1953; 8:50 a. m.]

## TITLE 25—INDIANS

### Chapter I—Bureau of Indian Affairs, Department of the Interior

Subchapter R—Leases and Sale of Minerals, Restricted Indian Lands

PART 180—LEASING OF OSAGE RESERVATION LANDS FOR OIL AND GAS MINING

DIVISION ORDERS

Section 180.88 (a) is hereby amended to read as follows:

§ 180.88 *Division orders.* (a) The Superintendent may make arrangements with the purchasers of oil for the payment of the royalty, but such arrangements, if made, shall not relieve the lessee from responsibility for the payment of the royalty, should such purchaser fail, neglect, or refuse to pay the royalty when it becomes due. No oil shall be run to any purchaser or delivered to the pipe line or other carrier for shipment, or otherwise conveyed or removed from the leased premises, until a division order is executed, filed, and approved, by the Superintendent, showing that the lessee has a regularly approved leased in effect, and the conditions under which the oil may be run: *Provided*, That the Superintendent may grant temporary permission to run oil from a lease pending the execution, filing, and approval by him of a division order. Lessees shall be required to pay for all oil or gas used off the leased premises for operating purposes; affidavit shall be made as to the production used for such purposes and royalty paid in the usual manner. The lessee or his representative shall be present when oil is taken from the leased premises under any division order and will be responsible for the correct measurement thereof and shall report all oil so run.

(Sec. 3, 34 Stat. 543)

NOVEMBER 4, 1953.

FRED G. AANDAHL,
*Acting Secretary of the Interior.*

## TITLE 29—LABOR

### Chapter V—Wage and Hour Division, Department of Labor

PART 709—PEARL BUTTON AND BUCKLE DIVISION OF THE BUTTON, BUCKLE, AND JEWELRY INDUSTRY IN PUERTO RICO

MISCELLANEOUS AMENDMENTS

The minimum wage order for the Pearl Button and Buckle Division of the Button, Buckle, and Jewelry Industry in Puerto Rico, as recommended by Special Industry Committee No. 12 for Puerto Rico was approved and made final pursuant to authority under the Fair Labor Standards Act of 1938, as amended (52 Stat. 1060, as amended; 29 U. S. C. 201) and published in the FEDERAL REGISTER on August 18, 1953 (18 F. R. 4889).

This wage order is hereby revised as set forth below.

1. Redesignate § 709.1 *Wage rates* as paragraph (e) of § 709.1.

2. Delete all of § 709.2.

3. Redesignate § 709.3 as subparagraph (5) of § 709.3 (b), as follows.

§ 709.3 * * *
(b) * * *

(5) *Definition of the pearl button and buckle division of the button, buckle, and jewelry industry in Puerto Rico.* The manufacture of buttons and buckles from ocean pearl or other natural shell.

Signed at Washington, D. C., this 9th day of November 1953.

WM. R. MCCOMB,
*Administrator, Wage and Hour Division, Department of Labor.*

[F. R. Doc. 53-9578; Filed, Nov. 9, 1953; 11:47 a. m.]

## TITLE 32—NATIONAL DEFENSE

### Chapter V—Department of the Army

Subchapter G—Procurement

PART 590—GENERAL PROVISIONS

PART 595—FOREIGN PURCHASES

PART 596—CONTRACT CLAUSES AND FORMS

PART 602—GOVERNMENT PROPERTY

ARMY PROCUREMENT PROCEDURE; MISCELLANEOUS AMENDMENTS

1. Section 590.602 is amended by adding a new paragraph (d) as follows:

§ 590.602 *Execution of contracts; requirements.* * * *

(d) *Contracts with partnerships.* Contracts entered into with partnerships will be executed in the partnership name and will enumerate the names of all the partners. The partnership contract need be signed by only one partner, provided the authority of the particular partner to effectively bind the partnership has been established. The Contracting Officer need not require that partnerships execute a certificate of attestation substantially in the form included in DD Form 351-2 provided he obtains other evidence which satisfactorily shows that the partner is empowered to bind the partnership.

2. In § 590.604-1 (a), subparagraph (2) (ii) is amended to read as follows:

§ 590.604–1 *Personal or professional services*—(a) *Contracts for employment of experts or consultants.* • • •

(2) *Approval required.* • • •

(ii) Contracts which provide for performance of personal services by experts or consultants, or organizations thereof, contemplating supervision by Government personnel of the contractor, and not requiring the contractor, as an integral part of the contract, to furnish an end item or product. Each contract for stenographic reporting services or for personal services of experts and consultants negotiated under the above or any other authority and each supplemental agreement or change order making a material change in such contract, will contain a provision stating that it is subject to the approval of the Secretary and will not be binding until so approved; and the contract or request for award thereof, supplemental agreement, or change order will be forwarded by the Head of the Procuring Activity involved to the Assistant Chief of Staff, G–4, Department of the Army, Attention: Chief, Purchases Branch, for approval by the Secretary. The request for approval will refer specifically to the above-quoted statutory authorities and will furnish a complete statement of facts supporting the determinations required by statute to be made by the Secretary. The request for approval will also include the information required by § 590.605, if applicable, and will contain a statement as to availability of funds and a reference to the Project Account Number, Appropriation Symbol, and the statutory authority under which appropriated. The request for approval shall also contain a statement or be accompanied by a certificate personally signed by the Head of the Procuring Activity, his Deputy, or his Chief of Staff reading substantially as follows:

The employment of ----------
(Name of contractor)
will not be in excess of the civilian personnel authorization established by the Department of the Army for the ----------
(Procuring activity)

• • • • •

3 Subpart C of Part 595 is revoked.

4. A new Subpart E is added to Part 595 as follows:

SUBPART E—DUTY AND CUSTOMS

Sec.

595.501 Customs duties on foreign purchases.
595.502 Emergency purchases of war material abroad.
595.502–1 General.
595.502–2 War materials.
595.502–3 Emergency purchases.
595.502–4 Conditions under which duty free entry certificates may be issued.
595.502–5 Duty free entry certificate.
595.503 Customs duties and drawbacks.

AUTHORITY: §§ 595.501 to 595.503 issued under R. S. 161; 5 U. S. C. 22. Interpret or apply 62 Stat. 21; 41 U. S. C. Sup. 151–161.

SUBPART E—DUTY AND CUSTOMS

§ 595.501 *Customs duties on foreign purchases.* Duty must ordinarily be paid in connection with the importation of supplies purchased outside of the United States, except that the importation of "emergency purchases of war material abroad" by a Department is exempt from duty (act of June 30, 1914, 38 Stat. 399; 34 U. S. C. 568); section 12, Armed Services Procurement Act of 1947 (62 Stat. 26; 5 U. S. C. 219b, 626e). Where the importation of supplies is subject to customs duties, a Department is exempt from any requirements of a customs bond.

§ 595.502 *Emergency purchases of war material abroad.*

§ 595.502–1 *General.* This subpart furnishes guidance as to what constitutes "emergency purchases of war material abroad," prescribes the conditions under which duty free entry certificates may be issued in connection with the importation of such purchases and sets forth the form of certificate to be utilized. The procedures to be followed in the issuance of such certificates shall be as prescribed by the respective Departments.

§ 595.502–2 *War materials.* As used in this subpart, the term "war material" includes the following:

(a) Weapons, munitions, aircraft, vessels or boats;

(b) Agricultural, industrial, or other supplies used in the prosecution of war or for the national defense;

(c) Supplies, including components or equipment, necessary for the manufacture, production, processing, repair, servicing, or operation of the supplies set forth in paragraphs (a) and (b) of this section.

§ 595.502–3 *Emergency purchases.* As used in this subpart, the term "emergency purchases" includes the following:

(a) War material purchased by any Department in time of war or a national emergency, including any war material received in exchange for anything of value obtained under reciprocal aid or other statutory authority;

(b) War material purchased because of a shortage of domestic supply, pursuant to a decision that the supplies are necessary for the adequate maintenance of the Armed Services;

(c) Captured enemy war material;

(d) Materials requisitioned by United States Forces abroad;

(e) Materials rebuilt from other materials owned by, captured by, or turned over to United States Forces;

(f) War materials procured for the use of United States Forces abroad or United States vessels in foreign waters.

§ 595.502–4 *Conditions under which duty free entry certificates may be issued.* The issuance of duty free entry certificates in appropriate situations will result in important savings for military appropriations. At the same time, any procedure established for the issuance of such certificates must recognize that anything other than a careful selection of the proper situations where such certificates are to be issued may fail to save funds and may result in unanticipated advantages to contractors, especially in situations involving fixed-price contracts. Considerations which are pertinent to the selection of those cases where such certificates should be issued include the savings to be accomplished by the issuance of the certificate; the administrative burden and cost of processing the certificate; and the degree of supervision which can be exercised by the Government over the supplies or materials to be imported to verify that the full benefit of the certificate inures to the Government. The latter consideration is particularly significant in the case of fixed-price contracts since title to the importation does not generally vest in the Government until delivery of the end product. Subject to the foregoing considerations, a duty-free entry certificate may be issued in accordance with Department procedures when an "emergency purchase of war material" is made under the following circumstances:

(a) Direct purchases abroad regardless of whether title passes at point of origin or at destination in the United States, providing the contract states that the final price is exclusive of duty.

(b) Purchases abroad by a Government prime contractor under a cost-reimbursement type contract or by a cost-reimbursement type subcontractor (where no fixed-price prime or fixed-price subcontract intervenes between the purchaser and the Government), regardless of whether title passes at point of origin or at destination in the United States. If a fixed-price prime or fixed-price subcontract intervenes, the criteria stated in paragraph (c) of this section should be followed.

(c) Purchases abroad by a fixed-price contractor, fixed-price subcontractor, or cost-type subcontractor where a fixed-price prime or fixed-price subcontract intervenes, provided (1) the fixed-price prime and, where applicable, fixed-price subcontract prices are, or are amended to be, exclusive of duty; (2) the prime contractor and, where applicable, the subcontractors concerned certify that the supplies so purchased are to be delivered to the Government or incorporated in Government owned property or in an end product to be furnished to the Government, and that duty will be paid if such supplies or any portion thereof are utilized for other than the performance of the Government contract or disposed of other than for the benefit of the Government in accordance with the contract terms; and (3) such procurement abroad is authorized by the terms of the prime contract, the applicable subcontract, or by the Contracting Officer.

§ 595.502–5 *Duty free entry certificate.* The duty free entry certificate referred to in this subpart will be printed, stamped, or typed on the face of Customs Form 7501 or attached thereto, and will be executed by a duly designated officer or civilian official of the appropriate Department in the following form:

I certify that the procurement of this material constituted an emergency purchase of war material abroad by the Department of the (Indicate Army, Navy, or Air Force) and it is accordingly requested that such material be admitted free of duty pursuant to the Act of June 30, 1914 (38 U. S. C. 568) (or Section 12 of the Act of February 19, 1948 (5 U. S. C. 219b, 626e)).

---
(Name)
---
(Title), who has been designated to execute free entry certificates for the above-named Department
---
(Grade) (Organization)

§ 595.503 *Customs duties and drawbacks.* Whenever any Department purchases supplies with respect to which there might arise a claim to a refund or drawback of customs duties paid thereon (to the extent such drawback is authorized pursuant to the Tariff Act of 1930, 19 U. S. C., Chapter 4), the price to be paid shall ordinarily include the customs duties, and accordingly the supplier will have no claim to a drawback. On the other hand, when the price to be paid for any such purpose does not include the customs duties, then the supplier will have the right to claim any drawback with respect to duties paid by the supplier provided (a) he has reserved such right in connection with such sale or consignment and (b) he produces evidence that such reservation was made with the knowledge and consent of the exporter.

5 Section 596.103–8 is amended as follows:

§ 596.103–8 *Assignment of claims.* • • •

(d) *Acknowledgment of notice of assignment.* Contracting Officers will acknowledge notices of assignment filed by assignees in accordance with § 596.103–8 (c). In cases where a notice of assignment of monies due under a definitive contract, which supersedes a letter contract, is received pursuant to the Assignment of Claims Act of 1940 (54 Stat. 1029), as amended, such notice should be acknowledged regardless of the fact that a notice of assignment of monies due under the letter contract had been previously acknowledged. The two notices of assignment should be considered as one and filed accordingly.

(e) *Assignor's statement.* Where direct payment is made to an assignee, the contractor will furnish on each voucher, invoice, or other supporting paper, a statement to the effect that he recognizes the assignment, its validity, and the right of the assignee to receive payment.

(f) *Information to be furnished to assignees.* Contracting Officers will, upon request of the contractor, furnish proposed assignees information regarding the status of the contract at the time of the assignment. In so doing, the Contracting Officer will advise the assignee that the information is so furnished only for confidential use in connection with the assignment.

6 In § 596.531–1, Item 6, *Disputes*, is rescinded and the following substituted therefor:

§ 596.531–1 *Sample of form.* • • •

6 *Disputes.* (See ASPR 7–103.12.)

• • • • •

7. In § 602.805 (h) a new subparagraph (3) is added as follows:

§ 602.805 *General.* • • •

(h) • • •

(3) When a purchase order or contract does not exceed $5,000, jigs, patterns, fixtures, gages and other manufacturing aids which are furnished to a contractor from stocks to aid in the performance of work may, at the option of the Contracting Officer, be accounted for as a suspense item in the Military Account from which shipped, provided that the total cost thereof does not exceed $1,000. Accounting for such property under Appendix B, Part 413 of this title, is not required.

[Proc. Cir. 27, October 27, 1953] (R. S. 161; 5 U. S. C. 22. Interpret or apply 62 Stat. 21; 41 U. S. C. Sup. 151–161)

[SEAL] WM. E. BERGIN,
*Major General, U. S. Army,*
*The Adjutant General.*

## TITLE 32A—NATIONAL DEFENSE, APPENDIX

### Chapter XVIII — National Shipping Authority, Maritime Administration, Department of Commerce

[NSA Order No. 64 (OPR–4, Amdt. 2)]

OPR–4—AUTHORITY AND RESPONSIBILITY OF GENERAL AGENTS TO UNDERTAKE TO DECOMMISSION SHIPS TO BE WITHDRAWN FROM OPERATION AND PLACED IN A RESERVE FLEET

GENERAL AGENTS' DUTIES; BOOKS AND LOG BOOKS

Effective upon publication of this Amendment 2 in the FEDERAL REGISTER, paragraph (n) of section 3 *General Agents' duties* contained in NSA Order 64 (OPR–4) published in the FEDERAL REGISTER issue of April 22, 1952 (17 F. R. 3553) is amended to read as follows:

(n) *Books and log books.* Merchant Marine library books shall be removed by the Merchant Marine Library Association. All log books and bell books shall be listed in a covering letter and forwarded to the District Property and Supply Officer, Maritime Administration, 45 Broadway, New York 4, New York. Copies of the covering letter shall in each case be sent to the Chief, Division of Office Services, Office of Property and Supply, Maritime Administration, Washington 25, D. C. and to the cognizant Coast Director who shall check each list to ensure completeness of submissions.

(Sec. 204, 49 Stat. 1987 as amended; 46 U. S. C. 1114)

Approved: November 2, 1953.

[SEAL] C. H. MCGUIRE,
*Director, Office of National Shipping Authority and Government Aid.*

## TITLE 39—POSTAL SERVICE

### Chapter I—Post Office Department

PART 35—PROVISIONS APPLICABLE TO THE SEVERAL CLASSES OF MAIL MATTER

PART 43—TREATMENT OF DOMESTIC MAIL MATTER AT RECEIVING POST OFFICES

HARMLESS LIVE CREATURES; VALUABLE MAIL RECEIVED FROM DEAD LETTER OR DEAD PARCEL POST BRANCHES

1. In § 35.25 *Harmless live creatures* amend paragraph (b) to read as follows:

(b) Live creatures described in paragraph (a) of this section, except soft crabs, shall be properly prepared for mailing so as to withstand handling inside of sacks or pouches, if size of parcel permits, during period from November 1 to March 31, of each year. Such parcels weighing over 8 ounces will be dispatched as outside matter from April 1 to October 31 but parcels weighing 8 ounces or less shall be sacked or pouched all year.

(R. S. 161, 396; secs. 304, 309, 42 Stat. 24, 25; 5 U. S. C. 22, 369)

2. In § 43.38 *Valuable mail received from dead letter or dead parcel post branches* amend paragraph (e) to read as follows:

(e) *When received registered from a dead letter or dead parcel post branch.* When dead matter is received under registered cover from a dead letter or dead parcel post branch for possible delivery, it shall be handled in the Inquiry Section or some other section or by a specific employee designated by the postmaster. In any event, the registry section shall not be allowed to open and dispose of such registered matter. If the proper address is supplied, the matter shall be re-registered to the rightful owner under the local registry number and the person to whom delivered charged with the 5 cent dead letter fee plus the minimum registry fee. The registry number shall be entered on the form which accompanies the dead mail and the form filed by the delivering office. Such matter received under registered cover must also be sent under registered cover when forwarded or returned.

(R. S. 161, 396, 3936, as amended, secs. 304, 309, 42 Stat. 24, 25; 5 U. S. C. 22, 369, 39 U. S. C. 406)

## TITLE 43—PUBLIC LANDS: INTERIOR

### Chapter I—Bureau of Land Management, Department of the Interior

[Circular No. 1862]

PART 259—DISPOSAL OF MATERIALS

SALES

Sections 259.11 and 259.12 (f) and (g) are amended to read as follows:

§ 259.11 *Bond.* In all sales in which payment in full is not made in advance, a bond of not less than 15 percent of the contract price of materials sold in the public-land States, or 25 percent of the contract price of materials sold in Alaska, must be furnished by the purchaser. In any sale the signing officer, in his discretion, may require a bond in excess of that amount. Bonds hereunder shall be executed on Form 4–057. The bond must be that of a corporate surety shown on an approved list issued by the Treasury Department, or a cash bond. United States bonds, or cash, may be furnished in lieu of a surety bond, if accompanied by a proper personal bond and power of attorney authorizing the Secretary, in case of default, to collect, sell, assign, or transfer the said bonds without notice, at public or private sale, free from any equity of redemption, and without appraisement or valuation.

§ 259.12 *Payment.* • • •

(f) In any sale of materials in the public-land States for which payment in installments is permitted, the purchaser shall make an initial payment equivalent to two installments as follows: One installment prior to the approval of the contract and the second installment within six months thereafter, or prior to the commencement of operations thereunder, whichever is earlier. The first installment shall be retained by the Government as additional security for the full and faithful performance of the contract, and shall be applied in whole or in part toward the final installment thereunder. On the basis of his initial payment, the purchaser may sever or extract materials under the contract of a value not to exceed one-half of such initial payment. The remaining installments shall become due and payable without prior notice whenever the value of the materials severed or extracted under the contract shall equal the sum of the payments made by the purchaser (exclusive of one-half of the initial payments, as provided in this paragraph).

(g) In any sale of materials in Alaska for which payment in installments is permitted, the purchaser shall make payment of one installment prior to the approval of the contract. The purchaser may sever or extract materials under the contract of a value not to exceed such payment. The remaining installments shall become due and payable without prior notice whenever the value of the materials severed or extracted under the contract shall equal the sum of the payments made by the purchaser.

(Sec. 1, 61 Stat. 681, 43 U. S. C. 1185)

FRED G. AANDAHL,
*Acting Secretary of the Interior.*

# PROPOSED RULE MAKING

## DEPARTMENT OF LABOR

### Wage and Hour Division

### [ 29 CFR Part 686 ]

SHOE MANUFACTURING AND ALLIED INDUSTRIES IN PUERTO RICO

MINIMUM WAGE RATE

On April 9, 1953, pursuant to section 5 of the Fair Labor Standards Act of 1938, as amended (hereinafter called the act), the Administrator of the Wage and Hour Division, United States Department of Labor, by Administrative Order No. 428, as amended by Administrative Orders Nos. 430, 431 and 432, dated April 27, 1953, May 5, 1953, and May 18, 1953, respectively, appointed Special Industry Committee No. 14 for Puerto Rico (hereinafter called the Committee) and directed the Committee to investigate conditions in a number of industries specified and defined in the order, including the Shoe Manufacturing and Allied Industries in Puerto Rico (hereinafter called the Industry), and to recommend minimum wage rates for employees engaged in commerce or in the production of goods for commerce in such industries.

For purposes of investigating conditions in and recommending minimum wages for the Shoe Manufacturing and Allied Industries in Puerto Rico, the Committee included three disinterested persons representing the public, a like number representing employers, and a like number representing employees in the industry, and was composed of residents of Puerto Rico and of the United States outside of Puerto Rico.

After investigating economic and competitive conditions in the Shoe Manufacturing and Allied Industries in Puerto Rico, as defined in Administrative Order No. 428, the Committee filed with the Administrator a report containing the recommendation, that a minimum wage rate of 40 cents an hour shall be paid under section 6 of the Fair Labor Standards Act of 1938, as amended, by every employer to each of his employees in the Shoe Manufacturing and Allied Industries in Puerto Rico who is engaged in commerce or in the production of goods for commerce.

Pursuant to notice published in the FEDERAL REGISTER on August 1, 1953 (18 F. R. 4524–4527) and circulated to all interested parties, a public hearing upon the Committee's recommendation was held before Hearing Examiner E. West Parkinson, as Presiding Officer on September 3, 1953, in Washington, D. C., at which all interested parties were given an opportunity to be heard. After the hearing was closed the record of the hearing was certified to the Administrator by the presiding officer.

Upon reviewing all of the evidence adduced in this proceeding, and after giving due consideration to the provisions of the act, particularly sections 5 and 8 thereof, I have concluded that the recommendation of the Committee for a minimum wage rate of 40 cents an hour in the Shoe Manufacturing and Allied Industries in Puerto Rico was made in accordance with law, is supported by the evidence adduced at the hearing, and, taking into consideration the same factors as are required to be considered by the Committee, will carry out the purposes of sections 5 and 8 of the act.

I have set forth my decision in a document entitled "Findings and Opinion of the Administrator in the Matter of the Recommendations of Special Industry Committee No. 14 for Puerto Rico for Minimum Wage Rates in the Shoe Manufacturing and Allied Industries in Puerto Rico", a copy of which may be had upon request addressed to the Wage and Hour Division, United States Department of Labor, Washington 25, D. C.

Accordingly, notice is hereby given pursuant to the Administrative Procedure Act (60 Stat. 237; 5 U. S. C. 1001) and the rules of practice governing this proceeding, that I propose to amend the Wage Order for the Shoe Manufacturing and Allied Industries in Puerto Rico, which is contained in 29 CFR, 1952 Supp., Part 686, as follows:

Delete § 686.2 and substitute the following:

§ 686.2 *Wage rate.* Wages at a rate of not less than 40 cents per hour shall be paid under section 6 of the Fair Labor Standards Act of 1938, as amended, by every employer to each of his employees in the Shoe Manufacturing and Allied Industries in Puerto Rico who is engaged in commerce or in the production of goods for commerce.

Within fifteen days from the publication of this notice in the FEDERAL REGISTER, interested parties may submit written exceptions to the proposed actions above described. Exceptions should be addressed to the Administrator of the Wage and Hour Division, United States Department of Labor, Washington 25, D. C. They should be submitted in quadruplicate, and should include supporting reasons for any exceptions.

Signed at Washington, D. C., this 4th day of November 1953.

WM. R. MCCOMB,
*Administrator, Wage and Hour Division, Department of Labor.*

[F. R. Doc. 53-9485; Filed, Nov. 9, 1953; 8:47 a. m.]

### [ 29 CFR Part 709 ]

COSTUME JEWELRY DIVISION OF THE BUTTON, BUCKLE, AND JEWELRY INDUSTRY IN PUERTO RICO

MINIMUM WAGE RATE

On April 9, 1953, pursuant to section 5 of the Fair Labor Standards Act, as amended (hereinafter called the act), the Administrator of the Wage and Hour Division, United States Department of Labor, by Administrative Order No. 428, as amended by Administrative Orders Nos. 430, 431 and 432 dated April 27, 1953, May 5, 1953, and May 18, 1953, respectively, appointed Special Industry Committee No. 14 for Puerto Rico (hereinafter called the Committee) and directed the Committee to investigate conditions in a number of industries specified in the order, including the Costume Jewelry Division of the Button, Buckle, and Jewelry Industry in Puerto Rico, and to recommend minimum wage rates for employees engaged in commerce or in the production of goods for commerce in such industries.

For purposes of investigating conditions in and recommending minimum wage rates for the Costume Jewelry Division of the Button, Buckle, and Jewelry Industry in Puerto Rico, the Committee included three disinterested persons representing the public, a like number representing employers, and a like number representing employees in the industry, and was composed of residents of Puerto Rico and of the United States outside of Puerto Rico.

After investigating economic and competitive conditions in the Costume Jewelry Division, as defined in Administrative Order No. 428, the Committee submitted to the Administrator a report containing the following recommendations: (1) That the Costume Jewelry Division, as defined, should be divided into separate and distinct Divisions of the Button, Buckle, and Jewelry Industry, to be entitled "The Costume Jewelry Hair Ornament Division", and "The Costume Jewelry General Division"; and (2) that a minimum wage rate of 50 cents an hour should be paid in the Costume Jewelry Hair Ornament Division, and a minimum wage rate of 36 cents an hour should be paid in the Costume Jewelry General Division, to employees who are engaged in commerce or in the production of goods for commerce.

Pursuant to notice published in the FEDERAL REGISTER on August 1, 1953 (18 F. R. 4524–4527) and circulated to all interested parties, a public hearing upon the Committee's recommendations was held before Hearing Examiner Clifford P. Grant, as presiding officer, on September 1, 1953, in Washington, D. C., at which all interested parties were given an opportunity to be heard. After the hearing was closed the record of the hearing was certified to the Administrator by the presiding officer.

Upon reviewing all of the evidence adduced in this proceeding, and after giving due consideration to the provisions of the Act, particularly sections 5 and 8 thereof, I have concluded that the recommendation of the Committee for the division of the Costume Jewelry Division into separate and distinct divisions to be known as the Costume Jewelry Hair Ornament Division, and the Costume Jewelry General Division of the Button, Buckle, and Jewelry Industry, together with the recommendations of the Committee for a minimum wage rate of 50 cents an hour in the Costume Jewelry Hair Ornament Division and a minimum wage rate of 36 cents an hour in the Costume Jewelry General Division, as defined, were made in accordance with law, are supported by the evidence adduced at the hearing, and, taking into consideration the same factors as are required to be considered by the Committee, will carry out the purposes of sections 5 and 8 of the act.

I have set forth my decision in a document entitled "Findings and Opinion of the Administrator in the Matter of the Recommendations of Special Industry Committee No. 14 for Puerto Rico for Minimum Wage Rates in the Costume Jewelry Division of the Button, Buckle, and Jewelry Industry in Puerto Rico", a copy of which may be had upon request addressed to the Wage and Hour Division, United States Department of Labor, Washington 25, D. C.

Accordingly, notice is hereby given pursuant to the Administrative Procedure Act (60 Stat. 237; 5 U. S. C. 1001) and the rules of practice governing this proceeding, that I propose to amend the Wage Order for the Button, Buckle, and Jewelry Industry in Puerto Rico, which is contained in 29 CFR Part 709, as follows:

1. In § 709.1 delete in its entirety the note which immediately follows paragraph (e) (minimum wage rate for the pearl button and buckle division) and substitute the following paragraphs:

(f) Wages at a rate of not less than 50 cents per hour shall be paid under section 6 of the Fair Labor Standards Act of 1938, as amended, by every employer to each of his employees in the Costume Jewelry Hair Ornament Division of the Button, Buckle, and Jewelry Industry in Puerto Rico who is engaged in commerce or in the production of goods for commerce.

(g) Wages at a rate of not less than 36 cents per hour shall be paid under section 6 of the Fair Labor Standards Act of 1938, as amended, by every employer to each of his employees in the Costume Jewelry General Division of the Button, Buckle, and Jewelry Industry in Puerto Rico who is engaged in commerce or in the production of goods for commerce.

2. In § 709.3, delete the note which immediately follows pararaph (b) (5) (definition of the pearl button and buckle division) and add the following subparagraphs:

(6) *Costume Jewelry Hair Ornament Division.* The manufacture from any material (except precious metals or materials of local origin such as seeds, shells, natural fibers and similar materials) of hair ornaments such as decorative or ornamental combs, clips, and barrettes, and of component parts of such ornaments when the manufacture of such parts is performed in an establishment producing such hair ornaments.

(7) *Costume Jewelry General Division.* The manufacture of jewelry (except rosaries, hair ornaments, metal expansion watch bands and braclets, and metal, glass, plastic and wooden beads) and jewelry findings from any material except precious metals or materials of local origin such as seeds, shells, natural fibers and similar materials.

Within fifteen days from the publication of this notice in the FEDERAL REGISTER, interested parties may submit written exceptions to the proposed actions above described. Exceptions should be addressed to the Administrator of the Wage and Hour Division, United States Department of Labor, Washington 25, D. C. They should be submitted in quadruplicate, and should contain supporting reasons for any exceptions.

Signed at Washington, D. C., this 4th day of November 1953.

WM. R. MCCOMB,
*Administrator, Wage and Hour Division, Department of Labor.*

# NOTICES

## FEDERAL POWER COMMISSION

[Docket No. E-6462]

PACIFIC GAS & ELECTRIC CO.

ORDER POSTPONING DATE FOR ORAL ARGUMENT

Pacific Gas and Electric Company by petition filed October 30, 1953, requested a postponement of the date for oral reargument in this proceeding from November 10, 1953, as heretofore fixed by our order issued October 6, 1953, to a date subsequent to Commission action on a petition to reopen the record in this proceeding for the receipt of certain documents relating to matters the parties were requested to address themselves to on reargument, which petition Pacific undertakes will be filed and served by it not later than November 16, 1953.

Counsel for Sierra Pacific Power Company by telegram filed November 3, 1953, and Commission's Staff Counsel by a response filed November 3, 1953, have indicated they have no objection to the requested postponement.

The Commission finds: It is appropriate to carry out the provisions of the Federal Power Act to postpone the date for oral reargument in the above-entitled matter as hereinafter ordered.

The Commission orders: The date for oral reargument in the above-entitled matter be and it is hereby postponed from November 10, 1953, at 10 a. m., e. s. t., in the Hearing Room of the Federal Power Commission, at 441 G Street

NW., Washington, D. C., to a date to be fixed by a subsequent order of the Commission.

Adopted: November 4, 1953.

Issued: November 4, 1953.

By the Commission.

[Project No. 2142]

CENTRAL MAINE POWER CO.

NOTICE OF APPLICATION FOR LICENSE

NOVEMBER 4, 1953.

Public notice is hereby given that Central Maine Power Company, of Augusta, Maine, has filed application under the Federal Power Act (16 U. S. C. 791a–825r) for license for proposed water-power Project No. 2142 (to be known as Indian Pond Project) to be located on the Kennebec River in Somerset and Piscataquis Counties, Maine, and consisting of a reservoir with an area of about 3,666 acres at normal pool elevation of 955 feet, U. S. G. S. Datum, formed by raising Indian Pond; a concrete gravity type dam composed of an intake section, a spillway section with roller gates and stanchions, a flashboard section, a log sluice section, a bulkhead section, and flanked on the left bank by an earth dike; a detached earth dike; four penstocks; a powerhouse at the foot of the dam with total generating capacity of 76,600 kilowatts; a tailrace about 1,750 feet long; a log sluice; an access road; a substation adjacent to the powerhouse; a wood pole 115 kv transmission line about 29.6 miles long; a switching substation at the downstream Wyman project; and appurtenant facilities.

Protests or petitions to intervene may be filed with the Federal Power Commission, Washington 25, D. C., in accordance with the rules of practice and procedure of the Commission (18 CFR 1.8 or 1.10) on or before the 17th day of December 1953. The application is on file with the Commission for public inspection.

## INTERSTATE COMMERCE COMMISSION

[4th Sec. Application 28618]

TIRE FABRIC FROM CLEVELAND AND PAINESVILLE, OHIO, TO GADSDEN, ALA.

APPLICATION FOR RELIEF

NOVEMBER 5, 1953.

The Commission is in receipt of the above-entitled and numbered application for relief from the long-and-short-haul provision of section 4 (1) of the Interstate Commerce Act.

Filed by: H. R. Hinsch, Alternate Agent, for carriers parties to his tariff I. C. C. No. 4510, pursuant to fourth section order No. 17220.

Commodities involved: Tire fabric, rayon cord, in bales, boxes or rolls, carloads.

From: Cleveland and Painesville, Ohio.

To: Gadsden, Ala.

Grounds for relief: Competition with rail carriers, circuitous routes, and to maintain grouping.

Any interested person desiring the Commission to hold a hearing upon such application shall request the Commission in writing so to do within 15 days from the date of this notice. As provided by the general rules of practice of the Commission, Rule 73, persons other than applicants should fairly disclose their interest, and the position they intend to take at the hearing with respect to the application. Otherwise the Commission, in its discretion, may proceed to investigate and determine the matters involved in such application without further or formal hearing. If because of an emergency a grant of temporary relief is found to be necessary before the expiration of the 15-day period, a hearing, upon a request filed within that period, may be held subsequently.

By the Commission.

[SEAL] GEORGE W. LAIRD, *Secretary.*

---

[4th Sec. Application 28619]

VARIOUS COMMODITIES BETWEEN POINTS IN SOUTH

APPLICATION FOR RELIEF

NOVEMBER 5, 1953.

The Commission is in receipt of the above-entitled and numbered application for relief from the long-and-short-haul provision of section 4 (1) of the Interstate Commerce Act.

Filed by: R. E. Boyle, Jr., Agent, for carriers parties to Agent C. A. Spaninger's tariff I. C. C. No. 1295 and others listed in the application, pursuant to fourth-section order No. 17220.

Commodities involved: Aluminum, agricultural implements, bags and bagging, and other commodities listed in the application, carloads.

Territory: From, to, and between points in Southern territory.

Grounds for relief: Competition with rail carriers, circuitous routes, and to maintain grouping.

Any interested person desiring the Commission to hold a hearing upon such application shall request the Commission in writing so to do within 15 days from the date of this notice. As provided by the general rules of practice of the Commission, Rule 73, persons other than applicants should fairly disclose their interest, and the position they intend to take at the hearing with respect to the application. Otherwise the Commission, in its discretion, may proceed to investigate and determine the matters involved in such application without further or formal hearing. If because of an emergency a grant of temporary relief is found to be necessary before the expiration of the 15-day period, a hearing, upon a request filed within that period, may be held subsequently.

By the Commission.

[4th Sec. Application 28620]

IRON OR STEEL BILLETS FROM STEELTON, MINN., TO CLEVELAND, OHIO

APPLICATION FOR RELIEF

NOVEMBER 5, 1953.

The Commission is in receipt of the above-entitled and numbered application for relief from the long-and-short-haul provision of section 4 (1) of the Interstate Commerce Act.

Filed by: W. J. Prueter, Agent, for carriers parties to his tariff I. C. C. No. A-3715 and Duluth, South Shore and Atlantic Railroad Company's tariff I. C. C. No. 3915.

Commodities involved: Billets, iron or steel (other than copper clad), carloads.

From: Steelton, Minn.

To: Cleveland, Ohio.

Grounds for relief: Competition with water carriers.

Any interested person desiring the Commission to hold a hearing upon such application shall request the Commission in writing so to do within 15 days from the date of this notice. As provided by the general rules of practice of the Commission, Rule 73, persons other than applicants should fairly disclose their interest, and the position they intend to take at the hearing with respect to the application. Otherwise the Commission, in its discretion, may proceed to investigate and determine the matters involved in such application without further or formal hearing. If because of an emergency a grant of temporary relief is found to be necessary before the expiration of the 15-day period, a hearing, upon a request filed within that period, may be held subsequently.

[No. 31307]

TENNESSEE INTRASTATE FREIGHT RATES AND CHARGES ON AGRICULTURAL LIMESTONE AND OTHER COMMODITIES

At a session of the Interstate Commerce Commission, Division 1, held at its office in Washington, D. C. on the 23d day of October A. D. 1953.

Upon a petition filed by common carriers by railroad operating to, from and between points in the State of Tennessee, an order was entered by the Commission, Division 1, on July 8, 1953, in the above-entitled proceeding, instituting an investigation under section 13 of the Interstate Commerce Act of rates on certain commodities within the State of Tennessee, as more particularly described in said order. The petitioning railroads by petition filed September 25, 1953 request that the order of investigation be amended with respect to rates on agricultural limestone, and (in paragraph 4 of said petition) with respect to rates on all the commodities described in the order, by eliminating the restriction (contained in the first ordering paragraph of the order) upon evidence as to the alleged unlawfulness of the intrastate rates, imposed by the words, "by reason of the failure of such rates and charges to include increases corresponding to those permitted by this Commission for interstate traffic in said Ex Parte 175, Increased Freight Rates, 1951, supra" and for good cause appearing:

*It is ordered*, That the said order of July 8, 1953 be, and it is hereby, amended by striking out from the first ordering paragraph the words quoted in the preceding paragraph hereof;

*It is further ordered*, That a copy of this order be served on the respondents and persons upon whom the original order was served, that notice to the public be given by depositing a copy of this order in the office of the Secretary of the Commission at Washington, D. C. for public inspection and by filing a copy with the Director, Division of the Federal Register, Washington, D. C.

By the Commission, Division 1.

[SEAL] GEORGE W. LAIRD, *Secretary.*

## SECURITIES AND EXCHANGE COMMISSION

[File No. 54-201]

UNITED GAS IMPROVEMENT CO.

ORDER RELEASING JURISDICTION WITH RESPECT TO FEES AND EXPENSES

NOVEMBER 4, 1953.

The Commission on September 18, 1952 having issued its findings and opinion and order approving a plan for the reorganization of the United Gas Improvement Company ("UGI"), a registered holding company, and its subsidiaries pursuant to section 11 (e) of the Public Utility Holding Company Act of 1935; and said order having reserved jurisdiction over the fees and expenses in connection with the plan proceeding; and said plan having since been consummated and carried out in accordance with its terms; and

Applications having been filed requesting the approval and allowance of fees and reimbursement of expenses for services rendered in said proceeding; and

UGI having stated that it is prepared to pay the amounts for fees and expenses for which applications have been filed; and

The Commission having considered the applications on file and the amounts requested, and being of the opinion that the requested allowances hereinafter itemized are reasonable and are for necessary services, and that an order should be entered approving and directing the payment thereof by UGI:

*It is ordered*, That the applications as filed for allowances for services and reimbursement of expenses, in the following amounts, be, and are hereby approved, and UGI is directed to pay such amounts:

| | Fees | Expenses | Total |
|---|---|---|---|
| General counsel for UGI, Morgan, Lewis & Bockius | $75,000.00 | $1,817.42 | $76,817.42 |
| Local counsel for UGI, Arents, Fox, Kintner, Plotkin & Kahn | 100.00 | ---------- | 100.00 |
| Hall, Ludlum & Mintzer | 2,295.00 | | 2,295.00 |
| Rodd & Heywood | 100.00 | 295.00 | 395.00 |
| White, Rowlands & Hourigan | 1,442.50 | 54.40 | 1,496.90 |
| Drexel & Co., financial advisor for UGI | 15,000.00 | ---------- | 15,000.00 |
| Eyeland, Ross, Bissell & McCreight, accounting services to UGI | 24,770.00 | ---------- | 24,770.00 |
| Ross & Chandler, Inc., expert for committee of stockholders committee | 3,500.00 | 70.33 | 3,570.33 |
| Kane & Co., accounting services to common stockholders committee | 500.00 | ---------- | 500.00 |
| Miscellaneous expenses of common stockholders committee | ---------- | 1,173.61 | 1,173.61 |
| Miscellaneous expenses of UGI (printing, filing and recording fees, travel, etc.) | ---------- | 87,207.03 | 87,207.03 |

*It is further ordered*, That the jurisdiction heretofore reserved with respect to the allowances herein made be, and hereby is, released.

By the Commission.

[File No. 70-3147]

MONONGAHELA POWER CO.

NOTICE OF PROPOSED ISSUANCE AND SALE OF PRINCIPAL AMOUNT OF FIRST MORTGAGE BONDS

NOVEMBER 4, 1953.

Notice is hereby given that Monongahela Power Company ("Monongahela"), a subsidiary company of the West Penn Electric Company, a registered holding company, has filed a declaration pursuant to the Public Utility Holding Company Act of 1935 ("act"). Declarant has designated sections 6 (a) and 7 of the act and Rule U-50 promulgated thereunder as applicable to the proposed transactions.

All interested persons are referred to said declaration, which is on file in the office of the Commission, for a statement of the transactions therein proposed, which are summarized as follows:

Monongahela proposes to issue and sell, pursuant to the competitive bidding requirements of Rule U-50, $10,000,000 principal amount of its first mortgage bonds, -- percent Series, due 1983. The net proceeds from the sale of said bonds are to be used for construction of property additions and improvements by Monongahela and its subsidiaries. The bonds are to be issued under an indenture dated as of August 1, 1945, as heretofore supplemented, between Monongahela and City Bank Farmers Trust Company as Trustee, and an indenture supplemental to said indenture to be dated as of December 1, 1953. The price of the bonds shall be not less than 100 percent or more than 102¾ percent of the principal amount thereof and the interest rate (which shall be a multiple of ⅛ of 1 percent) will be determined by the competitive bidding.

Notice is further given that any interested person may, not later than November 16, 1953, at 5:30 p. m., e. s. t., request the Commission in writing that a hearing be held on such matter, stating the nature of his interest, and the issues of law or fact raised by said declaration which he desires to controvert, or he may request that he be notified if the Commission should order a hearing thereon. Any such request should be addressed: Secretary, Securities and Exchange Commission, 425 Second Street NW., Washington 25, D. C. At any time after said date, said declaration, as filed or as amended, may be granted and permitted to become effective as provided in Rule U-23 of the rules and regulations promulgated under the act, or the Commission may exempt such transactions as provided in Rules U-20 (a) and U-100 thereof.

By the Commission.

## TITLE 19—CUSTOMS DUTIES

### Chapter I—Bureau of Customs, Department of the Treasury

[T. D. 53370]

PART 24—CUSTOMS FINANCIAL AND ACCOUNTING PROCEDURE

REFUNDS OF EXCESSIVE DUTIES, TAXES, ETC.

Under present procedure when it is found on liquidation or reliquidation of an entry that there has been an excess deposit of duties and internal-revenue taxes, the collector of customs (1) prepares a notice of refund of duties due which is forwarded to the person to whom the refund is due together with a check in payment thereof, and (2) prepares a notice of refund of internal-revenue tax due which he sends to such person. To obtain payment of the internal-revenue tax refund, such person is required by regulation to file a claim with the Internal Revenue Service.

In order to expedite the payment of refunds of excess deposits of internal-revenue taxes collected by collectors of customs and to conserve manpower both in the Internal Revenue Service and the Bureau of Customs, the Secretary of the Treasury by Treasury Department Order No. 165-2,[1] T. D. 53368, has authorized the Commissioner of Customs or such officer of employee of the Customs Service as may be designated by him to make refunds of excess deposits of internal-revenue tax found by collectors of customs on liquidation or reliquidation to be due. No claim for such refund need be filed.

So that collectors of customs may make such refunds and to eliminate certain provisions of the Customs Regulations inconsistent with that procedure, § 24.36 is hereby amended as follows:

1 The first sentence of paragraph (a) is amended by inserting "of excessive duties or taxes, or both," between "that a refund" and "is due" and by changing "(c) and (d)" to "(b) and (c)."

2 Paragraphs (b), (e), and (f) are deleted; paragraphs (c) and (d) are redesignated (b) and (c), respectively; and the first sentence of newly designated paragraph (c) is amended by adding the words "or internal-revenue taxes" after the word "duties".

[1] See Department of the Treasury, Office of the Secretary, F. R. Doc. 53-9545, in Notices section, *infra*.

(R. S. 161, 251, sec. 624, 46 Stat. 759; 5 U. S. C. 22, 19 U. S. C. 66, 1624)

These amendments shall be effective with respect to all refunds found to be due on entries liquidated or reliquidated on or after January 1, 1954.

[SEAL] D. B. STRUBINGER, *Acting Commissioner of Customs.*

Approved: October 29, 1953.

H. CHAPMAN ROSE, *Acting Secretary of the Treasury.*

[F. R. Doc. 53-9540; Filed, Nov. 10, 1953; 11:21 a. m.]

## TITLE 7—AGRICULTURE

### Chapter I—Production and Marketing Administration (Standards, Inspections, Marketing Practices), Department of Agriculture

Subchapter C—Regulations and Standards Under the Farm Products Inspection Act

PART 51—FRUITS, VEGETABLES AND OTHER PRODUCTS[1] (INSPECTION, CERTIFICATION AND STANDARDS)

RECODIFICATION

By virtue of the authority (18 F. R. 4839) vested in me by the Secretary of Agriculture and in accordance with the revised Federal Register regulations, the format of the regulations (7 CFR, Part 51) governing the grading and certification of fruits, vegetables and other products and the United States standards with respect thereto, which are currently operative pursuant to the applicable provisions of the Agricultural Marketing Act of 1946 (60 Stat. 1087; 7 U. S. C. 1621 et seq.) and the Department of Agriculture Appropriation Act, 1954 (Pub. Law 156, 83d Cong., approved July 28, 1953), is recodified as hereinafter set forth.

The recasting of the format due to such recodification is not intended, nor shall it be deemed to make any substantive change in said regulations. However, in §§ 51.620 and 51.630 (formerly §§ 51.191 and 51.192) the statements on the coverage of the standards were changed to reflect the fact that separate standards have been issued for Florida

[1] Among such other products are the following: raw nuts; Christmas trees and greens; flowers and flower bulbs; and onion sets.

grapefruit and oranges. Since the services and programs provided by the regulations are currently in effect, the regulations as presented in recodified form shall become effective upon publication in the FEDERAL REGISTER so as to avoid any interruption to the continuity of such services and programs.

The recodification is set forth below.

Issued at Washington, D. C., this 6th day of November 1953.

ROY W. LENNARTSON,
*Assistant Administrator, Production and Marketing Administration.*

SUBPART—REGULATIONS

ADMINISTRATION

Sec.
51.1 Administration of regulations.

DEFINITIONS

51.2 Meaning of words.
51.3 Terms defined.

INSPECTION SERVICE

51.4 Inspection service.
51.5 Kind of service.
51.6 Who may obtain service.
51.7 How to make application.
51.8 Form of application.
51.9 Filing of application.
51.10 When application may be rejected.
51.11 When application may be withdrawn.
51.12 Authority to request inspection.
51.13 Accessibility of products.
51.14 Basis of service.
51.15 Order of inspection.
51.16 Financial interest of inspector.
51.17 Postponing inspection.
51.18 Official sampling.
51.19 Certificate form.
51.20 Certificates, issuance.
51.21 Certificates, disposition.
51.22 Advance information.

APPEAL INSPECTION

51.23 When appeal may be taken.
51.24 How to obtain.
51.25 Record of filing time.
51.26 When appeal inspection may be refused.
51.27 When an application for an appeal inspection may be withdrawn.
51.28 Order in which made.
51.29 Who shall make appeal inspections.
51.30 Appeal findings.
51.31 Superseded certificates.

LICENSED INSPECTORS

51.32 Who may be licensed.
51.33 Application to become a licensed inspector.
51.34 Suspension or revocation of license of licensed inspector.
51.35 Surrender of license.

FEES AND CHARGES

51.36 Amount of fees, rates, and charges.
51.37 Basis for charges.
51.38 Fees for inspections by licensee who is working under contract with the Administrator.
51.39 Fees under cooperative agreement.
51.40 Fees for appeal inspections.
51.41 Traveling, and other expenses.
51.42 Fees for additional copies of inspection certificates.
51.43 Charges for inspection services on a contract basis.
51.44 How fees shall be paid.
51.45 Disposition of fees.

MISCELLANEOUS

51.46 Fraud or misrepresentation.
51.47 Political activity.
51.48 Interfering with an inspector.
51.49 Compliance with other laws.
51.50 Identification.
51.51 Publication.

SUBPART—REGULATIONS

ADMINISTRATION

§ 51.1 *Administration of regulations.* The Administrator, Production and Marketing Administration, United States Department of Agriculture, is charged with the administration of the regulations in this part, and he may delegate any or all of such functions to any other officer or employee of the Production and Marketing Administration of the Department, in his discretion.

DEFINITIONS

§ 51.2 *Meaning of words.* Words in the regulations in this part in the singular form shall be deemed to import the plural, and vice versa, as the case may demand.

§ 51.3 *Terms defined.* For the purpose of the regulations in this part, unless the context otherwise requires, the following terms shall have the following meanings:

(a) "Act" means the following provisions of the Department of Agriculture Appropriation Act, 1949 (Pub. Law 712, 80th Cong., 2d Sess.), or any other present or future act of Congress conferring similar authority:

*Market inspection of farm products.* For the investigation and certification, in one or more jurisdictions, to shippers and other interested parties of the class, quality, and condition of any agricultural commodity or food product, whether raw, dried, canned, or otherwise processed, and any product containing an agricultural commodity or derivative thereof when offered for interstate shipment or when received at such important central markets as the Secretary may from time to time designate, or at points which may be conveniently reached therefrom under such rules and regulations as he may prescribe, including payment of such fees as will be reasonable and as nearly as may be to cover the cost for the services rendered.

(b) "Department" means the United States Department of Agriculture.

(c) "Administrator" means the Administrator of the Production and Marketing Administration of the Department.

(d) "Person" means any individual, partnership, association, business trust, corporation, organized group of persons (whether incorporated or not), the United States (including, but not limited to, corporate agencies thereof), and any State, county, or municipal government, any common carrier, and any authorized agent of any of the foregoing.

(e) "Interested party" means any person who has a financial interest in the product on which inspection is requested.

(f) "Inspector" means any employee of the Department who is authorized by the Secretary, or any other person licensed by the Secretary, to investigate, sample, inspect, and certify, in accordance with the regulations in this part, to any interested party the quality and/or condition of any product covered under this part, and to perform related duties in connection with such inspection services.

(g) "Inspection certificate" means a statement, in written and/or printed form, issued pursuant to the regulations in this part, setting forth, in addition to appropriate descriptive information relative to the particular product and the containers thereof, the quality and/or condition of such product.

(h) "Quality" means the combination of the inherent properties of a product which determines its relative degree of excellence.

(i) "Condition" means the relative degree of soundness or preservation of a product and includes, but is not necessarily limited to, its maturity, decay, freezing or mechanical injury, shriveling, flabbiness, or any other factor which affects its merchantability.

(j) "Lot" means the quantity of the same kind of product offered for inspection at the same general time by an interested party, except that different varieties of the same kind of product, other than peanuts, pecans, and other nuts, shall not be considered as separate lots.

INSPECTION SERVICE

§ 51.4 *Inspection service.* Products will be inspected at appropriate points indicated in paragraphs (a), (b), and (c) of this section whenever inspectors are available.

(a) *Shipping points.* Inspection is available in all States with which cooperative agreements providing for this work have been entered into on behalf of the Department pursuant to authority contained in any act of Congress.[1]

(b) *Designated markets.* The following are designated as important central markets at which products may be inspected under the act: Birmingham, Mobile, Montgomery, Ala.; Phoenix, Ariz.; Little Rock, Ark.; Los Angeles, Oakland, Sacramento, San Diego, San Francisco, Calif.; Denver, Col.; Hartford, Conn.; Washington, D. C.; Jacksonville, Miami, Tampa, Winter Haven, Fla.; Atlanta, Ga.; Chicago, Ill.; Indianapolis, Ind.; Baton Rouge, New Orleans, La.; Baltimore, Md.; Boston, Mass.; Detroit, Mich.; Duluth, Minneapolis, Minn.; Jackson, Miss.; Kansas City, St. Louis, Mo.; Newark, Trenton, N. J.; Albany, Buffalo, New York City, Rochester, Syracuse, N. Y.; Asheville, Charlotte, Raleigh, N. C.; Fargo, N. Dak.; Cincinnati, Cleveland, Columbus, Youngstown, O.; Oklahoma City, Tulsa, Okla.; Portland, Ore.; Harrisburg, Philadelphia, Pittsburgh, Wilkes-Barre, Pa.; Columbia, S. C.; Memphis, Nashville, Tenn.; Dallas, Ft. Worth, Houston, San Antonio, Tex.; Salt Lake City, Utah; Norfolk, Richmond, Roanoke, Va.; Seattle, Wash.; Milwaukee, Wis.[2]

[1] The addresses of the offices at these points or markets are changed from time to time. However, any prospective applicant may obtain the address of the office nearest the place where the commodity which he wishes to have inspected is located by addressing an inquiry to "Food Products Inspection Service" at any of the following offices: 1. Production and Marketing Administration, Washington 25, D. C. 2. Room 836A, 641 Washington Street, New York 14, N. Y. 3. 1421 South Aberdeen Street, Chicago 8, Ill. 4. 739 Appraiser's Building, San Francisco 11, Calif.

(c) *Other points.* Inspection may be made at any point which may be conveniently reached from any market referred to in paragraph (b) of this section under conditions provided in § 51.41 and to the extent permitted by the time of the nearest inspector.

§ 51.5 *Kind of service.* Inspection of products may be made according to quality and/or condition, and, in the discretion of the Administrator, for any part thereof.

§ 51.6 *Who may obtain service.* An application for inspection may be made by any interested party, or by his authorized agent.

§ 51.7 *How to make application.* Application for inspection may be filed in an office of inspection at any market referred to in § 51.4 (a) or (b) or with any inspector. It may be made in writing, orally, by telegraph, or by telephone. If made orally or by telephone, the inspector may require that it be confirmed by applicant in writing or by telegraph. An application may be made for one or more lots, or it may be in the nature of a blanket application for inspection of all designated lots of a given commodity within a particular period, or for all designated lots loaded or received at a specified point.

§ 51.8 *Form of application.* Each application for inspection shall state (a) the name and post-office address of the applicant and the name and capacity of the person, if any, making the application in his behalf; (b) the name and post-office address of the shipper; (c) the kind and quantity of the products involved; (d) the interest of the applicant therein; (e) the identification of the products by (1) grade, brand, or other marks, if practicable, (2) car initials, car number, and name of carrier or number of truck or name of boat, if practicable, and (3) the name and location of the store, warehouse, or other place where the products are located; (f) the particular quality or condition concerning which inspection is requested, to which may be added the time and place at which it is desired that the inspection be made; (g) when the lot is to be inspected in a receiving market, the name and address of the receiver; (h) the name of the shipping point and of the destination, when known; and (i) such other information as may be necessary for identification of the product, or as may be required by the inspector or the Administrator.

§ 51.9 *Filing of application.* An application shall be deemed filed when received at the office of inspection nearest the place where the commodity is located. A record showing the date and time of filing shall be made and kept in such office.

§ 51.10 *When application may be rejected.* An application may be rejected by the inspector in charge of the appropriate office of inspection for failure of the applicant (a) to observe the regulations in this part, (b) to furnish necessary information or to make the commodity reasonably available or accessible for inspection, or (c) when it appears that to perform the inspection and certification service would not be to the best interests of the Government. Such applicant shall be notified promptly of the reason for such rejection.

§ 51.11 *When application may be withdrawn.* An application may be withdrawn by the applicant at any time before the inspection is performed: *Provided,* That the applicant shall pay any travel expenses, telephone, telegraph, or other expenses which have been incurred by the inspection service in connection with such application.

§ 51.12 *Authority to request inspection.* Proof of the interest of an applicant in the product involved, or of the authority of any person applying for inspection in behalf of another may be required, in the discretion of the inspector.

§ 51.13 *Accessibility of products.* The applicant shall cause the products for which inspection is requested to be made reasonably accessible for sampling or inspection and to be so placed as to disclose their quality or condition. Samples of the products drawn for examination shall be inspected only under such conditions as, in the opinion of the inspector, will permit a true and correct determination to be made of their quality or condition.

§ 51.14 *Basis of service.* Inspection and certification service for quality and/or condition shall be based on the appropriate recommended standards promulgated by the United States Department of Agriculture, applicable standards prescribed by the laws of the State where the particular product was produced which are generally recognized and used therein, specifications of any governmental agency, written buyer and seller contract specifications, or any written specification by an applicant which is approved by the Administrator: *Provided,* That, if such product is regulated under the Agricultural Marketing Agreement Act of 1937, as amended (61 Stat. 208, 707; 7 U. S. C. 601 et seq.) such inspection and certification shall be on the basis of the standards, if any, prescribed in, or pursuant to, the marketing order and/or agreement effective thereunder.

§ 51.15 *Order of inspection.* Inspection shall, insofar as practicable, be made in the order in which applications are received, except that precedence shall be given (a) to the inspection of lots involved in complaints filed pursuant to the Perishable Agricultural Commodities Act, 1930 (7 U. S. C. 499a et seq.), and (b) to appeal inspections. Precedence may also be given to applications made on behalf of the Federal Government or of a State Government.

§ 51.16 *Financial interest of inspector.* No inspector shall inspect any products in which he is financially interested, either directly or indirectly.

§ 51.17 *Postponing inspection.* If the inspector has reason to believe that, because of latent defects due to climatic or other conditions, he is unable to determine the true quality or condition of the product, he shall postpone examination

for such period as may, in his judgment, be reasonably necessary to enable him to determine its true quality or condition.

§ 51.18 *Official sampling.* Samples may be officially drawn by any duly authorized inspector and delivered, or shipped, for analysis and certification to the nearest designated market or to such market as shall be directed by the Administrator. The container in which such samples are delivered, or shipped, shall contain a statement, signed by the inspector who drew the samples, showing the time and place of the sampling and the brands or other identifying marks of the containers from which the samples were drawn. The certificate based on such samples shall show the time and place of drawing the samples, and the name of the inspector by whom they were drawn.

§ 51.19 *Certificate form.* Certificates shall be issued on forms approved by the Administrator: *Provided*, That when an application for inspection is made by any person for the purpose of determining whether food products for use by such applicant comply with contract specifications therefor, a formal certificate need not be issued, but the fact of such compliance or noncompliance may be indicated by appropriate stamp or mark on such products or the containers thereof, or otherwise, in the discretion of the inspector.

§ 51.20 *Certificates, issuance.* The inspector shall sign and issue a separate certificate for each lot inspected by him, except that when an application covers a number of lots a single certificate may be issued to cover all such lots.

§ 51.21 *Certificates, disposition.* The original certificate, and not to exceed four copies (if requested by applicant prior to issuance), shall be delivered or mailed promptly to the applicant or to a person designated by him. One copy shall be filed in the office of the inspector when the inspection is made by a Federal Government employee, otherwise it shall be filed in the appropriate office of the cooperating State Agency. One copy shall be forwarded to the Administrator to be kept on file in Washington, except that copies of certificates showing the grades of individual grower's lots offered for manufacturing or other purposes need not be so forwarded. In the case of any product covered by a marketing agreement and/or order effective under the Agricultural Marketing Agreement Act of 1937, as amended (61 Stat. 208, 707; 7 U. S. C. 601 et seq.), at least one copy of each certificate covering the inspection of such product shall, on request, be delivered to the administrative agency established thereunder, subject to such terms and conditions as the Secretary may prescribe. Copies will be furnished to other interested parties as outlined in § 51.42.

§ 51.22 *Advance information.* Upon request of an applicant, all or any part of the contents of a certificate covering an inspection requested by him may be telegraphed or telephoned to him, or to any person designated by him, at his expense. If the application for such information is received after the certificate has been issued, it will be considered as an application for an extra copy of the certificate, and the fees prescribed in § 51.42 shall apply.

APPEAL INSPECTION

§ 51.23 *When appeal may be taken.* An application for appeal inspection may be made whenever any financially interested person is dissatisfied with the determination stated in the original certificate.

§ 51.24 *How to obtain.* An appeal inspection may be obtained by the applicant, or other person financially interested in the product, by filing a request (a) with the inspection office nearest the point where the product is located, or (b) with the inspector who made the original inspection, or (c) with any district supervisory inspection office, or (d) with the Administrator. The application for appeal shall state the reasons therefor, and shall be accompanied by a copy of any previous inspection certificate or inspection report, and any other information which the applicant received regarding the quality or condition of the product at the time of the original inspection. Such application may be made orally or in writing, or by telegraph or telephone. If made orally or by telephone, the application shall be confirmed in writing.

§ 51.25 *Record of filing time.* A record showing the date and time of filing an application shall be made promptly by the receiving office.

§ 51.26 *When appeal inspection may be refused.* An application for an appeal inspection may be refused if, (a) the reasons for the appeal inspection are frivolous or not substantial; (b) the quality or condition of the product has undergone a material change since the inspection covering the product on which the appeal inspection is requested; (c) the lot in question is not, or cannot be, made accessible for inspection; (d) the lot relative to which appeal inspection is requested cannot be identified positively by the inspector as the lot which was previously inspected; or (e) there is noncompliance with the regulations in this part. Such an applicant shall be notified promptly of the reason for the refusal.

§ 51.27 *When an application for an appeal inspection may be withdrawn.* An application for appeal inspection may be withdrawn by the applicant at any time before the appeal inspection is performed: *Provided*, That the applicant shall pay any travel expenses, telephone, telegraph, or other expenses which have been incurred by the inspection service in connection with such application.

§ 51.28 *Order in which made.* Appeal inspections shall be made, insofar as practicable, at the time requested by applicant and in the order in which applications are received. They shall take precedence over all other pending applications, except inspections covering lots involved in complaints filed pursuant to the Perishable Agricultural Commodities Act, 1930 (7 U. S. C. 499a et seq.).

§ 51.29 *Who shall make appeal inspections.* Appeal inspections shall be made by an inspector or inspectors designated therefor by the Administrator.

§ 51.30 *Appeal findings.* The inspector or inspectors making an appeal inspection shall sign and issue an appeal inspection certificate, which shall supersede and refer specifically to the original inspection certificate from which the appeal was taken, and contain a statement as to the quality or condition of the product, as determined by the appeal inspection. In all other respects the provisions of §§ 51.5 to 51.22, insofar as applicable, shall apply to appeal inspection certificates, except that if the applicant for appeal inspection is not the original applicant, a copy of the appeal inspection certificate shall be mailed to the original applicant.

§ 51.31 *Superseded certificates.* When an original inspection certificate shall have been superseded by an appeal inspection certificate, such original inspection certificate shall not thereafter represent the quality or condition of the product described therein. If the original and all copies of the superseded certificate are not submitted to the person receiving the application for appeal inspection, the officer issuing the superseding certificate shall forward notice of such issuance and of the superseding of the original certificate to such persons as he considers necessary to prevent fraudulent use of the superseded certificate.

LICENSED INSPECTORS

§ 51.32 *Who may be licensed.* Persons possessing adequate qualifications, as determined by such examinations as the Administrator may consider to be appropriate, may be licensed by the Secretary as inspectors of products which may be inspected under the regulations in this part. Such licenses shall bear the printed signature of the Secretary and shall be countersigned by an authorized employee of the Department. A licensed inspector shall perform his duties pursuant to these regulations as directed by the Administrator.

§ 51.33 *Application to become a licensed inspector.* Application to become a licensed inspector shall be made to the Administrator on forms furnished for that purpose. Each such application shall be filled in and signed by the applicant in his own handwriting, and the application shall contain or be accompanied by:

(a) A statement of present address, age, height and weight of the applicant;

(b) A statement showing education and present and previous occupations, together with names of all employers for whom he has worked, with periods of service, during the last 5 years previous to the date of his application;

(c) A statement by the applicant that he agrees to comply with all the terms and conditions of the regulations in this part relating to the duties of inspectors; and

(d) Such other information as may be required by the Administrator.

§ 51.34 *Suspension or revocation of license of licensed inspector.* Pending final action by the Secretary, the Administrator may, whenever he deems such action necessary, suspend the license of any licensed inspector issued pursuant to the regulations in this part by giving notice of such suspension to the respective licensee, accompanied by a statement of the reasons therefor. Within 7 days after the receipt of the aforesaid notice and statement of reasons by such licensee, he may file an appeal, in writing, with the Secretary supported by any argument or evidence that he may wish to offer as to why his license should not be suspended or revoked. After the expiration of the aforesaid 7 day period and consideration of such argument and evidence, the Secretary shall take such action as he deems appropriate with respect to such suspension or revocation.

§ 51.35 *Surrender of license.* Upon termination of his services as a licensed inspector, or suspension or revocation of his license, a licensee shall surrender his license immediately to the office of inspection serving the area in which he is located. These same provisions shall apply in a case of an expired license.

FEES AND CHARGES

§ 51.36 *Amount of fees, rates, and charges.* For each lot of products inspected, a fee, and expenses, determined in accordance with §§ 51.37 to 51.41 shall be paid by the applicant.

§ 51.37 *Basis for charges.* (a) The fee for each lot of products inspected by a salaried inspector acting exclusively for the Department of Agriculture, except for peanuts, pecans, and other nuts, shall be on the following basis: For an inspection covering quality and condition, $9 when the quantity involved is more than one-half of a carload of the customary size for such products in the area from which shipped but not more than a full carload, and $6 when the quantity involved is not more than one-half of such carload, but the maximum fee for any carload not exceeding the customary size shall be $18. For an inspection covering condition only, $7.20 when the quantity involved is more than one-half of carload of the customary size for such products in the area from which shipped but not more than a full carload, and $4.80 when the quantity involved is not more than one-half of such carload, but the maximum fee for condition only inspection of any carload not exceeding the customary size shall be $14.40.

(b) For each lot of peanuts, pecans, or other nuts inspected, except pursuant to the provisions in § 51.19, the fee shall be $12 when the quantity involved is not more than a full carload: *Provided*, That the different grades and varieties of peanuts shall be considered separate lots, and the fee for farmer stock peanuts (unshelled peanuts) shall be $1.50 per ton.

(c) When any lot involved is in excess of a carload the quantity shall be calculated in terms of carloads and fractions thereof of the customary size for such carloads and the carload rates aforesaid applied: *Provided*, That said fractions shall be calculated in terms of fourths or next higher fourths. When inspections are made on which formal certificates are not issued, as provided in § 51.19, or when the products inspected cannot readily be calculated in terms of carlots, or when the services rendered are such that a charge on the carlot basis would be inadequate or inequitable, charges for inspection may be based on the time consumed by the inspector in connection with such inspections, computed at the rate of $3.60 per hour, or the charges may be based upon the number of pounds or number of containers in the lot inspected, if such charges are in substantial conformity with the hourly or carload rate.

§ 51.38 *Fees for inspections by licensee who is working under contract with the Administrator.* The Administrator may enter into a contract with any licensed inspector authorizing him to make inspections under the act in a designated area; to collect fees for such inspections at rates prescribed in the contract; and direct him to transmit such fees, less a designated percentage which he may retain as compensation for his services in making such inspections, to the Production and Marketing Administration at such times and in such manner as the contract shall provide.

§ 51.39 *Fees under cooperative agreement.* Fees for inspections made under cooperative agreements pursuant to authority contained in any act of Congress shall be those provided for by such agreements.

§ 51.40 *Fees for appeal inspections.* Fees for appeal inspections on all products shall be double those for original inspections, except that when it is found that there was a material error in the determination based upon the original inspection no fee will be charged, and except that appeal inspection for Government agencies shall be on the hourly basis prescribed in § 51.47, plus traveling and other expenses authorized to be charged by the provisions in § 51.41. The maximum fee for the appeal inspection of a single car shall not exceed $24.

§ 51.41 *Traveling, and other expenses.* Such further charges may be made for traveling expenses and other items paid or incurred by the Production and Marketing Administration in connection with an inspection made at a place where no inspector is located, or appeal inspection where the services of a second inspector are required, as will reimburse the Production and Marketing Administration. These charges shall be included with the fee for inspection on the bill furnished the applicant.

§ 51.42 *Fees for additional copies of inspection certificates.* Additional copies of any inspection certificate other than those provided for in § 51.21, may be supplied to any interested party upon payment of a fee of $1.50 for each set of 3, or less, copies.

§ 51.43 *Charges for inspection services on a contract basis.* Irrespective of fees and charges prescribed in foregoing sections, the Administrator may enter into contracts with applicants to perform inspection services pursuant to the regulations in this part and other requirements as prescribed by the Administrator in such contract, and the charges for such inspection services provided for in such contracts shall be on such bases as will reimburse the Production and Marketing Administration of the Department for the full cost of rendering such inspection service, including an appropriate overhead charge to cover, as closely as practicable, administrative overhead expenses, as may be determined by the Administrator.

§ 51.44 *How fees shall be paid.* Fees shall be paid by the applicant in accordance with the directions on the fee bill furnished him by the inspector, and in advance, if required by the inspector.

§ 51.45 *Disposition of fees.* (a) The fees covered by §§ 51.37 to 51.39 shall be disposed of as follows:

(1) Fees for inspections made by salaried inspectors acting exclusively for the Production and Marketing Administration shall be remitted promptly to the Administrator.

(2) Fees for inspections made by a licensed inspector acting exclusively for the Production and Marketing Administration, less the percentage thereof which he is allowed by the terms of his contract of employment as compensation for his services, shall be remitted to the Production and Marketing Administration.

(3) Fees for inspections made by an inspector acting under a cooperative agreement with a State or other organizations shall be disposed of in accordance with the terms of such agreement. Such portion of the fees collected under a cooperative agreement with a State as may be due the United States shall be remitted to the Production and Marketing Administration.

(b) Fees covered by §§ 51.40 to 51.43 shall be remitted to the Production and Marketing Administration.

MISCELLANEOUS

§ 51.46 *Fraud or misrepresentation.* Any wilful misrepresentation or any deceptive or fraudulent practice found to be made or committed by any person in connection with: (a) The making or filing of an application for any inspection service; (b) the making the product accessible for sampling or inspection; (c) the use of any inspection report or any inspection certificate, or appeal inspection certificate issued under the regulations in this part; (d) the use of a facsimile form which simulates, in whole or in part, any official certificate authorized to be issued under these regulations in this part for the purpose of purporting to evidence the U. S. grade of any product; or (e) any wilful violation of the regulations in this part, or supplementary rules or instructions issued by the Administrator, may be deemed sufficient cause for debarring such person from any or all benefits of the act.

§ 51.47 *Political activity.* All inspectors are forbidden, during the period of their respective appointments or licenses, to take an active part in political management or in political campaigns. Political activities in city, county, State, or national elections, whether primary or regular, or in behalf of any party or can-

didate, or any measure to be voted upon, are prohibited. This applies to all appointees or licensees, including, but not limited to, temporary and cooperative employees and employees on leave of absence, with or without pay. Willful violations of this section will constitute grounds for dismissal in the case of appointees and revocation of licenses in the case of licensees.

§ 51.48 *Interfering with an inspector.* Any further benefits of the act may be denied any applicant or other interested party who, either personally or through an agent or representative, interferes with or obstructs, by intimidation, threats, assault, or in any other manner, an inspector in the performance of his duties.

§ 51.49 *Compliance with other laws.* None of the requirements in the regulations of this part shall excuse failure to comply with any Federal, State, county, or municipal laws applicable to products covered in the regulations in this part.

§ 51.50 *Identification.* Each inspector shall have in his possession at all times, and present upon request, while on duty, the means of identification furnished by the Department to such person.

§ 51.51 *Publication.* Publication under the act and in this part shall be made in the FEDERAL REGISTER, the Service and Regulatory Announcements of the Department, and such other media as the Administrator may approve for the purpose.

## SUBPART—UNITED STATES STANDARDS FOR APPLES

### GRADES

§ 51.300 *U. S. Extra Fancy.* U. S. Extra Fancy consists of apples of one variety which are mature, but not overripe, carefully hand-picked, clean, well formed; free from decay, internal browning, internal breakdown, scald, scab, bitter pit, Jonathan spot, freezing injury, broken skins and bruises (except those that are slight and incident to proper handling and packing), and visible water core. The apples shall also be free from injury caused by russeting, sunburn or spray burn, limb rubs, hail, drought spots, scars, stem or calyx cracks, other diseases, insects, or mechanical or other means. Each apple of this grade shall have the amount of color specified in § 51.308 for the variety. (See §§ 51.308, 51.310, and 51.313.)

§ 51.301 *U. S. Fancy.* U. S. Fancy consists of apples of one variety which are mature but not overripe, carefully handpicked, clean, fairly well formed; free from decay, internal browning, internal breakdown, bitter pit, Jonathan spot, scald, freezing injury, broken skins and bruises (except those incident to proper handling and packing), and visible water core. The apples shall also be free from damage caused by russeting, sunburn or spray burn, limb rubs, hail, drought spots, scars, stem or calyx cracks, other diseases, insects, or mechanical or other means. Each apple of this grade shall have the amount of color specified in § 51.308 for the variety. (See §§ 51.308, 51.310, and 51.313.)

§ 51.302 *U. S. No. 1.* The requirements for this grade are the same as U. S. Fancy except for color and russeting. In this grade less color is required for all varieties except yellow and green varieties, for which the requirements for both grades are the same. Apples of this grade shall be free from excessive damage caused by russeting which means that they shall meet the russeting requirements for U. S. Fancy as defined under the definitions of "damage by russeting": *Provided*, That, the aggregate area of an apple which may be covered by smooth net-like russeting shall not exceed 25 percent: *And further provided*, That, the aggregate area of an apple which may be covered by smooth solid russeting shall not exceed 10 percent. (See §§ 51.308, 51.310, and 51.313.)

§ 51.303 *U. S. No. 1 Cookers.* U. S. No. 1 Cookers consists of apples of one variety which meet the requirements of U. S. No. 1 grade except as to color. This grade is provided for apples which are mature but which may not have sufficient color to meet the specifications of U. S. No. 1. (See §§ 51.310 and 51.313.)

§ 51.304 *U. S. No. 1 Early.* U. S. No. 1 Early consists of apples of one variety which meet the requirements of U. S. No. 1 grade except as to color, maturity and size. Apples of this grade have no color requirements, need not be mature, and shall be not less than 2 inches in diameter. This grade is provided for varieties such as Duchess, Gravenstein, Red June, Twenty Ounce, Wealthy, Williams, Yellow Transparent, and Lodi, or other varieties which are normally marketed during the summer months. (See §§ 51.310 and 51.313.)

§ 51.305 *U. S. Utility.* U. S. Utility consists of apples of one variety which are mature but not overripe, carefully handpicked, not seriously deformed; free from decay, internal browning, internal breakdown, scald and freezing injury. The apples shall also be free from serious damage caused by dirt or other foreign matter, broken skins, bruises, russeting, sunburn, spray burn, limb rubs, hail, drought spots, scars, stem or calyx cracks, visible water core, other diseases, insects, or mechanical or other means. (See §§ 51.310 and 51.313.)

§ 51.306 *Combination grades.* (a) Combinations of the above grades can be used as follows:

Combination U. S. Extra Fancy and U. S. Fancy.

Combination U. S. Fancy and U. S. No. 1.

Combination U. S. No. 1 and U. S. Utility.

(b) Combinations other than these are not permitted in connection with the United States apple grades. When Combination U. S. Extra Fancy and U. S. Fancy is packed, at least 25 percent of the apples in any lot shall meet the requirements of the higher grade in the combination. When Combination U. S. Fancy and U. S. No. 1 or Combination U. S. No. 1 and U. S. Utility are packed, at least 50 percent of the apples in any lot shall meet the requirements of the higher grade in the combination. (See §§ 51.308, 51.310 and 51.313.)

§ 51.307 *U. S. Hail grade.* U. S. Hail grade consists of apples which meet the requirements of U. S. No. 1 grade except that hail marks where the skin has not been broken and well healed hail marks where the skin has been broken shall be permitted, provided the apples are fairly well formed. (See §§ 51.308, 51.310, and 51.313.)

### COLOR

§ 51.308 *Color requirements.* In addition to the requirements specified for the grades set forth in §§ 51.300 to 51.307, apples of these grades shall have the percentage of color specified for the variety in Table I appearing in this section. For the solid red varieties the percentage stated refers to the area of the surface which must be covered with a good shade of solid red characteristic of the variety: *Provided*, That, an apple having color of a lighter shade of solid red or striped red than that considered as a good shade of red characteristic of the variety may be admitted to a grade, provided it has sufficient additional area covered so that the apple has as good an appearance as one with the minimum percentage of good red characteristic of the variety required for the grade. For the striped red varieties the percentage stated refers to the area of the surface in which the stripes of good shade of red characteristic of the variety shall predominate over stripes of lighter red, green, or yellow. However, an apple having color of a lighter shade than that considered as a good shade of red characteristic of the variety may be admitted to a grade: *Provided*, That, it has sufficient additional area covered so that the apple has as good an appearance as one with the minimum percentage of stripes of a good red characteristic of the variety required for the grade. Faded brown stripes shall not be considered as color except in the case of the Gray Baldwin variety.

TABLE I—COLOR REQUIREMENTS FOR SPECIFIED U. S. GRADES OF APPLES, BY VARIETIES

| Variety | U. S. Extra Fancy | U. S. Fancy | U. S. No. 1 |
|---|---|---|---|
| Solid Red: | *Percent* | *Percent* | *Percent* |
| Black Ben | 75 | 50 | [2] |
| Gano | 75 | 50 | [2] |
| Winesap | 75 | 50 | [2] |
| Other similar varieties [1] | 75 | 50 | [2] |
| Red Sport varieties [3] | 75 | 50 | [2] |
| Striped or partially red: | | | |
| Cortland | 66 | 33 | [2] |
| Jonathan | 66 | 33 | [2] |
| McIntosh | 66 | 33 | [2] |
| Other similar varieties [4] | 66 | 33 | [2] |
| Baldwin | 50 | 25 | [2] |
| Ben Davis | 50 | 25 | [2] |
| Delicious | 50 | 25 | [2] |
| Mammoth Black Twig | 50 | 25 | [2] |
| Northern Spy | 50 | 25 | [2] |
| Rome Beauty | 50 | 25 | [2] |
| Stayman | 50 | 25 | [2] |
| Tinley | 50 | 25 | [2] |
| Waggener | 50 | 25 | [2] |
| Wealthy | 50 | 25 | [2] |
| Willow Twig | 50 | 25 | [2] |
| York Imperial | 50 | 25 | [2] |
| Other similar varieties [4] | 50 | 25 | [2] |
| Hubbardston | 50 | 15 | [2] |
| Stark | 50 | 15 | [2] |
| Other similar varieties | 50 | 15 | [2] |

[1] Arkansas Black, Beacon, Detroit Red, Esopus Spitzenburg, King David, Lowry, Minjon.

[2] When Red Sport varieties are specified as such they shall meet the color requirements specified for Red Sport varieties.

[3] Haralson, Kendall, Macoun, Melba, Snow (Fameuse).

[4] Bonum, Early McIntosh, Limbertwig, Milton, Nero, Paragon.

TABLE I—COLOR REQUIREMENTS FOR SPECIFIED U. S. GRADES OF APPLES, BY VARIETIES—Con.

| Variety | U. S. Extra Fancy | U. S. Fancy | U. S. No. 1 |
|---|---|---|---|
| Striped or partially red—Con. | *Percent* | *Percent* | *Percent* |
| Red June | 50 | 15 | [2] |
| Williams | 50 | 15 | [2] |
| Other similar varieties | 50 | 15 | [2] |
| Gravenstein | 25 | 10 | [2] |
| Other similar varieties [5] | 25 | 10 | [2] |
| Red checked or blushed: | | | |
| Maiden Blush | [7] | [8] | [8] |
| Twenty Ounce | [7] | [8] | [8] |
| Winter Banana | [7] | [8] | [8] |
| Other similar varieties | [7] | [8] | [8] |
| Green varieties | [8] | [8] | [8] |
| Yellow varieties | [8] | [8] | [8] |
| Golden Delicious | [10] | [10] | [10] |

[5] Tinge of color.

[6] Duchess, Red Astrachan, Smokehouse, Summer Rambo.

[7] Blush cheek.

[8] None.

[9] Characteristic ground color.

[10] 75 percent characteristic color. NOTE "Characteristic color", when the white around the lenticels predominates over the green color, creating a mottling effect on the surface of the apple, it shall be considered as the minimum characteristic color.

### UNCLASSIFIED

§ 51.309 *Unclassified.* Unclassified consists of apples which are not graded in conformity with any of the foregoing grades. The term "unclassified" is not a grade within the meaning of these standards but is provided as a designation to show that no definite grade has been applied to the lot.

### TOLERANCES

§ 51.310 *Tolerances.* (a) In order to allow for variations incident to proper grading and handling, not more than a total of 10 percent of the apples in any lot may fail to meet the requirements of the grade: *Provided*, That, not more than one-half of this amount, or 5 percent, shall be allowed for apples which are seriously damaged by insects and including not more than 1 percent for apples affected by decay or internal breakdown or both.

(b) When applying the foregoing tolerances to Combination U. S. Extra Fancy and U. S. Fancy grade, no part of any tolerance shall be allowed to reduce, for the lot as a whole, the 25 percent of apples of the higher grade required in the combination, but individual containers shall have not less than 15 percent of the higher grade.

(c) When applying the foregoing tolerances to Combination U. S. Fancy and U. S. No. 1 grade and to Combination U. S. No. 1 and U. S. Utility grade, no part of any tolerance shall be allowed to reduce, for the lot as a whole, the 50 percent of apples of the higher grade required in the combination, but individual containers shall have not less than 40 percent of the higher grade.

§ 51.311 *Application of tolerances to individual packages.* The contents of individual packages in the lot, based on sample inspection, are subject to the following limitations, provided the averages for the entire lot are within the tolerances specified for the grade:

(a) For packages which contain more than 10 pounds, and a tolerance of 10 percent or more is provided (as in the case of size, where a tolerance of 15 percent is provided) individual packages in any lot shall have not more than one and one-half times the tolerance specified. For packages which contain more than 10 pounds and a tolerance of less than 10 percent is provided, individual packages in any lot shall have not more than double the tolerance specified, except that at least one apple which is seriously damaged by insects or affected by decay or internal breakdown may be permitted in any package.

(b) For packages which contain 10 pounds or less, individual packages in any lot are not restricted as to the percentage of defects: *Provided*, That, not more than one apple which is seriously damaged by insects or affected by decay or internal breakdown may be permitted in any package.

§ 51.312 *Basis of calculating percentages.* (a) When the numerical count is marked on the container, percentages shall be calculated on the basis of count.

(b) When the minimum diameter or minimum and maximum diameters are marked on the container, percentages shall be calculated on the basis of weight.

(c) When the apples are in bulk, percentages shall be calculated on the basis of weight.

### CONDITION

§ 51.313 *Condition after storage or transit.* Decay, scald, or any other deterioration which may have developed on apples after they have been in storage or transit shall be considered as affecting condition and not the grade.

### SIZE

§ 51.314 *Size requirements.* The numerical count or the minimum diameter of the apples packed in a closed container shall be indicated on the container.

(b) When the numerical count is marked on the container the minimum size of the largest apple shall be not more than one-fourth inch larger than the minimum size of the smallest apple.

(c) When the numerical count is not shown the minimum diameter shall be plainly stamped, stenciled, or otherwise marked on the container in terms of whole inches, whole and half inches, whole and quarter inches, or whole and eighth inches, as 2½ inches minimum, 2¼ inches minimum, or 2⅝ inches minimum, in accordance with the facts. It is suggested that both minimum and maximum diameters be marked on the container, as 2¼ to 2¾ inches, or 2½ to 2¾ inches, as such marking is especially desirable for apples marketed in the export trade.

(d) The measurement for minimum size shall be the largest diameter of the apple taken at right angles to a line from the stem end to the blossom end. The measurement for maximum size shall be the smallest dimension of the apple determined by passing the apple through a round opening.

(e) In order to allow for variations incident to proper sizing, not more than 5 percent of the apples in any lot may not meet the size requirements: *Provided*, That, when the maximum and minimum sizes are both stated, an additional 10 percent tolerance shall be allowed for apples which are larger than the maximum size stated.

### PACKING AND MARKING

§ 51.315 *Packing requirements.*—(a) *Representative face packing.* Each package shall be packed so that the apples on the shown face shall be reasonably representative in size, color and quality of the contents of the package.

(b) *Boxes.* (1) Apples packed in the standard northwestern apple boxes shall be arranged in the containers according to the approved and recognized methods with the stems pointing toward the ends of the boxes, except when jumbled. All packages shall be well filled but not to the extent as to cause excessive or unnecessary bruising to the apples because of overfilled packages. Apples packed in the standard northwestern apple boxes shall be tightly packed with sufficient bulge to prevent any appreciable movement of the apples within the containers when lidded. Each wrapped apple shall be completely enclosed by its individual wrapper.

(2) Apples packed in other type boxes, such as nailed wooden boxes, wire-bound boxes, and fibreboard boxes, may be place packed, jumble packed faced, or jumble packed, and all packs shall be well filled.

(3) Apples packed in boxes equipped with cell compartments or molded trays shall be of the proper size for the cells or the molds in which they are packed.

(4) Apples packed in consumer unit cartons and packed into shipping containers shall completely fill the shipping container.

(c) *Baskets.* Apples packed in U. S. standard bushel baskets, one-half bushel baskets and five-eighths bushel baskets may be ring faced and shall be tightly packed with sufficient bulge to prevent any appreciable movement of the apples within the containers when lidded.

(d) *Barrels.* Apples packed in barrels shall be tightly packed.

(e) *Tolerances.* In order to allow for variations incident to proper packing, not more than 5 percent of the containers in any lot may not meet these requirements.

§ 51.316 *Suggestions for marking containers.* (a) In order to conserve space, abbreviations may be used for marking United States grade names on containers. The following abbreviations are suggested where it is not desired to use the full grade name:

(1) U. S. Ex. Fcy. for U. S. Extra Fancy.

(2) U. S. Fcy. for U. S. Fancy.

(3) U. S. No. 1 for U. S. No. 1.

(4) U. S. Util. for U. S. Utility.

(5) Combination grades may be designated by abbreviations of the grades preceded by the abbreviation "Comb.", as "Comb. U. S. Fcy.-U. S. No. 1".

### STANDARDS FOR EXPORT

§ 51.317 *Standards for export, as applied to condition factors.* (a) The apples in any lot shall be generally tightly packed when in barrels or

baskets, and generally fairly tightly or tightly packed, when in boxes.

(b) Not more than 5 percent of the apples in any lot shall be further advanced in maturity than firm ripe.

(c) Not more than 5 percent of the apples in any lot shall be damaged by storage scab.

(d) Not more than a total of 5 percent of the apples in any lot shall be damaged by bitter pit, Jonathan spot, scald, internal breakdown, water core, freezing, decay, or other such condition factors: *Provided*, That,

(1) Not more than 2 percent shall be allowed for apples affected by decay;

(2) Not more than 2 percent shall be allowed for damage by internal breakdown;

(3) Not more than 2 percent of slight scald shall be permitted for apples properly packed in oiled paper or which have been especially treated with oil to prevent scald; otherwise, the apples must be free from scald.

(e) Any lot of apples shall be considered as meeting the standards for export if the entire lot averages within the requirements specified: *Provided*, That, no sample from the containers in any lot is found to exceed double the percentages specified.

DEFINITIONS

§ 51.318 *Mature.* "Mature" means that the apples have reached the stage of growth which will insure the proper completion of the ripening process. Before a mature apple becomes overripe it will show varying degrees of firmness, depending upon the stage of the ripening process. The following terms are used for describing these different stages of firmness of apples:

(a) "Hard" means apples with a tenacious flesh and starchy flavor. Apples at this stage are suitable for storage and long-distance shipment.

(b) "Firm" means apples with a tenacious flesh but which are becoming crisp with a slight starchy flavor, except the Delicious variety. Apples at this stage are also suitable for storage and long-distance shipment.

(c) "Firm ripe" means apples with crisp flesh except that the flesh of the apples of the Gano, Ben Davis, and Rome Beauty varieties may be slightly mealy. Apples at this stage may be shipped long distances but should be moved into consumption within a short period of time.

(d) "Ripe" means apples with mealy flesh and soon to become soft for the variety. Apples at this stage should be moved immediately into consumption.

§ 51.319 *Overripe.* "Overripe" means apples which are dead ripe, with flesh very mealy or soft, and past commercial utility.

§ 51.320 *Carefully hand-picked.* "Carefully hand-picked" means that the apples do not show evidence of rough handling or of having been on the ground.

§ 51.321 *Clean.* "Clean" means that the apples are free from excessive dirt, dust, spray residue and other foreign material.

§ 51.322 *Well formed.* "Well formed" means that the apple has the normal shape characteristic of the variety, except that the shape may be slightly irregular, provided, it does not detract from the general appearance of the apple.

§ 51.323 *Injury.* "Injury" means any defect which more than slightly affects the appearance, or the edible or shipping quality of the apples.

(a) Russeting in the stem cavity or calyx basin which cannot be seen when the apple is placed stem end or calyx end down on a flat surface, shall not be considered in determining whether or not an apple is injured by russeting, except that rough or bark-like russeting in the stem cavity or calyx basin shall be considered as injury when the appearance of the apple is materially affected. The following types and amounts of russeting outside of the stem cavity or calyx basin, shall be considered as injury:

(1) Smooth net-like russeting, when an aggregate area of more than 5 percent of the surface is covered, and the color of the russeting shows no very pronounced contrast with the background color of the apple, or lesser amounts of more conspicuous net-like russeting when the appearance is affected to a greater extent than the above amount permitted.

(2) Smooth, solid russeting which covers an aggregate area of more than one-half inch in diameter, and the pattern and color of the russeting shows no very pronounced contrast with the background color of the apple, or lesser amounts of more conspicuous solid russeting when the appearance is affected to a greater extent than the above amount permitted.[1]

(3) Slightly rough russeting which covers an aggregate area of more than one-fourth inch in diameter.[1]

(4) Rough russeting, unless it is well within the stem cavity or calyx basin and is not readily apparent.

(b) Any one of the following defects, or any combination thereof, the seriousness of which exceeds the maximum allowed for any one defect, shall be considered as injury:

(1) Sunburn or spray burn, when the discolored area does not blend into the normal color of the fruit.

(2) Dark brown or black limb rubs which affect a total area of more than one-eighth inch in diameter, except that light brown limb rubs of a russet character shall be considered under the definition of injury by russeting.[1]

(3) Hail marks, drought spots or other similar depressions or scars where there is appreciable discoloration other than russeting, or when the indentations are not superficial, or when an individual indentation exceeds one-eighth inch in diameter, or the total affected area exceeds one-fourth inch in diameter.[1]

(4) Stem or calyx cracks which are not well healed, or well healed stem or calyx cracks which exceed a length of one-eighth inch.

(5) Diseases: (i) Cedar rust infection which affects a total area of more than one-eighth inch in diameter.[1]

(ii) Sooty blotch or fly speck which is thinly scattered over more than 5 percent of the surface, or dark, heavily concentrated spots which affect an area of more than one-fourth inch in diameter.[1]

(iii) Red skin spots which are thinly scattered over more than one-tenth of the surface, or dark, heavily concentrated spots which affect an area of more than one-fourth inch in diameter.[1]

(6) Insects: (i) Any healed sting or healed stings which affect a total area of more than one-eighth inch in diameter including any encircling discolored rings.[1]

(ii) Worm holes.

§ 51.324 *Fairly well formed.* "Fairly well formed" means that the apple may be slightly abnormal in shape but not to an extent which detracts materially from its appearance.

§ 51.325 *Damage.* "Damage" means any defect which materially affects the appearance, or the edible or shipping quality of the apples.

(a) Russeting in the stem cavity or calyx basin which cannot be seen when the apple is placed stem end or calyx end down on a flat surface shall not be considered in determining whether or not an apple is damaged by russeting, except that excessively rough or bark-like russeting in the stem cavity or calyx basin shall be considered as damage when the appearance of the apple is materially affected. The following types and amounts of russeting outside of the stem cavity or calyx basin, shall be considered as damage:

(1) Russeting which is excessively rough on Roxbury Russet and other similar varieties.

(2) Smooth net-like russeting, when an aggregate area of more than 15 percent of the surface is covered, and the color of the russeting shows no very pronounced contrast with the background color of the apple, or lesser amounts of more conspicuous net-like russeting when the appearance is affected to a greater extent than the above amount permitted.

(3) Smooth solid russeting, when an aggregate area of more than 5 percent of the surface is covered, and the pattern and color of the russeting shows no very pronounced contrast with the background color of the apple, or lesser amounts of more conspicuous solid russeting when the appearance is affected to a greater extent than the above amount permitted.

(4) Slightly rough russeting which covers an aggregate area of more than one-half inch in diameter.[1]

(5) Rough russeting which exceeds one-fourth inch in diameter, unless it is well within the stem cavity or calyx basin and is not readily apparent.[1]

(b) Any one of the following defects, or any combination thereof, the seriousness of which exceeds the maximum allowed for any one defect, shall be considered as damage:

[1] The area refers to that of a circle of the specified diameter.

(1) Sunburn or spray burn which has caused blistering or cracking of the skin, or when the discolored area does not blend into the normal color of the fruit unless the injury can be classed as russeting.

(2) Limb rubs which affect a total area of more than one-half inch in diameter, except that light brown limb rubs of a russet character shall be considered under the definition of damage by russeting.[1]

(3) Hail marks, drought spots, or other similar depressions or scars which are not superficial, or when such injury affects a total area of more than one-half inch in diameter.[1]

(4) Stem or calyx cracks which are not well healed, or well healed stem or calyx cracks which exceed an aggregate length of one-fourth inch.

(5) Diseases: (i) Scab spots which affect a total area of more than one-fourth inch in diameter.[1]

(ii) Cedar rust infection which affects a total area of more than one-fourth inch in diameter.[1]

(iii) Sooty blotch or fly speck which is thinly scattered over more than one-tenth of the surface, or dark, heavily concentrated spots which affect an area of more than one-half inch in diameter.[1]

(iv) Red skin spots which are thinly scattered over more than one-tenth of the surface, or dark, heavily concentrated spots which affect an area of more than one-half inch in diameter.[1]

(6) Insects: (i) Any healed sting or healed stings which affect a total area of more than three-sixteenths inch in diameter including any encircling discolored rings.[1]

(ii) Worm holes.

§ 51.326 *Seriously deformed.* "Seriously deformed" means that the apple is so badly misshapen that its appearance is seriously affected.

§ 51.327 *Serious damage.* "Serious damage" means any defect which seriously affects the appearance, or the edible or shipping quality of the apples.

(a) The following types and amounts of russeting shall be considered as serious damage:

(1) Smooth solid russeting, when more than one-half of the surface in the aggregate is covered, including any russeting in the stem cavity or calyx basin or slightly rough, or excessively rough or bark-like russeting which detracts from the appearance of the fruit to a greater extent that the amount of smooth solid russeting permitted: *Provided*, That, any amount of russeting shall be permitted on Roxbury Russet and other similar varieties.

(b) Any one of the following defects, or any combination thereof, the seriousness of which exceeds the maximum allowed for any one defect, shall be considered as serious damage:

(1) Sunburn or spray burn which seriously detracts from the appearance of the fruit.

[1] The area refers to that of a circle of the specified diameter.

(2) Limb rubs which affect more than one-tenth of the surface in the aggregate.

(3) Hail marks, drought spots, or scars, if they materially deform or disfigure the fruit, or if such defects affect more than one-tenth of the surface in the aggregate: *Provided*, That, no hail marks which are unhealed shall be permitted and not more than an aggregate area of one-half inch shall be allowed for well-healed hail marks where the skin has been broken.[1]

(4) Stem or calyx cracks which are not well healed, or well healed stem or calyx cracks which exceed an aggregate length of one-half inch.

(5) Visible water core which affects an area of more than one-half inch in diameter.[1]

(6) Diseases: (i) Scab spots which affect a total area of more than three-fourths inch in diameter.[1]

(ii) Cedar rust infection which affects a total area of more than three-fourths inch in diameter.[1]

(iii) Sooty blotch or fly speck which affects more than one-third of the surface.

(iv) Red skin spots which affect more than one-third of the surface.

(v) Bitter pit and Jonathan spot which is thinly scattered over more than one-tenth of the surface and does not materially deform or disfigure the fruit.

(7) Insects: (i) Healed stings which affect a total area of more than one-fourth inch in diameter including any encircling discolored rings.[1]

(ii) Worm holes.

SUBPART—UNITED STATES STANDARDS FOR APPLES FOR PROCESSING

GRADES

§ 51.340 *U. S. No. 1.* U. S. No. 1 shall consist of apples of one variety which are not overripe and which are free from decay, worm holes, freezing injury and internal breakdown. The apples shall also be free from any defect which cannot be removed during the usual commercial preparation for use without causing a loss of over 5 percent, by weight, of the apple in excess of that which would occur if the apple were perfect. (See § 51.343.)

§ 51.341 *U. S. No. 2.* U. S. No. 2 shall consist of apples of one variety which are not overripe and which are free from freezing injury and internal breakdown. The apples shall also be free from any defect which cannot be removed during the usual commercial preparation for use without causing a loss of over 25 percent, by weight, of the apple in excess of that which would occur if the apple were perfect. (See § 51.343.)

CULLS

§ 51.342 *Culls.* Culls shall consist of apples which do not meet the requirements of either of the foregoing grades.

SIZE

§ 51.343 *Size.* The minimum size and range of size may be fixed by agreement between buyer and seller. The measurement for minimum size shall be the largest diameter taken at right angles to a line from stem to blossom end and the measurement for maximum size shall be the smallest diameter taken at right angles to a line from stem to blossom end.

TOLERANCES

§ 51.344 *Tolerances.* In the application of these standards it is contemplated that in most instances sellers will not sort their apples into separate lots of the various grades and sizes before delivery to the buyer, and that the buyer will pay on the basis of the percentage of each grade and size in the lot as determined by inspection. In such cases, there is no need for tolerances. If the contract between buyer and seller provides for the delivery of lots containing only one grade and size, such as "U. S. No. 1—$2\frac{1}{4}$ inches up," "U. S. No. 1—$2\frac{1}{4}$ to $2\frac{1}{2}$ inches," or "U. S. No. 2—$2\frac{1}{4}$ inches up," then unless otherwise specified, a 10 percent tolerance shall be allowed for apples which fail to meet the requirements of the grade upon which the contract is based, and an additional tolerance of 5 percent shall be allowed for apples below any specified minimum size and an additional tolerance of 10 percent shall be permitted for apples above any specified maximum size.

SUBPART—UNITED STATES STANDARDS FOR FRESH SHELLED LIMA BEANS FOR PROCESSING

GRADES

§ 51.355 *U. S. No. 1.* U. S. No. 1 consists of shelled lima beans of similar varietal characteristics which are fairly tender, have a green color and which are free from decay and from injury caused by discoloration, shriveling, sunscald, heating, freezing, disease, insects, or other means.

§ 51.356 *U. S. No. 2.* U. S. No. 2 consists of shelled lima beans which are free from decay, and from damage caused by discoloration, shriveling, sunscald, heating, freezing, disease, insects, or other means.

CULLS; FOREIGN MATERIAL

§ 51.357 *Culls.* Culls are lima beans which fail to meet the requirements of either of the foregoing grades.

§ 51.358 *Foreign material.* Thistle buds, weed seeds, pods or other foreign material are not incorporated in the standards since their presence is not a factor of quality for the purpose of these grades. However, the amount of such foreign material permitted in a lot may be fixed by agreement between grower and processor.

DEFINITIONS

§ 51.359 *Fairly tender.* "Fairly tender" means that the lima beans are not hard, tough, or rubbery.

§ 51.360 *Green color.* "Green color" means that the cotyledons of each bean shall have a green color characteristic of a tender or fairly tender bean for the variety.

§ 51.361 *Injury.* "Injury" means any defect which more than slightly affects the canning or freezing quality. Split or

broken beans incident to proper harvesting and vining operations shall not be considered as injury.

§ 51.362 *Damage.* "Damage" means any defect which materially affects the canning or freezing quality. Split or broken beans incident to proper harvesting and vining operations shall not be considered as damage.

SUBPART—UNITED STATES STANDARDS FOR BUNCHED BEETS

GRADES

§ 51.375 *U. S. No. 1.* U. S. No. 1 consists of beets of similar varietal characteristics which are firm, fairly smooth, fairly well shaped, fairly clean, free from soft rot and from damage caused by growth cracks, disease, rodents, insects or mechanical or other means.

(a) Bunches shall have tops which are fresh, and free from damage by any cause. The tops shall be either full size or cut back to not less than 6 inches.

(b) Unless otherwise specified, the minimum diameter of the beets shall be 1½ inches and the maximum diameter shall be 3 inches.

(c) In order to allow for variations incident to proper grading and handling, not more than 5 percent, by count, of the beets in any lot may be smaller than the specified minimum diameter and not more than 10 percent may be larger than the specified maximum diameter. In addition, when the tops are cut back, not more than 15 percent of the bunches may have tops less than 6 inches. In addition, not more than a total of 10 percent of the beet roots may fail to meet the remaining requirements of this grade, but not to exceed 5 percent shall be allowed for defects causing serious damage, including not more than 1 percent for beet roots affected by soft rot. (See § 51.377.)

UNCLASSIFIED

§ 51.376 *Unclassified.* Unclassified consists of bunched beets which have not been classified in accordance with the foregoing grade. The term "unclassified" is not a grade within the meaning of these standards but is provided as a designation to show that no definite grade has been applied to the lot.

APPLICATION OF TOLERANCES

§ 51.377 *Application of tolerances.* (a) The contents of individual containers in the lot, based on sample inspection, are subject to the following limitations, provided the averages for the entire lot are within the tolerances specified:

(1) When a tolerance is 10 percent or more, individual containers in any lot shall have not more than one and one-half times the tolerance specified, except that at least one defective and one off-size specimen may be permitted in a container.

(2) When a tolerance is less than 10 percent, individual containers in any lot shall have not more than double the tolerance specified, except that at least one defective and one off-size specimen may be permitted in a container.

SIZE TERMS

§ 51.378 *Size terms.* The following terms are provided for describing the diameters of beets in any lot: Small means less than 2 inches; medium means 2 to 3 inches inclusive; large means over 3 inches.

BUNCHING

§ 51.379 *Bunching.* Bunches shall be fairly uniform in size.

DEFINITIONS

§ 51.380 *Firm.* "Firm" means that the beet is not soft, flabby, or shriveled.

§ 51.381 *Fairly smooth.* "Fairly smooth" means that the appearance of the beet is not more than slightly injured by roughness or by the presence of secondary rootlets. Very slight roughness over the crown or very slight pitting caused by the shedding of dead leaves shall not be considered as injury to the appearance.

§ 51.382 *Fairly well shaped.* "Fairly well shaped" means that the beet is not misshapen to such an extent as to materially injure its appearance.

§ 51.383 *Fairly clean.* "Fairly clean" means that individual beets are reasonably free from dirt, stain and other foreign matter and that the general appearance of the beets in the lot is not more than slightly affected by these causes.

§ 51.384 *Soft rot.* "Soft rot" means any soft, mushy or leaky condition of the tissue.

§ 51.385 *Damage.* "Damage" means any injury or defect which materially affects the appearance, or the edible or shipping quality of the individual beet, bunch or lot; or which cannot be removed without a loss of more than 5 percent of the total weight of the beet. Growth cracks which are not healed, and healed growth cracks which are not shallow and not smooth or which materially affect the appearance of the beet shall be considered as damage.

§ 51.386 *Tops which are fresh and free from damage by any cause.* "Tops which are fresh and free from damage by any cause" means that the tops are not badly wilted and that not more than 10 percent, by count, of the bunches in any lot may have any injury which materially affects the appearance of the tops. The appearance of individual bunches shall be considered materially affected when the tops are trimmed to the extent that only a few leaves or leafstems remain. The appearance of bunches with tops having a few slightly discolored leaves shall not be considered materially affected if the tops as a whole show a predominately normal color.

§ 51.387 *Full size.* "Full size" means that the tops have not been cut back, but dried or damaged leaves or leafstems may have been removed.

§ 51.388 *Diameter.* "Diameter" means the greatest dimension taken at right angles to a straight line from the center of the crown to the base of the root.

§ 51.389 *Serious damage.* "Serious damage" means any injury or defect which seriously affects the appearance, or the edible or shipping quality of the individual beet, bunch, or lot; or which cannot be removed without a loss of more than 20 percent of the total weight of the beet.

SUBPART—UNITED STATES CONSUMER STANDARDS FOR ITALIAN SPROUTING BROCCOLI

GRADES

§ 51.400 *U. S. Grade A.* U. S. Grade A consists of stalks, or parts of stalks of Italian sprouting broccoli which are well trimmed, and have good characteristic color, and fairly compact bud clusters; and which are fresh, tender, and clean, and are free from decay and from damage caused by discoloration, freezing, hollow stem or pithiness, scars, disease, insects, or mechanical or other means. Broccoli stalks on the shown face shall be reasonably representative in size and quality of the contents of the container.

(a) The length of the stalks or parts thereof shall be not more than 6 inches nor less than 3 inches, and the diameter of the stem shall be not less than ¼ inch.

(b) Incident to proper grading and handling, not more than 5 percent, by weight, of the broccoli stalks or parts thereof in any lot may fail to meet the size requirements and, in addition, not more than 5 percent, by weight, may fail to meet the remaining requirements of the grade, including not more than 1 percent for decay.

§ 51.401 *U. S. Grade B.* U. S. Grade B consists of stalks or parts of stalks of Italian sprouting broccoli which meet the requirements of U. S. Grade A except as to compactness of bud clusters and except for the increased tolerances specified below.

(a) Stalks or parts of stalks of broccoli of this grade shall have reasonably compact bud clusters.

(b) Incident to proper grading and handling, not more than 10 percent, by weight, of the broccoli stalks or parts thereof in any lot may fail to meet the size requirements and in addition, not more than 10 percent, by weight, may fail to meet the remaining requirements of the grade, including not more than 1 percent for decay.

OFF-GRADE

§ 51.402 *Off-Grade Italian sprouting broccoli.* Italian sprouting broccoli which fails to meet the requirements of either of the foregoing grades shall be Off-Grade Italian sprouting broccoli.

DEFINITIONS

§ 51.403 *Stalk.* "Stalk" means a portion of the broccoli plant including the stem, bud clusters and leaves.

§ 51.404 *Well trimmed.* "Well trimmed" means that all coarse, damaged, and discolored leaves and leaves extending more than 1½ inches above the top of the head have been removed, and that cross cuts on butts and lengthwise cuts on split stalks are smooth.

§ 51.405 *Good characteristic color.* "Good characteristic color" means that the stem and external portion of the head or part thereof has a light green or darker shade of green color except that purplish color shall be allowed on the external portion of the head or part thereof.

§ 51.406 *Fairly compact bud clusters.* "Fairly compact bud clusters" means that the individual florets of bud clusters are relatively small and fairly tightly crowded together and that the bud clusters on the stalk or part of a stalk are generally close together.

§ 51.407 *Fresh.* "Fresh" means that the broccoli is not flabby or more than slightly wilted.

§ 51.408 *Tender.* "Tender" means that the broccoli is succulent, and that the stems are not fibrous, tough or stringy.

§ 51.409 *Clean.* "Clean" means that the broccoli is practically free from sand, dirt, silt, muck, and other water-insoluble inorganic material.

§ 51.410 *Damage.* "Damage" means any defect which more than slightly affects the appearance, of the edible, shipping, or keeping quality of the individual stalks or parts thereof, or the lot as a whole. The following defects or any combination of defects, the seriousness of which exceeds the maximum allowed for any one defect shall be considered as damage:

(a) Discoloration, when more than very slight.

(b) Freezing, when causing more than slight discoloration of the individual unit.

(c) Hollow stem or pithiness, when discolored, or when more than slightly affecting the appearance of the individual unit.

(d) Scars, when discolored, or when more than slight or superficial.

(e) Disease, when showing discoloration, or when more than slightly affecting the appearance of the individual unit.

(f) Insects, when worms or worm frass are present or when there is more than slight infestation by other insects.

§ 51.411 *Diameter.* "Diameter" means the greatest thickness of the stem measured at the base.

§ 51.412 *Reasonably compact bud clusters.* "Reasonably compact bud clusters" means that the individual florets of bud clusters are not on the verge of opening, but that pedicels on florets may be moderately elongated and bud clusters may be moderately open and spreading.

SUBPART—UNITED STATES STANDARDS FOR BROCCOLI FOR PROCESSING

GENERAL

§ 51.425 *General.* (a) The accompanying grades for broccoli are intended to facilitate transactions between growers and processors who may wish to use a purchasing system based upon the quality of broccoli delivered. These grades are an outgrowth of the widely accepted principle that price should be directly proportional to quality. The grower who delivers high quality deserves a premium price, because such broccoli enables the processor to pack a better quality finished product.

(b) In the application of these standards, it is assumed that sellers will not sort their broccoli into separate lots of U. S. No. 1 and U. S. No. 2 grades before delivery to the buyer, and that the buyer will pay a certain price for the percentage of each grade in the lot as determined by inspection. Upon delivery, the inspector will simply sort representative samples taken from each lot and determine the percentage of each grade. Final settlement would then be made by applying the percentage of each grade to the total weight of the lot, and then applying the contract prices established for each grade. Under such a procedure, there is no need for tolerances.

GRADES

§ 51.426 *U. S. No. 1.* U. S. No. 1 consists of stalks of broccoli which are fresh, tender, and have good characteristic color, and compact heads; which are free from decay and cull material, and are free from damage caused by discoloration, freezing, hollow stem or pithiness, scars, dirt or other foreign material, disease, insects, and mechanical or other means. (See § 51.430.)

(a) Unless otherwise specified, the length shall be not more than 6 inches nor less than 4 inches, and the diameter of the stem shall be not less than three-eighths inch. (See § 51.436.)

§ 51.427 *U. S. No. 2.* U. S. No. 2 consists of stalks of broccoli which are fresh, tender, and have good characteristic color, and fairly compact heads; which are free from decay and cull material, and are free from damage caused by scars, dirt or other foreign material, disease, insects; and are free from serious damage caused by discoloration, freezing, hollow stem or pithiness, and mechanical or other means. (See § 51.430.)

(a) Unless otherwise specified, the length shall be not more than 6 inches nor less than 3 inches, and the diameter of the stem shall be not less than one-fourth inch. (See § 51.436.)

CULLS AND TRIMMING

§ 51.428 *Culls.* Culls are stalks of broccoli which fail to meet the requirements of either of the foregoing grades.

§ 51.429 *Cull material.* (See § 51.436.)

§ 51.430 *Trimming requirements.* Unless otherwise specified, all coarse, damaged, and discolored leaves and leaves extending more than one and one-half inches above the top of the head shall be removed. In making grade determinations, all coarse, damaged and discolored leaves, and leaves extending more than one and one-half inches above the top of the head shall be removed and scored as cull material.

DEFINITIONS

§ 51.431 *Stalk.* "Stalk" means a portion of the broccoli plant including the stem, bud cluster and leaves.

§ 51.432 *Fresh.* "Fresh" means that the broccoli is not badly wilted or excessively flabby.

§ 51.433 *Tender.* "Tender" means that the broccoli is succulent, and reasonably free from fibrous material and is not tough, or stringy.

§ 51.434 *Good characteristic color.* "Good characteristic color" means that the stem and external portion of the head has a light green or darker shade of green color, except that purplish color shall also be allowed on the external portion of the head.

§ 51.435 *Compact head.* "Compact head" means that the individual head is closely formed, not open or spread to the extent that it has a loose appearance, and that the individual florets are fairly tightly formed and not more than moderately elongated.

§ 51.436 *Cull material.* "Cull material" means all foreign material, any portion of the stem in excess of the maximum length specified, all stalks under the minimum length specified for the U. S. No. 2 grade, and all coarse, damaged and discolored leaves, and leaves extending more than one and one-half inches above the top of the head.

§ 51.437 *Damage.* "Damage" means any defect which more than slightly affects the appearance, or the processing or edible quality of the head, or any portion of the stem within 5 inches from the top of the head. Any one of the following defects, or any combination of defects the seriousness of which exceeds the maximum allowed for any one defect, shall be considered as damage:

(a) Discoloration, when more than very slight, or which will not change to light green or darker shade of green color in the ordinary process of blanching.

(b) Freezing, when causing more than slight discoloration of the individual unit.

(c) Hollow stem or pithiness, when discolored, or when more than slightly affecting the appearance of the individual unit.

(d) Scars, when discolored, or when more than slight or superficial.

(e) Dirt or other foreign material, when more than slight, or which cannot be removed in the ordinary washing process.

(f) Disease, when showing discoloration, or when more than slightly affecting the appearance, or the processing or edible quality.

(g) Insects, when worms or worm frass are present, or when there is more than slight infestation by other insects.

§ 51.438 *Diameter.* "Diameter" means the greatest thickness of the stem measured at a point 6 inches from the top of the head, except that stems which are less than 6 inches in length shall be measured at the base of the stem.

§ 51.439 *Fairly compact head.* "Fairly compact head" means that the individual head is fairly closely formed and not excessively spread and that the florets are not on the verge of opening and will not open in the ordinary process of blanching.

§ 51.440 *Serious damage.* "Serious damage" means any defect which materially affects the appearance, or the processing or edible quality of the head, or any portion of the stem within 5 inches from the top of the head. Any one of the following defects, or any com-

bination of defects the seriousness of which exceeds the maximum allowed for any one defect, shall be considered as serious damage:

(a) Discoloration, when the appearance of the individual unit is materially affected.

(b) Freezing, when causing discoloration which materially affects the appearance of the individual unit.

(c) Hollow stem or pithiness, when discolored, or when materially affecting the appearance of the individual unit. Units which show a ragged appearance or deep holes shall be considered as serious damage.

SUBPART—UNITED STATES STANDARDS FOR CABBAGE

GRADES

§ 51.450 *U. S. No. 1.* U. S. No. 1 shall consist of heads of cabbage of one variety or similar varietal characteristics, which are of reasonable solidity, and are not withered, puffy, or burst and which are free from soft rot, seedstems, and from damage caused by discoloration, freezing, disease, insects or mechanical or other means. Stems shall be cut so that they do not extend more than one-half inch beyond the point of attachment of the outermost leaves.

(a) Unless otherwise specified, each head shall be well trimmed. However, cabbage which has fairly good green color and is specified as "U. S. No. 1 Green," and red cabbage which is specified as "U. S. No. 1 New Red" need be only fairly well trimmed.

(b) In order to allow for variations, other than excess number of wrapper leaves, incident to proper grading and handling, not more than a total of 10 percent, by weight, of the heads in any lot may fail to meet the requirements of this grade, but not more than one-fifth of this amount, or 2 percent, shall be allowed for soft decay. In addition, not more than 10 percent, by weight, may not meet the requirements as to number of wrapper leaves. (See § 51.454.)

§ 51.451 *U. S. Commercial.* U. S. Commercial shall consist of heads of cabbage which meet the requirements for U. S. No. 1 grade except for the increased tolerance for defects specified below, and except that the heads shall be reasonably firm.

(a) Unless otherwise specified, each head shall be well trimmed. However, cabbage which has fairly good green color and is specified as "U. S. Commercial Green," and red cabbage which is specified as "U. S. Commercial New Red" need be only fairly well trimmed.

(b) In order to allow for variations, other than excess number of wrapper leaves, incident to proper grading and handling, not more than a total of 25 percent, by weight, of the heads in any lot may fail to meet the requirements of this grade, but not more than two-fifths of this amount, or a total of 10 percent, shall be allowed for defects causing serious damage, but not more than 2 percent shall be allowed for soft decay. In addition, not more than 10 percent, by weight, may not meet the requirements as to number of wrapper leaves. (See § 51.454.)

UNCLASSIFIED

§ 51.452 *Unclassified.* Unclassified shall consist of cabbage which has not been classified in accordance with the foregoing grades. The term "unclassified" is not a grade within the meaning of these standards but is provided as a designation to show that no definite grade has been applied to the lot.

SIZE

§ 51.453 *Size.* The minimum size or minimum and maximum sizes may be specified in connection with the grades as "U. S. No. 1, 1 pound min.," or "U. S. No. 1, 2 to 4 pounds," or any lot may be classified as Small, Medium, Large, Small to Medium, or Medium to Large in accordance with the facts.

| Small | Medium | Large |
|---|---|---|
| Pointed, under 1½ lbs ..... | 1½ to 3 lbs.. | Over 3 lbs. |
| Danish and domestic, under 2 lbs. | 2 to 5 lbs.... | Over 5 lbs. |

(a) In order to allow for variations incident to proper sizing, not more than a total of 15 percent, by weight, of the heads in any lot may vary from the size specifications, but not more than 10 percent may be either above or below the size specified. This tolerance is in addition to the tolerance for grade defects. (See § 51.454.)

APPLICATION OF TOLERANCES

§ 51.454 *Application of tolerances.* The contents of individual containers in the lot, based on sample inspection, are subject to the following limitations, provided the averages for the entire lot are within the tolerances specified:

(a) When a tolerance is 10 percent or more, individual containers in any lot shall have not more than one and one-half times the tolerance specified, except that at least one defective and one off-sized cabbage may be permitted in a container.

(b) When a tolerance is less than 10 percent individual containers in any lot shall have not more than double the tolerance specified, except that at least one defective and one off-sized cabbage may be permitted in a container.

DEFINITIONS

§ 51.455 *Similar varietal characteristics.* "Similar varietal characteristics" means that the cabbage in each container shall have the same general characteristics.

§ 51.456 *Reasonable solidity.* "Reasonable solidity" means fairly firm for pointed type cabbage and southern Domestic type cabbage. Northern Domestic type cabbage and Danish or Hollander type cabbage shall be firm. "Reasonable solidity" as applied to Savoy cabbage means not soft or puffy; Savoy type cabbage is characteristically loosely formed and rather light in weight.

§ 51.457 *Puffy.* "Puffy" means that the heads are very light in weight in comparison to size, or have excessive air spaces in the central portion. They normally feel firm at time of harvesting but often soften quickly. They are known as "Balloon Heads" in certain sections.

§ 51.458 *Seedstems.* "Seedstems" means those heads which have seed stalks showing or in which the formation of seed stalks has plainly begun.

§ 51.459 *Damage.* "Damage" means any injury or defect which materially affects the appearance, or the edible or shipping quality. Worm injury on the outer head leaves or wrapper leaves which materially affects the appearance of the head or worm holes which extend deeply into the compact portion of the head shall be considered as damage.

§ 51.460 *Well trimmed.* "Well trimmed" means that the head shall not have more than four wrapper leaves.

§ 51.461 *Fairly well trimmed.* "Fairly well trimmed" means that the head shall not have more than seven wrapper leaves.

§ 51.462 *Wrapper leaves.* "Wrapper leaves" means leaves which do not enfold the head fairly tightly more than two-thirds the distance from the base to the top.

§ 51.463 *Reasonably firm.* "Reasonably firm" means that the head is not soft and is of reasonable weight for its size but may have considerable open spaces between the leaves in the lower portion of the head.

§ 51.464 *Serious damage.* "Serious damage" means any injury or defect which seriously affects the appearance, or the edible or shipping quality. Cabbage which is affected by soft rot or which is seriously puffy, badly burst, or seriously injured by seedstems, discoloration, freezing, disease, insects, mechanical or other means shall be considered as seriously damaged. Worm injury on the outer head leaves or wrapper leaves which seriously affects the appearance of the heads, or worm holes which seriously affect the compact portion of the head shall be regarded as serious damage.

SUBPART—UNITED STATES STANDARDS FOR CANTALOUPS

GRADES

§ 51.475 *U. S. No. 1.* U. S. No. 1 shall consist of cantaloups of one type which are well formed, well netted, mature but not overripe, soft, or wilted; and which are free from sunscald and decay, and free from damage caused by aphis honey dew, bruises, cracks, loose seeds dirt, hail, insects, scars, sunburn, or mechanical or other means.

(a) In order to allow for variations incident to proper grading and handling not more than a total of 10 percent, by count, of the cantaloups in any lot may fail to meet the requirements of this grade, but not more than one-half of this amount, or 5 percent, shall be allowed for defects causing serious damage, including not more than 1 percent for cantaloups affected by soft rot.

§ 51.476 *U. S. Commercial.* U. S. Commercial shall consist of cantaloups which meet the requirements of U. S. No. 1 grade except that the cantaloups need

be only fairly well netted and except for the increased tolerance for defects specified below:

(a) In order to allow for variations incident to proper grading and handling, not more than a total of 20 percent, by count, of the cantaloups, in any lot may fail to meet the requirements of this grade, but not more than one-fourth of this amount, or 5 percent, shall be allowed for defects causing serious damage, including not more than 1 percent for cantaloups affected by soft rot.

UNCLASSIFIED

§ 51.477 *Unclassified.* Unclassified shall consist of cantaloups which have not been classified in accordance with either of the foregoing grades. The term "unclassified" is not a grade within the meaning of these standards but is provided as a designation to show that no definite grade has been applied to the lot.

APPLICATION OF TOLERANCES

§ 51.478 *Application of tolerances to individual packages.* (a) The contents of individual packages in the lot, based on sample inspection, are subject to the following limitations, provided the averages for the entire lot are within the tolerances specified for the grade:

(b) For a tolerance of 10 percent or more, individual packages in any lot may contain not more than one and one-half times the tolerance specified, except that when the package contains 15 specimens or less, individual packages may contain not more than double the tolerance specified.

(c) For a tolerance of less than 10 percent, individual packages in any lot may contain not more than double the tolerance specified, provided at least one specimen which does not meet the requirements shall be allowed in any one package.

DEFINITIONS

§ 51.479 *One type.* "One type" means that the cantaloups in any container are similar in shape and color of flesh.

§ 51.480 *Well formed.* "Well formed" means that the cantaloup has the shape characteristic of the variety.

§ 51.481 *Well netted.* "Well netted" means that the cantaloup has good netting characteristic of the variety.

§ 51.482 *Mature.* "Mature" means that the cantaloup has reached the stage of maturity which will insure the proper completion of the normal ripening process.

§ 51.483 *Damage.* "Damage" means any injury or defect which materially affects the appearance, or edible or shipping quality of the cantaloup. Any one of the following defects, or any combination of defects, the seriousness of which exceeds the maximum allowed for any one defect shall be considered as damage:

(a) Aphis honey dew, when more than slightly sticky, or when showing discoloration which more than slightly affects the appearance of the cantaloup.

(b) Cracks or wounds, when unhealed or deep, or when materially affecting the appearance of the cantaloup. Slight healed cracks around the ends or in the sutures of the cantaloup shall not be considered as damage.

(c) Hail injury, when unhealed or deep, or when materially affecting the appearance of the cantaloup.

(d) Scars which are healed, shallow, smooth and light colored and aggregate more than 1½ inches in diameter. Healed scars which are deep, rough or dark colored are considered as damage if their appearance is more objectionable than the amount of healed, shallow, smooth and light colored scars permitted.

(e) Sunburn, when the appearance of the cantaloup is materially affected by dark yellow or brownish discoloration, or when it causes the rind to be flattened, thin or hard.

§ 51.484 *Serious damage.* "Serious damage" means any injury or defect which seriously affects the appearance, or edible or shipping quality of the cantaloup. Cantaloups which are overripe, wilted, immature or have unhealed cracks shall be considered as being seriously damaged.

§ 51.485 *Fairly well netted.* "Fairly well netted" means that the cantaloup has fairly good netting characteristic of the variety.

SUBPART—UNITED STATES CONSUMER STANDARDS FOR FRESH CARROTS

STYLES

§ 51.495 *Bunched carrots.* "Bunched carrots" means untopped carrots which are tied in bunches.

§ 51.496 *Carrots with short-trimmed tops.* "Carrots with short-trimmed tops" means carrots which have attached leafstems ranging up to 4 inches in length.

§ 51.497 *Topped carrots.* "Topped carrots" means carrots which have practically all of the tops clipped off.

GRADES

§ 51.498 *U. S. Grade A.* U. S. Grade A shall consist of carrots of similar varietal characteristics, the roots of which are firm, clean, fairly well colored, fairly well formed and fairly smooth; which are free from soft rot, and from damage caused by freezing, growth cracks, sunburn, pithiness, woodiness, internal discoloration, oil spray, dry rot, other disease, insects or mechanical or other means. Carrots on the shown face shall be reasonably representative in size and quality of the contents of the container.

(a) Unless otherwise specified, the diameter of each carrot shall be not less than ¾ inch nor more than 1½ inches.

(b) Bunched carrots shall be free from damage caused by seedstems and shall have tops which are fresh and free from damage by any cause. Tops may be full or clipped back but shall be not less than 12 inches nor more than 20 inches in length. Each bunch shall weigh not less than one pound, including the tops, and contain at least 4 carrots.

(c) Carrots with short-trimmed tops shall be free from damage caused by seedstems and shall have leafstems which are free from damage by any cause and which are cut back to not more than 4 inches in length.

(d) Topped carrots shall be well trimmed.

(e) Incident to proper grading and handling, not more than 5 percent, by count, of the carrots in any lot may be smaller than the specified minimum diameter and not more than 10 percent may be larger than the specified maximum diameter. In addition, not more than 5 percent, by count, of the carrots in any lot may fail to meet the root requirements of the grade including not more than 1 percent for carrot roots affected by soft rot. In addition, for bunched carrots, not more than 10 percent, by count, of the bunches in any lot may have tops which vary from the specified length; and for carrots with short-trimmed tops not more than 5 percent by count, of the carrots in any lot may fail to meet the requirement for length of leafstem.

OFF-GRADE

§ 51.499 *Off-Grade carrots.* Carrots which fail to meet the requirements of the foregoing grade shall be Off-Grade carrots.

DEFINITIONS

§ 51.500 *Similar varietal characteristics.* "Similar varietal characteristics" means that the carrots in the lot are of the same general type. For example, carrots with a short, blunt growth like the Oxheart variety shall not be mixed with long or half-long carrots like the Imperator or Danvers varieties.

§ 51.501 *Firm.* "Firm" means that the carrot root is not soft, flabby or shriveled.

§ 51.502 *Clean.* "Clean" means that the individual carrots are practically free from stain, dirt, and other foreign matter.

§ 51.503 *Fairly well colored.* "Fairly well colored" means that the carrot root has an orange, orange red, or orange scarlet color, but not a pale orange or distinct yellow color.

§ 51.504 *Fairly well formed.* "Fairly well formed" means that the carrot root is not so forked or misshapen as to materially affect its appearance or cause a loss of more than 3 percent, by weight, in the ordinary preparation for use.

§ 51.505 *Fairly smooth.* "Fairly smooth" means that the carrot root is not rough, ridged, or covered with secondary rootlets to an extent which materially affects its appearance or causes a loss of more than 3 percent, by weight, in the ordinary preparation for use.

§ 51.506 *Damage.* "Damage" means any injury or defect which materially affects the appearance, or edible or shipping quality of the individual carrot or carrots in the lot, or causes a loss of more than 3 percent, by weight, in the ordinary preparation for use. Any one of the following defects or combination of defects the seriousness of which exceeds the maximum allowed for any one defect shall be considered as damage:

(a) Growth cracks which are unhealed; healed growth cracks which are

not shallow and not smooth or which materially affect the appearance of the carrot root.

(b) Sunburn which causes a loss of more than 3 percent, by weight, in the ordinary preparation for use, except that superficial light green color at the stem end which does not materially affect the appearance of the root shall be permitted.

§ 51.507 *Diameter.* "Diameter" means the greatest dimension of the root taken at right angles to the longitudinal axis.

§ 51.508 *Tops.* "Tops which are fresh and free from damage by any cause" means that the tops are not badly wilted and not more than 10 percent, by count, of the bunches in any lot may have any injury which materially affects the appearance of the tops. The appearance of individual bunches shall be considered materially affected when the tops are trimmed to the extent that only a relatively few leaves or leafstems remain. The appearance of bunches with tops having slight discoloration such as yellowing, browning or other abnormal color affecting a few leaflets shall not be considered materially affected if the tops as a whole show a predominantly normal green color.

§ 51.509 *Leafstems which are free from damage by any cause.* "Leafstems which are free from damage by any cause" means that not more than 10 percent, by count, of the carrots in any lot may have leafstems with any injury which materially affects their appearance.

§ 51.510 *Well trimmed.* "Well trimmed" means that the tops shall be cut back to not more than 1 inch in length.

SUBPART—UNITED STATES STANDARDS FOR COLLARD GREENS OR BROCCOLI GREENS

GENERAL

§ 51.520 *General.* These standards are applicable to collard greens or broccoli greens, or mixtures of the two which may consist of leaves, or parts of leaves, plants or mixtures of leaves and plants.

GRADES

§ 51.521 *U. S. No. 1.* U. S. No. 1 consists of collard greens or broccoli greens, of similar varietal characteristics which are fresh, fairly tender, fairly clean, well trimmed, and of characteristic color for the variety or type; which are free from decay and free from damage caused by course stalks and seedstems, discoloration, freezing, foreign material, disease, insects or mechanical or other means.

(a) In order to allow for variations incident to proper grading and handling, not more than a total of 10 percent, by weight, of the units in any lot, may fail to meet the requirements of the grade: *Provided*, That not more than one-half of this amount, or 5 percent, shall be allowed for serious damage by any cause, and including therein not more than 2 percent for decay. (See § 51.524.)

UNCLASSIFIED

§ 51.522 *Unclassified.* Unclassified consists of collard greens or broccoli greens which have not been classified in accordance with the foregoing grade. The term "unclassified" is not a grade within the meaning of these standards but is provided as a designation to show that no definite grade has been applied to the lot.

APPLICATION OF TOLERANCES

§ 51.523 *Application of tolerances.* The contents of individual containers in the lot, based on sample inspection, are subject to the following limitations: *Provided*, That the averages for the entire lot are within the tolerances specified:

(a) When a tolerance is 10 percent or more, individual containers in any lot shall have not more than one and one-half times the tolerance specified.

(b) When a tolerance is less than 10 percent, individual containers in any lot shall have not more than double the tolerance specified: *Provided*, That at least one specimen which does not meet the requirements may be permitted in any container.

§ 51.524 *Basis for calculating percentages.* Percentages shall be calculated on the basis of weight or an equivalent basis. In sorting or grading the sample, the unit shall be the plant, the leaf, or a portion of the leaf or plant exactly as it occurs in the sample. A plant or portion of plant shall not be broken to remove the defective portion, but shall be considered as a unit.

DEFINITIONS

§ 51.525 *Similar varietal characteristics.* "Similar varietal characteristics" means that the collard greens or broccoli greens shall be of the same general color and character of growth. No mixture of varieties or types shall be permitted which materially affects the appearance of the lot.

§ 51.526 *Fresh.* "Fresh" means that the greens are not more than slightly wilted.

§ 51.527 *Fairly tender.* "Fairly tender" means that the greens are not tough, or excessively fibrous.

§ 51.528 *Fairly clean.* "Fairly clean" means that the appearance of the greens is not materially affected by the presence of dirt, dust, or other foreign material.

§ 51.529 *Well trimmed.* "Well trimmed", as applied to plants, means that the main stem shall not extend more than one inch below the point of attachment of the first leaf.

§ 51.530 *Damage.* "Damage" means any defect which materially affects the appearance, or the edible or shipping quality of the individual unit, or the lot as a whole. Any one of the following defects, or any combination of defects, the seriousness of which exceeds the maximum allowed for any one defect, shall be considered as damage:

(a) Coarse stalks or seedstems when they are woody and tough and more than 3½ inches in length, or when they are fairly tender or tender and are more than one-third the length of the entire plant. The length of the plant shall be measured from the base of the main stem to the tip of the leaf extending the greatest distance from the base of the main stem;

(b) Discoloration when the appearance of the unit is materially affected by yellowing or any other type of discoloration; and,

(c) Mechanical damage when the unit is badly crushed, torn, or broken.

§ 51.531 *Serious damage.* "Serious damage" means any defect which seriously affects the appearance, or the edible or shipping quality of the individual unit, or the lot as a whole. Any one of the following defects, or any combination of defects, the seriousness of which exceeds the maximum allowed for any one defect, shall be considered as serious damage:

(a) Insects when the unit is noticeably infested, or when it is seriously damaged by them;

(b) Discoloration when the unit is badly discolored; and,

(c) Decay.

SUBPART—UNITED STATES STANDARDS FOR CAULIFLOWER

GRADES

§ 51.540 *U. S. No. 1.* U. S. No. 1 consists of compact heads of cauliflower which are not discolored, or over-mature, and which are free from soft or wet decay and are free from damage caused by wilting, fuzziness, riciness, enlarged bracts, bruises, hollow stems, dirt or other foreign matter, disease, insects, or mechanical or other means. Unless otherwise specified, the heads shall be not less then 4 inches in diameter. Jacket leaves shall be fresh, green, and free from damage caused by disease and free from serious damage by any other cause. Unless otherwise specified, jacket leaves shall be well trimmed.

(a) In order to allow for variations, other then for size, incident to proper grading and handling, not more then a total of 10 percent, by count, of the cauliflower in any lot may fail to meet the requirements of this grade but not more than one-tenth of this amount, or 1 percent, may be affected by soft rot or wet decay affecting the curd. In addition, not more than 5 percent, by count, of the heads in any lot may be smaller than the specified minimum size.

UNCLASSIFIED

§ 51.541 *Unclassified.* Unclassified consists of cauliflower which has not been classified in accordance with the foregoing grade. The term "unclassified" is not a grade within the meaning of these standards but is provided as a designation to show that no definite grade has been applied to the lot.

APPLICATION OF TOLERANCES

§ 51.542 *Application of tolerances.* The contents of individual packages in the lot, based on sample inspection, are subject to the following limitations: *Provided*, That the averages for the entire lot are within the tolerances specified for the grade.

(a) For a tolerance of 10 percent or more, individual packages in any lot may contain not more than one and one-half times the tolerance specified, except that when the package contains 15 specimens or less, individual packages may contain not more than double the tolerance specified.

(b) For a tolerance of less than 10 percent, individual packages in any lot may contain not more than double the tolerance specified, except that at least one defective and two off-sized specimens may be permitted in any package.

DEFINITIONS

§ 51.543 *Compact.* "Compact" means that the flower clusters are closely united and the head feels solid.

§ 51.544 *Discolored.* "Discolored" means that the head is of some abnormal color.

§ 51.545 *Over-mature.* "Over-mature" means a stage of growth which is beyond that of a compact, properly developed head. An over-mature head usually is loose or open and ordinarily is tinged yellow.

§ 51.546 *Damage.* "Damage" means any defect which materially affects the appearance, or the edible or shipping quality of the curd, or any disease which materially affects the appearance, or the shipping quality of the jacket leaves. Any one of the following defects, or any combination of defects, the seriousness of which exceeds the maximum allowed for any one defect, shall be considered as damage:

(a) Fuzziness which gives the head a distinctly fuzzy appearance on more than one-half of the head;

(b) Riciness, when the appearance of the head is materially injured by a very abnormal rough or granular surface on the curd;

(c) Enlarged bracts, when the appearance of the head is materially injured by leaves (bracts) growing up through and extending above the curd; and

(d) Mold which causes the flesh of the curd to disintegrate or which exceeds $\frac{3}{8}$ inch in diameter in the aggregate, or any single spot of mold which exceeds $\frac{1}{8}$ inch in diameter.

§ 51.547 *Diameter.* "Diameter" means the average diameter of the head exclusive of the jacket leaves.

§ 51.548 *Serious damage.* "Serious damage" means any injury to the jacket leaves which seriously affects their appearance.

§ 51.549 *Well trimmed.* "Well trimmed" means that the jacket leaves shall be limited to the number and length necessary to protect the head. No jacket leaves are required on heads which are individually wrapped, or packed with cushions, partitions or other means which protect the head from bruising.

SUBPART—UNITED STATES STANDARDS FOR CELERY

GRADES

§ 51.560 *U. S. Extra No. 1.* U. S. Extra No. 1 shall consist of stalks of celery of similar varietal characteristics which are well developed and have good heart formation, which are clean, well trimmed, fairly compact, and are free from blackheart, brown stem, decay (except dry type crater rot), doubles, and from damage caused by crater rot, wilting, cutworms, freezing, suckers, growth cracks, hollow crown, pithy branches, seedstems, disease, insects or mechanical or other means. Unless otherwise specified, stalks shall be fairly well blanched. However, any lot of celery which meets all the requirements of this grade, except as to blanching, may be designated as "U. S. Extra No. 1 Well Blanched" or "U. S. Extra No. 1 Mixed Blanch": *Provided*, That any lot of celery which has a medium to dark green appearance shall be designated as "U. S. Extra No. 1 Green."

(a) The average midrib length of the outer whorl of branches on stalks in this grade shall be not less than 7 inches.

(b) Unless otherwise specified in connection with the grade, stalks shall be of such length as to extend from one side of the container to within 1½ inches of the opposite side when packed in accordance with the usual commercial practice. Such measurements shall not include the bulge. When stalks fail to meet such requirements, the length shall be specified in terms of even inches only, as "U. S. Extra No. 1—14 inches," or "U. S. Extra No. 1—18 inches," etc., in accordance with the facts.

(c) In order to allow for variations, other than lengths, incident to proper grading and handling, not more than 10 percent, by count, of the stalks in any lot may be below the requirements of this grade, but not more than two-fifths of this amount, or 4 percent, shall be allowed for decay: *Provided*, That not more than one-half of this decay, or 2 percent, may be in the branches or in an advanced stage in the roots. In addition, not more than 5 percent, by count, of the stalks in any lot may not meet the requirements relating to stalk length, and not more than 5 percent shall be allowed for stalks having an average midrib length shorter than that specified.

§ 51.561 *U. S. No. 1.* U. S. No. 1 shall consist of stalks of celery of similar varietal characteristics which are fairly well developed and have fairly good heart formation; which are well trimmed, which are not badly spread and are free from blackheart, decay (except dry type crater rot), and from damage caused by crater rot, brown stem, wilting, cutworms, freezing, suckers, growth cracks, hollow crown, pithy branches, seedstems, dirt, doubles, disease, insects or mechanical or other means. Unless otherwise specified, stalks shall be fairly well blanched. However, any lot of celery which meets all the requirements of this grade, except as to blanching, may be designated as "U. S. No. 1 Well Blanched," or "U. S. No. 1 Mixed Blanch:" *Provided*, That any lot of celery which has a medium to dark green appearance shall be designated as "U. S. No. 1 Green."

(a) Unless otherwise sepcified, the average midrib length of the outer whorl of branches on stalks in this grade shall be not less than 5 inches.

(b) Unless otherwise specified in connection with the grade, stalks shall be of such length as to extend from one side of the container to within 1½ inches of the opposite side when packed in accordance with the usual commercial practice. Such measurements shall not include the bulge. When stalks fail to meet such requirements, the length shall be specified in terms of even inches only, as "U. S. No. 1—14 inches" or "U. S. No. 1—18 inches," etc., in accordance with the facts.

(c) In order to allow for variations, other than lengths, incident to proper grading and handling, not more than a total of 15 percent, by count, of the stalks in any lot may be below the requirements of this grade: *Provided*, That not more than two-thirds of this amount, or 10 percent, shall be allowed for defects other than pith but not more than 4 percent shall be allowed for decay: *Provided*, That not more than one-half of this decay, or 2 percent, may be in the branches, or in an advanced stage in the roots. In addition, not more than 5 percent, by count, of the stalks in any lot may not meet the requirements relating to stalk length, and not more than 5 percent shall be allowed for stalks having an average midrib length shorter than that specified.

§ 51.562 *U. S. Combination grade.* Any lot of celery may be designated "U. S. Combination" when not less than 60 percent, by count, of the stalks in each lot meet the requirements of U. S. No. 1 grade and the remainder U. S. No. 2 grade. Any lot of celery which meets all the requirements of this grade except as to blanching may be designated as "U. S. Combination Well Blanched" or "U. S. Combination Mixed Blanch:" *Provided*, That any lot of celery which has a medium to dark green appearance shall be designated as "U. S. Combination Green."

(a) In order to allow for variations other than lengths, incident to proper grading and handling, not more than 10 percent, by count, of the stalks in any lot may be below the requirements of U. S. No. 2 grade, but not more than two-fifths of this amount, or 4 percent, shall be allowed for decay: *Provided*, That not more than one-half of this decay, or 2 percent, may be in the branches, or in an advanced stage in the roots. In addition, not more than 5 percent, by count, of the stalks in any lot may not meet the requirements relating to stalk length and not more than 5 percent shall be allowed for stalks having an average midrib length shorter than that specified. No part of any tolerance shall be allowed to reduce, for the lot as a whole, the percentage of U. S. No. 1 required in the combination, but individual containers may have not more than 10 percent less than the percentage of U. S. No. 1 stalks required.

§ 51.563 *U. S. No. 2 grade.* U. S. No. 2 grade shall consist of stalks of celery of similar varietal characteristics which are fairly well developed, which are well trimmed and free from blackheart, decay (except dry type crater rot), and from serious damage caused by crater rot, brown stem, wilting, cutworms, freezing, suckers, growth cracks, hollow

crown, pithy branches, seedstems, dirt, doubles, disease, insects or mechanical or other means. Unless otherwise specified, stalks shall be fairly well blanched. However, any lot of celery which meets all the requirements of this grade except as to blanching may be designated as "U. S. No. 2 Well Blanched," or "U. S. No. 2 Mixed Blanch": *Provided*, That any lot of celery which has a medium to dark green appearance shall be designated as "U. S. No. 2 Green."

(a) Unless otherwise specified, the average midrib length of the outer whorl of branches on stalks in this grade shall be not less than 4 inches.

(b) Unless otherwise specified in connection with the grade, stalks shall be of such length as to extend from one side of the container to within 1½ inches of the opposite side when packed in accordance with the usual commercial practice. Such measurements shall not include the bulge. When stalks fail to meet such requirements, the length shall be specified in terms of even inches only, as "U. S. No. 2—14 inches" or "U. S. No. 2—18 inches," etc., in accordance with the facts.

(c) In order to allow for variations other than lengths, incident to proper grading and handling, not more than 10 percent, by count, of the stalks in any lot may be below the requirements of this grade, but not more than two-fifths of this amount, or 4 percent, shall be allowed for decay: *Provided*, That not more than one-half of this decay, or 2 percent, may be in the branches or in an advanced stage in the roots. In addition, not more than 5 percent, by count, of the stalks in any lot may not meet the requirements relating to stalk length and not more than 5 percent shall be allowed for stalks having an average midrib length shorter than that specified.

UNCLASSIFIED

§ 51.564 *Unclassified.* Unclassified shall consist of stalks of celery which have not been classified in accordance with any of the foregoing grades. The term "unclassified" is not a grade within the meaning of these standards but is provided as a designation to show that no definite grade has been applied to the lot.

COUNT

§ 51.565 *Requirements as to count.* The number of stalks in the container shall be specified by numerical count or in terms of dozens or half dozens. Variations from the number specified shall be allowed as follows: *Provided*, That the lot averages not more than 1 stalk less than the number specified.

| | |
|---|---|
| Less than 50 stalks | 3 stalk variation. |
| 50 to 70 stalks, incl | 4 stalk variation. |
| More than 70 stalks | 5 stalk variation. |

APPLICATION OF TOLERANCES

§ 51.566 *Application of tolerances.* (a) The contents of individual containers in the lot, based on sample inspection, are subject to the following limitations, provided the averages for the entire lot are within the tolerances specified:

(1) When a tolerance is 10 percent or more, individual containers in any lot shall have not more than one and one-half times the tolerance specified, except that at least one defective and one off-sized specimen may be permitted in any container.

(2) When a tolerance is less than 10 percent, individual containers in any lot shall have not more than double the tolerance specified, except that at least one defective and one off-sized specimen may be permitted in any container.

DEFINITIONS

§ 51.567 *Stalk.* "Stalk" means an individual plant.

§ 51.568 *Similar varietal characteristics.* "Similar varietal characteristics" means that the stalks in any container have the same color and character of growth. For example, celery of Giant Pascal and Golden Self Blanching types must not be mixed.

§ 51.569 *Well developed.* "Well developed" means that the outer branches are of good width in relation to the length of midribs and type of celery.

§ 51.570 *Good heart formation.* "Good heart formation" means that the stalk has a reasonable number of stocky inner heart branches that are not longer than one-half the overall length of the stalk.

§ 51.571 *Clean.* "Clean" means that the stalk is practically free from dirt or other foreign materials. Stalks shall be permitted to have a small amount of dirt on the inside of the branches or in the heart branches which cannot be removed by good commercial methods of washing. All celery which is washed may not be sufficiently free from dirt or other foreign materials to be considered clean, while other lots which have not been washed may meet this requirement.

§ 51.572 *Well trimmed.* "Well trimmed" means that the outside coarse and damaged branches have been removed and the root or roots have been so trimmed that the remaining portion of the root or roots does not extend a distance of more than 3 inches below the point of attachment of the outer branches. The actual length of the root or roots shall not be measured but the distance through which they extend below the base of the branches shall be measured when the stalk is resting in an upright position on a solid surface.

§ 51.573 *Fairly compact.* "Fairly compact" means that the branches are fairly close together on the stalk.

§ 51.574 *Damage.* "Damage" means any injury or defect which materially affects the appearance, or the edible or shipping quality. Any one of the following defects, or any combination of defects, the seriousness of which exceeds the maximum allowed for any one defect, shall be considered as damage:

(a) Crater rot, when moist or occurring on more than 2 branches, or when aggregating more than two-thirds of a square inch on the branch or branches.

(b) Cutworms, when the worms are present, or when worm injury occurs on the heart branches, or when occurring on the midrib portion of more than two branches, or when aggregating more than two-thirds of a square inch on the midrib portion of the branch or branches.

(c) Growth cracks, when the stalk has more than two branches affected by growth cracks each of which is more than one-half inch long. Growth cracks of any length affecting not more than two branches shall be permitted.

(d) Pithy branches, when the midribs of more than two branches are pithy. Pithy branches means those which have a distinctly open texture with air spaces in the central portion.

(e) Seedstems, when the stalk has a seedstem the length of which is more than one and one-half times the greatest diameter of the stalk. The greatest diameter of the stalk shall be measured at a point 2 inches above the point of attachment of the outer branches to the root. The length of the seedstems shall be measured from the point of attachment of the outer branches at the base of the seedstem to the top of the actual seedstem, exclusive of any leaves or leaf stems attached to the top of the seedstem.

(f) Dirt, when the stalk is caked with dirt.

(g) Doubles, when not separated and the appearance is serious affected, or if separated and either of the stalks is badly curved, or when the heart branches are not fairly well protected.

§ 51.575 *Fairly well blanched.* "Fairly well blanched" means that the midrib portions of the branches on the stalks are generally of a light greenish to creamy white color.

§ 51.576 *Well blanched.* "Well blanched" means that the midrib portions of the branches on the stalks are generally of a creamy white color.

§ 51.577 *Midrib length.* "Midrib length" of a branch means the distance between the point of attachment to the root and the first node.

§ 51.578 *Length of stalk.* "Length of stalk" means the distance from where the main root is cut off to a point which represents the average length of the longest branches and leaves.

§ 51.579 *Fairly well developed.* "Fairly well developed" means that the outer branches are not spindly or abnormally short and thin.

§ 51.580 *Fairly good heart formation.* "Fairly good heart formation" means that the inner heart branches are of reasonable number, length, and stockiness.

§ 51.581 *Serious damage.* "Serious damage" means any injury or defect which severely affects the appearance, or the edible or shipping quality. Any one of the following defects, or any combination of defects, the seriousness of which exceeds the maximum allowed for any one defect, shall be considered as serious damage:

(a) Crater rot, when moist or occurring on more than 3 branches, or when aggregating more than one square inch on the branch or branches.

(b) Cutworms, when the worms are present, or when worm injury occurs on the heart branches, or when occurring on the midrib portion of more than three branches, or when aggregating more than one square inch on the midrib portion of the branch or branches.

(c) Growth cracks, when the stalk has more than four branches affected by growth cracks each of which is more than ½ inch long.

(d) Pithy branches, when the midribs of more than four branches are pithy, or when the midribs of more than one-half of the outer branches (other than heart branches) are pithy. Pithy branches means those which have a distinctly open texture with air spaces in the central portion.

(e) Seedstems, when the stalk has a seedstem the length of which is more than 3 times the greatest diameter of the stalk. The greatest diameter of the stalk shall be measured at a point 2 inches above the point of attachment of the outer branches to the root. The length of the seedstem shall be measured from the point of attachment of the outer branches at the base of the seedstem to the top of the actual seedstem, exclusive of any leaves or leafstems attached to the top of the seedstem.

(f) Dirt, when the stalk is badly caked with dirt.

(g) Doubles, when the heart branches are not fairly well protected.

SUBPART—UNITED STATES CONSUMER STANDARDS FOR CELERY STALKS

GENERAL

§ 51.595 *General.* These standards do not apply to celery hearts.

GRADES

§ 51.596 *U. S. Grade AA.* U. S. Grade AA shall consist of stalks of celery of similar varietal characteristics, which are well developed, and have good heart formation; which are clean, well trimmed, fairly compact, and are free from blackheart, brown stem, decay (except dry type crater rot), doubles, and from damage caused by crater rot, wilting, cutworms, freezing, suckers, growth cracks, hollow crown, pithy branches, seedstems, rust, cracked stem, other diseases, insects or mechanical or other means.

(a) The average midrib length of the outer whorl of branches on stalks in this grade shall be not less than 7 inches. (See §§ 51.599 and 51.600.)

(b) Incident to proper grading and handling other than for average midrib length of branches not more than 5 percent, by count, of the stalks in any lot may fail to meet the requirements of the grade including not more than 1 percent for stalks affected by moist type decay. In addition, not more than 3 percent, by count, of the stalks in any lot may fail to meet the requirements as to average midrib length of the stalks.

§ 51.597 *U. S. Grade A.* U. S. Grade A shall consist of stalks of celery of similar varietal characteristics which are fairly well developed and have fairly good heart formation; which are clean, well trimmed, and not badly spread, and which are free from blackheart, decay (except dry type crater rot), doubles, and from damage caused by crater rot, brown stem, wilting, cutworms, freezing, suckers, growth cracks, hollow crown, pithy branches, seedstems, rust, cracked stem, other diseases, insects, or mechanical or other means.

(a) The average midrib length of the outer whorl of branches on stalks in this grade shall be not less than 5 inches. (See §§ 51.599 and 51.600.)

(b) Incident to proper grading and handling other than for average midrib length of branches, not more than 5 percent, by count, of the stalks in any lot may fail to meet the requirements of the grade including not more than 1 percent for stalks affected by moist type decay. In addition not more than 3 percent, by count, of the stalks in any lot may fail to meet the requirements as to average midrib length of the stalks.

§ 51.598 *U. S. Grade B.* U. S. Grade B shall consist of stalks of celery of similar varietal characteristics which are fairly well developed, which are clean, well trimmed and free from blackheart, decay (except dry type crater rot), doubles, and from serious damage caused by crater rot, brown stem, wilting, cutworms, freezing, suckers, growth cracks, hollow crown, pithy branches, seedstems, rust, cracked stem, other diseases, insects, or mechanical or other means.

(a) The average midrib length of the outer whorl of branches on stalks in this grade shall be not less than 4 inches. (See §§ 51.599 and 51.600.)

(b) Incident to proper grading and handling other than for average midrib length of branches, not more than 5 percent, by count, of the stalks in any lot may fail to meet the requirements of this grade including not more than 1 percent for stalks affected by moist type decay. In addition not more than 3 percent, by count, of the stalks in any lot may fail to meet the requirements as to average midrib length of the stalks.

BLANCHING; LENGTH OF STALKS

§ 51.599 *Blanching.* There are no requirements in the grades as to blanching. However, celery stalks may be classed as "green" when they have a medium to dark green appearance, fairly "well blanched" when the midrib portions of the branches on the stalks are generally of a light greenish to creamy white color, or "well blanched" when the midrib portions of the branches on the stalks are generally of a creamy white color. Not more than 5 percent of the stalks in any lot may fail to meet the requirements of any of the above classes.

§ 51.600 *Length of stalks.* There are no requirements in the grades as to stalk length. However, when the stalk length is specified it shall be determined by measuring the distance from where the main root is cut off, to a point which represents the average length of the longest branches and leaves expressed in terms of the nearest whole inch. Incident to proper sizing, not more than 5 percent, by count, of the stalks in any lot may fail to meet any specified stalk length.

OFF-GRADE

§ 51.601 *Off-Grade celery.* Celery stalks which fail to meet the requirements of any of the foregoing grades shall be Off-Grade celery stalks.

DEFINITIONS

§ 51.602 *Stalk.* "Stalk" means an individual plant.

§ 51.603 *Similar varietal characteristics.* "Similar varietal characteristics" means that the stalks in any container have the same character of growth. For example, celery of Giant Pascal and Golden Self Blanching types must not be mixed.

§ 51.604 *Well developed.* "Well developed" means that the outer branches are of good width in relation to the length of midribs and type of celery.

§ 51.605 *Good heart formation.* "Good heart formation" means that the stalk has a reasonable number of stocky inner heart branches for its size.

§ 51.606 *Clean.* "Clean" means that the stalk is practically free from dirt or other foreign materials. Stalks shall be permitted to have a small amount of dirt on the inside of the branches or in the heart branches which cannot be removed by good commercial methods of washing.

§ 51.607 *Well trimmed.* "Well trimmed" means that the outside coarse and damaged branches have been removed and that the root or roots have been neatly trimmed to a reasonable length for the size of the stalk.

§ 51.608 *Fairly compact.* "Fairly compact" means that the branches are fairly close together on the stalk.

§ 51.609 *Damage.* "Damage" means any injury or defect which materially affects the appearance, or edible or shipping quality. Any one of the following defects, or any combination of defects, the seriousness of which exceeds the maximum allowed for any one defect shall be considered as damage:

(a) Crater rot, when moist, or when occurring on more than 2 branches, or when aggregating more than two-thirds of a square inch on the branch or branches.

(b) Cutworms, when the worms are present, or when worm injury occurs on the heart branches, or when occurring on the midrib portion of more than two branches, or when aggregating more than one-half of a square inch on the midrib portion of the branch or branches.

(c) Growth cracks, when the stalk has more than one branch affected by growth cracks any of which are more than one-half inch long.

(d) Pithy branches, when the midribs of more than one branch are pithy. Pithy branches means those which have a distinctly open texture with air spaces in the central portion.

(e) Seedstems, when the stalk has a seedstem the length of which is more than one and one-half times the greatest diameter of the stalk. The greatest diameter of the stalk shall be measured at a point two inches above the point of attachment of the outer branches to the root. The length of the seedstem shall be measured from the point of attachment of the outer branches at the base of the seedstem to the top of the actual seedstem, exclusive of any leaves or leaf stems attached to the top of the seedstem.

(f) Rust, when there are more than five hair-like lines of any length on one or more heart branches, or when there is more than one square inch in the aggregate on branches other than heart branches.

(g) Cracked stem, when there is more than one-half of a square inch in the aggregate on any or all branches.

§ 51.610 *Midrib length.* "Midrib length" of a branch means the distance between the point of attachment to the root and the first node.

§ 51.611 *Fairly well developed.* "Fairly well developed" means that the outer branches are not spindly or abnormally short and thin.

§ 51.612 *Fairly good heart formation.* "Fairly good heart formation" means that the stalk has a moderate number of fairly stocky inner heart branches for its size.

§ 51.613 *Serious damage.* "Serious damage" means any injury or defect which seriously affects the appearance, or edible or shipping quality. Any one of the following defects, or any combination of defects, the seriousness of which exceeds the maximum allowed for any one defect, shall be considered as serious damage:

(a) Crater rot, when moist, or when occurring on more than three branches, or when aggregating more than one square inch on the branch or branches.

(b) Cutworms, when the worms are present, or when worm injury occurs on the heart branches, or when occurring on the midrib portion of more than three branches, or when aggregating more than one square inch on the midrib portion of the branch or branches.

(c) Growth cracks, when the stalk has more than two branches affected by growth cracks any of which are more than one-half inch long.

(d) Pithy branches, when the midribs of more than two branches are pithy. Pithy branches means those which have a distinctly open texture with air spaces in the central portion.

(e) Seedstems, when the stalk has a seedstem the length of which is more than three times the greatest diameter of the stalk. The greatest diameter of the stalk shall be measured at a point two inches above the point of attachment of the outer branches to the root. The length of the seedstem shall be measured from the point of attachment of the outer branches at the base of the seedstem to the top of the actual seedstem, exclusive of any leaves or leafstems attached to the top of the seedstem.

(f) Rust, when there are more than fifteen hair-like lines of any length on one or more heart branches, or when there are more than one and one-half square inches in the aggregate on branches other than heart branches.

(g) Cracked stem, when there is more than one square inch in the aggregate on any or all branches.

## SUBPART—UNITED STATES STANDARDS FOR GRAPEFRUIT

### GENERAL

§ 51.620 *General.* These standards do not apply to Florida, or to California and Arizona grapefruit for which separate United States Standards are issued.

### GRADES

§ 51.621 *U. S. Fancy.* U. S. Fancy shall consist of grapefruit of similar varietal characteristics which are well colored, firm, well formed, mature, and of smooth texture; free from ammoniation, bird pecks, bruises, buckskin, cuts which are not healed, decay, growth cracks, scab, sprayburn, and from injury by green spots or oil spots, pitting, scale, scars, thorn scratches, and from damage caused by dirt or other foreign materials, dryness or mushy condition, sprouting, sunburn, disease, insects, or mechanical or other means.

In this grade not more than one-tenth of the surface in the aggregate may be affected with discoloration. (See § 51.634.)

§ 51.622 *U. S. No. 1.* U. S. No. 1 shall consist of grapefruit of similar varietal characteristics which are fairly well colored, firm, fairly well formed, mature, and of fairly smooth texture; free from bruises, cuts which are not healed, decay, growth cracks, sprayburn, and from damage caused by ammoniation, bird pecks, buckskin, dirt or other foreign materials, dryness or mushy condition, green spots or oil spots, pitting, scab, scale, scars, sprouting, sunburn, thorn scratches, disease, insects or mechanical or other means.

In this grade not more than one-half of the surface in the aggregate, may be affected with discoloration. (See § 51.635.)

§ 51.623 *U. S. No. 1 Bright.* The requirements for this grade are the same as for U. S. No. 1 except that no fruit may have more than one-tenth of its surface in the aggregate affected with discoloration. (See § 51.635.)

§ 51.624 *U. S. No. 1 Golden.* The requirements for this grade are the same as for U. S. No. 1 except that not more than 30 percent, by count, of the fruits shall have in excess of one-third of the surface in the aggregate affected with discoloration. (See § 51.636.)

§ 51.625 *U. S. No. 1 Bronze.* The requirements for this grade are the same as for U. S. No. 1 except that more than 30 percent but not more than 75 percent, by count, of the fruits shall have in excess of one-third of the surface in the aggregate affected with discoloration: *Provided*, That when the predominating discoloration on each of 75 percent or more, by count, of the fruits is caused by rust mite, all fruits may have in excess of one-third of the surface affected with discoloration. (See § 51.636.)

§ 51.626 *U. S. No. 1 Russet.* The requirements for this grade are the same as for U. S. No. 1 except that more than 75 percent, by count, of the fruits shall have in excess of one-third of the surface in the aggregate affected with discoloration. (See § 51.637.)

§ 51.627 *U. S. No. 2.* U. S. No. 2 shall consist of grapefruit of similar varietal characteristics, which are mature, fairly firm, not more than slightly misshapen or slightly rough, and which are free from bruises, cuts which are not healed, decay, growth cracks, and are free from serious damage caused by ammoniation, bird pecks, buckskin, dirt or other foreign materials, dryness or mushy condition, green spots or oil spots, pitting, scab, scale, scars, sprayburn, sprouting, sunburn, thorn scratches, disease, insects, mechanical or other means.

(a) Each grapefruit may be only slightly colored.

(b) Not more than two-thirds of the surface in the aggregate, may be affected with discoloration. (See § 51.638.)

§ 51.628 *U. S. No. 2 Bright.* The requirements for this grade are the same as for U. S. No. 2 except that no fruit may have more than one-tenth of its surface in the aggregate affected with discoloration. (See § 51.635.)

§ 51.629 *U. S. No. 2 Russet.* The requirements for this grade are the same as for U. S. No. 2 except that more than 10 percent, by count, of the fruits shall have in excess of two-thirds of the surface in the aggregate affected with discoloration. (See § 51.639.)

§ 51.630 *U. S. Combination grade.* Any lot of grapefruit may be designated "U. S. Combination" when not less than 40 percent, by count, of the fruits in each container meet the requirements of U. S. No. 1 grade and the remainder U. S. No. 2 grade. (See § 51.640.)

§ 51.631 *U. S. Combination Russet grade.* Any lot of grapefruit may be designated "U. S. Combination Russet" when not less than 40 percent, by count, of the fruits in each container meet the requirements of U. S. No. 1 grade and the remainder U. S. No. 2 grade except that in this combination grade each fruit shall have in excess of one-third of the surface in the aggregate affected with discoloration. (See § 51.641.)

### UNCLASSIFIED

§ 51.632 *Unclassified.* "Unclassified" shall consist of grapefruit which has not been classified in accordance with any of the foregoing grades. The term "unclassified" is not a grade within the meaning of these standards but is provided as a designation to show that no definite grade has been applied to the lot.

### TOLERANCES

§ 51.633 *Tolerances.* In order to allow for variations incident to proper grading and handling in each of the foregoing grades, the tolerances set forth in §§ 51.634 to 51.641 are provided as specified.

§ 51.634 *U. S. Fancy.* Not more than 10 percent, by count, of the fruits in any lot may be below the requirements of this grade, but not more than one-half of this tolerance, or 5 percent, shall be allowed for very serious damage, and not more than one-twentieth of the tolerance, or one-half of one percent, shall be allowed for decay at shipping point: *Provided*, That a total tolerance of not more than 3 percent shall be allowed for decay en route or at destination. None of the foregoing tolerances shall apply to wormy fruit.

§ 51.635 *U. S. No. 1, U. S. No. 1 Bright, U. S. No. 2 Bright grades.* Not more than 10 percent, by count, of the fruits in any lot may be below the requirements of the grade other than for discoloration but not more than one-half of this tolerance, or 5 percent, shall be allowed for very serious damage, and not more than one-twentieth of the tolerance, or one-half of one percent, shall be allowed for decay at shipping point: *Provided*, That a total tolerance of not more than 3 percent shall be allowed for decay en route or at destination. In addition, not more than 10 percent, by count, of the fruits in any lot may not meet the requirements relating to discoloration. None of the foregoing tolerances shall apply to wormy fruit.

§ 51.636 *U. S. No. 1 Golden and U. S. No. 1 Bronze grades.* Not more than 10 percent, by count, of the fruits in any lot may be below the requirements of the grade, but not more than one-half of this tolerance, or 5 percent, shall be allowed for very serious damage, and not more than one-twentieth of the tolerance, or one half of one percent, shall be allowed for decay at shipping point: *Provided*, That a total tolerance of not more than 3 percent shall be allowed for decay en route or at destination. No part of any tolerance shall be allowed to reduce or to increase the percentage of fruits having in excess of one-third of the surface in the aggregate affected with discoloration which is required in the grade, but individual containers may vary not more than 10 percent from the percentage required: *Provided*, That the entire lot averages within the percentage specified. None of the foregoing tolerances shall apply to wormy fruit.

§ 51.637 *U. S. No. 1 Russet.* Not more than 10 percent, by count, of the fruits in any lot may be below the requirements of the grade but not more than one-half of this tolerance, or 5 percent, shall be allowed for very serious damage, and not more than one-twentieth of the tolerance, or one-half of one percent, shall be allowed for decay at shipping point: *Provided*, That a total tolerance of not more than 3 percent shall be allowed for decay en route or at destination. No part of any tolerance shall be allowed to reduce the percentage of fruits having in excess of one-third of the surface in the aggregate affected with discoloration which is required in this grade, but individual containers may have not more than 10 percent less than the percentage required: *Provided*, That the entire lot averages within the percentage specified. None of the foregoing tolerances shall apply to wormy fruit.

§ 51.638 *U. S. No. 2.* Not more than 10 percent, by count, of the fruits in any lot may be below the requirements of this grade other than for discoloration but not more than one-half of this tolerance, or 5 percent, shall be allowed for very serious damage other than by dryness or mushy condition, and not more than one-twentieth of the tolerance, or one-half of one percent, shall be allowed for decay at shipping point: *Provided*, That a total tolerance of not more than 3 percent shall be allowed for decay en route or at destination. In addition, not more than 10 percent, by count, of the fruits in any lot may not meet the requirements relating to discoloration. None of the foregoing tolerances shall apply to wormy fruit.

§ 51.639 *U. S. No. 2 Russet.* Not more than 10 percent, by count, of the fruits in any lot may be below the requirements of this grade but not more than one-half of this tolerance, or 5 percent, shall be allowed for very serious damage other than by dryness or mushy condition, and not more than one-twentieth of the tolerance, or one-half of one percent, shall be allowed for decay at shipping point: *Provided*, That a total tolerance of not more than 3 percent shall be allowed for decay en route or at destination. No part of any tolerance shall be allowed to reduce the percentage of fruits having in excess of two-thirds of the surface in the aggregate affected with discoloration which is required in this grade, but individual containers may have not more than 10 percent less than the percentage required: *Provided*, That the entire lot averages within the percentage specified. None of the foregoing tolerances shall apply to wormy fruit.

§ 51.640 *U. S. Combination grade.* Not more than 10 percent, by count, of the fruits in any lot may be below the requirements of this grade other than for discoloration but not more than one-half of this tolerance, or 5 percent, shall be allowed for very serious damage other than by dryness or mushy condition, and not more than one-twentieth of the tolerance, or one-half of one percent, shall be allowed for decay at shipping point: *Provided*, That a total tolerance of not more than 3 percent shall be allowed for decay en route or at destination. In addition, not more than 10 percent, by count, of the fruits in any lot may have less than one-third discoloration. No part of any tolerance shall be allowed to reduce, for the lot as a whole, the percentage of U. S. No. 1 except for discoloration required in the combination, but individual containers may have not more than a total of 10 percent less than the percentage of U. S. No. 1 except for discoloration required or specified: *Provided*, That the entire lot averages within the percentage specified. None of the foregoing tolerances shall apply to wormy fruit.

### APPLICATION OF TOLERANCES

§ 51.642 *Application of tolerances to individual packages.* (a) The contents of individual packages in the lot, based on sample inspection, are subject to the following limitations: *Provided*, That the averages for the entire lot are within the tolerances specified for the grade.

(b) For packages which contain more than 25 pounds, and a tolerance of 10 percent or more is provided, individual packages in any lot shall have not more than one and one-half times the tolerance specified. For packages which contain more than 25 pounds and a tolerance of less than 10 percent is provided, individual packages in any lot shall have not more than double the tolerance specified, except that at least one decayed or very seriously damaged fruit may be permitted in any package.

(c) For packages which contain 25 pounds or less, individual packages in any lot are not restricted as to the percentage of defects: *Provided*, That not more than one grapefruit which is seriously damaged by dryness or mushy condition or very seriously damaged by other means may be permitted in any package and in addition, en route or at destination not more than 10 percent of the packages may have more than one decayed fruit.

### STANDARD PACK

§ 51.643 *Standard pack for grapefruit.* (a) Fruits shall be fairly uniform in size, unless specified as uniform in size, and when packed in boxes, shall be arranged according to the approved and recognized methods. Each wrapped fruit shall be fairly well wrapped.

(b) All packages shall be tightly packed and well filled but the contents shall not show excessive or unnecessary bruising because of overfilled packages.

(c) When packed in standard nailed boxes, each container shall show a minimum bulge of 2 inches, except that boxes packed with grapefruit of a size 80 or smaller need only show a bulge of 1½ inches.

(d) "Fairly uniform in size" means that not more than a total of 10 percent, by count, of the fruits in any container is outside the range given below for various packs:

[Diameter in inches]

| Pack | Minimum | Maximum |
|---|---|---|
| 36's | 5 | 5 9/16 |
| 46's | 4 11/16 | 5 4/16 |
| 54's | 4 9/16 | 4 13/16 |
| 64's | 4 4/16 | 4 12/16 |
| 70's | 3 15/16 | 4 5/16 |
| 80's | 3 15/16 | 4 5/16 |
| 96's | 3 8/16 | 4 3/16 |
| 112's | 3 7/16 | 4 |
| 126's | 3 5/16 | 3 15/16 |

(e) "Uniform in size" means that not more than 10 percent, by count, of the fruits in any container vary more than the following amounts:

64 size and smaller—not more than 6/16 inch in diameter.

54 size and larger—not more than 9/16 inch in diameter.

(f) In order to allow for variations, other than sizing, incident to proper packing, not more than 5 percent of the packages in any lot may not meet the requirements of standard pack.

DEFINITIONS

§ 51.644 *Similar varietal characteristics.* "Similar varietal characteristics" means that the fruits in any container are similar in color and shape.

§ 51.645 *Well colored.* "Well colored" means that the fruit is yellow in color with practically no trace of green color.

§ 51.646 *Firm.* "Firm" means that the fruit is not soft, or noticeably wilted or flabby, and the skin is not spongy or puffy.

§ 51.647 *Well formed.* "Well formed" means that the fruit has the shape characteristic of the variety.

§ 51.648 *Smooth texture.* "Smooth texture" means that the skin is thin and smooth for the variety and size of the fruit.

§ 51.649 *Injury.* "Injury" means any defect or blemish which more than slightly affects the appearance, or edible or shipping quality of the fruit. Any one of the following defects, or any combination of defects, the seriousness of which exceeds the maximum allowed for any one defect shall be considered as injury.

(a) Green spots or oil spots, when appreciably affecting the appearance of the individual fruit.

(b) Scale, when more than a few adjacent to the "button" at stem end, or when more than 6 scattered on the other portions of the fruit.

(c) Scars which are depressed, not smooth, or which detract from the appearance of the fruit to a greater extent than the maximum amount of discoloration allowed in the grade.

(d) Thorn scratches, when the injury is not slight, not well healed, or more unsightly than discoloration allowed in the grade.

§ 51.650 *Discoloration.* "Discoloration" means russeting of a light shade of golden brown caused by rust mite or other means. Lighter shades of discoloration caused by scars or other means may be allowed on a greater area, or darker shades may be allowed on a lesser area, provided no discoloration caused by melanose or other means may affect the appearance of the fruit to a greater extent than the shade and amount of discoloration allowed for the grade.

§ 51.651 *Fairly well colored.* "Fairly well colored" means that except for one inch in the aggregate of green color, the yellow color predominates over the green color on that part of the fruit which is not discolored.

§ 51.652 *Fairly well formed.* "Fairly well formed" means that the fruit may not have the shape characteristic of the variety but is not elongated or pointed, or otherwise deformed.

§ 51.653 *Fairly smooth texture.* "Fairly smooth texture" means that the skin is fairly thin and not coarse for the variety and size of the fruit.

§ 51.654 *Damage.* "Damage" means any defect or injury which materially affects the appearance, or edible or shipping quality of the fruit. Any one of the following defects, or any combination of defects, the seriousness of which exceeds the maximum allowed for any one defect shall be considered as damage:

(a) Ammoniation, when not occurring as light speck type similar to melanose.

(b) Dryness or mushy condition when affecting all segments more than one-fourth inch at the stem end, or more than the equivalent of this amount, by volume, when occurring in other portions of the fruit.

(c) Green spots or oil spots, when materially affecting the appearance of the individual fruit.

(d) Scab, when it cannot be classed as discoloration, or appreciably affects shape or texture.

(e) Scale, when it materially affects the appearance of the fruit.

(f) Scars which are deep.

(g) Scars which are shallow or fairly shallow and detract from the appearance of the fruit to a greater extent than the amount of discoloration allowed in the grade.

(h) Scars which are not smooth.

(i) Sunburn, when the area affected exceeds 25 percent of the fruit surface, or when the skin is appreciably flattened, dry, darkened, or hard.

(j) Thorn scratches, when the injury is not well healed, or concentrated light colored thorn injury which has caused an area of more than an average of one-fourth inch in diameter of the skin to become hard, or slight scratches when light colored and concentrated and averaging more than 1 inch in diameter, or dark or scattered thorn injury which detracts from the appearance of the fruit to a greater extent than the amounts specified above.

§ 51.655 *Fairly firm.* "Fairly firm" means that the fruit may be slightly soft, but not bruised, and the skin is not spongy or puffy.

§ 51.656 *Slightly misshapen.* "Slightly misshapen" means that the fruit is not of the shape characteristic of the variety but is not appreciably elongated or pointed, or otherwise deformed.

§ 51.657 *Slightly rough texture.* "Slightly rough texture" means that the skin is not of smooth texture but is not excessively thick or materially ridged, grooved, or wrinkled.

§ 51.658 *Serious damage.* "Serious damage" means any defect or injury which seriously affects the appearance, or edible or shipping quality of the fruit. Any one of the following defects, or any combination of defects, the seriousness of which exceeds the maximum allowed for any one defect shall be considered as serious damage:

(a) Ammoniation, when scars are cracked, or when dark and aggregating more than three-fourths inch in diameter, or when light colored and aggregating more than 1¼ inches in diameter.

(b) Buckskin, when aggregating more than 25 percent of the fruit surface or the fruit texture is seriously affected.

(c) Dryness or mushy condition, when affecting all segments more than one-half inch at the stem end, or more than the equivalent of this amount, by volume, when occurring in other portions of the fruit.

(d) Green spots or oil spots, when seriously affecting the appearance of the individual fruit.

(e) Scab, when it cannot be classed as discoloration, or when materially affecting shape or texture.

(f) Scale, when it seriously affects the appearance of the individual fruit.

(g) Scars which are very deep.

(h) Scars which are not very deep but which detract from the appearance of the fruit to a greater extent than the amount of discoloration allowed in the grade.

(i) Scars which are not fairly smooth.

(j) Sprayburn which seriously affects the appearance of the fruit or is hard, or when more than 1¼ inches in diameter in the aggregate has a light brown discoloration.

(k) Sunburn which affects more than one-third of the fruit surface, or is hard, or the fruit is decidedly one-sided or when more than 1¼ inches in diameter in the aggregate has a light brown discoloration.

(l) Thorn scratches, when the injury is not well healed, or concentrated light colored thorn injury which has caused an area of more than an average of one-half inch in diameter of the skin to become hard, or slight scratches when light colored and concentrated, averaging more than 1½ inches in diameter, or dark or scattered thorn injury which detracts from the appearance of the fruit to a greater extent than the amounts specified above.

§ 51.659 *Slightly colored.* "Slightly colored" means that except for two inches in the aggregate of green color, the portion of the fruit surface which it not discolored shows some yellow color.

§ 51.660 *Very serious damage.* "Very serious damage" means any defect or injury which very seriously affects the appearance, or edible or shipping quality of the fruit. Any one of the following defects, or any combination of defects, the seriousness of which exceeds the maximum allowed for any one defect shall be considered as very serious damage:

(a) Growth cracks that are seriously weakened, gummy or not healed.

(b) Ammoniation, when aggregating more than 2 inches in diameter, or which has caused serious cracks.

(c) Bird pecks, when not healed.

(d) Caked melanose, when more than 25 percent in the aggregate of the surface of the fruit is caked.

(e) Buckskin, when rough and aggregating more than 50 percent of the surface of the fruit.

(f) Dryness or mushy condition, when affecting all segments more than one-half inch at the stem end, or more than the equivalent of this amount, by volume, when occurring in other portions of the fruit.

(g) Scab, when aggregating more than 25 percent of the surface of the fruit.

(h) Scale, when covering more than 20 percent of the surface of the fruit.

(i) Sprayburn, when seriously affecting more than one-third of the fruit surface.

(j) Sunburn, when seriously affecting more than one-third of the fruit surface.

(k) Thorn punctures, when not healed or the fruit is seriously weakened.

SUBPART—UNITED STATES STANDARDS FOR ORANGES

GENERAL

§ 51.680 *General.* These standards apply only to the common or sweet orange group and varieties belonging to the Mandarin Group, except tangerines. These standards do not apply to tangerines or to Florida, or to California and Arizona oranges for which separate U. S. Standards are issued.

GRADES

§ 51.681 *U. S. Fancy.* U. S. Fancy shall consist of oranges or similar varietal characteristics which are well colored, firm, well formed, mature, and of smooth texture; free from ammoniation, bird pecks, bruises, buckskin, creasing, cuts which are not healed, decay, growth cracks, scabs, split navels, sprayburn, and undeveloped or sunken segments, from injury by green spots or oil spots, pitting, rough and excessively wide or protruding navels, scale, scars, thorn scratches, and from damage caused by dirt or other foreign materials, dryness or mushy condition, sprouting, sunburn, riciness or woodiness of the flesh, disease, insects, or mechanical or other means.

(a) In this grade not more than one-tenth of the surface, in the aggregate, may be affected with discoloration.

(b) See § 51.695.

(c) If any lot of U. S. Fancy fruit also meets the internal specifications of "U. S Grade AA Juice (Double A)" or "U. S. Grade A Juice" it may be so specified in accordance with the facts. (See §§ 51.725–51.728.)

§ 51.682 *U. S. No. 1.* U. S. No. 1 shall consist of oranges of similar varietal characteristics which are firm, well formed, mature, and of fairly smooth texture; free from bruises, cuts which are not healed, decay, growth cracks, sprayburn, undeveloped or sunken segments, and from damage caused by ammoniation, bird pecks, buckskin, creasing, dirt or other foreign materials, dryness or mushy condition, green spots or oil spots, pitting, scab, scale, scars, split or rough or protruding navels, sprouting, sunburn, thorn scratches, riciness or woodiness of the flesh, disease, insects or mechanical or other means.

(a) Oranges of the early and midseason varieties shall be fairly well colored.

(b) With respect to Valencia and other late varieties, not less than 50 percent, by count, of the oranges shall be fairly well colored and the remainder reasonably well colored.

(c) In this grade not more than one-third of the surface, in the aggregate, may be affected with discoloration.

(d) See tolerances for defects (§ 51.696).

(e) If any lot of U. S. No. 1 fruit also meets the internal specifications of "U. S. Grade AA Juice (Double A)" or "U. S. Grade A Juice" it may be so specified in accordance with the facts. (See §§ 51.725–51.728.)

§ 51.683 *U. S. No. 1 Bright.* The requirements for this grade are the same as for U. S. No. 1 except that no fruit may have more than one-tenth of its surface, in the aggregate, affected with discoloration.

(a) See tolerances for defects (§ 51.697).

(b) If any lot of U. S. No. 1 Bright fruit also meets the internal specifications of "U. S. Grade AA Juice (Double A)" or "U. S. Grade A Juice" it may be so specified in accordance with the facts. (See §§ 51.725–51.728.)

§ 51.684 *U. S. No. 1 Golden.* The requirements for this grade are the same as for U. S. No. 1 except that not more than 30 percent, by count, of the fruit shall have in excess of one-third of the surface, in the aggregate, affected with discoloration.

(a) See tolerances for defects (§ 51.693).

(b) If any lot of U. S. No. 1 Golden fruit also meets the internal specifications of "U. S. Grade AA Juice (Double A)" or "U. S. Grade A Juice" it may be so specified in accordance with the facts. (See §§ 51.725–51.728.)

§ 51.685 *U. S. No. 1 Bronze.* The requirements for this grade are the same as for U. S. No. 1 except that more than 30 percent but not more than 75 percent, by count, of the fruit shall have in excess of one-third of the surface, in the aggregate, affected with discoloration: *Provided,* That when the predominating discoloration on each of 75 percent or more, by count, of the fruit is caused by rust mite, all fruit may have in excess of one-third of the surface affected with discoloration.

(a) See tolerances for defects (§ 51.698).

(b) If any lot of U. S. No. 1 Bronze fruit also meets the internal specifications of "U. S. Grade AA Juice (Double A)" or "U. S. Grade A Juice" it may be so specified in accordance with the facts. (See §§ 51.725–51.728.)

§ 51.686 *U. S. No. 1 Russet.* The requirements for this grade are the same as for U. S. No. 1 except that more than 75 percent, by count, of the fruit shall have in excess of one-third of the surface, in the aggregate, affected with discoloration.

(a) See tolerances for defects (§ 51.699).

(b) If any lot of U. S. No. 1 Russet Fruit also meets the internal specifications of "U. S. Grade AA Juice (Double A)" or "U. S. Grade A Juice" it may be so specified in accordance with the facts. (See §§ 51.725–51.728.)

§ 51.687 *U. S. No. 2.* U. S. No. 2 shall consist of oranges of similar varietal characteristics which are mature, fairly firm, not more than slightly misshapen, not more than slightly rough, and which are free from bruises, cuts which are not healed, decay, growth cracks, and are free from serious damage caused by ammoniation, bird pecks, buckskin, creasing, dirt or other foreign materials, dryness or mushy condition, green spots or oil spots, pitting, scab, scale, scars, split or rough or protruding navels, sprayburn, sprouting, sunburn, thorn scratches, undeveloped or sunken segments, riciness or woodiness of the flesh, disease, insects, mechanical or other means.

(a) Each orange of this grade shall be reasonably well colored.

(b) In this grade not more than one-half of the surface, in the aggregate, may be affected with discoloration.

(c) See tolerances for defects (§ 51.700).

(d) If any lot of U. S. No. 2 fruit also meets the internal specifications of "U. S. Grade AA Juice (Double A)" or "U. S. Grade A Juice" it may be so specified in accordance with the facts. (See §§ 51.725–51.728.)

§ 51.688 *U. S. No. 2 Bright.* The requirements for this grade are the same as for U. S. No. 2 except that no fruit may have more than one-tenth of its surface, in the aggregate, affected with discoloration.

(a) See tolerances for defects (§ 51.697).

(b) If any lot of U. S. No. 2 Bright fruit also meets the internal specifications of "U. S. Grade AA Juice (Double A)" or "U. S. Grade A Juice" it may be so specified in accordance with the facts. (See §§ 51.725–51.728.)

§ 51.689 *U. S. No. 2 Russet.* The requirements for this grade are the same as for U. S. No. 2 except that more than 10 percent, by count, of the fruit shall have in excess of one-half of the surface, in the aggregate, affected with discoloration.

(a) See tolerances for defects (§ 51.701).

(b) If any lot of U. S. No. 2 Russet fruit also meets the internal specifications of "U. S. Grade AA Juice (Double A)" or "U. S. Grade A Juice" it may be so specified in accordance with the facts. (See §§ 51.725–51.728.)

§ 51.690 *U. S. No. 3.* U. S. No. 3 shall consist of oranges of similar varietal characteristics which are mature; which may be misshapen, slightly spongy, rough but not seriously lumpy for the variety or seriously cracked; which are free from cuts which are not healed and from decay; and from very serious damage caused by bruises, growth cracks, ammoniation, bird pecks, caked melanose, buckskin, creasing, dryness or mushy condition, pitting, scab, scale, split navels, sprayburn, sprouting, sunburn, thorn punctures, riciness or woodiness of the flesh, disease, insects, mechanical or other means.

(a) Each fruit may be poorly colored but not more than 25 percent of the sur-

face of each fruit may be of a solid dark green color.

(b) See tolerances for defects (§ 51.702).

(c) If any lot of U. S. No. 3 fruit also meets the internal specification of "U. S. Grade AA Juice (Double A)" or "U. S. Grade A Juice" it may be so specified in accordance with the facts. (See §§ 51.725–51.728.)

§ 51.691 *U. S. Combination.* Any lot of oranges may be designated "U. S. Combination" when not less than 50 percent, by count, of the fruit in each container meets the requirements of U. S. No. 1 grade, and each of the remainder of the oranges meets the requirements of U. S. No. 2 grade, except that the fruit shall meet the following requirements for color: In this grade, the U. S. No. 1 oranges shall be fairly well colored and the U. S. No. 2 oranges shall be reasonably well colored.

(a) See tolerances for defects (§ 51.703).

(b) If any lot of U. S. Combination fruit also meets the internal specifications of "U. S. Grade AA Juice (Double A)" or "U. S. Grade A Juice" it may be so specified in accordance with the facts. (See §§ 51.725–51.728.)

§ 51.692 *U. S. Combination Russet.* Any lot of oranges may be designated "U. S. Combination Russet" when not less than 50 percent, by count, of the fruit in each container meets the requirements of U. S. No. 1 grade and each of the remainder of the oranges meets the requirements of the U. S. No. 2 grade: *Provided*, That all oranges in the lot shall have in excess of one-third of the surface, in the aggregate, affected with discoloration, and meet the following requirements for color: In this grade, the U. S. No. 1 oranges shall be fairly well colored and the U. S. No. 2 oranges shall be reasonably well colored.

(a) See tolerances for defects (§ 51.704).

(b) If any lot of U. S. Combination Russet fruit also meets the internal specifications of "U. S. Grade AA Juice (Double A)" or "U. S. Grade A Juice" it may be so specified in accordance with the facts. (See §§ 51.725–51.728.)

UNCLASSIFIED

§ 51.693 *Unclassified.* "Unclassified" shall consist of oranges which have not been classified in accordance with any of the foregoing grades. The term "Unclassified" is not a grade within the meaning of these standards but is provided as a designation to show that no definite grade has been applied to the lot.

TOLERANCES

§ 51.694 *Tolerances for defects.* In order to allow for variations incident to proper grading and handling in each of the foregoing grades, the tolerances set forth in §§ 51.695 to 51.704 are provided as specified.

§ 51.695 *U. S. Fancy grade.* Not more than 10 percent, by count, of the fruits in any lot may be below the requirements of this grade, but not more than one-half of this tolerance, or 5 percent, shall be allowed for very serious damage, and not more than one-twentieth of the tolerance, or one-half of 1 percent, shall be allowed for decay at shipping point: *Provided*, That a total tolerance of not more than 3 percent shall be allowed for decay en route or at destination. None of the foregoing tolerances shall apply to wormy fruit.

§ 51.696 *U. S. No. 1 grade.* Not more than 10 percent, by count, of the fruits in any lot may be below the requirements of this grade other than for discoloration but not more than one-half of this tolerance, or 5 percent, shall be allowed for very serious damage, and not more than one-twentieth of the tolerance, or one-half of 1 percent, shall be allowed for decay at shipping point: *Provided*, That a total tolerance of not more than 3 percent shall be allowed for decay en route or at destination. In addition, not more than 20 percent, by count, of the fruits in any lot may have discoloration in excess of one-third of the fruit surface, but not more than one-fourth of this tolerance, or 5 percent, shall be allowed for discoloration in excess of one-half of the fruit surface. None of the foregoing tolerances shall apply to wormy fruit.

§ 51.697 *U. S. No. 1 Bright and U. S. No. 2 Bright grades.* Not more than 10 percent, by count, of the fruits in any lot may be below the requirements of the grade other than for discoloration but not more than one-half of this tolerance, or 5 percent, shall be allowed for very serious damage, and not more than one-twentieth of the tolerance, or one-half of one percent, shall be allowed for decay at shipping point: *Provided*, That a total tolerance of not more than 3 percent shall be allowed for decay en route or at destination. In addition, not more than 10 percent, by count, of the fruits in any lot may not meet the requirements relating to discoloration. None of the foregoing tolerances shall apply to wormy fruit.

§ 51.698 *U. S. No. 1 Golden and U. S. No. 1 Bronze grades.* Not more than 10 percent, by count, of the fruits in any lot may be below the requirements of the grade, but not more than one-half of this tolerance, or 5 percent, shall be allowed for very serious damage, and not more than one-twentieth of the tolerance, or one-half of one percent, shall be allowed for decay at shipping point: *Provided*, That a total tolerance of not more than 3 percent shall be allowed for decay, enroute or at destination. No part of any tolerance shall be allowed to reduce or to increase the percentage of fruits having in excess of one-third of the surface, in the aggregate, affected with discoloration which is required in the grade, but individual containers may vary not more than 10 percent from the percentage required: *Provided*, That the entire lot averages within the percentage specified. None of the foregoing tolerances shall apply to wormy fruit.

§ 51.699 *U. S. No. 1 Russet grade.* Not more than 10 percent, by count, of the fruits in any lot may be below the requirements of this grade but not more than one-half of this tolerance, or 5 percent, shall be allowed for very serious damage, and not more than one-twentieth of the tolerance, or one-half of one percent, shall be allowed for decay at shipping point: *Provided*, That a total tolerance of not more than 3 percent shall be allowed for decay en route or at destination. No part of any tolerance shall be allowed to reduce the percentage of fruits having in excess of one-third of the surface, in the aggregate, affected with discoloration which is required in this grade, but individual containers may have not more than 10 percent less than the percentage required: *Provided*, That the entire lot averages within the percentage specified. None of the foregoing tolerances shall apply to wormy fruit.

§ 51.700 *U. S. No. 2 grade.* Not more than 10 percent, by count, of the fruits in any lot may be below the requirements of this grade other than for discoloration but not more than one-half of this tolerance, or 5 percent, shall be allowed for very serious damage other than by dryness or mushy condition, and not more than one-twentieth of the tolerance, or one-half of one percent, shall be allowed for decay at shipping point: *Provided*, That a total tolerance of not more than 3 percent shall be allowed for decay en route or at destination. In addition, not more than 10 percent, by count, of the fruits in any lot may not meet the requirements relating to discoloration. None of the foregoing tolerances shall apply to wormy fruit.

§ 51.701 *U. S. No. 2 Russet grade.* Not more than 10 percent, by count, of the fruits in any lot may be below the requirements of this grade but not more than one-half of this tolerance, or 5 percent, shall be allowed for very serious damage other than by dryness or mushy condition, and not more than one-twentieth of the tolerance, or one-half of one percent, shall be allowed for decay at shipping point: *Provided*, That a total tolerance of not more than 3 percent shall be allowed for decay en route or at destination. No part of any tolerance shall be allowed to reduce the percentage of fruits having in excess of one-third of the surface, in the aggregate, affected with discoloration which is required in this grade, but individual containers may have not more than 10 percent less than the percentage required: *Provided*, That the entire lot averages within the percentage specified. None of the foregoing tolerances shall apply to wormy fruit.

§ 51.702 *U. S. No. 3 grade.* Not more than 15 percent, by count, of the fruits in any lot may be below the requirements of this grade but not more than one-third of this tolerance, or 5 percent, shall be allowed for defects other than dryness or mushy condition, and not more than one-fifth of this amount, or 1 percent, shall be allowed for decay at shipping point: *Provided*, That a total tolerance of not more than 3 percent shall be allowed for decay en route or at destination. None of the foregoing tolerances shall apply to wormy fruit.

§ 51.703 *U. S. Combination grade.* Not more than 10 percent, by count, of the fruits in any lot may be below the requirements of this grade other than for discoloration but not more than one-half of this tolerance, or 5 percent, shall be allowed for very serious damage other than by dryness or mushy condition, and not more than one-twentieth of the tolerance, or one-half of one percent, shall be allowed for decay at shipping point: *Provided*, That a total tolerance of not more than 3 percent shall be allowed for decay en route or at destination. No part of any tolerance shall be allowed to reduce the percentage of U. S. No. 1 required in the combination, but the individual containers may have not more than a total of 10 percent less than the percentage of U. S. No. 1 required or specified: *Provided*, That the entire lot averages within the percentage specified. None of the foregoing tolerances shall apply to wormy fruit.

§ 51.704 *U. S. Combination Russet grade.* Not more than 10 percent, by count, of the fruits in any lot may be below the requirements of this grade other than for discoloration but not more than one-half of this tolerance, or 5 percent, shall be allowed for very serious damage other than by dryness or mushy condition, and not more than one-twentieth of the tolerance, or one-half of one percent, shall be allowed for decay at shipping point: *Provided*, That a total tolerance of not more than 3 percent shall be allowed for decay en route or at destination. In addition, not more than 10 percent, by count, of the fruits in any lot may have less than one-third discoloration. No part of any tolerance shall be allowed to reduce for the lot as a whole, the percentage of U. S. No. 1 except for discoloration required in the combination, but individual containers may have not more than a total of 10 percent less than the percentage of U. S. No. 1 except for discoloration required or specified: *Provided*, That the entire lot averages within the percentage specified. None of the foregoing tolerances shall apply to wormy fruit.

APPLICATION OF TOLERANCES

§ 51.705 *Application of tolerances to individual packages.* (a) The contents of individual packages in the lot, based on sample inspection, are subject to the following limitations: *Provided*, That the averages for the entire lot are within the tolerances specified for the grade.

(1) For packages which contain more than 25 pounds, and a tolerance of 10 percent or more is provided, individual packages in any lot shall have not more than one and one-half times the tolerance specified. For packages which contain more than 25 pounds and a tolerance of less than 10 percent is provided individual packages in any lot shall have not more than double the tolerance specified, except that at least one decayed or very seriously damaged fruit may be permitted in any package.

(2) For packages which contain 25 pounds or less, individual packages in any lot are not restricted as to the percentage of defects: *Provided*, That not more than one orange which is seriously damaged by dryness or mushy condition or very seriously damaged by other means may be permitted in any package and in addition, en route or at destination not more than 10 percent of the packages may have more than one decayed fruit.

STANDARD PACK

§ 51.706 *Standard pack for oranges except Temple variety.* (a) Fruit shall be fairly uniform in size, unless specified as uniform in size, and when packed in boxes, shall be arranged according to the approved and recognized methods. Each wrapped fruit shall be fairly well wrapped.

(b) All packages shall be tightly packed and well filled but the contents shall not show excessive or unnecessary bruising because of overfilled packages.

(c) When packed in standard nailed boxes, each container shall show a minimum bulge of $1\frac{1}{4}$ inches.

(d) "Fairly uniform in size" means that not more than a total of 10 percent, by count, of the fruit in any container is outside the range given below for various packs:

[Diameter in inches]

| Pack | Minimum | Maximum |
|---|---|---|
| 96's | $3\frac{5}{16}$ | $3\frac{11}{16}$ |
| 127's or 126's | $3\frac{1}{16}$ | $3\frac{7}{16}$ |
| 150's | 3 | $3\frac{3}{16}$ |
| 175's or 176's | $2\frac{15}{16}$ | $3\frac{1}{16}$ |
| 200's | $2\frac{13}{16}$ | $3\frac{1}{16}$ |
| 216's | $2\frac{13}{16}$ | 3 |
| 252's | $2\frac{9}{16}$ | $2\frac{15}{16}$ |
| 288's or 294's | $2\frac{7}{16}$ | $2\frac{13}{16}$ |
| 324's | $2\frac{5}{16}$ | $2\frac{11}{16}$ |

(e) "Uniform in size" means that not more than 10 percent, by count, of the fruits in any container vary more than the following amounts:

150 size and smaller—not more than $\frac{1}{16}$ inch in diameter.

126 size and larger—not more than $\frac{3}{16}$ inch in diameter.

(f) In order to allow for variations, other than sizing, incident to proper packing, not more than 5 percent of the packages in any lot may not meet the requirements of standard pack.

DEFINITIONS

§ 51.707 *Similar varietal characteristics.* "Similar varietal characteristics" means that the fruits in any container are similar in color and shape.

§ 51.708 *Well colored.* "Well colored" means that the fruit is yellow or orange in color with practically no trace of green color.

§ 51.709 *Firm.* "Firm" as applied to common oranges, means that the fruit is not soft, or noticeably wilted or flabby; as applied to oranges of the Mandarin Group (Satsumas, King, Mandarin), means that the fruit is not extremely puffy, although the skin may be slightly loose.

§ 51.710 *Well formed.* "Well formed" means that the fruit has the shape characteristic of the variety.

§ 51.711 *Smooth texture.* "Smooth texture" means that the skin is thin and smooth for the variety and size of the fruit.

§ 51.712 *Injury.* "Injury" means any defect or blemish which more than slightly affects the appearance, or edible or shipping quality of the fruit. Any one of the following defects, or any combination of defects, the seriousness of which exceeds the maximum allowed for any one defect shall be considered as injury:

(a) Green spots or oil spots, when appreciably affecting the appearance of the individual fruit.

(b) Rough and excessively wide or protruding navels, when protruding beyond the general contour of the orange; or when flush with the general contour but with the opening so wide, considering the size of the fruit, and the navel growth so folded and ridged that it detracts noticeably from the appearance of the orange.

(c) Scale, when more than a few adjacent to the "button" at the stem end, or when more than 6 scattered on other portions of the fruit.

(d) Scars which are depressed, not smooth, or which detract from the appearance of the fruit to a greater extent than the maximum amount of discoloration allowed in the grade.

(e) Thorn scratches, when the injury is not slight, not well healed, or more unsightly than discoloration allowed in the grade.

§ 51.713 *Discoloration.* "Discoloration" means russeting of a light shade of golden brown caused by rust mite or other means. Lighter shades of discoloration caused by superficial scars or other means may be allowed on a greater area, or darker shades may be allowed on a lesser area, provided no discoloration caused by melanose or other means may affect the appearance of the fruit to a greater extent than the shade and amount of discoloration allowed for the grade.

§ 51.714 *Fairly smooth texture.* "Fairly smooth texture" means that the skin is fairly thin and not coarse for the variety and size of the fruit.

§ 51.715 *Damage.* "Damage" means any defect or injury which materially affects the appearance, or edible or shipping quality of the fruit. Any one of the following defects, or any combination of defects, the seriousness of which exceeds the maximum allowed for any one defect shall be considered as damage:

(a) Ammoniation, when not occurring as light speck type similar to melanose.

(b) Creasing, when causing the skin to be materially weakened.

(c) Dryness or mushy condition, when affecting all segments of common oranges more than one-fourth inch at the stem end, or all segments of varieties of the Mandarin Group more than one-eighth inch at the stem end, or more than the equivalent of these respective amounts, by volume, when occurring in other portions of the fruit.

(d) Green spots or oil spots, when materially affecting the appearance of the individual fruit.

(e) Scab, when it cannot be classed as discoloration, or appreciably affects shape or texture.

(f) Scale, when it materially affects the appearance of the fruit.

(g) Scars which are deep.

(h) Scars which are shallow or fairly shallow and detract from the appearance of the fruit to a greater extent than the amount of discoloration allowed in the grade.

(i) Scars which are not smooth.

(j) Split or rough or protruding navels, when any split is unhealed, or more than three well-healed splits at the navel, or any split which is more than one-fourth inch in length, or three-cornered, star-shaped, or other irregular navels when the opening is so wide considering the size of the orange, and the navel growth so folded and ridged that it detracts materially from the appearance of the orange; or navels which flare, bulge, or protrude beyond the general contour of the orange to the extent that they are subject to mechanical injury in the process of proper grading, or handling, or packing.

(k) Sunburn, when the area affected exceeds 25 percent of the fruit surface, or when the skin is appreciably flattened, dry, darkened, or hard.

(l) Thorn scratches, when the injury is not well healed, or concentrated light colored thorn injury which has caused an area of more than an average of one-fourth inch in diameter of the skin to become hard, or slight scratches when light colored and concentrated and averaging more than 1 inch in diameter, or dark or scattered thorn injury which detracts from the appearance of the fruit to a greater extent than the amounts specified above.

(m) Riciness or woodiness, when the flesh of the fruit is so ricey or woody that excessive pressure by hand is required to extract the juice.

§ 51.716 *Fairly well colored.* "Fairly well colored" means that except for one inch in the aggregate of green color, the yellow or orange color predominates over the green color on that part of the fruit which is not discolored.

§ 51.717 *Reasonably well colored.* "Reasonably well colored" means that the yellow or orange color predominates over the green color on at least two-thirds of the fruit surface, in the aggregate, which is not discolored.

§ 51.718 *Fairly firm.* "Fairly firm" as applied to common oranges, means that the fruit may be slightly soft, but not bruised; as applied to oranges of the Mandarin Group (Satsumas, King, Mandarin), means that the skin of the fruit is not extremely puffy or extremely loose.

§ 51.719 *Slightly misshapen.* "Slightly misshapen" means that the fruit is not of the shape characteristic of the variety but is not appreciably elongated or pointed or otherwise deformed.

§ 51.720 *Slightly rough texture.* "Slightly rough texture" means that the skin is not of smooth texture but is not materially ridged, grooved, or wrinkled.

§ 51.721 *Serious damage.* "Serious damage" means any defect or injury which seriously affects the appearance, or edible or shipping quality of the fruit. Any one of the following defects, or any combination of defects, the seriousness of which exceeds the maximum allowed for any one defect shall be considered as serious damage:

(a) Ammoniation, when scars are cracked, or when dark and aggregating more than three-fourths inch in diameter, or when light colored and aggregating more than 1¼ inches in diameter.

(b) Buckskin, when aggregating more than 25 percent of the fruit surface, or the fruit texture is seriously affected.

(c) Creasing, when so deep or extensive that the skin is seriously weakened.

(d) Dryness or mushy condition, when affecting all segments of common oranges more than one-half inch at the stem end, or all segments of varieties of the Mandarin Group more than one-fourth inch at the stem end, or more than the equivalent of these respective amounts, by volume, when occurring in other portions of the fruit.

(e) Green spots or oil spots, when seriously affecting the appearance of the individual fruit.

(f) Scab, when it cannot be classed as discoloration, or when materially affecting shape or texture.

(g) Scale, when it seriously affects the appearance of the individual fruit.

(h) Scars which are very deep.

(i) Scars which are not very deep but which detract from the appearance of the fruit to a greater extent than the amount of discoloration allowed in the grade.

(j) Scars which are not fairly smooth.

(k) Split or rough or protruding navels, when any split is unhealed, or one well healed split at each corner of irregular navels when any one is more than one-half inch in length, or when aggregating more than 1 inch in length, or when more than four in number; or navels which protrude beyond the general contour of the orange to the extent that they are subject to mechanical injury during the process of proper grading, or handling, or packing; or irregular navels when the opening is so wide, considering the size of the orange, and the navel growth is so badly folded and ridged that it detracts seriously from the appearance of the orange.

(l) Sprayburn which seriously affects the appearance of the fruit or is hard, or when more than 1¼ inches in diameter in the aggregate has a light brown discoloration.

(m) Sunburn, which affects more than one-third of the fruit surface, or is hard, or the fruit is decidedly one-sided, or when more than 1¼ inches in diameter in the aggregate has a light brown discoloration.

(n) Thorn scratches, when the injury is not well healed, or concentrated light colored thorn injury which has caused an area of more than an average of one-half inch in diameter of the skin to become hard, or slight scratches when light colored and concentrated, averaging more than 1½ inches in diameter, or dark or scattered thorn injury which detracts from the appearance of the fruit to a greater extent than the amounts specified above.

(o) Undeveloped or sunken segments, in navel oranges, when such segments are so sunken or undeveloped that they are readily noticeable.

(p) Riciness or woodiness, when the flesh of the fruit is so ricey or woody that excessive presuure by hand is required to extract the juice.

§ 51.722 *Misshapen.* "Misshapen" means that the fruit is decidedly elongated, pointed or flat-sided.

§ 51.723 *Slightly spongy.* "Slightly spongy" means that the fruit is puffy or slightly wilted but not flabby.

§ 51.724 *Very serious damage.* "Very serious damage" means any defect or injury which very seriously affects the appearance, or edible or shipping quality of the fruit. Any one of the following defects, or any combination of defects, the seriousness of which exceeds the maximum allowed for any one defect shall be considered as very serious damage:

(a) Growth cracks that are seriously weakened, gummy, or not healed.

(b) Ammoniation, when aggregating more than 2 inches in diameter, or which has caused serious cracks.

(c) Bird pecks, when not healed.

(d) Caked melanose, when more than 25 percent in the aggregate of the surface of the fruit is caked.

(e) Buckskin, when rough and aggregating more than 50 percent of the surface of the fruit.

(f) Creasing, when so deep or extensive that the skin is very seriously weakened.

(g) Dryness or mushy condition, when affecting all segments of common oranges more than one-half inch at the stem end, or all segments of varieties of the Mandarin Group more than one-fourth inch at the stem end, or more than the equivalent of these respective amounts, by volume, when occurring in other portions of the fruit.

(h) Scab, when aggregating more than 25 percent of the surface of the fruit.

(i) Scale, when covering more than 20 percent of the surface of the fruit.

(j) Split navels, when not healed or the fruit is seriously weakened.

(k) Sprayburn, when seriously affecting more than one-third of the fruit surface.

(l) Sunburn, when seriously affecting more than one-third of the fruit surface.

(m) Thorn punctures, when not healed or the fruit is seriously weakened.

(n) Riciness or woodiness, when the flesh of the fruit is so ricey or woody that excessive pressure by hand is required to extract the juice.

STANDARDS FOR INTERNAL QUALITY OF COMMON SWEET ORANGES (CITRUS SINENSIS (L) OSBECK)

§ 51.725 *U. S. Grade AA Juice (Double A).* Any lot of oranges, the juice content of which meets the following requirements, may be designated "U. S. Grade AA Juice (Double A)":

(a) Each lot of fruit shall contain an average of not less than 5 gallons of juice per standard packed box of one and three-fifths bushels.

(b) The average juice content for any lot of fruit shall have not less than 10 percent total soluble solids, and not less than one-half of 1 percent anhydrous citric acid, or more than the maximum acid specified in Table I of § 51.727.

§ 51.726 *U. S. Grade A Juice.* Any lot of oranges, the juice content of which meets the following requirements, may be designated "U. S. Grade A Juice."

(a) Each lot of fruit shall contain an average of not less than four and one-half gallons of juice per standard packed box of one and three-fifths bushels.

(b) The average juice content for any lot of fruit shall have not less than 9 percent total soluble solids, and not less than one-half of 1 percent anhydrous citric acid, or more than the maximum acid specified in Table I of § 51.727.

§ 51.727 *Maximum anhydrous citric acid permissible for corresponding total soluble solids.* For determining the grade of juice, the maximum permissible anhydrous citric acid content in relation to corresponding total soluble solids in the fruit is set forth in the following table together with the minimum ratio of total soluble solids to anhydrous citric acid:

TABLE I

| Total soluble solids average percent | Maximum anhydrous citric acid average percent | Minimum ratio of total soluble solids to anhydrous citric acid |
|---|---|---|
| 9.0 | 0.047 | 9.50-1 |
| 9.1 | .963 | 9.45-1 |
| 9.2 | .979 | 9.40-1 |
| 9.3 | .995 | 9.35-1 |
| 9.4 | 1.011 | 9.30-1 |
| 9.5 | 1.027 | 9.25-1 |
| 9.6 | 1.043 | 9.20-1 |
| 9.7 | 1.060 | 9.15-1 |
| 9.8 | 1.077 | 9.10-1 |
| 9.9 | 1.094 | 9.05-1 |
| 10.0 | 1.111 | 9.00-1 |
| 10.1 | 1.128 | 8.95-1 |
| 10.2 | 1.146 | 8.90-1 |
| 10.3 | 1.164 | 8.85-1 |
| 10.4 | 1.182 | 8.80-1 |
| 10.5 | 1.200 | 8.75-1 |
| 10.6 | 1.218 | 8.70-1 |
| 10.7 | 1.237 | 8.65-1 |
| 10.8 | 1.256 | 8.60-1 |
| 10.9 | 1.275 | 8.55-1 |
| 11.0 | 1.294 | 8.50-1 |
| 11.1 | 1.306 | 8.50-1 |
| 11.2 | 1.318 | 8.50-1 |
| 11.3 | 1.329 | 8.50-1 |
| 11.4 | 1.341 | 8.50-1 |
| 11.5 | 1.353 | 8.50-1 |
| 11.6 | 1.365 | 8.50-1 |
| 11.7 | 1.376 | 8.50-1 |
| 11.8 | 1.388 | 8.50-1 |
| 11.9 | 1.400 | 8.50-1 |
| 12.0 | 1.412 | 8.50-1 |
| 12.1 | 1.423 | 8.50-1 |
| 12.2 | 1.435 | 8.50-1 |
| 12.3 | 1.447 | 8.50-1 |
| 12.4 | 1.459 | 8.50-1 |
| 12.5 | 1.471 | 8.50-1 |
| 12.6 | 1.482 | 8.50-1 |
| 12.7 | 1.494 | 8.50-1 |
| 12.8 | 1.506 | 8.50-1 |
| 12.9 | 1.517 | 8.50-1 |
| 13.0 | 1.529 | 8.50-1 |
| 13.1 | 1.541 | 8.50-1 |
| 13.2 | 1.553 | 8.50-1 |
| 13.3 | 1.565 | 8.50-1 |
| 13.4 | 1.576 | 8.50-1 |
| 13.5 | 1.588 | 8.50-1 |
| 13.6 | 1.600 | 8.50-1 |
| 13.7 | 1.612 | 8.50-1 |
| 13.8 | 1.624 | 8.50-1 |
| 13.9 | 1.635 | 8.50-1 |
| 14.0 | 1.647 | 8.50-1 |
| 14.1 | 1.659 | 8.50-1 |
| 14.2 | 1.671 | 8.50-1 |
| 14.3 | 1.682 | 8.50-1 |
| 14.4 | 1.694 | 8.50-1 |
| 14.5 | 1.706 | 8.50-1 |
| 14.6 | 1.718 | 8.50-1 |
| 14.7 | 1.729 | 8.50-1 |
| 14.8 | 1.741 | 8.50-1 |
| 14.9 | 1.753 | 8.50-1 |
| 15.0 | 1.765 | 8.50-1 |
| 15.1 | 1.776 | 8.50-1 |
| 15.2 | 1.788 | 8.50-1 |
| 15.3 | 1.800 | 8.50-1 |
| 15.4 | 1.812 | 8.50-1 |
| 15.5 or more | 1.824 | 8.50-1 |

§ 51.728 *Method of juice extraction.* The juice used in the determination of solids, acid, and juice content shall be extracted from representative samples as thoroughly as possible with a reamer or by hand, and shall be strained through a double thickness of gauze having 44 x 40 threads per square inch, and shall not be extracted or strained in any other manner.

SUBPART—UNITED STATES STANDARDS FOR FLORIDA GRAPEFRUIT

GRADES

§ 51.750 *U. S. Fancy.* U. S. Fancy consists of grapefruit of similar varietal characteristics which are well colored, firm, well formed, mature, and of smooth texture, and which are free from ammoniation, bird pecks, bruises, buckskin, cuts which are not healed, decay, growth cracks, scab, sprayburn, and free from injury caused by green spots or oil spots, pitting, scale, scars, thorn scratches, and from damage caused by dirt or other foreign materials, dryness or mushy condition, sprouting, sunburn, disease, insects, or mechanical or other means.

(a) In this grade not more than one-tenth of the surface in the aggregate may be affected with discoloration. (See § 51.762.)

§ 51.751 *U. S. No. 1.* U. S. No. 1 consists of grapefruit of similar varietal characteristics which are fairly well colored, firm, well formed, mature, and of fairly smooth texture, and which are free from bruises, cuts which are not healed, buckskin or similar type of discoloration, decay, growth cracks, sprayburn, and free from damage caused by ammoniation, bird pecks, dirt or other foreign materials, dryness or mushy condition, green spots or oil spots, pitting, scab, scale, scars, sprouting, sunburn, thorn scratches, disease, insects, or mechanical or other means.

(a) In this grade not more than one-third of the surface in the aggregate may be affected with discoloration. (See § 51.763.)

§ 51.752 *U. S. No. 1 Bright.* The requirements for this grade are the same as for U. S. No. 1 except that no fruit may have more than one-tenth of its surface in the aggregate affected with discoloration. (See § 51.763.)

§ 51.753 *U. S. No. 1 Golden.* The requirements for this grade are the same as for U. S. No. 1 except that not more than 30 percent, by count, of the fruits shall have in excess of one-third of their surface in the aggregate affected with discoloration. (See § 51.764.)

§ 51.754 *U. S. No. 1 Bronze.* The requirements for this grade are the same as for U. S. No. 1 except that more than 30 percent but not more than 75 percent, by count, of the fruits shall have in excess of one-third of their surface in the aggregate affected with discoloration: *Provided,* That when the predominating discoloration on each of 75 percent or more, by count, of the fruits is caused by rust mite, all fruits may have in excess of one-third of their surface affected with discoloration. (See § 51.764.)

§ 51.755 *U. S. No. 1 Russet.* The requirements for this grade are the same as for U. S. No. 1 except that more than 75 percent, by count, of the fruits shall have in excess of one-third of their surface in the aggregate affected with discoloration. (See § 51.765.)

§ 51.756 *U. S. No. 2.* U. S. No. 2 consists of grapefruit of similar varietal characteristics which are mature, fairly firm, not more than slightly misshapen or of slightly rough texture, and which are free from bruises, cuts which are not healed, decay, growth cracks, and free from serious damage caused by ammoniation, bird pecks, buckskin, dirt or other foreign materials, dryness or mushy condition, green spots or oil spots, pitting, scab, scale, scars, sprayburn, sprouting, sunburn, thorn scratches, disease, insects, mechanical or other means.

(a) Each grapefruit may be only slightly colored.

(b) Not more than one-half of the surface in the aggregate may be affected with discoloration. (See § 51.766.)

§ 51.757 *U. S. No. 2 Bright.* The requirements for this grade are the same as for U. S. No. 2 except that no fruit may have more than one-tenth of its surface in the aggregate affected with discoloration. (See § 51.763.)

§ 51.758 *U. S. No. 2 Russet.* The requirements for this grade are the same as for U. S. No. 2 except that more than 10 percent, by count, of the fruits shall have in excess of one-half of their surface in the aggregate affected with discoloration. (See § 51.767.)

§ 51.759 *U. S. No. 3.* U. S. No. 3 consists of grapefruit of similar varietal characteristics which are mature, which may be misshapen, slightly spongy, rough but not seriously lumpy for the variety or seriously cracked, which are free from cuts which are not healed, and from decay, and from very serious damage caused by bruises, growth cracks, ammoniation, bird pecks, caked melanose, buckskin, dryness or mushy condition, pitting, scab, scale, sprayburn, sprouting, sunburn, thorn punctures, disease, insects, mechanical or other means. The fruit may be poorly colored but not more than 25 percent of the surface of each fruit may be of a solid dark green color. (See § 51.763.)

UNCLASSIFIED

§ 51.760 *Unclassified.* Unclassified consists of grapefruit which has not been classified in accordance with any of the foregoing grades. The term "unclassified" is not a grade within the meaning of these standards but is provided as a designation to show that no definite grade has been applied to the lot.

TOLERANCES

§ 51.761 *Tolerances.* In order to allow for variations incident to proper grading and handling in each of the foregoing grades, the tolerances set forth in §§ 51.762 to 51.763 are provided as specified.

§ 51.762 *U. S. Fancy.* Not more than 10 percent, by count, of the fruits in

any lot may be below the requirements of this grade, but not more than one-half of this amount, or 5 percent, shall be allowed for very serious damage, and not more than one-twentieth of the tolerance, or one-half of one percent, shall be allowed for decay at shipping point: *Provided*, That an additional tolerance of $2\frac{1}{2}$ percent, or a total of not more than 3 percent, shall be allowed for decay en route or at destination. None of the foregoing tolerances shall apply to wormy fruit.

§ 51.763 *U. S. No. 1, U. S. No. 1 Bright, and U. S. No. 2 Bright grades.* Not more than 10 percent, by count, of the fruits in any lot may be below the requirements of the grade other than for discoloration but not more than one-half of this amount, or 5 percent, shall be allowed for very serious damage, and not more than one-twentieth of the tolerance, or one-half of one percent, shall be allowed for decay at shipping point: *Provided*, That an additional tolerance of $2\frac{1}{2}$ percent, or a total of not more than 3 percent, shall be allowed for decay en route or at destination. In addition, not more than 10 percent, by count, of the fruits in any lot may not meet the requirements relating to discoloration. None of the foregoing tolerances shall apply to wormy fruit.

§ 51.764 *U. S. No. 1 Golden and U. S. No. 1 Bronze grades.* Not more than 10 percent, by count, of the fruits in any lot may be below the requirements of the grade, but not more than one-half of this amount, or 5 percent, shall be allowed for very serious damage, and not more than one-twentieth of the tolerance, or one-half of one percent, shall be allowed for decay at shipping point: *Provided*, That an additional tolerance of $2\frac{1}{2}$ percent, or a total of not more than 3 percent, shall be allowed for decay en route or at destination. None of the foregoing tolerances shall apply to wormy fruit. In addition, not more than 10 percent, by count, of the fruits in any lot may not meet the requirements relating to discoloration.

§ 51.765 *U. S. No. 1 Russet.* Not more than 10 percent, by count, of the fruits in any lot may be below the requirements of the grade but not more than one-half of this amount, or 5 percent, shall be allowed for very serious damage, and not more than one-twentieth of the tolerance, or one-half of one percent, shall be allowed for decay at shipping point: *Provided*, That an additional tolerance of $2\frac{1}{2}$ percent, or a total of not more than 3 percent, shall be allowed for decay en route or at destination. No part of any tolerance shall be allowed to reduce the percentage of fruits having in excess of one-third of their surface in the aggregate affected with discoloration which is required in this grade, but individual containers may have not more than 10 percent less than the percentage required: *Provided*, That the entire lot averages within the percentage specified. None of the foregoing tolerances shall apply to wormy fruit.

§ 51.766 *U. S. No. 2.* Not more than 10 percent, by count, of the fruits in any lot may be below the requirements of this grade other than for discoloration but not more than one-half of this amount, or 5 percent, shall be allowed for very serious damage other than that caused by dryness or mushy condition, and not more than one-twentieth of the tolerance, or one-half of one percent, shall be allowed for decay at shipping point: *Provided*, That an additional tolerance of $2\frac{1}{2}$ percent, or a total of not more than 3 percent, shall be allowed for decay en route or at destination. No part of any tolerance shall be allowed to reduce the percentage of fruits having in excess of one-half of their surface in the aggregate affected with discoloration which is required in this grade, but individual containers may have not more than 10 percent less than the percentage required: *Provided*, That the entire lot averages within the percentage specified. None of the foregoing tolerances shall apply to wormy fruit.

§ 51.767 *U. S. No. 2 Russet.* Not more than 10 percent, by count, of the fruits in any lot may be below the requirements of this grade but not more than one-half of this amount, or 5 percent, shall be allowed for very serious damage other than that caused by dryness or mushy condition, and not more than one-twentieth of the tolerance, or one-half of one percent, shall be allowed for decay at shipping point: *Provided*, That an additional tolerance of $2\frac{1}{2}$ percent, or a total of not more than 3 percent, shall be allowed for decay en route or at destination. No part of any tolerance shall be allowed to reduce the percentage of fruits having in excess of one-half of their surface in the aggregate affected with discoloration which is required in this grade, but individual containers may have not more than 10 percent less than the percentage required: *Provided*, That the entire lot averages within the percentage specified. None of the foregoing tolerances shall apply to wormy fruit.

§ 51.768 *U. S. No. 3 grade.* Not more than 15 percent, by count, of the fruit in any container may be below the requirements of this grade but not more than one-third of this amount, or 5 percent, shall be allowed for defects other than dryness or mushy condition, and not more than one-fifth of this amount, or 1 percent, shall be allowed for decay at shipping point: *Provided*, That an additional tolerance of $2\frac{1}{2}$ percent or a total of not more than 3 percent shall be allowed for decay en route or at destination. None of the foregoing tolerances shall apply to wormy fruit.

APPLICATION OF TOLERANCES

§ 51.769 *Application of tolerances to individual packages.* (a) The contents of individual packages in the lot, based on sample inspection, are subject to the following limitations: *Provided*, That the averages for the entire lot are within the tolerances specified for the grade.

(1) For packages which contain more than 10 pounds, and a tolerance of 10 percent or more is provided, individual packages in any lot shall have not more than one and one-half times the tolerance specified. For packages which contain more than 10 pounds and a tolerance of less than 10 percent is provided, individual packages in any lot shall have not more than double the tolerance specified, except that at least one decayed or very seriously damaged fruit may be permitted in any package.

(2) For packages which contain 10 pounds or less, individual packages in any lot are not restricted as to the percentage of defects: *Provided*, That not more than one grapefruit which is seriously damaged by dryness or mushy condition or very seriously damaged by other means may be permitted in any package and in addition en route or at destination not more than 10 percent of the packages may have more than one decayed fruit.

STANDARD PACK

§ 51.770 *Standard pack for grapefruit.* (a) Fruits shall be fairly uniform in size, unless specified as uniform in size, and when packed in boxes, shall be arranged according to the approved and recognized methods. Each wrapped fruit shall be fairly well wrapped.

(b) All packages shall be tightly packed and well filled but the contents shall not show excessive or unnecessary bruising because of overfilled packages.

(c) When packed in standard nailed boxes, each container shall show a minimum bulge of 2 inches, except that boxes packed with grapefruit of a size 80 or smaller need only show a bulge of $1\frac{1}{2}$ inches.

(d) "Fairly uniform in size" means that not more than a total of 10 percent, by count, of the fruits in any container is outside the range of diameters given in the following table for various packs:

TABLE I

[Diameter in inches]

| Pack | Minimum | Maximum |
|---|---|---|
| 36's | 5 | [illegible] |
| 42's or 46's | 4 11/16 | [illegible] |
| 54's or 56's | 4 3/8 | [illegible] |
| 64's | 4 1/16 | [illegible] |
| 70's or 72's | 3 15/16 | 4 |
| 80's | 3 13/16 | 3 15/16 |
| 96's | 3 5/8 | 3 11/16 |
| 112's | 3 5/16 | 3 3/8 |
| 125's or 126's | 3 1/16 | 3 1/8 |

(e) "Uniform in size" means that not more than 10 percent, by count, of the fruits in any container vary more than the following amounts:

64 size and smaller—not more than $\frac{1}{8}$ inch in diameter.

54 size and larger—not more than $\frac{3}{16}$ inch in diameter.

(f) In order to allow for variations, other than sizing, incident to proper packing, not more than 5 percent of the packages in any lot may not meet the requirements of standard pack.

DEFINITIONS

§ 51.771 *Similar varietal characteristics.* "Similar varietal characteristics" means that the fruits in any container are similar in color and shape.

§ 51.772 *Well colored.* "Well colored" means that the fruit is yellow in color with practically no trace of green color.

§ 51.773 *Firm.* "Firm" means that the fruit is not soft, or noticeably wilted or flabby, and the skin is not spongy or puffy.

§ 51.774 *Well formed.* "Well formed" means that the fruit has the shape characteristic of the variety.

§ 51.775 *Mature.* "Mature" means the same as that term is set forth in section 601.16 Florida Statutes, Chapter 2492, known as the Florida Citrus Code of 1949, as amended.

§ 51.776 *Smooth texture.* "Smooth texture" means that the skin is thin and smooth for the variety and size of the fruit.

§ 51.777 *Injury.* "Injury" means any defect which more than slightly affects the appearance, or the edible or shipping quality of the fruit. Any one of the following defects, or any combination of defects, the seriousness of which exceeds the maximum allowed for any one defect, shall be considered as injury:

(a) Green spots or oil spots, when appreciably affecting appearance of the individual fruit;

(b) Scale, when more than a few adjacent to the "button" at the stem end, or when more than 6 scattered on the other portions of the fruit;

(c) Scars which are depressed, not smooth, or which detract from the appearance of the fruit to a greater extent than the maximum amount of discoloration allowed in the grade; and,

(d) Thorn scratches, when the injury is not slight, not well healed, or more unsightly than discoloration allowed in the grade.

§ 51.778 *Discoloration.* "Discoloration" means russeting of a light shade of golden brown caused by rust mite or other means. Lighter shades of discoloration caused by scars or other means may be allowed on a greater area, or darker shades may be allowed on a lesser area, provided no discoloration caused by melanose or other means may affect the appearance of the fruit to a greater extent than the shade and amount of discoloration allowed for the grade.

§ 51.779 *Fairly well colored.* "Fairly well colored" means that except for one inch in the aggregate of green color, the yellow color predominates over the green color on that part of the fruit which is not discolored.

§ 51.780 *Fairly smooth texture.* "Fairly smooth texture" means that the skin is fairly thin and not coarse for the variety and size of the fruit.

§ 51.781 *Damage.* "Damage" means any defect which materially affects the appearance, or the edible or shipping quality of the fruit. Any one of the following defects, or any combination of defects, the seriousness of which exceeds the maximum allowed for any one defect, shall be considered as damage:

(a) Ammoniation, when not occurring as light speck type similar to melanose;

(b) Dryness or mushy condition when affecting all segments more than one-fourth inch at the stem end, or more than the equivalent of this amount, by volume, when occurring in other portions of the fruit;

(c) Green spots or oil spots, when materially affecting the appearance of the individual fruit;

(d) Scab, when it cannot be classed as discoloration or appreciably affects shape or texture;

(e) Scale, when occurring as a blotch and its size exceeds the area of a circle $\frac{3}{4}$ inch in diameter, or when occurring as a ring and its size exceeds the area of a circle $1\frac{1}{4}$ inches in diameter on a grapefruit of 70-size. Smaller sizes shall have lesser areas of scale and larger sizes may have greater areas: *Provided*, That no scale shall be permitted which affects the appearance to a greater extent than a blotch $\frac{3}{4}$ inch in diameter or a ring $1\frac{1}{4}$ inches in diameter on a 70-size grapefruit;

(f) Scars which are not smooth, or scars which are deep, or scars which are shallow or fairly shallow and detract from the appearance of the fruit to a greater extent than the amount of discoloration allowed in the grade;

(g) Sunburn, when the area affected exceeds 25 percent of the fruit surface, or when the skin is appreciably flattened, dry, darkened, or hard; and,

(h) Thorn scratches, when the injury is not well healed, or concentrated light colored thorn injury which has caused the skin to become hard and the aggregate area exceeds the area of a circle one-fourth inch in diameter, or slight scratches when light colored and concentrated and the aggregate area exceeds the area of a circle 1 inch in diameter, or dark or scattered thorn injury which detracts from the appearance of the fruit to a greater extent than the amounts specified above.

§ 51.782 *Fairly firm.* "Fairly firm" means that the fruit may be slightly soft, but not bruised, and the skin is not spongy or puffy.

§ 51.783 *Slightly misshapen.* "Slightly misshapen" means that the fruit is not of the shape characteristic of the variety but is not appreciably elongated or pointed, or otherwise deformed.

§ 51.784 *Slightly rough texture.* "Slightly rough texture" means that the skin is not of smooth texture but is not excessively thick or materially ridged, grooved, or wrinkled.

§ 51.785 *Serious damage.* "Serious damage" means any defect which seriously affects the appearance, or the edible or shipping quality of the fruit. Any one of the following defects, or any combination of defects, the seriousness of which exceeds the maximum allowed for any one defect, shall be considered as serious damage:

(a) Ammoniation, when scars are cracked, or when dark and aggregating more than one-half inch in diameter, or when light colored and aggregating more than one inch in diameter;

(b) Buckskin, when affecting the appearance of the fruit to a greater extent than the amount of discoloration allowed;

(c) Dryness or mushy condition, when affecting all segments more than one-half inch at the stem end, or more than the equivalent of this amount, by volume, when occurring in other portions of the fruit;

(d) Green spots or oil spots, when the aggregate area exceeds the area of a circle one inch in diameter on a grapefruit of 70-size. Smaller sizes shall have lesser areas of green spots or oil spots and larger sizes may have greater areas: *Provided*, That the appearance of the grapefruit is not affected to a greater extent than the area permitted on a 70-size grapefruit;

(e) Scab, when it cannot be classed as discoloration, or when materially affecting shape or texture;

(f) Scale, when occurring as a blotch and its size exceeds the area of a circle one inch in diameter, or when occurring as a ring and its size exceeds the area of a circle $1\frac{1}{2}$ inches in diameter on a grapefruit of 70-size. Smaller sizes shall have lesser areas of scale and larger sizes may have greater areas: *Provided*, That no scale shall be permitted which affects the appearance to a greater extent than a blotch one inch in diameter or a ring $1\frac{1}{2}$ inches in diameter on a 70-size grapefruit;

(g) Scars which are not fairly smooth, or scars which are very deep, or scars which are not very deep but which detract from the appearance of the fruit to a greater extent than the amount of discoloration allowed in the grade;

(h) Sprayburn which seriously affects the appearance of the fruit or is hard, or when more than $1\frac{1}{4}$ inches in diameter in the aggregate has a light brown discoloration;

(i) Sunburn which affects more than one-third of the fruit surface, or is hard, or the fruit is decidedly one-sided, or when more than $1\frac{1}{4}$ inches in diameter in the aggregate has a light brown discoloration; and,

(j) Thorn scratches, when the injury is not well healed, or concentrated light colored thorn injury which has caused the skin to become hard and the aggregate area exceeds the area of a circle one-half inch in diameter, or slight scratches when light colored and concentrated and the aggregate area exceeds the area of a circle $1\frac{1}{2}$ inches in diameter, or dark or scattered thorn injury which detracts from the appearance of the fruit to a greater extent than the amounts specified above.

§ 51.786 *Slightly colored.* "Slightly colored" means that except for two inches in the aggregate of green color, the portion of the fruit surface which is not discolored shows some yellow color.

§ 51.787 *Misshapen.* "Misshapen" means that the fruit is decidedly elongated, pointed or flat sided.

§ 51.788 *Slightly spongy.* "Slightly spongy" means that the fruit is puffy or slightly wilted but not flabby.

§ 51.789 *Very serious damage.* "Very serious damage" means any defect which very seriously affects the appearance, or the edible or shipping quality of the fruit. Any one of the following defects, or any combination of defects, the seriousness of which exceeds the maximum allowed for any one defect, shall be considered as very serious damage:

(a) Growth cracks that are seriously weakened, gummy or not healed;

(b) Ammoniation, when aggregating more than 2 inches in diameter, or which has caused serious cracks;

(c) Bird pecks, when not healed;

(d) Caked melanose, when more than 25 percent in the aggregate of the surface of the fruit is caked;

(e) Buckskin, when rough and aggregating more than 50 percent of the surface of the fruit;

(f) Dryness or mushy condition, when affecting all segments more than one-half inch at the stem end, or more than the equivalent of this amount, by volume, when occurring in other portions of the fruit;

(g) Scab, when aggregating more than 25 percent of the surface of the fruit;

(h) Scale, when covering more than 20 percent of the surface of the fruit;

(i) Sprayburn, when seriously affecting more than one-third of the fruit surface;

(j) Sunburn, when seriously affecting more than one-third of the fruit surface; and,

(k) Thorn punctures, when not healed or the fruit is seriously weakened.

§ 51.790 *Diameter.* "Diameter" means the greatest dimension measured at right angles to a line from stem to blossom end of the fruit.

SUBPART—UNITED STATES CONSUMER STANDARDS FOR HUSKED CORN ON THE COB

GRADES

§ 51.810 *U. S. Grade A.* U. S. Grade A shall consist of husked ears or portions of ears of corn on the cob of similar varietal characteristics which are well trimmed, well formed, clean, free from decay and insect injury, and free from damage caused by bruising, mechanical or other means. Cobs shall be well filled with tender, plump and milky kernels. Each ear may be clipped at one or both ends but the length of each unit, clipped or unclipped, shall be not less than 3 inches. Each clipped ear shall be properly clipped. Units on the shown face shall be reasonably representative of the size and quality of the contents of the package.

(a) Incident to proper grading and handling, not more than 10 percent, by count, of the units of corn in any lot may fail to meet the requirements of this grade, including not more than 5 percent for defects other than damage caused by bruising: *Provided*, That not more than one-fifth of this amount, or 1 percent, shall be allowed for units affected by decay.

§ 51.811 *U. S. Grade B.* U. S. Grade B shall consist of husked ears or portions of ears of corn on the cob which meet the requirements of U. S. Grade A except for the increased tolerance specified below.

(a) Incident to proper grading and handling, not more than 20 percent, by count, of the units of corn in any lot may fail to meet the requirements of this grade, including not more than 5 percent for units having insect injury and not more than 1 percent for units affected by decay.

OFF-GRADE

§ 51.812 *Off-Grade husked corn on the cob.* Husked ears or portions of ears of corn on the cob which fail to meet the requirements of the foregoing grades shall be Off-Grade husked corn on the cob.

DEFINITIONS

§ 51.813 *Similar varietal characteristics.* "Similar varietal characteristics" means that the units in any package are of similar color and character of growth. Units of white and yellow corn shall not be mixed in the same package.

§ 51.814 *Well trimmed.* "Well trimmed" means that the unit is practically free from husks and silk and that the shank does not extend more than ½ inch from the base of the cob.

§ 51.815 *Well formed.* "Well formed" means that the unit is not stunted. Nubbins shall not be considered well formed units.

§ 51.816 *Clean.* "Clean" means that the unit is practically free from dirt or other foreign material.

§ 51.817 *Damage.* "Damage" means any injury or defect which materially affects the appearance, or the edible, shipping or keeping quality of the unit.

§ 51.818 *Well filled.* "Well filled" means that the rows of kernels show fairly uniform development, and that the appearance of the unit is not materially affected by poorly developed rows.

§ 51.819 *Tender.* "Tender" means that the kernels break with only moderate pressure from the thumbnail.

§ 51.820 *Plump and milky.* "Plump and milky" means that the kernels are well developed but are not over-mature or shriveled.

§ 51.821 *Units.* "Units", as used in these standards, means whole ears or portions of ears of husked corn on the cob.

§ 51.822 *Properly clipped.* "Properly clipped" means that the end or ends of the ear have been neatly cut off at approximately a right angle to the longitudinal axis.

SUBPART—UNITED STATES STANDARDS FOR GREEN CORN

GRADES

§ 51.835 *U. S. No. 1.* U. S. No. 1 shall consist of ears of green corn of similar varietal characteristics which are well trimmed, well formed, and free from smut, decay and from damage caused by other disease, insects, birds, mechanical or other means. Cobs shall be well filled, with plump and milky kernels and well covered with fresh, green husks.

(a) Each ear may be clipped but unless otherwise specified, the length of each cob, clipped or unclipped, shall be not less than 5 inches. Each clipped ear shall be properly clipped.

(b) In order to allow for variations other than length of cob incident to proper grading and handling, not more than 10 percent, by count, of the ears of corn in any lot may fail to meet the requirements of this grade, including not more than 2 percent for ears affected by decay. In addition, not more than 5 percent, by count, of the ears in any lot may fail to meet the requirements as to length of cob.

§ 51.836 *U. S. Fancy.* U. S. Fancy shall consist of ears of green corn which meet the requirements of U. S. No. 1 grade, except that the ears shall be free from worms and insect injury, and the length of the cob shall be not less than 6 inches and the ears shall not be clipped.

(a) In order to allow for variations, other than length of cob, incident to proper grading and handling, not more than 10 percent, by count, of the ears of corn in any lot may fail to meet the requirements of this grade, including not more than 2 percent for ears affected by decay. In addition, not more than 5 percent, by count, of the ears in any lot may fail to meet the requirements as to length of cob.

UNCLASSIFIED

§ 51.837 *Unclassified.* Unclassified shall consist of corn which fails to meet the requirements of either of the foregoing grades. The term "unclassified" is not a grade within the meaning of these standards, but is provided as a designation to show that no definite grade has been applied to the lot.

COUNT

§ 51.838 *Count.* The number of ears in the container may be specified by numerical count or in terms of dozens or half dozens. Variation from the number specified shall be as follows: *Provided*, That the lot averages not more than one ear less than the number specified:

60 ears or less, 3 ear variation.
More than 60 ears, 4 ear variation.

APPLICATION OF TOLERANCES

§ 51.839 *Application of tolerances.* (a) The contents of individual containers in the lot, based on sample inspection, are subject to the following limitations, provided the averages for the entire lot are within the tolerances specified:

(1) When a tolerance is 10 percent or more, individual containers in any lot shall have not more than one and one-half times the tolerance specified, except that at least one defective and one off-sized specimen may be permitted in any container.

(2) When a tolerance is less than 10 percent, individual containers in any lot shall have not more than double the tolerance specified, except that at least one defective and one off-sized specimen may be permitted in any container.

DEFINITIONS

§ 51.840 *Similar varietal characteristics.* "Similar varietal characteristics" means that the ears in any container are of similar color and character of growth. Ears of field and sweet corn or white and yellow corn shall not be mixed in the same container.

§ 51.841 *Well trimmed.* "Well trimmed" means that the ears are practically free from loose husks and that the shank shall be not more than 6 inches in length and not extend more than 1 inch beyond the point of attachment of the outside husk.

§ 51.842 *Well formed.* "Well formed" means that the ears are not stunted. Nubbins are not well formed ears.

§ 51.843 *Damage.* "Damage" means injury from any cause which materially affects the appearance, or the edible or shipping quality of the ear. Unclipped ears showing worm injury extending not more than one and one-half inches from the tip of the cob shall not be regarded as damaged, but worm injury affecting kernels on other parts of the cob shall be considered as damage. When ears are clipped, any worm injury remaining shall be regarded as damage.

§ 51.844 *Well filled.* "Well filled" means that the rows of kernels show fairly uniform development, and that the appearance and quality of the edible portion of the ear are not materially affected by poorly developed rows. When the ear has not been clipped, not more than one-fourth of the length of the cob may have poorly developed or missing kernels at the tip. When the ear has been clipped it shall have practically no poorly developed kernels at the tip of the cob. Missing or poorly developed kernels on other parts of the ear shall not aggregate more than one square inch on a cob 6 inches in length, and a proportionally greater area shall be permitted on a longer cob and a proportionally lesser area on a shorter cob.

§ 51.845 *Plump and milky.* "Plump and milky" means that the kernels are well developed but are not overmature or shriveled.

§ 51.846 *Fresh.* "Fresh" means that the husks are not badly wilted, dried, or turning yellow or brown.

§ 51.847 *Properly clipped.* "Properly clipped means that either the end of the cob, or the end of the cob and husk have been neatly removed at approximately a right angle to the longitudinal axis.

SUBPART—UNITED STATES STANDARDS FOR BERRIES FOR PROCESSING [1]

GRADES

§ 51.860 *U. S. No. 1.* U. S. No. 1 shall consist of berries of similar varietal characteristics which are free from caps (calyxes), mold or decay, and from dried, undeveloped and distinctly immature berries and from damage caused by overmaturity, crushing, shriveling, dirt, or other foreign matter, hail, sunscald, moisture, birds, disease, insects, mechanical or other means. At least 85 percent, by weight, of the berries in the lot shall be well colored. (See § 51.863.)

(a) In order to allow for variations incident to proper handling, not more than 10 percent, by weight, of the berries in any lot may fail to meet the requirements of this grade, including not more than 3 percent for distinctly immature berries. No part of any tolerance shall be allowed to reduce the percentage of well colored berries required in the grade, and no part of any tolerance shall be allowed for berries infested with worms.

§ 51.861 *U. S. No. 2.* U. S. No. 2 shall consist of berries which meet the requirements for U. S. No. 1 grade except for color and except for the increased tolerance for defects specified below. At least 75 percent, by weight, of the berries in the lot shall be well colored. (See § 51.863.)

(a) In order to allow for variations incident to proper handling, not more than 20 percent, by weight, of the berries in any lot may fail to meet the requirements of this grade, including not more than 5 percent for distinctly immature berries. No part of any tolerance shall be allowed to reduce the percentage of well colored berries required in the grade, and no part of any tolerance shall be allowed for berries infested with worms.

UNCLASSIFIED

§ 51.862 *Unclassified.* Unclassified shall consist of berries which fail to meet the requirements of either of the foregoing grades. The term "unclassified" is not a grade within the meaning of these standards but is provided as a designation to show that no definite grade has been applied to the lot.

SIZE

§ 51.863 *Size.* In view of the size variations in different producing sections and size variations of different types and varieties of berries, no size requirements are specified in these standards. However, the size may be specified in terms of minimum diameter or length.

(a) In order to allow for variations incident to proper sizing, not more than 5 percent, by weight, of the berries in any lot may fail to meet the size specified.

DEFINITIONS

§ 51.864 *Dried.* "Dried" means appreciably lacking in juice. Dried berries are excessively seedy and often shriveled.

§ 51.865 *Undeveloped.* "Undeveloped" means lack of development, due to frost or insect injury, lack of pollination or other means, which causes the berry to be dwarfed or badly misshapen.

§ 51.866 *Distinctly immature.* "Distinctly immature" means that the berries are light red, whitish, or green in the case of types or varieties which are characteristically blue or black when well ripened; and that the berries are whitish or green in the case of types or varieties which are characteristically red when well ripened.

§ 51.867 *Damage.* "Damage" means any injury or defect which materially affects the berries for processing purposes. The following shall be considered as damage:

(a) Overmaturity, when the druplets of the berry have lost their luster and are excessively soft. Such berries usually disintegrate when washed under pressure.

(b) Crushing, when more than one-fourth of the druplets of the berry have been crushed.

(c) Shriveling, when the berry is materially shriveled as evidenced by drying or undevelopment of more than one-fourth of the druplets of the berry.

(d) Dirt, when it cannot be removed from the berry in the ordinary washing process.

§ 51.868 *Well colored.* "Well colored" means that the berry has the color characteristic for a well ripened berry of the type or variety.

§ 51.869 *Diameter.* "Diameter" means the greatest dimension of the berry measured at right angles to a line running from the stem end to the blossom end.

SUBPART—UNITED STATES STANDARDS FOR TABLE GRAPES (EUROPEAN OR VINIFERA TYPE)

GRADES

§ 51.880 *U. S. Fancy Table Grapes.* U. S. Fancy Table Grapes consists of bunches of well developed grapes of one variety (except when designated as assorted varieties) which are well matured, fairly uniform in appearance and well colored. The berries shall be firm, firmly attached to capstems and shall not be weak, shriveled at capstems, shattered, split, crushed or wet, and shall be free from decay, waterberry, sunburn and Almeria Spot, and shall be free from damage caused by scarring, discoloration, heat, mildew, other diseases, freezing, insects, or mechanical or other means.

(a) *Bunches.* The bunches shall be fairly well filled but not excessively tight. They shall also be free from injury caused by shot berries, dried berries or other defective berries or by the trimming away of defective berries and they shall weigh not less than one-half pound.

(b) *Stems.* The stems shall be well developed and strong, shall not be dry and brittle and shall be free from mold and free from damage caused by mildew or freezing. The Almeria variety shall have stems which are mature. The Emperor variety shall have stems which are mature and distinctly yellowish-green or yellow at time of packing.

(c) *Size of berries.* Not less than 90 percent, by count, of the berries, exclusive of shot berries and dried berries, on each bunch shall have a minimum diameter as indicated for varieties as follows:

Ribier and Cardinal, $^{12}/_{16}$ of an inch.
Tokay, $^{11}/_{16}$ of an inch.
Almeria, $^{9}/_{16}$ of an inch.
Thompson Seedless and Black Monukka, $^{7}/_{16}$ of an inch.
Other varieties, $^{10}/_{16}$ of an inch.

(d) *Tolerances.* In order to allow for variations incident to proper grading and handling, the following tolerances, by weight, shall be permitted:

(1) 5 percent for bunches which fail to meet the requirements for minimum diameter of berries;

(2) 5 percent for bunches which weigh less than one-half pound;

[1] These standards apply to berries of the genus Rubus, such as blackberries, dewberries, Boysenberries, Loganberries, Youngberries and similar types of berries, but not raspberries.

(3) 10 percent for bunches which fail to meet the color requirements;

(4) 5 percent for bunches of the Almeria and Emperor varieties which fail to meet the requirements for maturity of stems and color of stems;

(5) 5 percent for bunches and berries which fail to meet the remaining requirements of this grade, other than for maturity and uniformity of appearance, including not more than 3 percent for shattered berries and including not more than 2 percent for berries which are seriously damaged: *Provided*, That not more than one-fourth of the latter amount, or one-half of 1 percent, may be permitted for berries affected by decay.

(6) There is no tolerance specified in this grade for grapes which fail to meet the maturity requirements. However, no lot shall be considered as failing to meet these requirements because the sample of grapes from one container tests below the required percentage of soluble solids.

§ 51.881 *U. S. Extra No. 1 Table Grapes.* U. S. Extra No. 1 Table Grapes consists of bunches of well developed grapes of one variety (except when designated as assorted varieties) which are mature, fairly uniform in appearance and fairly well colored, except that grapes of the red varieties shall be reasonably well colored. The berries shall be firm, firmly attached to capstems and shall not be weak, shriveled at capstems, shattered, split, crushed or wet, and shall be free from decay, waterberry, sunburn and Almeria Spot, and free from damage caused by scarring, discoloration, heat, mildew, other diseases, freezing, insects or mechanical or other means.

(a) *Bunches.* The bunches shall be fairly well filled but not excessively tight. They shall also be free from damage caused by shot berries, dried berries or other defective berries or by the trimming away of defective berries and they shall weigh not less than one-fourth pound.

(b) *Stems.* The stems shall be well developed and strong, shall not be dry and brittle and shall be free from mold and free from damage caused by mildew or freezing. The Almeria variety shall have not less than 50 percent of the bunches with stems which are mature. The Emperor variety shall have not less than 50 percent of the bunches with stems which are mature and distinctly yellowish-green or yellow at time of packing.

(c) *Size of berries.* Not less than 90 percent, by count, of the berries, exclusive of shot berries and dried berries, on each bunch shall have a minimum diameter as indicated for varieties as follows:

Ribier and Cardinal, 12/16 of an inch.
Tokay, 11/16 of an inch.
Almeria, 9/16 of an inch.
Thompson Seedless and Black Monukka, 7/16 of an inch.
Other varieties, 10/16 of an inch.

(d) *Tolerances.* In order to allow for variations incident to proper grading and handling, the following tolerances, by weight, shall be permitted:

(1) 5 percent for bunches which fail to meet the requirements for minimum diameter of berries;

(2) 10 percent for bunches which fail to meet the color requirements;

(3) For the Almeria and Emperor varieties, individual containers may have not more than a total of 10 percent less than the required percentage of bunches which meet the requirements for maturity of stems and color of stems: *Provided*, That the entire lot averages within the required percentage.

(4) 8 percent for bunches which weigh less than one-fourth pound and bunches and berries which fail to meet the remaining requirements of this grade, other than for maturity and uniformity of appearance, including not more than 5 percent for shattered berries and including not more than 2 percent for berries which are seriously damaged: *Provided*, That not more than one-fourth of the latter amount, or one-half of 1 percent, may be permitted for berries affected by decay.

(5) There is no tolerance specified in this grade for grapes which fail to meet the maturity requirements. However, no lot shall be considered as failing to meet these requirements because the sample of grapes from one container tests below the required percentage of soluble solids.

§ 51.882 *U. S. No. 1 Table Grapes.* U. S. No. 1 Table Grapes consists of bunches of well developed grapes of one variety (except when designated as assorted varieties) which are mature and fairly well colored. The berries shall be firm, firmly attached to capstems and shall not be weak, shriveled at capstems, shattered, split, crushed or wet, and shall be free from decay, waterberry, sunburn and Almeria Spot, and free from damage caused by scarring, discoloration, heat, mildew, other diseases, freezing, insects or mechanical or other means.

(a) *Bunches.* The bunches shall not be straggly. They shall be free from damage caused by shot berries, dried berries or other defective berries or by the trimming away of defective berries and they shall weight not less than one-fourth pound.

(b) *Stems.* The stems shall not be weak or dry and brittle and shall be free from mold and free from damage caused by mildew or freezing.

(c) *Tolerances.* In order to allow for variations incident to proper grading and handling, the following tolerances, by weight, shall be permitted:

(1) 10 percent for bunches which fail to meet the color requirements;

(2) 10 percent for bunches which weigh less than one-fourth pound and bunches and berries which fail to meet the remaining requirements of this grade, other than for maturity, including not more than 5 percent for shattered berries and including not more than 2 percent for berries which are seriously damaged: *Provided*, That not more than one-fourth of the latter amount, or one-half of 1 percent, may be permitted for berries affected by decay.

(3) There is no tolerance specified in this grade for grapes which fail to meet the maturity requirements. However, no lot shall be considered as failing to meet these requirements because the sample of grapes from one container tests below the required percentage of soluble solids.

UNCLASSIFIED

§ 51.883 *Unclassified.* Unclassified consists of grapes which have not been classified in accordance with any of the foregoing grades. The term "unclassified" is not a grade within the meaning of these standards, but is provided as a designation to show that no definite grade has been applied to the lot.

APPLICATION OF TOLERANCES

§ 51.884 *Application of tolerances to individual packages.* (a) The contents of individual packages in the lot, based on sample inspection, are subject to the following limitations, provided the averages for the entire lot are within the tolerances specified for the grade:

(1) For a tolerance of 10 percent or more, individual packages in any lot may contain not more than one and one-half times the tolerance specified.

(2) For a tolerance of less than 10 percent, individual packages in any lot may contain not more than double the tolerance specified, except that for shattered berries and wet berries not more than one-tenth of the packages may contain more than double the tolerance specified.

DEFINITIONS

§ 51.885 *Well developed grapes.* "Well developed grapes" means grapes which are not abnormally small for the variety.

§ 51.886 *One variety.* "One variety" means that the grapes show similar varietal characteristics. However, grapes in special packs of two or more varieties, when designated as "assorted varieties," need not meet this requirement.

§ 51.887 *Well matured.* "Well matured" means that the juice from 10 percent, by weight, of whole bunches of grapes in the container, which appear to be least mature, shall test not less than 17 percent soluble solids, as determined by the Balling or Brix scale hydrometer, except that the Tokay variety shall test not less than 18 percent, the Thompson Seedless variety shall test not less than 19 percent, the Malaga and Muscat varieties shall test not less than 20 percent.

§ 51.888 *Fairly uniform in appearance.* "Fairly uniform in appearance" means that not more than one-tenth of the containers in any lot may show sufficient variation in color or size of berries to materially detract from the appearance of the contents of the individual container.

§ 51.889 *Well colored.* "Well colored" means in the case of:

(a) Black varieties that each bunch shall have not less than 95 percent, by count, of berries showing characteristic color. Purple to black shall be considered characteristic color for the varieties Malvoise, Rose of Peru, Black Prince and Black Hamburg; reddish-purple to black shall be considered characteristic color for Cornichon and Black Monukka. Ribier grape berries shall be considered as showing characteristic color when at least 60 percent of the surface is purple to black color, not reddish-purple.

(b) Red varieties that each bunch of the Tokay variety shall have not less than 60 percent, by count, and other red varieties shall have not less than 75 percent, by count, of berries which show at least 60 percent of the surface with good characteristic color: *Provided*, That the appearance of the bunch shall not be appreciably injured by very dark berries. Light or cherry red and dark red, but not light pink or very dark or purplish-red, are considered good characteristic color for the red varieties, excepting that any color ranging from light red through purple shall be considered good characteristic color for the Cardinal variety.

(c) White varieties. There are no color requirements for the white varieties.

§ 51.890 *Firm.* "Firm" means that the berry is reasonably turgid and does not yield more than slightly to moderate pressure.

§ 51.891 *Weak.* "Weak" means that the berry is relatively low in sugar content, has inferior flavor and usually is watery, translucent and somewhat soft to the touch.

§ 51.892 *Shriveled at capstems.* "Shriveled at capstems" means that the berry shows more than slight wrinkling of the skin surrounding the capstem.

§ 51.893 *Shattered.* "Shattered" means that the berry is separated from the bunch, and may or may not have the capstem attached.

§ 51.894 *Wet.* "Wet" means that the grapes are wet from moisture from crushed, leaking or decayed berries or from rain. Grapes which are moist from dew or other moisture condensation such as that resulting from removing grapes from a refrigerator car or cold storage to a warmer location shall not be considered as wet.

§ 51.895 *Decay.* "Decay" means any soft breakdown of the flesh or skin of the berry resulting from bacterial or fungus infection. Slight surface development of green mold (Cladosporium) shall not be considered decay.

§ 51.896 *Waterberry.* "Waterberry" means a watery, soft or flabby condition of the berries. Affected berries are low in sugar content, have tender skins and are easily crushed. This is an advanced or more pronounced stage of the condition referred to as "weak."

§ 51.897 *Sunburn.* "Sunburn" means injury to the berry caused by direct exposure to the sun, including "sulphur burn," occurring as a sunken, and usually discolored and dried area on the exposed surface.

§ 51.898 *Damage.* "Damage" means any defect which materially affects the appearance, or the edible or shipping quality of the individual berry, the appearance of the bunch as a whole, or the shipping quality of the stems.

(a) Any one of the following defects, or any combination of defects, the seriousness of which exceeds the maximum allowed for any one defect, shall be considered as damage to the individual berry:

(1) Scarring such as that caused by thrip, mildew, rubs and similar injuries when materially affecting the appearance of the berry.

(2) Discoloration, when any light brown, tan or darker discoloration of the skin materially affects the appearance of the berry: *Provided*, That "sunkissed" berries of the white Malaga variety which show discoloration of amber or light brown color shall not be considered as damaged. "Buckskin" berries of the Tokay variety, and similar injury to other varieties, shall be considered as damaged by discoloration.

(3) Heat, when the flesh of the berry is affected.

(4) Almeria Spot, when any spot is distinctly sunken or dark in color.

(5) Mildew, when active powdery mildew is present.

(6) Freezing, when the berry is frozen or when the flesh of the berry is affected by freezing.

(7) Insects, when any insect is present or there is visible evidence of insect injury; when mealybug residue or aphis honeydew are present; or when the appearance is materially affected by the presence of leafhopper residue.

(b) The following shall be considered as damage to stems:

(1) Mildew, when active powdery mildew is present on the stems, or when scars caused by this disease constrict or weaken any part of the main or lateral stems.

(2) Freezing, when the stems are frozen or the capstems are swollen or dried, or when the main or lateral stems are watersoaked and limp, or dried, as a result of freezing.

§ 51.899 *Fairly well filled.* "Fairly well filled" means that the berries are reasonably closely spaced on main and lateral stems and that the bunch is not very loose or stringy.

§ 51.900 *Excessively tight.* "Excessively tight" means that the berries are so closely wedged together that, when the stem is fresh, the bunch is solid and the appearance is materially affected by berries on the lower portions being distinctly distorted from normal shape.

§ 51.901 *Injury to the bunch.* "Injury to the bunch" means any defect which more than slightly affects the appearance of the bunch.

§ 51.902 *Shot berries.* "Shot berries" means very small berries resulting from insufficient pollination, usually seedless in those varieties which normally develop seeds. These berries may be entirely green and hard and are designated as "immature shot berries." They may mature and color uniformly with the normal berries on the bunch and are then designated as "mature shot berries."

§ 51.903 *Dried berries.* "Dried berries" means berries which are dry and shriveled to the extent that practically no moisture is present.

§ 51.904 *Well developed and strong.* "Well developed and strong" means that the main and lateral stems are firm, fibrous, and pliable; not distinctly immature or spindly or threadlike at time of packing.

§ 51.905 *Diameter.* "Diameter" means the greatest dimension of the berry taken at right angles to a line running from the stem to the blossom end.

§ 51.906 *Serious damage.* "Serious damage" means any defect which seriously affects the appearance, or the edible or shipping quality of the grapes and includes berries which are split, crushed, wet, affected by decay or waterberry, or damaged by heat or freezing, except that raisining grapes that are cracked or split, and grapes which show healed cracks at the blossom end, shall not be considered as seriously damaged.

§ 51.907 *Mature.* "Mature" means that the juice from 10 percent, by weight, of whole bunches of grapes in the container, which appear to be least mature, shall test not less than 17 percent soluble solids, as determined by the Balling or Brix scale hydrometer, except that the varieties Emperor, Gros Colman, Pierce Isabella, Olivette Blanche, Rish Baba, Red Malaga, Cardinal, Ribier, Khalili, Dizmar and varieties similar to or synonymous with the above, shall test not less than 16 percent, and except that Muscat varieties shall test not less than 18 percent.

§ 51.908 *Fairly well colored.* "Fairly well colored" means in the case of:

(a) Black varieties that each bunch shall have not less than 85 percent, by count, of berries showing characteristic color, except that in the varieties Ribier, Rose of Peru, Black Prince, Black Hamburg and Black Monukka each bunch shall have not less than 75 percent, by count, of berries showing characteristic color. Purple to black shall be considered characteristic color for the varieties Malvoise, Rose of Peru, Black Prince and Black Hamburg; reddish-purple to black shall be considered characteristic color for Cornichon and Black Monukka. Ribier grape berries shall be considered as showing characteristic color when at least 60 percent of the surface is purple to black color, not reddish-purple.

(b) Red varieties that each bunch of the Tokay variety shall have not less than 45 percent, by count, and other red varieties shall have not less than 60 percent, by count, of berries which show at least 60 percent of the surface with characteristic color. Light pink, red, dark red or purple are considered characteristic color for the red varieties. (There are no color requirements for the Pink Thompson Seedless variety, Saltanina Rose.)

(c) White varieties. There are no color requirements for the white varieties.

§ 51.909 *Reasonably well colored.* "Reasonably well colored" applies to the red varieties and means that each bunch of the Tokay variety shall have not less than 55 percent, by count, and other varieties shall have not less than 60

percent, by count, of berries which show at least 60 percent of the surface light pink, red or dark red, but not very dark or purplish-red: *Provided*, That the appearance of the bunch shall not be appreciably injured by very dark berries, except that any color ranging from light pink through purple shall be permitted for the Cardinal variety.

§ 51.910 *Slightly shriveled at capstems.* "Slightly shriveled at capstems" means that the skin of the berry is definitely wrinkled adjacent to the capstem and the surface is materially sunken.

§ 51.911 *Straggly.* "Straggly" means that the berries are so widely spaced on main and lateral stems that the bunch is distinctly open or very stemmy or stringy in structure.

SUBPART—UNITED STATES STANDARDS FOR GRAPEFRUIT (CALIFORNIA AND ARIZONA)

GRADES

§ 51.925 *U. S. Fancy.* U. S. Fancy shall consist of grapefruit of similar varietal characteristics which are mature, well colored, firm, well formed, of smooth texture for the variety, and fairly thin skinned; free from decay, broken skins which are not healed, hard or dry skins, bruises (except those incident to proper handling and packing), dryness or mushy condition, and from injury caused by sprayburn, fumigation, exanthema, scars, green spots, scale, sunburn, sprouting, dirt or other foreign materials, disease, insects or mechanical or other means. Stems shall be properly clipped. (See § 51.932.)

§ 51.926 *U. S. No. 1.* U. S. No. 1 shall consist of grapefruit of similar varietal characteristics which are mature, fairly well colored, firm, well formed, of fairly smooth texture for the variety, and not excessively thick skinned; free from decay, broken skins which are not healed, hard or dry skins, bruises (except those incident to proper handling and packing), and from damage caused by dryness or mushy condition, sprayburn, fumigation, exanthema, scars, green spots, scale, sunburn, sprouting, dirt or other foreign materials, disease, insects or mechanical or other means. Stems shall be properly clipped. (See § 51.932.)

§ 51.927 *U. S. No. 2.* U. S. No. 2 shall consist of grapefruit of similar varietal characteristics which are mature, slightly colored, fairly firm, fairly well formed, and not decidedly rough; free from decay, broken skins which are not healed, hard or dry skins, and from serious damage caused by bruises, dryness or mushy condition, sprayburn, fumigation, exanthema, scars, green spots, scale, sunburn, sprouting, dirt or other foreign materials, disease, insects, or mechanical or other means. Stems shall be properly clipped. (See § 51.932.)

§ 51.928 *U. S. Combination grade.* Any lot of grapefruit may be designated "U. S. Combination" when not less than 40 percent, by count, of the fruits in each container meet the requirements of U. S. No. 1 grade and the remainder U. S. No. 2 grade. (See § 51.933.)

§ 51.929 *U. S. No. 3.* U. S. No. 3 shall consist of grapefruit of similar varietal characteristics which are mature, slightly spongy, misshapen, and rough but not seriously lumpy; which are free from decay, broken skins which are not healed, hard or dry skins, and from serious damage caused by bruises, dryness or mushy condition, and from very serious damage caused by sprayburn, fumigation, exanthema, scars, green spots, scale, sunburn, sprouting, dirt or other foreign materials, disease, insects or mechanical or other means. Stems shall be properly clipped. (See § 51.932.)

UNCLASSIFIED

§ 51.930 *Unclassified.* Unclassified shall consist of grapefruit which have not been classified in accordance with any of the foregoing grades. The term "unclassified" is not a grade within the meaning of these standards but is provided as a designation to show that no definite grade has been applied to the lot.

TOLERANCES

§ 51.931 *Tolerances.* In order to allow for variations incident to proper grading and handling in each of the foregoing grades, the tolerances set forth in §§ 51.932 and 51.933 are provided as specified.

§ 51.932 *U. S. Fancy, U. S. No. 1, U. S. No. 2 and U. S. No. 3 grades.* Not more than 10 percent, by count, of the fruit in any lot may fail to meet the requirements of the specified grade, other than for color, but not more than one-twentieth of this amount, or one-half of 1 percent, shall be allowed for decay at shipping point: *Provided*, That an additional tolerance of $2\frac{1}{2}$ percent, or a total of not more than 3 percent, shall be allowed for decay en route or at destination. In addition not more than 10 percent, by count, of the fruit in any lot may not meet the requirements relating to color.

§ 51.933 *U. S. Combination grade.* Not more than 10 percent, by count, of the fruit in any lot may fail to meet the requirements of this grade, other than for color, but not more than one-twentieth of this amount or one-half of 1 percent, shall be allowed for decay at shipping point: *Provided*, That an additional tolerance of $2\frac{1}{2}$ percent, or a total of not more than 3 percent, shall be allowed for decay en route or at destination. This 3 percent tolerance may be used to reduce the percentage of U. S. No. 1 grade required in the combination, provided the affected fruits meet the requirements of U. S. No. 1 grade in other respects. In addition, not more than 10 percent, by count, of the fruit in any lot may not meet the requirements of the U. S. No. 2 grade for color. No part of any tolerance, other than that for decay, shall be allowed to reduce for the lot as a whole the percentage of U. S. No. 1 in the combination, but individual containers may have not more than a total of 10 percent less than the percentage of U. S. No. 1 specified: *Provided*, That the entire lot averages within the percentage specified.

APPLICATION OF TOLERANCES

§ 51.934 *Application of tolerances to individual packages.* (a) The contents of individual packages in the lot, based on sample inspection, are subject to the following limitations: *Provided*, That the averages for the entire lot are within the tolerances specified for the grade.

(1) For packages which contain more than 25 pounds, and a tolerance of 10 percent or more is provided, individual packages in any lot shall have not more than one and one-half times the tolerance specified. For packages which contain more than 25 pounds and a tolerance of less than 10 percent is provided, individual packages in any lot shall have not more than double the tolerance specified, except that at least one decayed or very seriously damaged fruit may be permitted in any package.

(2) For packages which contain 25 pounds or less, individual packages in any lot are not restricted as to the percentage of defects: *Provided*, That not more than one grapefruit which is seriously damaged by dryness or mushy condition or very seriously damaged by other means may be permitted in any package and, in addition, en route or at destination not more than 10 percent of the packages may have more than one decayed fruit.

STANDARD PACK

§ 51.935 *Standard pack.* (a) Grapefruit shall be fairly uniform in size, and, when packed in boxes, shall be arranged according to the approved and recognized methods. Each wrapped fruit shall be fairly well wrapped.

(b) All packages shall be tightly packed and well filled but the contents shall not show excessive or unnecessary bruising because of overfilled packages.

(c) When packed in standard packed boxes, grapefruit shall show a minimum bulge of 2 inches except that grapefruit of a size 80 or smaller need only show a bulge of $1\frac{1}{2}$ inches.

(d) "Fairly uniform in size" means that not more than 5 percent, by count, of the fruit in any container may be more than one standard size larger or smaller than the standard size for the count packed.

(e) Example of standard size grapefruit: The standard size grapefruit for a 64 count is that size grapefruit which will pack tightly 64 grapefruit of uniform size when packed according to the approved and recognized method.

(f) In order to allow for variations incident to proper packing, not more than 5 percent of the packages in any lot may not meet the requirements of standard pack.

STANDARDS FOR EXPORT

§ 51.936 *Standards for export.* (a) Not more than a total of 10 percent by count, of the grapefruit in any container may be soft, affected by decay, damaged by skin breakdown, have broken skins which are not healed, or be seriously damaged by dryness or mushy condition, except that:

(1) Not more than one-half of 1 percent shall be allowed for grapefruit affected by decay.

(2) Not more than 3 percent shall have broken skins which are not healed.

(3) Not more than 5 percent shall be soft.

(4) Not more than 5 percent shall be seriously damaged by dryness or mushy condition.

(5) Not more than 5 percent shall be damaged by skin breakdown.

(b) Any lot of grapefruit shall be considered as meeting the standards for export if the entire lot averages within the requirements specified: *Provided*, That no sample from the containers in any lot shall have more than double the percentage specified for any one defect, and that not more than a total of 10 percent, by count, of the grapefruit in any container has any of the defects enumerated in the standards for export.

DEFINITIONS

§ 51.937 *Similar varietal characteristics.* "Similar varietal characteristics" means that the fruits in any container are similar in color and type.

§ 51.938 *Well colored.* "Well colored" means that the fruit is yellow in color, with not more than a trace of green.

§ 51.939 *Firm.* "Firm" means that the fruit is not soft or noticeably wilted or flabby. The skin may feel slightly springy or spongy.

§ 51.940 *Well formed.* "Well formed" means that the fruit shows the normal shape characteristic of the variety.

§ 51.941 *Smooth.* "Smooth" means that the skin is of fairly fine grain, the "pebbling" is not pronounced, and any furrows radiating from the stem end are short and shallow.

§ 51.942 *Fairly thin skinned.* "Fairly thin skinned" means that the skin thickness does not average more than three-eighths of an inch, on a central cross section, in sizes 100 or smaller, or more than seven-sixteenths of an inch in sizes larger than 100.

§ 51.943 *Injury.* "Injury" means any defect which more than slightly affects the appearance, or edible or shipping quality of the fruit. Any one of the following defects, or any combination of defects, the seriousness of which exceeds the maximum allowed for any one defect, shall be considered as injury:

(a) Sprayburn which changes the color to such an extent that the appearance of the fruit is noticeably injured, or which causes scarring that aggregates more than one-half inch in diameter.

(b) Fumigation injury which noticeably detracts from the appearance of the fruit, or which occurs as small, thinly scattered spots over more than 10 percent of the fruit surface, or as solid or depressed scarring which aggregates more than one-half of an inch in diameter.

(c) Exanthema which noticeably detracts from the appearance of the fruit, or which occurs as small, thinly scattered spots over more than 10 percent of the fruit surface, or as solid scarring which aggregates more than one-half of an inch in diameter.

(d) Scars which are very rough or very deep; or scars which are very dark when more than one-fourth of an inch in diameter.

(e) Scars which are dark, rough, or deep and aggregate more than one-half of an inch in diameter.

(f) Scars which are fairly light in color, slightly rough, or of slight depth and aggregate more than 5 percent of the fruit surface.

(g) Scars which are light colored, fairly smooth, with no depth and aggregate more than 10 percent of the fruit surface.

(h) Green spots which are depressed or soft, or more than four in number, or which aggregate more than one inch in diameter.

(i) Scale, when more than 5 medium to large California red or purple scale are adjacent to the "button" at the stem end, or scattered over the fruit, or any scale which affects the appearance of the fruit to a greater extent.

(j) Sunburn which appreciably changes the normal color or shape of the fruit, or affects more than 10 percent of the fruit surface.

§ 51.944 *Fairly well colored.* "Fairly well colored" means that yellow color predominates on the fruit and that the fruit is free from distinctly green streaks and distinctly green blotches.

§ 51.945 *Fairly smooth.* "Fairly smooth" means that the skin does not feel noticeably rough or coarse. The size of the fruit should be considered in judging the texture, as large fruit is not usually as smooth as the small. It is common for the fruit to show larger and coarser "pebbling" on the stem end portion than on the blossom end. Slight furrows or grooves which may be present on the stem end portion of the fruit shall not be considered as slightly rough unless they are of sufficient depth, length, and number to materially affect the appearance and smoothness of the grapefruit.

§ 51.946 *Excessively thick skinned.* "Excessively thick skinned" means that the skin thickness averages more than seven-sixteenths of an inch, on a central cross section, in sizes 100 or smaller, or more than one-half of an inch in sizes larger than 100.

§ 51.947 *Damage.* "Damage" means any injury which materially affects the appearance, or the edible or shipping quality of the fruit. Any one of the following defects, or any combination of defects, the seriousness of which exceeds the maximum allowed for any one defect, shall be considered as damage:

(a) Dryness or mushy condition, when affecting all segments more than one-fourth of an inch at the stem end, or the equivalent of this amount by volume, when occurring in other portions of the fruit.

(b) Sprayburn which changes the color to such an extent that the appearance of the fruit is materially injured, or which causes scarring that aggregates more than three-fourths of an inch in diameter.

(c) Fumigation injury which materially detracts from the appearance of the fruit, or which occurs as small, thinly scattered spots over more than 25 percent of the fruit surface, or as solid scarring or depressions which aggregate more than three-fourths of an inch in diameter.

(d) Exanthema which materially detracts from the appearance of the fruit, or which occurs as small, thinly scattered spots over more than 25 percent of the fruit surface, or as solid scarring, that is not cracked, which aggregates more than three-fourths of an inch in diameter.

(e) Scars which are very deep; or scars which are very rough or very dark and aggregate more than one-half of an inch in diameter.

(f) Scars which are dark, rough or deep and aggregate more than three-fourths of an inch in diameter.

(g) Scars which are fairly light in color, slightly rough, or of slight depth and aggregate more than 10 percent of the fruit surface.

(h) Scars which are light colored, fairly smooth, with no depth and aggregate more than 15 percent of the fruit surface.

(i) Green spots which are depressed or soft, or more than seven in number, or which aggregate more than 5 percent of the fruit surface.

(j) Scale, when more than 10 medium to large California red or purple scale are adjacent to the "button" at the stem end, or scattered over the fruit, or any scale which affects the appearance of the fruit to a greater extent.

(k) Sunburn which causes appreciable flattening of the fruit, drying or darkening of the skin, or affects more than 25 percent of the fruit surface.

§ 51.948 *Slightly colored.* "Slightly colored" means that sufficient yellow color is distributed over the fruit surface and, when blended with the green color present, is equivalent to 25 percent of full yellow color characteristic of the variety.

§ 51.949 *Fairly firm.* "Fairly firm" means that the fruit may be slightly soft but is not decidedly flabby. The skin may be thick and slightly puffy.

§ 51.950 *Fairly well formed.* "Fairly well formed" means that the fruit is not materially flattened, materially pointed, extremely elongated, or otherwise decidedly deformed.

§ 51.951 *Decidedly rough.* "Decidedly rough" means that the skin is materially rough, materially lumpy, decidely folded, or decidely ridged.

§ 51.952 *Serious damage.* "Serious damage" means any injury which seriously affects the appearance, or the edible or shipping quality of the fruit. Any one of the following defects, or any combination of defects, the seriousness of which exceeds the maximum allowed for any one defect, shall be considered as serious damage:

(a) Dryness or mushy condition, when affecting all segments more than one-half of an inch at the stem end, or the equivalent of this amount by volume, when occurring in other portions of the fruit.

(b) Sprayburn which changes the color to such an extent that the appearance of the fruit is seriously injured, or which causes scarring that aggregates

more than 10 percent of the fruit surface.

(c) Fumigation injury which occurs as small, thinly scattered spots over more than one-half of the fruit surface, or solid scarring or depressions which aggregate more than 5 percent of the fruit surface.

(d) Exanthema which occurs as small, thinly scattered spots over more than one-half of the fruit surface, or solid scarring that is not cracked, which aggregates more than 5 percent of the fruit surface.

(e) Scars which are very deep; or scars which are very rough or very dark and aggregate more than one inch in diameter.

(f) Scars which are dark, rough or deep and aggregate more than 5 percent of the fruit surface.

(g) Scars which are fairly light in color, slightly rough or of slight depth and aggregate more than 15 percent of the fruit surface.

(h) Scars which are light colored, fairly smooth, with no depth and aggregate more than 25 percent of the fruit surface.

(i) Green spots which are soft or aggregate more than 2 inches in diameter.

(j) Scale, when California red or purple scale is concentrated as a ring or blotch, or which is more than thinly scattered over the fruit surface, or any scale which affects the appearance of the fruit to a greater extent.

(k) Sunburn which causes decided flattening of the fruit, drying or dark discoloration of the skin, or which affects more than one-third of the fruit surface.

§ 51.953 *Slightly spongy.* "Slightly spongy" mean that the fruit is puffy or slightly wilted but not decidedly flabby.

§ 51.954 *Misshapen.* "Misshapen" means that the fruit is materially flattened, materially pointed, extremely elongated or otherwise decidedly deformed.

§ 51.955 *Very serious damage.* "Very serious damage" means any injury which very seriously affects the appearance, or the edible or shipping quality of the fruit. Any one of the following defects, or any combination of defects, the seriousness of which exceeds the maximum allowed for any one defect, shall be considered as very serious damage:

(a) Sprayburn which seriously affects more than 25 percent of the fruit surface.

(b) Fumigation injury which causes deep, rough, or dark scarring which aggregates more than 25 percent of the fruit surface.

(c) Exanthema which aggregates more than 10 percent of the fruit surface, or causes serious cracks.

(d) Scars which are very dark, very rough, or very deep and aggregate more than 10 percent of the fruit surface.

(e) Scars which are dark, rough or deep and aggregate more than 25 percent of the fruit surface.

(f) Green spots which are badly sunken or soft.

(g) Scale so numerous or large that the appearance of the fruit is very seriously affected.

(h) Sunburn which seriously affects more than one-third of the fruit surface.

SUBPART—UNITED STATES CONSUMER STANDARDS FOR FRESH KALE

GRADES

§ 51.975 *U. S. Grade A.* U. S. Grade A shall consist of leaves or parts of leaves of kale of one type which are fresh, fairly tender, clean, well trimmed and of characteristic color for the type; which are free from decay, small pieces of leaves, and leaf stems without blades, and are free from damage caused by discoloration, seedstems, bud burn, freezing, foreign material, disease, insects or mechanical or other means. Leaves or parts of leaves of kale on the shown face shall be reasonably representative in size and quality of the contents of the container.

(a) Incident to proper grading and handling, not more than 3 percent, by weight, of the kale in any lot may be small pieces of leaves, and not more than 5 percent may fail to meet the remaining requirements of the grade, including not more than 2 percent for leaves or parts of leaves which are seriously damaged.

§ 51.976 *U. S Grade B.* U. S. Grade B shall consist of leaves or parts of leaves of kale which meet the requirements of U. S. Grade A, except that they need be only reasonably clean; and except that those with only the edges affected with bronze or slight yellowish color, but not dried, shall be permitted in this grade; and except for the increased tolerances for defects specified below:

(a) Incident to proper grading and handling, not more than 5 percent, by weight, of the kale in any lot may be small pieces of leaves, and not more than 10 percent may fail to meet the remaining requirements of the grade, including not more than 4 percent for leaves or parts of leaves which are seriously damaged.

OFF-GRADE

§ 51.977 *Off-Grade kale.* Leaves or parts of leaves of kale which fail to meet the requirements of either of the foregoing grades shall be Off-Grade kale.

DEFINITIONS

§ 51.978 *One type.* "One type" means that the kale is generally of the same color and character of growth. No mixture of types shall be permitted which materially affects the appearance of the lot.

§ 51.979 *Fresh.* "Fresh" means that the leaves or parts of leaves are not more than slightly wilted.

§ 51.980 *Fairly tender.* "Fairly tender" means that leaves and parts of leaves are not tough or excessively fibrous.

§ 51.981 *Clean.* "Clean" means that the kale does not show more than a trace of grit, sand, dirt, silt, muck or other water insoluble inorganic material.

§ 51.982 *Well trimmed.* "Well trimmed" means that the leaf stems (petioles) have been cut or broken off within ½ inch of the blade.

§ 51.983 *Small pieces of leaves.* "Small pieces of leaves" means parts of leaves which are smaller in area than a circle one inch in diameter.

§ 51.984 *Damage.* "Damage" means any injury or defect which materially affects the appearance, or the edible, shipping or keeping quality of the individual leaves or parts of leaves or the lot as a whole. The following defects or any combination of defects the seriousness of which exceeds the amount allowed for any one defect shall be considered as damage:

(a) Discoloration, when the appearance of the leaf or part of a leaf is materially affected.

(b) Mechanical damage, when the leaf or part of a leaf is very badly crushed, torn or broken.

§ 51.985 *Serious damage.* "Serious damage" means any injury or defect which seriously affects the appearance, or the edible, shipping or keeping quality of the individual leaves or parts of leaves or the lot as a whole. The following defects or any combination of defects the seriousness of which exceeds the amount allowed for any one defect shall be considered as serious damage:

(a) Leaves or parts of leaves which are badly discolored.

(b) Leaves or parts of leaves on which worms or worm frass are present, or leaves or parts of leaves on which there is more than slight infestation by other insects.

(c) Leaves which are affected by soft rot.

(d) Weeds, grass or pieces thereof, and other extraneous matter.

§ 51.986 *Reasonably clean.* "Reasonably clean" means that the kale is reasonably free from grit, sand, dirt, silt, muck and other water insoluble inorganic material.

SUBPART—UNITED STATES STANDARDS FOR PERSIAN (TAHITI) LIMES

GRADES

§ 51.1000 *U. S. No. 1.* U. S. No. 1 consists of Persian Limes which are firm, fairly well formed, of fairly smooth texture, which are free from decay, stylar end breakdown or other internal discoloration, broken skins which are not healed, bruises (except those incident to proper handling and packing), hard or dry skins, and free from damage caused by freezing, dryness or mushy condition, sprayburn, exanthema (ammoniation), scars, thorn scratches, scale, sunburn, scab, blanching, discoloration, buckskin, dirt or other foreign material, disease, insects or mechanical or other means.

(a) The limes shall have a good green color: *Provided*, That lots of limes which meet all the requirements of this grade except as to color shall be designated as "U. S. No. 1 Turning" if the limes in each container have started to show yellow color, or as "U. S. No. 1 Mixed Color" if the limes in each container fail to meet the color requirements of either U. S. No. 1 or U. S. No. 1 Turning.

(b) The fruit shall have a juice content of not less than 42 percent, by volume.

(c) In order to allow for variations incident to proper grading and handling, not more than 10 percent, by count, of the fruit in any lot may fail to meet the color requirements. In addition, not more than 10 percent, by count, of the fruit in any lot may be below the remaining requirements of this grade, but not more than one-half of this amount, or 5 percent, shall be allowed for decay, stylar end breakdown, broken skins which are not healed, or defects causing serious damage, including not more than one-half of 1 percent for decay at shipping point: *Provided*, That an additional tolerance of 2½ percent, or a total of not more than 3 percent, shall be allowed for decay en route or at destination.

§ 51.1001 *U. S. No. 2.* U. S. No. 2 consists of Persian Limes which are fairly firm, which are not badly deformed, and not of excessively rough texture, which are free from decay, stylar end breakdown or other internal discoloration, broken skins which are not healed, bruises (except those incident to proper handling and packing), and hard or dry skins, and free from serious damage caused by freezing, dryness or mushy condition, sprayburn, exanthema (ammoniation), scars, thorn scratches, scale, sunburn, scab, discoloration, buckskin, dirt or other foreign material, disease, insects or mechanical or other means.

(a) The limes shall have good green color: *Provided*, That lots of limes which meet all the requirements of this grade except as to color shall be designated as "U. S. No. 2 Turning" if the limes in each container have started to show yellow color, or as "U. S. No. 2 Mixed Color" if the limes in each container fail to meet the color requirements of either U. S. No. 2 or U. S. No. 2 Turning.

(b) The fruit shall have a juice content of not less than 42 percent, by volume.

(c) In order to allow for variations incident to proper grading and handling, not more than 10 percent, by count, of the fruit in any lot may fail to meet the color requirements. In addition, not more than 10 percent, by count, of the fruit in any lot may be below the remaining requirements of this grade, but not more than one-half of this amount, or 5 percent, shall be allowed for decay, stylar end breakdown, and broken skins which are not healed, including not more than one-half of 1 percent for decay at shipping point: *Provided*, That an additional tolerance of 2½ percent, or a total of not more than 3 percent, shall be allowed for decay en route or at destination.

§ 51.1002 *U. S. Combination grade.* A lot of limes may be designated "U. S. Combination" when not less than 75 percent, by count, of the limes in each container meet the requirements of U. S. No. 1 grade and the remainder U. S. No. 2 grade.

(a) The limes shall have good green color: *Provided*, That lots of limes which meet all the requirements of this grade except as to color shall be designated as "U. S. Combination Turning" if the limes in each container have started to show yellow color, or as "U. S. Combination Mixed Color" if the limes in each container fail to meet the color requirements of either U. S. Combination or U. S. Combination Turning.

(b) In order to allow for variations incident to proper grading and handling, not more than 10 percent, by count, of the fruit in any lot may fail to meet the color requirements. In addition, not more than 10 percent, by count, of the fruit in any lot may be below the remaining requirements of the lower grade in the combination, but not more than one-half of this amount, or 5 percent, shall be allowed for limes affected by decay, stylar end breakdown, and broken skins which are not healed, including not more than one-half of 1 percent for decay at shipping point: *Provided*, That an additional tolerance of 2½ percent, or a total of not more than 3 percent, shall be allowed for decay enroute or at destination.

(c) No part of the above tolerances shall be allowed to reduce for the lot as a whole, the 75 percent of U. S. No. 1 limes required in the U. S. Combination Grade, but individual containers may have not less than 65 percent of the higher grade.

UNCLASSIFIED

§ 51.1003 *Unclassified.* Unclassified consists of Persian Limes which have not been classified in accordance with any of the foregoing grades. The term "unclassified" is not a grade within the meaning of these standards but is provided as a designation to show that no definite grade has been applied to the lot.

APPLICATION OF TOLERANCES

§ 51.1004 *Application of tolerances to individual packages.* (a) The contents of individual packages in the lot, based on sample inspection, are subject to the following limitations: *Provided*, That the averages for the entire lot are within the tolerances specified for the grade.

(1) For a tolerance of 10 percent or more, individual packages in any lot may contain not more than one and one-half times the tolerance specified, except that when the package contains 15 specimens or less, individual packages may contain not more than double the tolerance specified.

(2) For a tolerance of less than 10 percent, individual packages in any lot may contain not more than double the tolerance specified, provided at least one specimen which does not meet the requirements shall be allowed in any one package.

DEFINITIONS

§ 51.1005 *Firm.* "Firm" means that the fruit is not soft or flabby.

§ 51.1006 *Fairly well formed.* "Fairly well formed" means that the fruit shows normal characteristic shape for the Persian variety and is not materially flattened on one side.

§ 51.1007 *Fairly smooth texture.* "Fairly smooth texture" means that the fruit is comparatively free from lumpiness and that pebbling is not abnormally coarse. Coarse pebbling is not objectionable as it is indicative of good keeping quality and is characteristic of the fruit, especially that from young trees.

§ 51.1008 *Stylar end breakdown.* "Stylar end breakdown" is a physiological breakdown starting as a sunken area at the base of the nipple. A brownish discoloration develops in the rind. As it progresses the color of the affected area becomes light drab to drab but the area remains firm unless infected with secondary organisms that cause soft decay.

§ 51.1009 *Damage.* "Damage" means any defect that materially affects the appearance, or the edible or shipping quality of the fruit. Any one of the following defects, or any combination of defects, the seriousness of which exceeds the maximum allowed for any one defect, shall be considered as damage:

(a) Dryness or mushy condition which extends into all segments more than one-eighth of an inch at the stem end, or more than the equivalent of this amount, by volume, when occurring in other portions of the fruit;

(b) Sprayburn which changes the color to such an extent that the appearance of the fruit is materially affected, or which causes scarring that in the aggregate exceeds the area of a circle one-fourth inch in diameter;

(c) Exanthema (ammoniation) which materially detracts from the appearance of the fruit, or which occurs as small, thinly scattered spots over more than 10 percent of the fruit surface, or as solid scarring (not cracked), or depressions which in the aggregate exceed the area of a circle one-half inch in diameter;

(d) Scars which are dark, rough, or deep and in the aggregate exceed the area of a circle one-fourth inch in diameter, or scars which are fairly light in color, slightly rough, or of slight depth and in the aggregate exceed the area of a circle one-half inch in diameter, or scars which are light colored, fairly smooth, with no depth and aggregate more than 10 percent of the fruit surface;

(e) Thorn scratches, when the injury is not well healed, or when dark colored, rough or deep and in the aggregate exceeds the area of a circle one-fourth inch in diameter, or when light colored, fairly smooth and concentrated and in the aggregate exceeds the area of a circle one-half inch in diameter, or light colored and scattered thorn injury which detracts from the appearance of the fruit to a greater extent than the aggregate area of one-half inch permitted for light colored concentrated injury;

(f) Scale, when more than ten medium to large California red or purple scale adjacent to button at stem end or scattered over the fruit, or any scale which affects the appearance of the fruit to a greater extent;

(g) Sunburn which causes appreciable flattening of the fruit, drying of the skin, material change in the color of the skin, appreciable drying of the flesh underneath the affected area or affects more than 5 percent of the fruit surface;

(h) Scab which materially affects the shape or texture;

(i) Blanching, when more than 10 percent of the surface of the fruit shows a

whitish area owing to shading, resting on the surface of the ground, or contact with other fruits on the tree. These whitish areas are not to be confused with fruit that is turning, the color of which is more of a greenish yellow;

(j) Discoloration caused by rust mite, melanose or other means, when fairly smooth and more than 10 percent of the fruit surface is affected, or when slightly rough and in the aggregate exceeds the area of a circle one-half inch in diameter; and,

(k) Buckskin, when more unsightly than the maximum of discoloration allowed, or the fruit texture is materially affected.

§ 51.1010 *Good green color.* "Good green color" means that the skin of that part of the lime free from permissible injury shall be of a good green color characteristic of the Persian variety.

§ 51.1011 *Fairly firm.* "Fairly firm" means that the fruit is not soft or excessively flabby.

§ 51.1012 *Badly deformed.* "Badly deformed" means that the fruit is seriously misshapen from any cause.

§ 51.1013 *Excessively rough texture.* "Excessively rough texture" means that the skin is badly ridged or very decidedly lumpy.

§ 51.1014 *Serious damage.* "Serious damage" means any defect which seriously affects the appearance, or the edible or shipping quality of the fruit. Any one of the following defects, or any combination of defects, the seriousness of which exceeds the maximum allowed for any one defect, shall be considered as serious damage:

(a) Dryness or mushy condition which extends into all segments more than one-fourth of an inch at the stem end, or more than the equivalent of this amount, by volume, when occurring in other portions of the fruit;

(b) Sprayburn which changes the color to such an extent that the appearance of the fruit is seriously injured or which causes scarring that in the aggregate exceeds the area of a circle one-half inch in diameter;

(c) Exanthema (ammoniation) which occurs as small spots over more than 25 percent of the fruit surface, or as solid scarring (not cracked), or depressions which aggregate more than 10 percent of the fruit surface;

(d) Scars which are dark, rough, or deep and aggregate more than 5 percent of the fruit surface, or scars which are fairly light in color, slightly rough, or of slight depth and aggregate more than 10 percent of the fruit surface, or scars which are light colored, fairly smooth, with no depth and aggregate more than 25 percent of the fruit surface;

(e) Thorn scratches, when the injury is not well healed, or when dark colored, rough or deep and aggregates more than 5 percent of the fruit surface, or when light colored, fairly smooth and concentrated and aggregates more than 10 percent of the fruit surface, or light colored and scattered thorn injury which detracts from the appearance of the fruit to a greater extent than the 10 percent light colored concentrated injury;

(f) Scale, California red or purple scale concentrated as a ring or blotch when the average outside diameter exceeds one-half inch, or more than the equivalent of this amount when scattered over the fruit surface;

(g) Sunburn which causes decided flattening of the fruit, marked drying or dark discoloration of the skin, material drying of the flesh underneath the affected area, or which affects more than 10 percent of the fruit surface;

(h) Scab which seriously affects shape or texture;

(i) Discoloration caused by rust mite, melanose or other means, when fairly smooth and more than 50 percent of the fruit surface is affected, or when slightly rough and more than 25 percent of the fruit surface is affected and,

(j) Buckskin, when more unsightly than the maximum of discoloration allowed or the fruit texture is seriously affected.

## Subpart—United States Standards for Mustard Greens and Turnip Greens

### GENERAL

§ 51.1030 *General.* These standards are applicable to either mustard greens or turnip greens consisting of either plants (crown or root attached), or cut leaves but they shall not be applicable to mixtures of plants and cut leaves or mixtures of mustard greens and turnip greens in the same container.

### GRADES

§ 51.1031 *U. S. No. 1.* U. S. No. 1 consists of mustard greens or turnip greens of similar varietal characteristics which are fresh, fairly tender, fairly clean, and which are free from decay and free from damage caused by seedstems, discoloration, freezing, foreign material, disease, insects or mechanical or other means.

(a) *Specifications for roots.* In the case of turnip greens with roots attached, the roots shall be firm and free from damage by any cause and unless otherwise specified, the maximum diameter of the root shall be 1½ inches.

(b) *Tolerance for defects.* In order to allow for variations incident to proper grading and handling, other than for size of roots and mixtures of plants and leaves, not more than a total of 10 percent, by weight, of the units in any lot, may fail to meet the requirements of the grade: *Provided*, That not more than one-half of this amount, or 5 percent, shall be allowed for serious damage by any cause and including therein not more than 2 percent of decay. (See § 51.1034.)

(c) *Tolerance for mixtures of whole plants and leaves.* Not more than 5 percent, by weight, of the mustard or turnip greens may consist of cut leaves in a lot consisting of plants, or of plants in a lot consisting of cut leaves. (See § 51.1034.)

(d) *Tolerance for size.* Turnip greens with roots attached shall have not more than 10 percent, by weight, of roots which are larger than the specified maximum size. (See § 51.1034.)

### UNCLASSIFIED

§ 51.1032 *Unclassified.* Unclassified consists of mustard greens or turnip greens which have not been classified in accordance with the foregoing grade. The term "unclassified" is not a grade within the meaning of these standards but is provided as a designation to show that no definite grade has been applied to the lot.

### APPLICATION OF TOLERANCES

§ 51.1033 *Application of tolerances.* (a) The contents of individual containers in the lot, based on sample inspection, are subject to the following limitation: *Provided*, That the averages for the entire lot are within the tolerances specified.

(1) When a tolerance is 10 percent or more, individual containers in any lot shall have not more than one and one-half times the tolerance specified.

(2) When a tolerance is less than 10 percent, individual containers in any lot shall have not more than double the tolerance specified.

§ 51.1034 *Basis for calculating percentages.* Percentages shall be calculated on the basis of weight or an equivalent basis. When mustard greens or turnip greens are packed as plants, each plant shall be considered as a unit. When packed as cut leaves, the individual leaf shall be considered as a unit.

### DEFINITIONS

§ 51.1035 *Similar varietal characteristics.* "Similar varietal characteristics" means that the mustard or turnip greens shall be of one type (such as, crinkly leaf type or smooth leaf type in the case of mustard greens). No mixture of types shall be permitted which materially affects the appearance of the lot.

§ 51.1036 *Fresh.* "Fresh" means that the mustard or turnip leaves are not more than slightly wilted.

§ 51.1037 *Fairly tender.* "Fairly tender" means that the mustard or turnip greens are not old, tough, or excessively fibrous.

§ 51.1038 *Fairly clean.* "Fairly clean" means that the appearance of the mustard or turnip greens is not materially affected by the presence of mud, dirt, or other foreign material.

§ 51.1039 *Damage.* "Damage" means any defect which materially affects the appearance, or the edible or shipping quality of the individual plant (with or without roots), the individual cut leaf, or the lot as a whole. Any one of the following defects, or any combination of defects, the seriousness of which exceeds the maximum allowed for any one defect, shall be considered as damage:

(a) Seedstems when more than one-fourth the length of the longest leaf;

(b) Discoloration when the appearance of the individual unit is materially affected by yellowing or any other type of discoloration; and,

(c) Mechanical damage when the individual unit is badly crushed, torn, or broken.

§ 51.1040 *Firm.* "Firm" means that the root is not soft, flabby, or shriveled.

§ 51.1041 *Diameter.* "Diameter" means the greatest dimension measured at right angles to a line from the center of the crown to the base of the root.

§ 51.1042 *Serious damage.* "Serious damage" means any defect which seriously affects the appearance, or the edible or shipping quality of the individual plant (with or without roots), the individual cut leaf, or the lot as a whole. Any one of the following defects, or any combination of defects, the seriousness of which exceeds the maximum allowed for any one defect, shall be considered as serious damage:

(a) Insects when the unit is noticeably infested or when seriously damaged by them;

(b) Discoloration when the unit is badly discolored; and,

(c) Decay.

## Subpart—United States Standards for Common Green Onions[1]

### GRADES

§ 51.1055 *U. S. No. 1.* U. S. No. 1 shall consist of green onions which are fairly well-formed, firm, young and tender, fairly clean, free from decay, and from damage caused by seedstems, roots, foreign material, disease, insects, mechanical or other means. The bulbs shall be well trimmed. The tops shall be fresh, of good green color, free from damage caused by broken or bruised leaves, or by clipping. When all the tops of the onions have been evenly clipped back in accordance with good commercial practice, they shall be specified as "Clipped Tops" in connection with the grade.

(a) *Over-all length.* Unless otherwise specified, the over-all length (roots excepted) of the onions shall be not more than 24 inches nor less than 8 inches and the onions shall be not less than one-fourth of an inch or more than one inch in diameter.

(b) *Tolerance for defects.* In order to allow for variations, other than size, incident to proper grading and handling, not more than a total of 10 percent, by count, of the onions in any lot may fail to meet the requirements of this grade, but not more than 5 percent shall be allowed for defects causing serious damage, including not more than 2 percent for onions affected by decay.

(c) *Tolerance for size.* Not more than a total of 10 percent, by count, of the onions in any lot may fail to meet the requirements as to the specified length, minimum diameter or maximum diameter, but not more than 5 percent shall be allowed for any one of the requirements for size.

§ 51.1056 *U. S. No. 2.* U. S. No. 2 shall consist of green onions which are not badly misshapen, and which are fairly firm, fairly young and tender, fairly clean, free from decay and from serious damage caused by seedstems, roots, foreign material, disease, insects, mechanical or other means. The bulbs shall be fairly well trimmed. The tops shall be fresh, of fairly good green color, and free from serious damage caused by broken or bruised leaves, or by clipping. When all the tops of the onions have been evenly clipped back in accordance with good commercial practice, they shall be specified as "Clipped Tops" in connection with the grade.

(a) *Over-all length.* Unless otherwise specified, the over-all length (roots excepted) of the onions shall be not less than 8 inches and the onions shall be not less than one-fourth of an inch or more than one and one-half inches in diameter.

(b) *Tolerance for defects.* In order to allow for variations, other than size, incident to proper grading and handling, not more than a total of 10 percent, by count, of the onions in any lot may fail to meet the requirements of this grade, including not more than 2 percent for onions affected by decay.

(c) *Tolerance for size.* Not more than a total of 10 percent, by count, of the onions in any lot may fail to meet the requirements of the specified length, minimum or maximum diameter, but not more than 5 percent shall be allowed for any one of the requirements for size.

### UNCLASSIFIED

§ 51.1057 *Unclassified.* Unclassified shall consist of onions which are not graded in conformity with either of the foregoing grades. The term "unclassified" is not a grade within the meaning of these standards but is provided as a designation to show that no definite grade has been applied to the lot.

### SIZE

§ 51.1058 *Size.* The following terms and definitions are provided for describing the diameters of any lot:

"Small" means less than ½ inch.
"Medium" means ½ to 1 inch, inclusive.
"Large" means over 1 inch.

### APPLICATION OF TOLERANCES

§ 51.1059 *Application of tolerances.* (a) The contents of individual containers in the lot, based on sample inspection, are subject to the following limitations, provided the averages for the entire lot are within the tolerances specified:

(1) When a tolerance is 10 percent or more, individual containers in any lot shall have not more than one and one-half times the tolerance specified, except that at least one defective and one off-size specimen may be permitted in any container.

(2) When a tolerance is less than 10 percent, individual containers in any lot shall have not more than double the tolerance specified, except that at least one defective and one off-size specimen may be permitted in any container.

### DEFINITIONS

§ 51.1060 *Fairly well formed.* "Fairly well formed" means that the onion is not more than slightly curved, angular, crooked, lopsided or otherwise slightly misshapen.

§ 51.1061 *Fairly clean.* "Fairly clean" means that the appearance of the onion is not materially injured by dirt.

§ 51.1062 *Damage.* "Damage" means any injury or defect which materially affects the appearance, or the edible or shipping quality.

(a) *Seedstems.* An onion with a seedstem shall be considered as damaged if the seedstem has been broken at a point other than at the top, or is coarse, fibrous, hollow or soft, or has separated naturally from the sheath or skin. Onions often show flower buds while the seedstem is still tender. Such onions are not objectionable if the flower buds have been removed, or if present, are not noticeably protruding; however, an onion with a seedstem which, after the flower bud has been removed, exceeds the length of the longest leaves of the plant, shall be considered as damaged.

(b) *Clipping.* The tops of onions are sometimes clipped or pinched back to remove discolored or otherwise injured leaves. An individual plant shall not be considered as damaged when not more than the tips of all the leaves have been clipped or pinched back; or when not more than half the leaves have been clipped or pinched back to a greater extent but not to the extent that the appearance is materially injured; or when the tops of all the onions have been evenly clipped back in accordance with good commercial practice and the designation "Clipped Tops" is specified in connection with the grade.

§ 51.1063 *Well-trimmed.* "Well-trimmed" means that the bulb is not broken above the point of root attachment and is practically free from dead, discolored or slick outer skins. Fresh, clean, loose skins which do not materially affect the appearance of the individual onion or the bunch are permitted.

§ 51.1064 *Fresh.* "Fresh" means that the tops are not withered or badly wilted.

§ 51.1065 *Good green color.* "Good green color" means that the tops have a normal green color characteristic of healthy plants. A slight discoloration of the extreme tips and slight scarring caused by thrips are not objectionable.

§ 51.1066 *Diameter.* "Diameter" means the greatest dimension of the onion taken at right angles to the longitudinal axis.

§ 51.1067 *Not badly misshapen.* "Not badly misshapen" means that the onion is not badly curved or crooked.

§ 51.1068 *Fairly young and tender.* "Fairly young and tender" means that the onion is not tough, stringy, or advanced to the stage where the neck is flabby.

§ 51.1069 *Serious damage.* "Serious damage" means any injury or defect which seriously affects the appearance, or the edible or shipping quality.

(a) Seedstems which are excessively coarse or fibrous shall be considered as serious damage.

(b) Badly broken or badly bruised tops shall be considered as serious damage.

[1] These standards apply only to commonly cultivated green onions (Allium cepa) and not to leeks (Allium porrum), Welch or Japanese multiplier onions (Allium fistulosum), and shallots (Allium ascalonicum).

(c) Clipping. The tops of onions are sometimes clipped or pinched back to remove discolored or otherwise injured leaves. An individual plant shall not be considered as seriously damaged when not more than the tips of all the leaves have been clipped or pinched back; or when not more than half the leaves have been clipped or pinched back to a greater extent but not to the extent that the appearance is seriously injured; or when the tops of all the onions have been evenly clipped back in accordance with good commercial practice and the designation "Clipped Tops" is specified in connection with the grade.

§ 51.1070 *Fairly well-trimmed.* "Fairly well-trimmed" means that the bulb is not broken above the point of root attachment and is reasonably free from dead, discolored or slick outer skins. Fresh, fairly clean, loose skins which do not seriously affect the appearance of the individual onion or the bunch are permitted.

§ 51.1071 *Fairly good green color.* "Fairly good green color" means that the tops are pale or yellowish green or otherwise slightly discolored.

SUBPART—UNITED STATES STANDARDS FOR ORANGES (CALIFORNIA AND ARIZONA)

GRADES

§ 51.1085 *U. S. Fancy.* U. S. Fancy consists of oranges of similar varietal characteristics which are mature, well colored, firm, well formed, of smooth texture for the variety, and which are free from decay, broken skins which are not healed, hard or dry skins, exanthema, growth cracks, bruises (except those incident to proper handling and packing), dryness or mushy condition, and free from injury caused by split, rough, wide or protruding navels, creasing, scars, oil spots, scale, sunburn, dirt or other foreign material, disease, insects or mechanical or other means. (See § 51.1092.)

§ 51.1086 *U. S. No. 1.* U. S. No. 1 consists of oranges of similar varietal characteristics which are mature, firm, well formed, of fairly smooth texture for the variety, and which are free from decay, broken skins which are not healed, hard or dry skins, exanthema, growth cracks, bruises (except those incident to proper handling and packing), and free from damage caused by dryness or mushy condition, split, rough, excessively wide or protruding navels, creasing, scars, oil spots, scale, sunburn, dirt or other foreign material, disease, insects or mechanical or other means. Each fruit shall be well colored except Valencia oranges which shall be at least fairly well colored: *Provided*, That navel oranges in any lot which is destined for export and which is certified as meeting the Standards for Export need be only fairly well colored. (See § 51.1092.)

§ 51.1087 *U. S. No. 2.* U. S. No. 2 consists of oranges of similar varietal characteristics which are mature, fairly well colored, fairly firm, fairly well formed but not excessively rough, and which are free from decay, broken skins which are not healed, hard or dry skins, exanthema, growth cracks, and free from serious damage caused by bruises, dryness or mushy condition, split or protruding navels, creasing, scars, oil spots, scale, sunburn, dirt or other foreign material, disease, insects or mechanical or other means. (See § 51.1092.)

§ 51.1088 *U. S. Combination grade.* Any lot of oranges may be designated "U. S. Combination" when not less than 40 percent, by count, of the oranges in each container meet the requirements of U. S. No. 1 grade and the remainder U. S. No. 2 grade. (See § 51.1093.)

§ 51.1089 *U. S. No. 3.* U. S. No. 3 consists of oranges of similar varietal characteristics which are mature, which may be slightly spongy, misshapen, rough but not seriously lumpy, and which are free from decay, broken skins which are not healed, hard or dry skins, exanthema, and free from serious damage caused by growth cracks, bruises, dryness or mushy condition, and from very serious damage caused by split navels, creasing, scars, oil spots, scale, sunburn, dirt or other foreign material, disease, insects or mechanical or other means. (See § 51.1092.)

UNCLASSIFIED

§ 51.1090 *Unclassified.* Unclassified consists of oranges which have not been classified in accordance with any of the foregoing grades. The term "unclassified" is not a grade within the meaning of these standards but is provided as a designation to show that no definite grade has been applied to the lot.

TOLERANCES

§ 51.1091 *Tolerances.* In order to allow for variations incident to proper grading and handling in each of the foregoing grades, the tolerances set forth in §§ 51.1092 and 51.1093 are provided as specified.

§ 51.1092 *U. S. Fancy, U. S. No. 1, U. S. No. 2 and U. S. No. 3 grades.* Not more than 10 percent, by count, of the fruits in any lot may be below the requirements of the specified grade, other than for color, but not more than one-twentieth of this amount, or one-half of 1 percent, shall be allowed for decay at shipping point: *Provided*, That an additional tolerance of 2½ percent, or a total of not more than 3 percent, shall be allowed for decay en route or at destination. In addition, not more than 10 percent, by count, of the fruits in any lot may not meet the requirements relating to color.

§ 51.1093 *U. S. Combination grade.* Not more than 10 percent, by count, of the fruits in any lot may be below the requirements of this grade, other than for color, but not more than one-twentieth of this amount, or one-half of 1 percent, shall be allowed for decay at shipping point: *Provided*, That an additional tolerance of 2½ percent, or a total of not more than 3 percent, shall be allowed for decay en route or at destination. This 3 percent tolerance may be used to reduce the percentage of U. S. No. 1 grade required in the combination, provided the affected fruits meet the requirements of U. S. No. 1 grade in other respects. In addition, not more than 10 percent, by count, of the fruits in any lot may not meet the requirements of the U. S. No. 2 grade for color.

(a) No part of any tolerance, other than that for decay, shall be allowed to reduce for the lot as a whole the percentage of U. S. No. 1 in the combination, but individual containers may have not more than a total of 10 percent less than the percentage of U. S. No. 1 specified: *Provided*, That the entire lot averages within the percentage specified.

APPLICATION OF TOLERANCES

§ 51.1094 *Application of tolerances to individual packages.* (a) The contents of individual packages in the lot, based on sample inspection, are subject to the following limitations: *Provided*, That the averages for the entire lot are within the tolerances specified for the grade.

(1) For packages which contain more than 10 pounds, and a tolerance of 10 percent or more is provided, individual packages in any lot shall have not more than one and one-half times the tolerance specified. For packages which contain more than 10 pounds and a tolerance of less than 10 percent is provided, individual packages in any lot shall have not more than double the tolerance specified, except that at least one decayed or very seriously damaged fruit may be permitted in any package.

(2) For packages which contain 10 pounds or less, individual packages in any lot are not restricted as to the percentage of defects: *Provided*, That not more than one orange which is seriously damaged by dryness or mushy condition or very seriously damaged by other means may be permitted in any package and, in addition, en route or at destination not more than 10 percent of the packages may have more than one decayed fruit.

STANDARD PACK

§ 51.1095 *Standard pack.* (a) Oranges shall be uniform in size and, when packed in boxes, shall be arranged according to the approved and recognized methods. Each wrapped fruit shall be fairly well enclosed by its individual wrapper.

(b) All packages shall be well filled, but the contents shall not show excessive or unnecessary bruising because of overfilled packages. The fruit shall be tightly packed.

(c) When oranges are packed in standard nailed boxes, each box shall show a minimum bulge of 1¼ inches.

(d) "Uniform in size" means that not more than 10 percent, by count, of the oranges in any container may be one standard size larger or smaller than the standard size orange for the count packed.

(e) Example of standard size orange: The standard size orange for a 200 count is that size orange which will pack tightly 200 oranges of uniform size when packed according to the approved and recognized method.

(f) In order to allow for variations incident to proper packing, when fruit is wrapped not more than 10 percent of the oranges in any container may fail to meet the requirements pertaining to wrapping, and, in addition, not more than 5 percent of the containers in any lot may fail to meet the requirements for standard pack.

STANDARDS FOR EXPORT

§ 51.1096 *Standards for export.* (a) Not more than a total of 10 percent, by count, of the oranges in any container may be soft, affected by decay, have broken skins which are not healed, growth cracks, or be damaged by creasing or skin breakdown, or seriously damaged by split or protruding navels, or by dryness or mushy condition, except that:

(1) Not more than one-half of 1 percent shall be allowed for oranges affected by decay;

(2) Not more than 3 percent shall have broken skins which are not healed;

(3) Not more than 3 percent shall have growth cracks;

(4) Not more than 5 percent shall be soft;

(5) Not more than 5 percent shall be damaged by creasing;

(6) Not more than 5 percent shall be seriously damaged by split or protruding navels;

(7) Not more than 5 percent shall be seriously damaged by dryness or mushy condition; and,

(8) Not more than 5 percent shall be damaged by skin breakdown.

(b) Any lot of oranges shall be considered as meeting the standards for export if the entire lot averages within the requirements specified: *Provided*, That no sample from the containers in any lot shall have more than double the percentage specified for any one defect, and that not more than a total of 10 percent, by count, of the oranges in any container has any of the defects enumerated in the standards for export.

DEFINITIONS

§ 51.1097 *Similar varietal characteristics.* "Similar varietal characteristics" means that the fruits in any container are similar in color and type.

§ 51.1098 *Well colored.* "Well colored" means that the fruit is at least light orange in color, with not more than a trace of green at the stem end, and not more than 15 percent of the remainder of the surface of the fruit shows green color.

§ 51.1099 *Firm.* "Firm" means that the fruit is not soft or noticeably wilted or flabby.

§ 51.1100 *Well formed.* "Well formed" means that the fruit shows the normal shape characteristic of the variety.

§ 51.1101 *Smooth.* "Smooth" means that the skin is of fairly fine grain, the "pebbling" is not pronounced, and any furrows radiating from the stem end are shallow.

§ 51.1102 *Injury.* "Injury" means any defect which more than slightly affects the appearance, or the edible or shipping quality of the fruit. Any one of the following defects, or any combination of defects, the seriousness of which exceeds the maximum allowed for any one defect, shall be considered as injury:

(a) Split, rough, wide or protruding navels, when a split is unhealed or is more than one-eighth inch in length; or when the navel protrudes beyond the general contour of the fruit; or when flush with the contour but with the opening so wide, considering the size of the fruit, or the navel growth so folded and ridged, that it detracts noticeably from the appearance of the fruit;

(b) Slight creasing which is more than barely visible, or which extends over more than 20 percent of the fruit surface;

(c) Scarring (including sprayburn and fumigation injury) which exceeds the following aggregate areas of different types of scars, or a combination of two or more types of scars, the seriousness of which exceeds the maximum allowed for any one type:

(1) Scars which are very dark and which have an aggregate area exceeding that of a circle one-eighth inch in diameter;

(2) Scars which are dark or rough, or deep and which have an aggregate area exceeding that of a circle one-fourth inch in diameter;

(3) Scars which are fairly light in color, slightly rough, or with slight depth and which have an aggregate area exceeding that of a circle one-half inch in diameter; and,

(4) Scars which are light in color, fairly smooth, and with no depth and which have an aggregate area of more than 5 percent of the fruit surface;

(d) Oil spots (oleocellosis or similar injuries) which are depressed or soft, or which have an aggregate area of more than 2½ percent of the fruit surface, or which are green and more than 4 in number;

(e) Scale, when medium or large and more than 5 are present; and,

(f) Sunburn which appreciably changes the normal color or shape of the fruit, or which affects more than 10 percent of the fruit surface.

§ 51.1103 *Fairly smooth.* "Fairly smooth" means that the skin does not feel noticeably rough or coarse. The size of the fruit should be considered in judging texture, as large fruit is not usually as smooth as smaller fruit. It is common for the fruit to show larger and coarser "pebbling" on the stem end portion than on the blossom end. The presence of furrows or grooves on the stem end portion of the fruit is a common condition in certain varieties, and the fruit shall not be considered as slightly rough unless the furrows or grooves are of sufficient depth, length, and number as to materially affect the appearance and smoothness of the orange.

§ 51.1104 *Damage.* "Damage" means any defect which materially affects the appearance, or the edible or shipping quality of the fruit. Any one of the following defects, or any combination of defects, the seriousness of which exceeds the maximum allowed for any one defect, shall be considered as damage:

(a) Dryness or mushy condition, when affecting all segments more than one-fourth inch at the stem end, or the equivalent of this amount, by volume, when occurring in other portions of the fruit;

(b) Split, rough, excessively wide or protruding navels, when more than 3 splits, or when any split is unhealed or is more than one-fourth inch in length; or navels which flare, bulge, or protrude materially beyond the general contour of the fruit; or when the navel opening is so wide, considering the size of the fruit, or the navel growth is so folded and ridged that it detracts materially from the appearance of the fruit;

(c) Creasing which materially weakens the skin, or which extends over more than one-third of the fruit surface;

(d) Scarring (including sprayburn and fumigation injury) which exceeds the following aggregate areas of different types of scars, or a combination of two or more types of scars, the seriousness of which exceeds the maximum allowed for any one type:

(1) Scars which are very dark and with slight depth and which have an aggregate area exceeding that of a circle one-fourth inch in diameter;

(2) Scars which are very dark, with no depth, and which have an aggregate area exceeding that of a circle one-half inch in diameter;

(3) Scars which are dark and rough or deep and which have an aggregate area exceeding that of a circle one-half inch in diameter;

(4) Scars which are dark and slightly rough, or with slight depth, and which have an aggregate area exceeding that of a circle three-fourths inch in diameter;

(5) Scars which are fairly light in color slightly rough, or with slight depth and which have an aggregate area of more than 5 percent of the fruit surface; and

(6) Scars which are light in color, fairly smooth, with no depth and which have an aggregate area of more than 10 percent of the fruit surface;

(e) Oil spots (oleocellosis or similar injuries) which are depressed or soft, or which have an aggregate area of more than 5 percent of the fruit surface, or which are green and more than 7 in number;

(f) Scale, when medium or large and more than 3 scales are present in each of 3 circular areas 1 inch in diameter, selected as the worst infected areas, or when more than 7 scales are present in one of these areas: *Provided*, That scale within a circle five-eighths inch in diameter centered at the stem button or button socket shall not be considered in determining whether an orange is damaged; and,

(g) Sunburn which causes appreciable flattening of the fruit, drying or darkening of the skin, or affects more than 25 percent of the fruit surface.

§ 51.1105 *Fairly well colored.* "Fairly well colored" means that the yellow or orange color predominates on the fruit.

§ 51.1106 *Fairly firm.* "Fairly firm" means that the fruit may be slightly soft but is not decidedly flabby.

§ 51.1107 *Fairly well formed.* "Fairly well formed" means that the fruit is not of the shape characteristic of the variety but is not decidedly flattened,

pointed, extremely elongated, or otherwise badly deformed.

§ 51.1108 *Excessively rough.* "Excessively rough" means that the skin is decidedly rough, badly folded, badly ridged, or decidedly lumpy. Heavily "pebbled" skin shall not be considered as excessively rough.

§ 51.1109 *Serious damage.* "Serious damage" means any defect which seriously affects the appearance, or the edible or shipping quality of the fruit. Any one of the following defects, or any combination of defects, the seriousness of which exceeds the maximum allowed for any one defect, shall be considered as serious damage:

(a) Dryness or mushy condition, when affecting all segments more than one-half inch at the stem end, or the equivalent of this amount, by volume, when occurring in other portions of the fruit;

(b) Split or protruding navels, when any split is unhealed or is more than one-half inch in length, or when two or more splits aggregate more than 1 inch in length; or navels which protrude seriously beyond the general contour of the fruit; or when the navel opening is so wide, considering the size of the fruit, or the navel growth is so badly folded and ridged, that it detracts seriously from the appearance of the fruit;

(c) Creasing which seriously weakens the skin, or which is distributed over practically the entire fruit surface;

(d) Scarring (including sprayburn and fumigation injury) which exceeds the following aggregate areas of different types of scars, or a combination of two or more types of scars, the seriousness of which exceeds the maximum allowed for any one type:

(1) Scars which are very dark or very rough, or very deep, and which have an aggregate area of more than 5 percent of the fruit surface;

(2) Scars which are dark or rough, or deep and which have an aggregate area of more than 10 percent of the fruit surface;

(3) Scars which are fairly light in color, slightly rough or of slight depth and which have an aggregate area of more than 15 percent of the fruit surface; and,

(4) Scars which are light in color, fairly smooth, and with no depth and which have an aggregate area of more than 25 percent of the fruit surface;

(e) Oil spots (oleocellosis or similar injuries) which are depressed or soft, or which have an aggregate area of more than 10 percent of the fruit surface;

(f) Scale, when medium or large and more than 9 scales are present in each of 3 circular areas 1 inch in diameter, selected as the worst infested areas, or if more than 19 scales are present in one of these areas;

(g) Sunburn which causes decided flattening of the fruit, drying or dark discoloration of the skin, or which affects more than one-third of the fruit surface; and,

(h) Growth cracks which are leaking, gummy, or not well healed.

§ 51.1110 *Slightly spongy.* "Slightly spongy" means that the fruit is puffy or slightly wilted but not flabby.

§ 51.1111 *Misshapen.* "Misshapen" means that the fruit is decidedly flattened, pointed, extremely elongated or otherwise deformed.

§ 51.1112 *Very serious damage.* "Very serious damage" means any defect which very seriously affects the appearance, or the edible or shipping quality of the fruit. Any one of the following defects, or any combination of defects, the seriousness of which exceeds the maximum allowed for any one defect, shall be considered as very serious damage:

(a) Split navels which are leaking, gummy, or not well healed;

(b) Creasing which is so deep or extensive that the skin is very seriously weakened;

(c) Scarring (including sprayburn and fumigation injury) which exceeds the following aggregate areas of different types of scars, or a combination of both types of scars, the seriousness of which exceeds the maximum allowed for one type:

(1) Scars which are very dark, or very rough, or very deep and which have an aggregate area of more than 10 percent of the fruit surface; and,

(2) Scars which are dark, or rough, or deep and which have an aggregate area of more than 25 percent of the fruit surface;

(d) Oil spots which are badly sunken, or soft;

(e) Scale which are so numerous or large that the appearance of the fruit is very seriously affected; and,

(f) Sunburn which seriously affects more than one-third of the fruit surface, or causes dark discoloration aggregating more than 5 percent of the fruit surface.

## SUBPART—UNITED STATES STANDARDS FOR FLORIDA ORANGES

### GENERAL

§ 51.1140 *General.* The standards in this section apply only to the common or sweet orange group and varieties belonging to the Mandarin group, except tangerines. The standards in this section do not apply to tangerines for which separate U. S. Standards are issued.

### GRADES

§ 51.1141 *U. S. Fancy.* U. S. Fancy consists of oranges of similar varietal characteristics which are well colored, firm, well formed, mature, and of smooth texture, and which are free from ammoniation, bird pecks, bruises, buckskin, creasing, cuts which are not healed, decay, growth cracks, scab, split navels, sprayburn, and undeveloped or sunken segments, and free from injury caused by green spots or oil spots, pitting, rough and excessively wide or protruding navels, scale, scars, thorn scratches, and from damage caused by dirt or other foreign materials, dryness or mushy condition, sprouting, sunburn, riciness or woodiness of the flesh, disease, insects, or mechanical or other means.

(a) In this grade not more than one-tenth of the surface, in the aggregate, may be affected with discoloration. (See § 51.1153.)

(b) If any lot of U. S. Fancy Fruit also meets the internal specifications of "U. S. Grade AA Juice (Double A)" or "U. S. Grade A Juice" it may be so specified in accordance with the facts. (See §§ 51.1183–51.1186.)

§ 51.1142 *U. S. No. 1.* U. S. No. 1 consists of oranges of similar varietal characteristics which are firm, well formed, mature, and of fairly smooth texture, and which are free from bruises, cuts which are not healed, buckskin or similar type of discoloration, decay, growth cracks, sprayburn, undeveloped or sunken segments, and free from damage caused by ammoniation, bird pecks, creasing, dirt or other foreign materials, dryness or mushy condition, green spots or oil spots, pitting, scab, scale, scars, split or rough or protruding navels, sprouting, sunburn, thorn scratches, riciness or woodiness of the flesh, disease, insects, or mechanical or other means.

(a) Oranges of the early and mid-season varieties shall be fairly well colored.

(b) With respect to Valencia and other late varieties, not less than 50 percent, by count, of the oranges shall be fairly well colored and the remainder reasonably well colored.

(c) In this grade not more than one-third of the surface, in the aggregate, may be affected with discoloration. (See § 51.1154.)

(d) If any lot of U. S. No. 1 fruit also meets the internal specifications of "U. S. Grade AA Juice (Double A)" or "U. S Grade A Juice" it may be so specified in accordance with the facts. (See §§ 51.1183–51.1186.)

§ 51.1143 *U. S. No. 1. Bright.* The requirements for this grade are the same as for U. S. No. 1 except that no fruit may have more than one-tenth of its surface, in the aggregate, affected with discoloration. (See § 51.1155.)

(a) If any lot of U. S. No. 1 Bright fruit also meets the internal specifications of "U. S. Grade AA Juice (Double A)" or "U. S. Grade A Juice" it may be so specified in accordance with the facts. (See §§ 51.1183–51.1186.)

§ 51.1144 *U. S. No. 1 Golden.* The requirements for this grade are the same as for U. S. No. 1 except that not more than 30 percent, by count, of the fruits shall have in excess of one-third of their surface, in the aggregate, affected with discoloration. (See § 51.1156.)

(a) If any lot of U. S. No. 1 Golden fruit also meets the internal specifications of "U. S. Grade AA Juice (Double A)" or "U. S. Grade A Juice" it may be so specified in accordance with the facts. (See §§ 51.1183–51.1186.)

§ 51.1145 *U. S. No. 1 Bronze.* The requirements for this grade are the same as for U. S. No. 1 except that more than 30 percent but not more than 75 percent, by count, of the fruits shall have in excess of one-third of their surface, in the aggregate, affected with discoloration: *Provided*, That when the predominating discoloration on each of 75 percent or more, by count, of the fruits is caused by rust mite, all fruits may have in excess of one-third of their surface affected with discoloration. (See § 51.1156.)

(a) If any lot of U. S. No. 1 Bronze fruit also meets the internal specifications of "U. S. Grade AA Juice (Double A)" or "U. S. Grade A Juice" it may be so specified in accordance with the facts. (See §§ 51.1183–51.1186.)

§ 51.1146 *U. S. No. 1 Russet.* The requirements for this grade are the same as for U. S. No. 1 except that more than 75 percent, by count, of the fruits shall have in excess of one-third of their surface, in the aggregate, affected with discoloration. (See § 51.1157.)

(a) If any lot of U. S. No. 1 Russet fruit also meets the internal specifications of "U. S. Grade AA Juice (Double A)" or "U. S. Grade A Juice" it may be so specified in accordance with the facts. (See §§ 51.1183–51.1186.)

§ 51.1147 *U. S. No. 2.* U. S. No. 2 consists of oranges of similar varietal characteristics which are mature, fairly firm, not more than slightly misshapen, of not more than slightly rough texture, and which are free from bruises, cuts which are not healed, decay, growth cracks, and are free from serious damage caused by ammoniation, bird pecks, buckskin, creasing, dirt or other foreign materials, dryness or mushy condition, green spots or oil spots, pitting, scab, scale, scars, split or rough or protruding navels, sprayburn, sprouting, sunburn, thorn scratches, undeveloped or sunken segments, riciness or woodiness of the flesh, disease, insects, or mechanical or other means.

(a) Each orange of this grade shall be reasonably well colored.

(b) In this grade not more than one-half of the surface, in the aggregate, may be affected with discoloration. (See § 51.1158.)

(c) If any lot of U. S. No. 2 fruit also meets the internal specifications of "U. S. Grade AA Juice (Double A)" or "U. S. Grade A Juice" it may be so specified in accordance with the facts. (See §§ 51.1183–51.1186.)

§ 51.1148 *U. S. No. 2 Bright.* The requirements for this grade are the same as for U. S. No. 2 except that no fruit may have more than one-tenth of its surface, in the aggregate, affected with discoloration. (See § 51.1155.)

(a) If any lot of U. S. No. 2 Bright fruit also meets the internal specifications of "U. S. Grade AA Juice (Double A)" or "U. S. Grade A Juice" it may be so specified in accordance with the facts. (See §§ 51.1183–51.1186.)

§ 51.1149 *U. S. No. 2 Russet.* The requirements for this grade are the same as for U. S. No. 2 except that more than 10 percent, by count, of the fruits shall have in excess of one-half of their surface, in the aggregate, affected with discoloration. (See § 51.1159.)

(a) If any lot of U. S. No. 2 Russet fruit also meets the internal specifications of "U. S. Grade AA Juice (Double A)" or "U. S. Grade A Juice" it may be so specified in accordance with the facts. (See §§ 51.1183–51.1186.)

§ 51.1150 *U. S. No. 3.* U. S. No. 3 consists of oranges of similar varietal characteristics which are mature, which may be misshapen, slightly spongy, rough but not seriously lumpy for the variety or seriously cracked, which are free from cuts which are not healed, and from decay, and from very serious damage caused by bruises, growth cracks, ammoniation, bird pecks, caked melanose, buckskin, creasing, dryness or mushy condition, pitting, scab, scale, split navels, sprayburn, sprouting, sunburn, thorn punctures, riciness or woodiness of the flesh, disease, insects, or mechanical or other means.

(a) Each fruit may be poorly colored but not more than 25 percent of the surface of each fruit may be of a solid dark green color. (See § 51.1160.)

(b) If any lot of U. S. No. 3 fruit also meets the internal specifications of "U. S. Grade AA Juice (Double A)" or "U. S. Grade A Juice" it may be so specified in accordance with the facts. (See §§ 51.1183–51.1186.)

### UNCLASSIFIED

§ 51.1151 *Unclassified.* Unclassified consists of oranges which have not been classified in accordance with any of the foregoing grades. The term "unclassified" is not a grade within the meaning of these standards but is provided as a designation to show that no definite grade has been applied to the lot.

### TOLERANCES

§ 51.1152 *Tolerances.* In order to allow for variations incident to proper grading and handling in each of the foregoing grades, the tolerances set forth in §§ 51.1153 to 51.1160 are provided as specified.

§ 51.1153 *U. S. Fancy grade.* Not more than 10 percent, by count, of the fruits in any lot may be below the requirements of this grade, but not more than one-half of this amount, or 5 percent, shall be allowed for very serious damage, and not more than one-twentieth of the tolerance, or one-half of one percent, shall be allowed for decay at shipping point: *Provided*, That an additional tolerance of 2½ percent, or a total of not more than 3 percent, shall be allowed for decay en route or at destination. No part of any tolerance shall be allowed to reduce the percentage of fruits having in excess of one-third of their surface, in the aggregate, affected with discoloration which is required in this grade, but individual containers may vary not more than 10 percent from the percentage required: *Provided*, That the entire lot averages within the percentage specified. None of the foregoing tolerances shall apply to wormy fruit.

§ 51.1154 *U. S. No. 1 grade.* Not more than 10 percent, by count, of the fruits in any lot may be below the requirements of this grade, other than for discoloration, but not more than one-half of this amount, or 5 percent, shall be allowed for very serious damage, and not more than one-twentieth of the tolerance, or one-half of one percent, shall be allowed for decay at shipping point: *Provided*, That an additional tolerance of 2½ percent, or a total of not more than 3 percent, shall be allowed for decay en route or at destination. In addition, not more than 10 percent, by count, of the fruits in any lot may have discoloration in excess of one-third of the fruit surface. None of the foregoing tolerances shall apply to wormy fruit.

§ 51.1155 *U. S. No. 1 Bright and U. S. No. 2 Bright grades.* Not more than 10 percent, by count, of the fruits in any lot may be below the requirements of the grade, other than for discoloration, but not more than one-half of this amount, or 5 percent, shall be allowed for very serious damage, and not more than one-twentieth of the tolerance, or one-half of one percent, shall be allowed for decay at shipping point: *Provided*, That an additional tolerance of 2½ percent, or a total of not more than 3 percent, shall be allowed for decay en route or at destination. In addition, not more than 10 percent, by count, of the fruits in any lot may not meet the requirements relating to discoloration. None of the foregoing tolerances shall apply to wormy fruit.

§ 51.1156 *U. S. No. 1 Golden and U. S. No. 1 Bronze grades.* Not more than 10 percent, by count, of the fruits in any lot may be below the requirements of the grade, but not more than one-half of this amount, or 5 percent, shall be allowed for very serious damage, and not more than one-twentieth of the tolerance, or one-half of one percent, shall be allowed for decay at shipping point: *Provided*, That an additional tolerance of 2½ percent, or a total of not more than 3 percent, shall be allowed for decay en route or at destination. No part of any tolerance shall be allowed to reduce or to increase the percentage of fruits having in excess of one-third of their surface, in the aggregate, affected with discoloration which is required in the grade, but individual containers may vary not more than 10 percent from the percentage required: *Provided*, That the entire lot averages within the percentage specified. None of the foregoing tolerances shall apply to wormy fruit.

§ 51.1157 *U. S. No. 1 Russet grade.* Not more than 10 percent, by count, of the fruits in any lot may be below the requirements of this grade, but not more than one-half of this amount, or 5 percent, shall be allowed for very serious damage, and not more than one-twentieth of the tolerance, or one-half of one percent, shall be allowed for decay at shipping point: *Provided*, That an additional tolerance of 2½ percent, or a total of not more than 3 percent, shall be allowed for decay en route or at destination. No party of any tolerance shall be allowed to reduce the percentage of fruits having in excess of one-third of their surface, in the aggregate, affected with discoloration which is required in this grade, but individual containers may have not more than 10 percent less than the percentage required: *Provided*, That the entire lot averages within the percentage specified. None of the foregoing tolerances shall apply to wormy fruit.

§ 51.1158 *U. S. No. 2 grade.* Not more than 10 percent, by count, of the fruits in any lot may be below the requirements of this grade, other than for discoloration, but not more than one-half of this amount, or 5 percent, shall be allowed for very serious damage other than that caused by dryness or mushy condition, and not more than one-twentieth of the tolerance, or one-half of one percent, shall be allowed for decay at shipping point: *Provided*, That an additional tolerance of 2½ percent, or a total of not more than 3 percent, shall be allowed for decay en route or at destination. In addition, not more than 10 percent, by count, of the fruits in any lot

may not meet the requirements relating to discoloration. None of the foregoing tolerances shall apply to wormy fruit.

§ 51.1159 *U. S. No. 2 Russet grade.* Not more than 10 percent, by count, of the fruits in any lot may be below the requirements of this grade, but not more than one-half of this amount, or 5 percent, shall be allowed for very serious damage other than that caused by dryness or mushy condition, and not more than one-twentieth of the tolerance, or one-half of one percent, shall be allowed for decay at shipping point: *Provided*, That an additional tolerance of 2½ percent, or a total of not more than 3 percent, shall be allowed for decay en route or at destination. No part of any tolerance shall be allowed to reduce the percentage of fruits having in excess of one-half of their surface, in the aggregate, affected with discoloration which is required in this grade, but individual containers may have not more than 10 percent less than the percentage required: *Provided*, That the entire lot averages within the percentage specified. None of the foregoing tolerances shall apply to wormy fruit.

§ 51.1160 *U. S. No. 3 grade.* Not more than 15 percent, by count, of the fruits in any lot may be below the requirements of this grade, but not more than one-third of this amount, or 5 percent, shall be allowed for defects other than that caused by dryness or mushy condition, and not more than one-fifth of this amount, or 1 percent, shall be allowed for decay at shipping point: *Provided*, That an additional tolerance of 2 percent, or a total of not more than 3 percent, shall be allowed for decay en route or at destination. None of the foregoing tolerances shall apply to wormy fruit.

APPLICATION OF TOLERANCES

§ 51.1161 *Application of tolerances to individual packages.* (a) The contents of individual packages in the lot, based on sample inspection, are subject to the following limitations: *Provided*, That the averages for the entire lot are within the tolerances specified for the grade.

(1) For packages which contain more than 10 pounds, and a tolerance of 10 percent or more is provided, individual packages in any lot shall have not more than one and one-half times the tolerance specified. For packages which contain more than 10 pounds and a tolerance of less than 10 percent is provided, individual packages in any lot shall have not more than double the tolerance specified, except that at least one decayed or very seriously damaged fruit may be permitted in any package.

(2) For packages which contain 10 pounds or less, individual packages in any lot are not restricted as to the percentage of defects: *Provided*, That not more than one orange which is seriously damaged by dryness or mushy condition or very seriously damaged by other means may be permitted in any package, and in addition, enroute or at destination not more than 10 percent of the packages may have more than one decayed fruit.

STANDARD PACK

§ 51.1162 *Standard pack for oranges except Temple variety.* (a) Fruit shall be fairly uniform in size, unless specified as uniform in size, and when packed in boxes shall be arranged according to the approved and recognized methods. Each wrapped fruit shall be fairly well wrapped.

(b) All packages shall be tightly packed and well filled but the contents shall not show excessive or unnecessary bruising because of overfilled packages.

(c) When packed in standard nailed boxes, each container shall show a minimum bulge of 1¼ inches.

(d) "Fairly uniform in size" means that not more than a total of 10 percent, by count, of the fruits in any container are outside the range of diameters given in the following table for various packs:

TABLE I

[Diameter in inches]

| Pack | Minimum | Maximum |
|---|---|---|
| 96's | 2 15/16 | 3 3/16 |
| 126's | 2 11/16 | 3 1/16 |
| 150's | 3 | 2 15/16 |
| 176's | 2 1/16 | 2 5/16 |
| 200's | 2 1/16 | 2 5/16 |
| 216's | 2 1/16 | 3 |
| 250's | 2 [illegible] | 2 3/16 |
| 288's | 2 [illegible] | 2 1/16 |
| 324's | 2 1/16 | 2 1/16 |

(e) "Uniform in size" means that not more than 10 percent, by count, of the fruits in any container vary more than the following amounts:

150 size and smaller—not more than 4/16 inch in diameter.

126 size and larger—not more than 5/16 inch in diameter.

(f) In order to allow for variations, other than sizing, incident to proper packing, not more than 5 percent of the packages in any lot may not meet the requirements of standard pack.

DEFINITIONS

§ 51.1163 *Similar varietal characteristics.* "Similar varietal characteristics" means that the fruits in any container are similar in color and shape.

§ 51.1164 *Well colored.* "Well colored" means that the fruit is yellow or orange in color with practically no trace of green color.

§ 51.1165 *Firm.* "Firm" as applied to common oranges, means that the fruit is not soft, or noticeably wilted or flabby; as applied to oranges of the Mandarin group (Satsumas, King, Mandarin), means that the fruit is not extremely puffy, although the skin may be slightly loose.

§ 51.1166 *Well formed.* "Well formed" means that the fruit has the shape characteristic of the variety.

§ 51.1167 *Mature.* "Mature" means the same as that term is set forth for oranges other than Temple oranges in sections 19 and 20, chapter 25149 and for Temple oranges, in sections 601.21 and 601.22, chapter 26492; Florida Statutes, known as the Florida Citrus Code of 1949.

§ 51.1168 *Smooth texture.* "Smooth texture" means that the skin is thin and smooth for the variety and size of the fruit.

§ 51.1169 *Injury.* "Injury" means any defect which more than slightly affects the appearance, or the edible or shipping quality of the fruit. Any one of the following defects, or any combination of defects, the seriousness of which exceeds the maximum allowed for any one defect, shall be considered as injury:

(a) Green spots or oil spots, when appreciably affecting the appearance of the individual fruit;

(b) Rough and excessively wide or protruding navels, when protruding beyond the general contour of the orange; or when flush with the general contour but with the opening so wide, considering the size of the fruit, and the navel growth so folded and ridged that it detracts noticeably from the appearance of the orange;

(c) Scale, when more than a few adjacent to the "button" at the stem end, or when more than 6 scattered on other portions of the fruit;

(d) Scars which are depressed, not smooth, or which detract from the appearance of the fruit to a greater extent than the maximum amount of discoloration allowed in the grade; and,

(e) Thorn scratches, when the injury is not slight, not well healed, or more unsightly than discoloration allowed in the grade.

§ 51.1170 *Discoloration.* "Discoloration" means russeting of a light shade of golden brown caused by rust mite or other means. Lighter shades of discoloration caused by superficial scars or other means may be allowed on a greater area, or darker shades may be allowed on a lesser area, provided no discoloration caused by melanose or other means may affect the appearance of the fruit to a greater extent than the shade and amount of discoloration allowed for the grade.

§ 51.1171 *Fairly smooth texture.* "Fairly smooth texture" means that the skin is fairly thin and not coarse for the variety and size of the fruit.

§ 51.1172 *Damage.* "Damage" means any defect which materially affects the appearance, or the edible or shipping quality of the fruit. Any one of the following defects, or any combination of defects, the seriousness of which exceeds the maximum allowed for any one defect, shall be considered as damage:

(a) Ammoniation, when not occurring as light speck type similar to melanose;

(b) Creasing, when causing the skin to be materially weakened;

(c) Dryness or mushy condition, when affecting all segments of common oranges more than one-fourth inch at the stem end, or all segments of varieties of the Mandarin group more than one-eighth inch at the stem end, or more than the equivalent of these respective amounts, by volume, when occurring in other portions of the fruit;

(d) Green spots or oil spots, when more than 5 in number, or when the aggregate area of all spots exceeds the area of a circle three-fourths inch in diameter on an orange of 200-size. Smaller sizes shall have a lesser number or lesser areas of green spots or oil spots and larger sizes may have a larger number or greater areas: *Provided*, That the appearance of the orange is not affected to a greater extent than the number or area permitted on a 200-size orange;

(e) Stab, when it cannot be classed as discoloration, or appreciably affects shape or texture;

(f) Scale, when occurring as a blotch and its size exceeds the area of a circle five-eighths inch in diameter on an orange of 200-size. Smaller sizes shall have lesser areas of scale and larger sizes may have greater areas: *Provided*, That no scale shall be permitted which affects the appearance to a greater extent than a blotch five-eighths inch in diameter on a 200-size orange;

(g) Scars which are not smooth, or scars which are deep, or scars which are shallow or fairly shallow and detract from the appearance of the fruit to a greater extent than the amount of discoloration allowed in the grade;

(h) Split or rough or protruding navels, when any split is unhealed, or more than three well-healed splits at the navel, or any split which is more than one-fourth inch in length, or three-cornered, star-shaped, or other irregular navels when the opening is so wide, considering the size of the orange, and the navel growth so folded and ridged that it detracts materially from the appearance of the orange; or navels which flare, bulge, or protrude beyond the general contour of the orange to the extent that they are subject to mechanical injury in the process of proper grading, or handling, or packing;

(i) Sunburn, when the area affected exceeds 25 percent of the fruit surface, or when the skin is appreciably flattened, dry, darkened, or hard;

(j) Thorn scratches, when the injury is not well healed, or concentrated light colored thorn injury which has caused the skin to become hard and the aggregate area exceeds the area of a circle one-fourth inch in diameter, or slight scratches when light colored and concentrated and the aggregate area exceeds the area of a circle 1 inch in diameter, or dark or scattered thorn injury which detracts from the appearance of the fruit to a greater extent than the amounts specified above; and,

(k) Riciness or woodiness, when the flesh of the fruit is so ricey or woody that excessive pressure by hand is required to extract the juice.

§ 51.1173 *Fairly well colored.* "Fairly well colored" means that the yellow or orange color predominates over the green color on that part of the fruit which is not discolored, except for an aggregate area of green color which does not exceed the area of a circle 1 inch in diameter.

§ 51.1174 *Reasonably well colored.* "Reasonably well colored" means that the yellow or orange color predominates over the green color on at least two-thirds of the fruit surface, in the aggregate, which is not discolored.

§ 51.1175 *Fairly firm.* "Fairly firm" as applied to common oranges, means that the fruit may be slightly soft, but not bruised; as applied to oranges of the Mandarin group (Satsumas, King, Mandarin), means that the skin of the fruit is not extremely puffy or extremely loose.

§ 51.1176 *Slightly misshapen.* "Slightly misshapen" means that the fruit is not of the shape characteristic of the variety but is not appreciably elongated or pointed or otherwise deformed.

§ 51.1177 *Slightly rough texture.* "Slightly rough texture" means that the skin is not of smooth texture but is not materially ridged, grooved, or wrinkled.

§ 51.1178 *Serious damage.* "Serious damage" means any defect which seriously affects the appearance, or the edible or shipping quality of the fruit. Any one of the following defects, or any combination of defects, the seriousness of which exceeds the maximum allowed for any one defect, shall be considered as serious damage:

(a) Ammoniation, when scars are cracked, or when dark and the aggregate area exceeds the area of a circle three-fourths inch in diameter, or when light colored and the aggregate area exceeds the area of a circle 1¼ inches in diameter;

(b) Buckskin, when aggregating more than 25 percent of the fruit surface, or the fruit texture is seriously affected;

(c) Creasing, when so deep or extensive that the skin is seriously weakened;

(d) Dryness or mushy condition, when affecting all segments of common oranges more than one-half inch at the stem end, or all segments of varieties of the Mandarin group more than one-fourth inch at the stem end, or more than the equivalent of these respective amounts, by volume, when occurring in other portions of the fruit;

(e) Green spots or oil spots, when seriously affecting the appearance of the individual fruit;

(f) Scab, when it cannot be classed as discoloration, or when materially affecting shape or texture;

(g) Scale, when it seriously affects the appearance of the individual fruit;

(h) Scars which are not fairly smooth, or scars which are very deep, or scars which are not very deep but which detract from the appearance of the fruit to a greater extent than the amount of discoloration allowed in the grade;

(i) Split or rough or protruding navels, when any split is unhealed, or one well healed split at each corner of irregular navels when any one is more than one-half inch in length, or when aggregating more than 1 inch in length, or when more than four in number; or navels which protrude beyond the general contour of the orange to the extent that they are subject to mechanical injury during the process of proper grading, or handling, or packing; or irregular navels when the opening is so wide, considering the size of the orange, and the navel growth so badly folded and ridged that it detracts seriously from the appearance of the orange;

(j) Sprayburn which seriously affects the appearance of the fruit, or is hard, or when light brown in color and the aggregate area exceeds the area of a circle 1¼ inches in diameter;

(k) Sunburn which affects more than one-third of the fruit surface, or is hard, or the fruit is decidedly one-sided, or when light brown in color and the aggregate area exceeds the area of a circle 1¼ inches in diameter;

(l) Thorn scratches, when the injury is not well healed, or concentrated light colored thorn injury which has caused the skin to become hard and the aggregate area exceeds the area of a circle one-half inch in diameter, or slight scratches when light colored and concentrated and the aggregate area exceeds the area of a circle 1½ inches in diameter, or dark or scattered thorn injury which detracts from the appearance of the fruit to a greater extent than the amounts specified above;

(m) Undeveloped or sunken segments, in navel oranges, when such segments are so sunken or undeveloped that they are readily noticeable; and,

(n) Riciness or woodiness, when the flesh of the fruit is so ricey or woody that excessive pressure by hand is required to extract the juice.

§ 51.1179 *Misshapen.* "Mis hapen" means that the fruit is decidely elongated, pointed or flatsided.

§ 51.1180 *Slightly spongy.* "Slightly spongy" means that the fruit is puffy or slightly wilted but not flabby.

§ 51.1181 *Very serious damage.* "Very serious damage" means any defect which very seriously affects the appearance, or the edible or shipping quality of the fruit. Any one of the following defects, or any combination of defects, the seriousness of which exceeds the maximum allowed for any one defect, shall be considered as very serious damage:

(a) Growth cracks that are seriously weakened, gummy or not healed;

(b) Ammoniation, when aggregating more than 2 inches in diameter, or which has caused serious cracks;

(c) Bird pecks, when not healed;

(d) Caked melanose, when more than 25 percent, in the aggregate, of the surface of the fruit is caked;

(e) Buckskin, when rough and aggregating more than 50 percent of the surface of the fruit;

(f) Creasing, when so deep or extensive that the skin is very seriously weakened;

(g) Dryness or mushy condition, when affecting all segments of common oranges more than one-half inch at the stem end, or all segments of varieties of the Mandarin group more than one-fourth inch at the stem end, or more than the equivalent of these respective amounts, by volume, when occurring in other portions of the fruit;

(h) Scab, when aggregating more than 25 percent of the surface of the fruit;

(i) Scale, when covering more than 20 percent of the surface of the fruit;

(j) Split navels, when not healed or the fruit is seriously weakened;

(k) Sprayburn, when seriously affecting more than one-third of the fruit surface;

(l) Sunburn, when seriously affecting more than one-third of the fruit surface;

(m) Thorn punctures, when not healed or the fruit is seriously weakened; and

(n) Riciness or woodiness, when the flesh of the fruit is so ricey or woody that excessive pressure by hand is required to extract the juice.

§ 51.1182 *Diameter.* "Diameter" means the greatest dimension measured at right angles to a line from stem to blossom end of the fruit.

STANDARDS FOR INTERNAL QUALITY OF COMMON SWEET ORANGES (CITRUS SINENSIS (L) OSBECK)

§ 51.1183 *U. S. Grade AA Juice (Double A).* Any lot of oranges, the juice content of which meets the following requirements, may be designated "U. S. Grade AA Juice (Double A)":

(a) Each lot of fruit shall contain an average of not less than 5 gallons of juice per standard packed box of one and three-fifths bushels.

(b) The average juice content for any lot of fruit shall have not less than 10 percent total soluble solids, and not less than one-half of 1 percent anhydrous citric acid, or more than the maximum acid specified in Table II of § 51.1185.

§ 51.1184 *U. S. Grade A Juice.* Any lot of oranges, the juice content of which meets the following requirements, may be designated "U. S. Grade A Juice":

(a) Each lot of fruit shall contain an average of not less than four and one-half gallons of juice per standard packed box of one and three-fifths bushels.

(b) The average juice content for any lot of fruit shall have not less than 9 percent total soluble solids, and not less than one-half of 1 percent anhydrous citric acid, or more than the maximum acid specified in Table II of § 51.1185.

§ 51.1185 *Maximum anhydrous citric acid permissible for corresponding total soluble solids.* For determining the grade of juice, the maximum permissible anhydrous citric acid content in relation to corresponding total soluble solids in the fruit is set forth in the following Table II together with the minimum ratio of total soluble solids to anhydrous citric acid:

TABLE II

| Total soluble solids average percent | Maximum anhydrous citric acid average percent | Minimum ratio of total soluble solids to anhydrous citric acid |
|---|---|---|
| 9.0 | 0.947 | 9.50-1 |
| 9.1 | .953 | 9.45-1 |
| 9.2 | .959 | 9.40-1 |
| 9.3 | .965 | 9.35-1 |
| 9.4 | 1.001 | 9.30-1 |
| 9.5 | 1.027 | 9.25-1 |
| 9.6 | 1.043 | 9.20-1 |
| 9.7 | 1.060 | 9.15-1 |
| 9.8 | 1.077 | 9.10-1 |
| 9.9 | 1.094 | 9.05-1 |
| 10.0 | 1.111 | 9.00-1 |
| 10.1 | 1.128 | 8.95-1 |
| 10.2 | 1.146 | 8.90-1 |
| 10.3 | 1.164 | 8.85-1 |
| 10.4 | 1.182 | 8.80-1 |
| 10.5 | 1.200 | 8.75-1 |
| 10.6 | 1.218 | 8.70-1 |
| 10.7 | 1.237 | 8.65-1 |
| 10.8 | 1.256 | 8.60-1 |
| 10.9 | 1.275 | 8.55-1 |
| 11.0 | 1.294 | 8.50-1 |
| 11.1 | 1.306 | 8.50-1 |
| 11.2 | 1.318 | 8.50-1 |
| 11.3 | 1.329 | 8.50-1 |
| 11.4 | 1.341 | 8.50-1 |
| 11.5 | 1.353 | 8.50-1 |
| 11.6 | 1.365 | 8.50-1 |
| 11.7 | 1.376 | 8.50-1 |
| 11.8 | 1.388 | 8.50-1 |
| 11.9 | 1.400 | 8.50-1 |
| 12.0 | 1.412 | 8.50-1 |
| 12.1 | 1.424 | 8.50-1 |
| 12.2 | 1.435 | 8.50-1 |
| 12.3 | 1.447 | 8.50-1 |
| 12.4 | 1.459 | 8.50-1 |
| 12.5 | 1.471 | 8.50-1 |
| 12.6 | 1.482 | 8.50-1 |
| 12.7 | 1.494 | 8.50-1 |
| 12.8 | 1.506 | 8.50-1 |
| 12.9 | 1.517 | 8.50-1 |
| 13.0 | 1.530 | 8.50-1 |
| 13.1 | 1.541 | 8.50-1 |
| 13.2 | 1.553 | 8.50-1 |
| 13.3 | 1.565 | 8.50-1 |
| 13.4 | 1.576 | 8.50-1 |
| 13.5 | 1.588 | 8.50-1 |
| 13.6 | 1.600 | 8.50-1 |
| 13.7 | 1.612 | 8.50-1 |
| 13.8 | 1.624 | 8.50-1 |
| 13.9 | 1.635 | 8.50-1 |
| 14.0 | 1.647 | 8.50-1 |
| 14.1 | 1.659 | 8.50-1 |
| 14.2 | 1.671 | 8.50-1 |
| 14.3 | 1.682 | 8.50-1 |
| 14.4 | 1.694 | 8.50-1 |
| 14.5 | 1.705 | 8.50-1 |
| 14.6 | 1.718 | 8.50-1 |
| 14.7 | 1.729 | 8.50-1 |
| 14.8 | 1.741 | 8.50-1 |
| 14.9 | 1.753 | 8.50-1 |
| 15.0 | 1.765 | 8.50-1 |
| 15.1 | 1.776 | 8.50-1 |
| 15.2 | 1.788 | 8.50-1 |
| 15.3 | 1.800 | 8.50-1 |
| 15.4 | 1.812 | 8.50-1 |
| 15.5 | 1.824 | 8.50-1 |
| 15.6 or more | | 8.50-1 |

§ 51.1186 *Method of juice extraction.* The juice used in the determination of solids, acid, and juice content shall be extracted from representative samples as thoroughly as possible with a reamer, or by hand, and shall be strained through a double thickness of gauze having 44x40 threads per square inch, and shall not be extracted or strained in any other manner.

SUBPART—UNITED STATES STANDARDS FOR PEACHES

GRADES

§ 51.1210 *U. S. Fancy.* U. S. Fancy consists of peaches of one variety which are mature but not soft or overripe, well formed and which are free from decay, bacterial spot, cuts which are not healed, growth cracks, hail injury, scab, scale, split pits, worms, worm holes, leaf or limb rub injury; and free from damage caused by bruises, dirt or other foreign material, other disease, insects or mechanical or other means.

(a) In addition to the above requirements, each peach shall have not less than one-third of its surface showing blushed, pink or red color.

(b) In order to allow for variations incident to proper grading and handling, not more than 10 percent, by count, of the peaches in any lot may fail to meet the requirements of this grade other than for color, but not more than one-half of this amount, or 5 percent, shall be allowed for defects causing serious damage, and not more than one-fifth of this amount, or 1 percent, shall be allowed for decay at shipping point: *Provided*, That an additional tolerance of 2 percent shall be allowed for soft, overripe, or decayed peaches en route or at destination. In addition, not more than 10 percent, by count, of the peaches in any lot may be below the specified color requirement.

§ 51.1211 *U. S. Extra No. 1.* Any lot of peaches may be designated "U. S. Extra No. 1" when the peaches meet the requirements of U. S. No. 1 grade: *Provided*, That in addition to these requirements, 50 percent, by count, of the peaches in any lot shall have not less than one-fourth of the surface showing blushed, pink or red color.

(a) In order to allow for variations incident to proper grading and handling, not more than 10 percent, by count, of the peaches in any lot may fail to meet the requirements of U. S. No. 1 grade, but not more than one-half of this amount, or 5 percent, shall be allowed for defects causing serious damage, and not more than one-fifth of this amount, or 1 percent, shall be allowed for decay at shipping point: *Provided*, That an additional tolerance of 2 percent shall be allowed for soft, overripe or decayed peaches en route or at destination. No part of any tolerance shall be used to reduce for the lot as a whole the 50 percent of peaches required to have not less than one-fourth of the surface showing blushed, pink or red color, but individual packages may contain not less than 40 percent of peaches having this amount of color: *Provided*, That the entire lot averages not less than 50 percent.

§ 51.1212 *U. S. No. 1.* U. S. No. 1 consists of peaches of one variety which are mature but not soft or overripe, well formed, and which are free from decay, growth cracks, cuts which are not healed, worms, worm holes, and free from damage caused by bruises, dirt, or other foreign material, bacterial spot, scab, scale, hail injury, leaf or limb rubs, split pits, other disease, insects or mechanical or other means.

(a) In order to allow for variations incident to proper grading and handling, not more than 10 percent, by count, of the peaches in any lot may fail to meet the requirements of U. S. No. 1 grade, but not more than one-half of this amount, or 5 percent, shall be allowed for defects causing serious damage, and not more than one-fifth of this amount, or 1 percent, shall be allowed for decay at shipping point: *Provided*, That an additional tolerance of 2 percent shall be allowed for soft, overripe, or decayed peaches en route, or at destination.

§ 51.1213 *U. S. No. 2.* U. S. No 2 consists of peaches of one variety which are mature but not soft or overripe, not badly misshapen, and which are free from decay, cuts which are not healed, worms, worm holes, and free from serious damage caused by bruises, dirt or other foreign material, bacterial spot, scab, scale, growth cracks, hail injury, leaf or limb rubs, split pits, other disease, insects, or mechanical or other means.

(a) In order to allow for variations incident to proper grading and handling, not more than 10 percent, by count, of the peaches in any lot may fail to meet the requirements of this grade, but not more than one-tenth of this amount, or 1 percent, shall be allowed for decay at shipping point: *Provided*, That an additional tolerance of 2 percent shall be allowed for soft, overripe, or decayed peaches en route or at destination.

UNCLASSIFIED

§ 51.1214 *Unclassified.* Unclassified consists of peaches which have not been classified in accordance with any of the foregoing grades. The term "unclassified" is not a grade within the meaning of these standards but is provided as a designation to show that no definite grade has been applied to the lot.

APPLICATION OF TOLERANCES

§ 51.1215 *Application of tolerances to individual packages.* (a) The contents of individual packages in the lot, based on sample inspection, are subject to the following limitations, provided the averages for the entire lot are within the tolerances specified for the grade:

(1) For packages which contain more than 10 pounds, and a tolerance of 10 percent or more is provided (as in the case of oversize, where a tolerance of 15 percent is provided), individual packages in any lot shall have not more than one and one-half times the tolerance specified. For packages which contain more than 10 pounds and a tolerance of less than 10 percent is provided, individual packages in any lot shall have not more than double the tolerance specified, except that at least one peach which is seriously damaged by insects or affected by decay may be permitted in any package.

(2) For packages which contain 10 pounds or less, individual packages in any lot are not restricted as to the percentage of defects: *Provided*, That not more than one peach which is seriously damaged by insects or affected by decay may be permitted in any package.

SIZE

§ 51.1216 *Size requirements.* (a) The numerical count or the minimum diameter of the peaches packed in a closed container shall be indicated on the container.

(b) When the numerical count is not shown the minimum diameter shall be plainly stamped, stenciled, or otherwise marked on the container in terms of whole inches, whole and half inches, whole and quarter inches, or whole and eight inches, as 2 inches minimum, $2\frac{1}{4}$ inches minimum, $1\frac{7}{8}$ inches minimum, in accordance with the facts. The minimum and maximum diameters may both be stated, as $1\frac{7}{8}$ to 2 inches, or 2 to $2\frac{1}{4}$ inches, in accordance with the facts.

(c) "Diameter" means the shortest distance measured through the center of the peach at right angles to a line running from the stem to the blossom end.

(d) In order to allow for variations incident to proper sizing, not more than 10 percent, by count, of peaches in any lot may be below the specified minimum size and not more than 15 percent may be above any specified maximum size.

STANDARD PACK

§ 51.1217 *Standard pack.* (a) Each package shall be packed so that the peaches in the shown face shall be reasonably representative in size, color and quality of the contents of the package.

(b) Peaches packed in U. S. Standard bushel baskets, or half-bushel baskets shall be ring faced and tightly packed with sufficient bulge to prevent any appreciable movement of the peaches within the packages when lidded.

(c) Peaches packed in standard western boxes shall be reasonably uniform in size and arranged in the packages according to the approved and recognized methods. Each wrapped peach shall be fairly well enclosed by its individual wrapper. All packages shall be well filled and tightly packed but the contents shall not show excessive or unnecessary bruising because of over-filled packages. The number of peaches in the box shall not vary more than 4 from the number indicated on the box.

(d) Peaches packed in other type boxes such as wire-bound boxes and fibre-board boxes may be place packed, or jumble packed faced, and all packs shall be well filled.

(e) Peaches packed in boxes equipped with cell compartments or molded trays shall be of the proper size for the cells or the molds in which they are packed.

(f) Peaches placed in individual paper cups and packed in boxes shall be in cups of the proper size for the peaches.

(g) In order to allow for variations incident to proper packing, not more than 10 percent of the packages in any lot may not meet these requirements.

DEFINITIONS

§ 51.1218 *Mature.* "Mature" means that the peach has reached the stage of growth which will insure a proper completion of the ripening process.

§ 51.1219 *Well formed.* "Well formed" means that the shape of the peach may be slightly irregular but not to the extent that its appearance is materially affected.

§ 51.1220 *Leaf or limb rub injury.* "Leaf or limb rub injury" means that the scarring is not smooth, not light colored, or aggregates more than $\frac{1}{4}$ inch in diameter.

§ 51.1221 *Damage.* "Damage" means any injury or defect which materially affects the appearance, or the edible or shipping quality of the peach. Any one of the following defects, or any combination thereof, the seriousness of which exceeds the maximum allowed for any one defect, shall be considered as damage:

(a) Bacterial spot, when cracked, or when aggregating more than $\frac{3}{8}$ inch in diameter;

(b) Scab spots, when cracked, or when aggregating more than $\frac{3}{8}$ inch in diameter;

(c) Scale, when concentrated, or when scattered and aggregating more than $\frac{1}{4}$ inch in diameter;

(d) Hail injury which is unhealed, or deep, or when aggregating more than $\frac{1}{4}$ inch in diameter;

(e) Leaf or limb rubs, when not smooth, or when not light colored, or when aggregating more than $\frac{1}{2}$ inch in diameter;

(f) Split pit, when causing any unhealed crack, or when causing any crack which is readily apparent, or when affecting shape to the extent that the fruit is not well formed.

§ 51.1222 *Serious damage.* "Serious damage" means any injury or defect which seriously affects the appearance, or the edible or shipping quality of the peach. Any one of the following defects, or any combination thereof, the seriousness of which exceeds the maximum allowed for any one defect, shall be considered as serious damage:

(a) Bacterial spot, when any cracks are not well healed, or when aggregating more than $\frac{3}{4}$ inch in diameter;

(b) Scab spots, when cracked, or when healed and aggregating more than one inch in diameter;

(c) Scale, when aggregating more than $\frac{1}{2}$ inch in diameter;

(d) Growth cracks, when unhealed, or more than $\frac{1}{2}$ inch in length;

(e) Hail injury, when unhealed, or shallow hail injury when aggregating more than $\frac{3}{4}$ inch in diameter, or deep hail injury which seriously deforms the fruit or which aggregates more than $\frac{1}{2}$ inch in diameter;

(f) Leaf or limb rubs, when smooth and light colored and aggregating more than $1\frac{1}{2}$ inches in diameter, or dark or slightly rough and barklike scars aggregating more than $\frac{3}{4}$ inch in diameter;

(g) Split pit, when causing any unhealed crack, or when healed and aggregating more than $\frac{1}{2}$ inch in length including any part of the crack which may be covered by the stem;

(h) Soft or overripe peaches;

(i) Wormy fruit or worm holes.

§ 51.1223 *Badly misshapen.* "Badly misshapen" means that the peach is so decidedly deformed that its appearance is seriously affected.

SUBPART—UNITED STATES STANDARDS FOR CLEANED VIRGINIA TYPE PEANUTS IN THE SHELL

GRADES

§ 51.1235 *U. S. Jumbo Hand Picked.* U. S. Jumbo Hand Picked shall consist of cleaned Virginia type peanuts in the shell which are mature, dry, and free from loose peanut kernels, dirt or other foreign material, pops, paper ends, and from damage caused by cracked or broken shells, discoloration or other means. The kernels shall be free from damage from any cause. In addition, the peanuts shall not pass through a screen having $\frac{27}{64}$ x 3 inch perforations. Unless otherwise specified, the unshelled peanuts in any lot shall not average more than 176 count per pound.

(a) In order to allow for variations incident to proper grading and handling, the following tolerances, by weight, shall be permitted:

(1) 10.0 percent total for pops, peanuts having paper ends or damaged shells, loose undamaged peanut kernels,

and dirt or other foreign material, but not more than one-twentieth of this amount, or 0.5 percent, shall be allowed for dirt or other foreign material.

(2) 5.0 percent for peanuts which will pass through the prescribed screen, but which are free from pops and from peanuts having paper ends or damaged shells.

(3) 3.5 percent for peanuts with damaged kernels, and damaged loose kernels.

UNCLASSIFIED

§ 51.1237 *Unclassified.* Unclassified shall consist of cleaned Virginia type peanuts in the shell which fail to meet the requirements of either of the foregoing grades. The term "unclassified" is not a grade within the meaning of these standards but is provided as a designation to show that no definite grade has been applied to the lot.

DEFINITIONS

§ 51.1238 *Mature.* "Mature" means that the shells are firm and well developed.

§ 51.1239 *Pops.* "Pops" means fully developed shells which contain practically no kernels.

§ 51.1240 *Paper ends.* "Paper ends" means peanuts which have very soft and or very thin ends.

§ 51.1241 *Damage.* "Damage" means any injury or defect which materially affects the appearance, edible or shipping quality of the individual peanut or the lot as a whole. The following shall be considered as damage:

(a) Cracked or broken shells which have been broken to the extent that the kernel within is plainly visible without minute examination and with no application of pressure, or the appearance of the individual peanut is materially affected.

(b) Discolored shells which have dark discoloration caused by mildew, staining or other means affecting one-half or more of the shell surface. Talc powder or other similar material which may have been applied to the shells during the cleaning process shall not be removed to determine the amount of discoloration beneath, but the peanut shall be judged as it appears with the talc.

(c) Kernels which are rancid or decayed.

(d) Moldy kernels.

(e) Kernels showing sprouts extending more than one-eighth inch from the end of the kernel.

(f) Distinctly dirty kernels.

(g) Kernels which are wormy, or have worm frass adhering, or have worm cuts which are more than superficial.

(h) Kernels which have dark yellow color penetrating the flesh, or yellow pitting extending deep into the kernel.

§ 51.1242 *Count per pound.* "Count per pound" means the number of peanuts in a pound. When determining the count per pound, one single kernel peanut shall be counted as one-half peanut.

SUBPART—UNITED STATES STANDARDS FOR PEARS (SUMMER AND FALL)

GENERAL

§ 51.1260 *General.* (a) When the numerical count is marked on the container, percentages shall be calculated on the basis of count.

(b) When the minimum diameter or minimum and maximum diameters are marked on the container, percentages shall be calculated on the basis of weight.

(c) When the pears are in bulk, percentages shall be calculated on the basis of weight.

(d) The tolerances for the standards are on a container basis. However, individual packages in any lot may vary from the specified tolerances as stated below, provided the averages for the entire lot, based on sample inspection, are within the tolerances specified.

(e) For a tolerance of 10 percent or more, individual packages in any lot may contain not more than one and one-half times the tolerance specified, except that when the package contains 15 specimens or less, individual packages may contain not more than double the tolerance specified.

(f) For a tolerance of less than 10 percent, individual packages in any lot may contain not more than double the tolerance specified, provided at least one specimen which does not meet the requirements shall be allowed in any one package.

GRADES

§ 51.1261 *U. S. No. 1.* "U. S. No. 1" shall consist of pears of one variety which are mature, but not overripe, carefully handpicked, clean, fairly well formed, free from decay, internal breakdown, scald, freezing injury, worm holes, black end, and from damage caused by hard end, bruises, broken skins, russeting, limbrubs, hail, scars, drought spot, sunburn, sprayburn, stings or other insect injury, disease, or mechanical or other means. (See §§ 51.1274 and 51.1275.)

§ 51.1262 *U. S. No. 2.* "U. S. No. 2" shall consist of pears of one variety which are mature, but not overripe, carefully handpicked, clean, not seriously misshapen, free from decay, internal breakdown, scald, freezing injury, worm holes, black end, and from damage caused by hard end, or broken skins. The pears shall also be free from serious damage caused by bruises, russeting, limbrubs, hail, scars, drought spot, sunburn, sprayburn, stings or other insect injury, disease, or mechanical or other means. (See §§ 51.1274 and 51.1275.)

§ 51.1263 *U. S. Combination grade.* A combination of U. S. No. 1 and U. S. No. 2 may be packed. When such a combination is packed, at least 50 percent of the pears in any container shall meet the requirements of U. S. No. 1. (See §§ 51.1274 and 51.1275.)

UNCLASSIFIED

§ 51.1264 *Unclassified.* Unclassified shall consist of pears which have not been classified in accordance with any of the foregoing grades. The term "unclassified" is not a grade within the meaning of these standards, but is provided as a designation to show that no definite grade has been applied to the lot.

DEFINITIONS

§ 51.1265 *Mature.* (a) "Mature" means that the pear has reached the stage of maturity which will insure the proper completion of the ripening process.

(b) Before a mature pear becomes overripe it will show varying degrees of firmness, depending upon the stage of the ripening process. Therefore, a statement of firmness should be given in order to indicate the stage of the ripening process. A description of the ground color should also be given.

(1) The following terms should be used for describing the ground color: "Green," "light green," "yellowish green," and "yellow."

(2) The following terms should be used for describing the firmness of pears.

(i) "Hard" means that the flesh of the pear is solid and does not yield appreciably even to considerable pressure. Such pears are in suitable condition for long storage period for the variety.

(ii) "Firm" means that the flesh of the pear is fairly solid but yields somewhat to moderate pressure. The ripening process in firm pears is further advanced than in hard pears and they cannot be held in storage as long.

(iii) "Firm ripe" means that the flesh of the pear yields readily to moderate pressure. Such a pear is approaching the stage at which it is in prime eating condition but may be held for a brief period.

(iv) "Ripe" means that the pear is at the stage where it is in its most desirable condition for eating.

§ 51.1266 *Overripe.* "Overripe" means dead ripe, very mealy or soft, past commercial utility.

§ 51.1267 *Carefully handpicked.* "Carefully handpicked" means that the pears do not show evidence of rough handling or of having been on the ground.

§ 51.1268 *Clean.* "Clean" means free from excessive dirt, dust, spray residue or other foreign material.

§ 51.1269 *Black end.* "Black end" is evidenced by an abnormally deep green color around the calyx, or black spots usually occurring on the one-third of the surface nearest to the calyx, or by an abnormally shallow calyx cavity.

§ 51.1270 *Fairly well-formed.* "Fairly well-formed" means that the pear may be slightly abnormal in shape but not to an extent which detracts materially from the appearance of the fruit.

§ 51.1271 *Damage.* "Damage" means any injury or defect which materially affects the appearance, edible or shipping quality.

(a) Hard end, if the pear shows a distinctly constricted protrusion at the blossom end, or an abnormally yellow color at the blossom end, or an abnormally smooth rounded base with little or no depression at the calyx, or if the flesh near the calyx is abnormally dry and tough or woody.

(b) Slight handling bruises and package bruises such as are incident to good commercial handling in the preparation of a slight pack shall not be considered damage.

(c) Any pear with one skin break larger than $^{3}/_{16}$ inch in diameter or depth, or with more than one skin break $^{1}/_{8}$ inch or larger in diameter or depth shall be considered damaged, and scored against the grade tolerance.

(1) Small inconspicuous skin breaks, less than $^{1}/_{8}$ inch in diameter or depth, shall not be considered damage. In addition, not more than 15 percent of the pears in any container may have not more than one skin break from $^{1}/_{8}$ inch to $^{3}/_{16}$ inch, inclusive, in diameter or depth.

(d) Russeting which exceeds the following shall be considered as damage:

(1) On all varieties excessively rough russeting (russeting which shows "frogging" or slight cracking) when the aggregate area exceeds $^{1}/_{2}$ inch in diameter.

(2) On Bartlett and other smooth-skinned varieties, slightly rough russeting, or thick russeting such as is characteristic of frost injury, when the aggregate area exceeds $^{3}/_{4}$ inch in diameter.

(3) On Bartlett and other smooth-skinned varieties, smooth solid or smooth netlike russeting when the aggregate area exceeds 15 percent of the surface.

(4) On Hardy, Sand and other similar varieties, rough or thick russeting such as is characteristic of frost injury, when the aggregate area exceeds $^{3}/_{4}$ inch in diameter. On any of these varieties any amount of characteristic russeting is permitted whether due to natural causes such as weather or stimulated by artificial means; leaf whips or light limbrubs which resemble and blend into russeted areas shall be considered as russet.

(e) Any one of the following defects or any combination thereof, the seriousness of which exceeds the maximum allowed for any one defect shall be considered as damage:

(1) Any limbrubs which are cracked, softened, or more than slightly depressed.

(2) Black discoloration caused by limbrubs, which exceeds an aggregate area of $^{3}/_{8}$ inch in diameter.

(3) Dark brown discoloration or excessive roughness caused by limbrubs which exceeds an aggregate area of $^{1}/_{2}$ inch in diameter.

(4) Slightly rough, light colored discoloration caused by limbrubs which exceeds an aggregate area of $^{3}/_{4}$ inch in diameter.

(5) Smooth, light colored discoloration caused by limbrubs which exceeds an aggregate area of 1 inch in diameter.

(6) Hail marks or other similar depressions or scars which are not shallow or superficial, or where the injury affects an aggregate area of more than $^{3}/_{8}$ inch in diameter.

(7) Drought spot when more than one in number, or when the external injury exceeds and aggregate area of $^{3}/_{8}$ inch in diameter, or when the appearance of the flesh is materially affected by corky tissue or brownish discoloration.

(8) Sunburn or sprayburn where the skin is blistered, cracked, or shows any light tan or brownish color, or the shape of the pear is appreciably flattened, or the flesh is appreciably softened or changed in color, except that sprayburn of a russet character shall be considered under the definition of russeting.

(9) Insects: (i) More than two healed codling moth stings, or any insect sting which is over $^{3}/_{32}$ of an inch in diameter, or other insect stings affecting the appearance to an equal extent.

(ii) Blister mite or canker worm injury which is not shallow or superficial, or where the injury affects an aggregate area of more than $^{3}/_{8}$ inch in diameter.

(10) Disease: (i) Scab spots which are black and which cover an aggregate area of more than $^{1}/_{8}$ inch in diameter except that scab spots of a russet character shall be considered under the definition of russeting.

(ii) Sooty blotch which is thinly scattered over more than 5 percent of the surface, or dark, heavily concentrated spots which affect an area of more than $^{3}/_{8}$ inch in diameter.

§ 51.1272 *Seriously misshapen.* "Seriously misshapen" means that the pear is excessively flattened or elongated for the variety, or is constricted or deformed so it will not cut three fairly uniform good quarters, or is so badly misshapen that the appearance is seriously affected.

§ 51.1273 *Serious damage.* "Serious damage" means any injury or defect which seriously affects the appearance, edible or shipping quality.

(a) Russeting which in the aggregate exceeds the following shall be considered as serious damage:

(1) On all varieties, excessively rough russeting (russeting which shows "frogging" or slight cracking) when the aggregate area exceeds $^{3}/_{4}$ inch in diameter.

(2) On all varieties, thick russeting such as is characteristic of frost injury, 15 percent of the surface.

(b) Any one of the following defects or combination thereof, the seriousness of which exceeds the maximum allowed for any one defect shall be considered as serious damage:

(1) Limbrubs which are more than slightly cracked, or excessively rough limbrubs or dark brown or black discoloration caused by limbrubs which exceeds an aggregate area of $^{3}/_{4}$ inch in diameter. Other limbrubs which affect an aggregate area of more than one-tenth of the surface.

(2) Hail marks or other similar depressions or scars which affect an aggregate area of more than $^{3}/_{4}$ inch in diameter, or which materially deform or disfigure the fruit.

(3) Drought spot when more than two in number, or where the external injury affects an aggregate area of more than $^{3}/_{4}$ inch in diameter, or when the appearance of the flesh is seriously affected by corky tissue or brownish discoloration.

(4) Sunburn or sprayburn where the skin is blistered, cracked or shows any brownish color, or where the shape of the pear is materially flattened, or the flesh is softened or materially changed in color, except that sprayburn of a russet character shall be considered under the definition of russeting.

(5) Insects: (i) Worm holes. More than three healed codling moth stings, of which not more than two may be over $^{3}/_{32}$ inch in diameter, or other insect stings affecting the appearance to an equal extent.

(ii) Blister mite or canker worm injury which affects an aggregate area of more than $^{3}/_{4}$ inch in diameter or which materially deforms or disfigures the fruit.

(6) Scab spots which are black and which cover an aggregate area of more than one-fourth inch in diameter, except that scab spots of a russet character shall be considered under the definition of russeting.

(7) Sooty blotch which is thinly scattered over more than 15 percent of the surface, or dark heavily concentrated spots which affect an area of more than $^{3}/_{4}$ inch in diameter.

TOLERANCES

§ 51.1274 *Tolerances.* (a) In order to allow for variations incident to proper grading and handling, not more than a total of 10 percent of the pears in any container may be below the requirements of grade: *Provided*, That not more than 5 percent shall be seriously damaged by insects, and not more than 1 percent shall be allowed for decay or internal breakdown.

(b) When applying the foregoing tolerances to the combination grade no part of any tolerance shall be used to reduce the percentage of U. S. No. 1 pears required in the combination, but individual containers may have not more than 10 percent less than the percentage of U. S. No. 1 required: *Provided*, That the entire lot averages within the percentage specified.

CONDITION

§ 51.1275 *Condition after storage or transit.* Decay, scald, or other deterioration which may have developed on pears

after they have been in storage or transit shall be considered as affecting condition and not the grade.

STANDARD PACK

§ 51.1276 *Sizing.* (a) The numerical count, or the minimum size of the pears packed in closed containers shall be indicated on the package. The number of pears in the box shall not vary more than 3 from the number indicated on the box.

(b) When the numerical count is marked on western standard or special pear boxes the pears shall not vary more than $^3/_8$ inch in their transverse diameter for counts 120 or less; $^1/_4$ inch for counts 135 to 180 inclusive; and $^3/_{16}$ inch for counts 193 or more.

(c) When the numerical count is marked on western standard half boxes or special half boxes packed three tiers deep, the pears shall not vary more than $^1/_4$ inch for counts 90 or less, and $^3/_{16}$ inch for counts 100 or more.

(d) When the numerical count is marked on western standard half boxes or special half boxes packed two tiers deep, the pears shall not vary more than $^3/_8$ inch for counts 50 or less; $^1/_4$ inch for counts 55 to 60 inclusive; and $^3/_{16}$ inch for counts 65 or more.

(e) When the numerical count is not shown, the minimum size shall be plainly stamped, stenciled or otherwise marked on the container in terms of whole inches, whole and half inches, whole and quarter inches, or whole and eighth inches, as $2^1/_2$ inches minimum, $2^1/_4$ inches minimum, or $2^5/_8$ inches minimum, in accordance with the facts. It is suggested that both minimum and maximum sizes be marked on the container, as $2^1/_4$ to $2^3/_4$ inches, $2^1/_2$ to $2^3/_4$ inches, as such marking is especially desirable for pears marketed in the export trade.

(f) "Size" means the greatest transverse diameter of the pear taken at right angles to a line running from the stem to the blossom end.

§ 51.1277 *Packing.* (a) Each package shall be packed so that the pears in the shown face shall be reasonably representative in size and quality of the contents of the package.

(b) Pears packed in any container shall be tightly packed. All packages shall be well filled but the contents shall not show excessive or unnecessary bruising because of overfilled packages.

(c) Pears packed in boxes shall be arranged in containers according to the approved and recognized methods with the pears packed lengthwise. A bridge shall not be allowed in any standard pack. When wrapped, each pear shall be fairly well enclosed by its individual wrapper.

(d) Pears packed in round stave bushel baskets, tubs or in barrels shall be ring faced.

§ 51.1278 *Tolerances for standard pack.* (a) In order to allow for variations incident to proper sizing, not more than 5 percent of the pears in any container may not meet the size requirements: *Provided*, That when the maximum and minimum sizes are both stated, an additional 10 percent tolerance shall be allowed for pears which are larger than the maximum size stated.

(b) In order to allow for variations incident to proper packing, not more than 10 percent of the containers in any lot may not meet these requirements, but no part of this tolerance shall be allowed for bridge packs, or for packs with different sizes and arrangements such as layers of 195 size and arrangement, and layers of 180 size and arrangement packed in the same box.

SUBPART—UNITED STATES STANDARDS FOR WINTER PEARS

GENERAL

§ 51.1300 *General.* (a) These standards apply to varieties such as Anjou, Bosc, Winter Nelis, Comice and other similar varieties.

(b) When the numerical count is marked on the container, percentages shall be calculated on the basis of count.

(c) When the minimum diameter or minimum and maximum diameters are marked on the container, percentages shall be calculated on the basis of weight.

(d) When the pears are in bulk, percentages shall be calculated on the basis of weight.

(e) The tolerances for the standards are on a container basis. However, individual packages in any lot may vary from the specified tolerances as stated below, provided the averages for the entire lot, based on sample inspection, are within the tolerances specified.

(f) For a tolerance of 10 percent or more, individual packages in any lot may contain not more than one and one-half times the tolerance specified, except that when the package contains 15 specimens or less, individual packages may contain not more than double the tolerance specified.

(g) For a tolerance of less than 10 percent, individual packages in any lot may contain not more than double the tolerance specified, provided at least one specimen which does not meet the requirements shall be allowed in any one package.

GRADES

§ 51.1301 *U. S. Extra No. 1.* U. S. Extra No. 1 shall consist of pears of one variety which are mature, but not overripe, carefully handpicked, clean, well formed, free from decay, internal breakdown, scald, freezing injury, worm holes, black end, hard end, drought spot, and free from injury caused by russeting, limbrubs, hail, scars, cork spot, sunburn, sprayburn, stings or other insect injury, or mechanical or other means except that they shall be free from damage caused by bruises, broken skins, or discase. (See §§ 51.1317 and 51.1318.)

§ 51.1302 *U. S. No. 1.* U. S. No. 1 shall consist of pears of one variety which are mature, but not overripe, carefully hand-picked, clean, fairly well formed, free from decay, internal breakdown, scald, freezing injury, worm holes, black end, and from damage caused by hard end, bruises, broken skins, russeting, limbrubs, hail, scars, cork spot, drought spot, sunburn, sprayburn, stings or other insect injury, disease, or mechanical or other means. (See §§ 51.1317 and 51.1318.)

§ 51.1303 *U. S. No. 2.* U. S. No. 2 shall consist of pears of one variety which are mature, but not overripe, carefully hand-picked, clean, not seriously misshapen, free from decay, internal breakdown, scald, freezing injury, worm holes, black end, and from damage caused by hard end, or broken skins. The pears shall also be free from serious damage caused by bruises, russeting, limbrubs, hail, scars, cork spot, drought spot, sunburn, sprayburn, stings or other insect injury, disease, or mechanical or other means. (See §§ 51.1317 and 51.1318.)

§ 51.1304 *U. S. Combination.* A Combination of U. S. No. 1 and U. S. No 2 may be packed. When such a combination is packed, at least 50 percent of the pears in any container shall meet the requirements of U. S. No. 1. (See §§ 51.1317 and 51.1318.)

UNCLASSIFIED

§ 51.1305 *Unclassified.* Unclassified shall consist of pears which have not been classified in accordance with any of the foregoing grades. The term "unclassified" is not a grade within the meaning of these standards, but is provided as a designation to show that no definite grade has been applied to the lot.

DEFINITIONS

§ 51.1306 *Mature.* (a) "Mature" means that the pear has reached the stage of maturity which will insure the proper completion of the ripening process.

(b) Before a mature pear becomes overripe it will show varying degrees of firmness depending upon the stage of the ripening process. Therefore, a statement of firmness should be given in order to indicate the stage of the ripening process. A description of the ground color should also be given.

(1) The following terms should be used for describing the ground color: "Green," "Light Green," "Yellowish Green," and "Yellow."

(2) The following terms should be used for describing the firmness of pears:

(i) "Hard" means that the flesh of the pear is solid and does not yield appreciably even to considerable pressure. Such pears are in suitable condition for long storage period for the variety.

(ii) "Firm" means that the flesh of the pear is fairly solid but yields somewhat to moderate pressure. The ripening process in firm pears is further advanced than in hard pears and they cannot be held in storage as long. Winter varieties at the firm stage may be held longer than the early varieties.

(iii) "Firm Ripe" means that the flesh of the pear yields readily to moderate pressure. Such a pear is approaching the stage at which it is in prime eating condition but may be held for a brief period although winter varieties can be held longer than the early varieties.

(iv) "Ripe" means that the pear is at the stage where it is in its most desirable condition for eating.

§ 51.1307 *Overripe.* "Overripe" means dead ripe, very mealy or soft, past commercial utility.

§ 51.1308 *Carefully handpicked.* "Carefully handpicked" means that the pears do not show evidence of rough handling or of having been on the ground.

§ 51.1309 *Clean.* "Clean" means free from excessive dirt, dust, spray residue or other foreign material.

§ 51.1310 *Well formed.* "Well formed" means having the shape characteristic of the variety. Slight irregularities of shape from type which do not appreciably detract from the general appearance of the fruit shall be considered well formed.

§ 51.1311 *Black end.* "Black end" is evidenced by an abnormally deep green color around the calyx, or black spots usually occurring on the one-third of the surface nearest to the calyx, or by an abnormally shallow calyx cavity.

§ 51.1312 *Injury.* "Injury" means any blemish or defect that more than slightly affects the appearance, or edible or shipping quality. The following shall be considered as injury:

(a) Russeting which exceeds the following shall be considered as injury:

(1) On all varieties any excessively rough russeting (russeting which shows "frogging" or slight cracking).

(2) On Comice, and on Anjou and other smooth-skinned varieties, slightly rough russeting, or thick russeting such as is characteristic of frost injury, when the aggregate area exceeds $^1/_2$ inch in diameter.

(3) On Anjou and other smooth-skinned varieties, smooth solid russeting when the aggregate area exceeds $^1/_2$ inch in diameter and smooth netlike russeting when the aggregate area exceeds 15 percent of the surface, and on Comice, smooth solid or smooth netlike russeting when the aggregate area exceeds one-third of the surface, except that, in addition, on these and similar varieties, any amount of characteristic smooth russeting shall be permitted on that portion of the calyx end not visible for more than $^1/_2$ inch along the contour of the pear, when it is placed calyx end down on a flat surface.

(4) On any of the following and other similar varieties, rough or thick russeting such as is characteristic of frost injury when the aggregate area exceeds $^1/_2$ inch in diameter. On any of these varieties any amount of characteristic russeting is permitted whether due to natural causes such as weather or stimulated by artificial means; leaf whips or light limbrubs which resemble and blend into russeted areas shall be considered as russet:

Bosc, Clairgeau, Easter Beurre, Flemish Beauty, Kieffer, P. Barry, Pound, Seckel, Sheldon, Winter Nelis, and other similar varieties.

(b) Any one of the following defects or any combination thereof, the seriousness of which exceeds the maximum allowed for any one defect, shall be considered as injury:

(1) Limbrubs which are cracked, softened, more than very slightly depressed, not light in color, or exceeding an aggregate area of $^3/_4$ inch in diameter.

(2) Hail marks or other similar depressions or scars which are not very shallow or superficial, or which affect an aggregate area of more than $^1/_4$ inch in diameter.

(3) Cork spot, when a pear shows depressions or other external evidence of the disease.

(4) Sunburn or sprayburn if the normal color of the fruit has been materially changed, or if the skin is blistered or cracked, or the flesh softened or discolored.

(5) More than two healed slight stings or depressions, or any stings which materially affect the general appearance of the fruit.

(6) Blister mite or canker worm injury which is not very shallow and superficial or where the injury affects an aggregate area of more than $^1/_4$ inch.

§ 51.1313 *Fairly well formed.* "Fairly well formed" means that the pear may be slightly abnormal in shape but not to an extent which detracts materially from the appearance of the fruit. Winter Nelis pears with characteristic slight sutures or with slight flattening on one side and/or other slight irregularities which do not materially detract from the general appearance of the pear shall be considered fairly well formed.

§ 51.1314 *Damage.* "Damage" means any injury or defect which materially affects the appearance, or edible or shipping quality.

(a) Hard end, if the pear shows an abnormally yellow color at the blossom end, or an abnormally smooth rounded base with little or no depression at the calyx, or if the flesh near the calyx is abnormally dry and tough or woody.

(b) Slight handling bruises and package bruises such as are incident to good commercial handling in the preparation of a tight pack shall not be considered damage.

(c) Any pear with one skin break larger than $^3/_{16}$ inch in diameter or depth, or with more than one skin break $^1/_8$ inch or larger in diameter or depth, shall be considered damaged, and scored against the grade tolerance.

(1) Small inconspicuous skin breaks, less than $^1/_8$ inch in diameter or depth, shall not be considered damage. In addition, not more than 15 percent of the pears in any container may have not more than one skin break from $^1/_8$ inch to $^3/_{16}$ inch inclusive, in diameter or depth.

(d) Russeting which exceeds the following shall be considered as damage:

(1) On all varieties excessively rough russeting (russeting which shows "frogging" or slight cracking) when the aggregate area exceeds $^1/_2$ inch in diameter.

(2) On Anjou and other smooth-skinned varieties, slightly rough russeting, or thick russeting such as is characteristic of frost injury, when the aggregate area exceeds $^3/_4$ inch in diameter.

(3) On Anjou, smooth solid or smooth netlike russeting when the aggregate exceeds one-third of the surface, and on other smooth-skinned varieties, 15 percent of the surface, except that, in addition, on Anjou and other smooth-skinned varieties, any amount of characteristic smooth russeting shall be permitted on that portion of the calyx end not visible for more than $^1/_2$ inch along the contour of the pear, when it is placed calyx end down on a flat surface.

(4) On any of the following and other similar varieties, rough or thick russeting such as is characteristic of frost injury, when the aggregate area exceeds $^3/_4$ inch in diameter. On any of these varieties any amount of characteristic russeting is permitted whether due to natural causes such as weather or stimulated by artificial means; leaf whips or light limbrubs which resemble and blend into russeted areas shall be considered as russet:

Bosc, Clairgeau, Comice, Eastern Beurre, Flemish Beauty, Kieffer, P. Barry, Pound, Seckel, Sheldon, Winter Nelis, and other similar varieties.

(e) Any one of the following defects or any combination thereof, the seriousness of which exceeds the maximum allowed for any one defect shall be considered as damage:

(1) Any limbrubs which are cracked, softened, or more than slightly depressed.

(2) Black discoloration caused by limbrubs which exceeds an aggregate area of $^3/_8$ inch in diameter.

(3) Dark brown discoloration or excessive roughness caused by limbrubs which exceeds an aggregate area of $^1/_2$ inch in diameter.

(4) Slightly rough, light colored discoloration caused by limbrubs which exceeds an aggregate area of $^3/_4$ inch in diameter.

(5) Smooth, light colored discoloration caused by limbrubs which exceeds an aggregate area of 1 inch in diameter.

(6) Hail marks or other similar depressions or scars which are not shallow or superficial, or where the injury affects an aggregate area of more than $^3/_8$ inch in diameter.

(7) Cork spot, when more than one in number visible externally, or when the visible external injury affects an area of more than $^3/_8$ inch in diameter.

(8) Drought spot when more than one in number or when the external injury exceeds an aggregate area of $^3/_8$ inch in diameter, or when the appearance of the flesh is materially affected by corky tissue or brownish discoloration.

(9) Sunburn or sprayburn where the skin is blistered, cracked, or shows any light tan or brownish color, or the shape of the pear is appreciably flattened, or the flesh is appreciably softened or changed in color, except that sprayburn of a russet character shall be considered under the definition of russeting.

(10) Insects: (i) More than two healed codling moth stings, or any insect sting which is over $^1/_{32}$ of an inch in diameter, or other insect stings affecting the appearance to an equal extent.

(ii) Blister mite or canker worm injury which is not shallow or superficial, or where the injury affects an aggregate area of more than $^3/_8$ inch in diameter.

(11) Disease: (i) Scab spots which are black and which cover an aggregate area of more than $^1/_8$ inch in diameter, except that scab spots of a russet character, shall be considered under the definition of russeting.

(ii) Hail marks or other similar depressions or scars which are not very shallow or superficial, or which affect an aggregate area of more than $^1/_4$ inch in diameter.

(iii) Cork spot, when a pear shows depressions or other external evidence of the disease.

(iv) Sunburn or sprayburn if the normal color of the fruit has been materially changed, or if the skin is blistered or cracked, or the flesh softened or discolored.

(v) More than two healed slight stings or depressions, or any stings which materially affect the general appearance of the fruit.

(vi) Blister mite or canker worm injury which is not very shallow and superficial or where the injury affects an aggregate area of more than $^1/_4$ inch.

§ 51.1315 *Fairly well formed.* "Fairly well formed" means that the pear may be slightly abnormal in shape but not to an extent which detracts materially from the appearance of the fruit. Winter Nelis pears with characteristic slight sutures or with slight flattening on one side and/or other slight irregularities which do not materially detract from the general appearance of the pear shall be considered fairly well formed.

§ 51.1316 *Damage.* "Damage" means any injury or defect which materially affects the appearance, or edible or shipping quality.

(a) Hard end, if the pear shows an abnormally yellow color at the blossom end, or an abnormally smooth rounded base with little or no depression at the calyx, or if the flesh near the calyx is abnormally dry and tough or woody.

(b) Slight handling bruises and package bruises such as are incident to good commercial handling in the preparation of a tight pack shall not be considered damage.

(c) Any pear with one skin break larger than $^3/_{16}$ inch in diameter or depth, or with more than one skin break $^1/_8$ inch or larger in diameter or depth, shall be considered damaged, and scored against the grade tolerance.

(1) Small inconspicuous skin breaks, less than $^1/_8$ inch in diameter or depth, shall not be considered damage. In addition, not more than 15 percent of the pears in any container may have not more than one skin break from $^1/_8$ inch to $^3/_{16}$ inch inclusive, in diameter or depth.

(d) Russeting which exceeds the following shall be considered as damage:

(1) On all varieties excessively rough russeting (russeting which shows "frogging" or slight cracking) when the aggregate area exceeds $^1/_2$ inch in diameter.

(2) On Anjou and other smooth-skinned varieties, slightly rough russeting, or thick russeting such as is characteristic of frost injury, when the aggregate area exceeds $^3/_4$ inch in diameter.

(3) On Anjou, smooth solid or smooth netlike russeting when the aggregate exceeds one-third of the surface, and on other smooth-skinned varieties, 15 percent of the surface, except that, in addition, on Anjou and other smooth-skinned varieties, any amount of characteristic smooth russeting shall be permitted on that portion of the calyx end not visible for more than $^1/_2$ inch along the contour of the pear, when it is placed calyx end down on a flat surface.

(4) On any of the following and other similar varieties, rough or thick russeting such as is characteristic of frost injury, when the aggregate area exceeds $^3/_4$ inch in diameter. On any of these varieties any amount of characteristic russeting is permitted whether due to natural causes such as weather or stimulated by artificial means; leaf whips or light limbrubs which resemble and blend into russeted areas shall be considered as russet:

Bosc, Clairgeau, Comice, Eastern Beurre, Flemish Beauty, Kieffer, P. Barry, Pound, Seckel, Sheldon, Winter Nelis, and other similar varieties.

(e) Any one of the following defects or any combination thereof, the seriousness of which exceeds the maximum allowed for any one defect shall be considered as damage:

(1) Any limbrubs which are cracked, softened, or more than slightly depressed.

(2) Black discoloration caused by limbrubs which exceeds an aggregate area of $^3/_8$ inch in diameter.

(3) Dark brown discoloration or excessive roughness caused by limbrubs which exceeds an aggregate area of $^1/_2$ inch in diameter.

(4) Slightly rough, light colored discoloration caused by limbrubs which exceeds an aggregate area of $^3/_4$ inch in diameter.

(5) Smooth, light colored discoloration caused by limbrubs which exceeds an aggregate area of 1 inch in diameter.

(6) Hail marks or other similar depressions or scars which are not shallow or superficial, or where the injury affects an aggregate area of more than $^3/_8$ inch in diameter.

(7) Cork spot, when more than one in number visible externally, or when the visible external injury affects an area of more than $^3/_8$ inch in diameter.

(8) Drought spot when more than one in number or when the external injury exceeds an aggregate area of $^3/_8$ inch in diameter, or when the appearance of the flesh is materially affected by corky tissue or brownish discoloration.

(9) Sunburn or sprayburn where the skin is blistered, cracked, or shows any light tan or brownish color, or the shape of the pear is appreciably flattened, or the flesh is appreciably softened or changed in color, except that sprayburn of a russet character shall be considered under the definition of russeting.

(10) Insects: (i) More than two healed codling moth stings, or any insect sting which is over $^1/_{32}$ of an inch in diameter, or other insect stings affecting the appearance to an equal extent.

(ii) Blister mite or canker worm injury which is not shallow or superficial, or where the injury affects an aggregate area of more than $^3/_8$ inch in diameter.

(11) Disease: (i) Scab spots which are black and which cover an aggregate area of more than $^1/_8$ inch in diameter, except that scab spots of a russet character, shall be considered under the definition of russeting.

(ii) Sooty blotch which is thinly scattered over more than 5 percent of the surface, or dark, heavily concentrated spots which affect an area of more than $\frac{3}{8}$ inch in diameter.

§ 51.1315 *Seriously misshapen.* "Seriously misshapen" means that the pear is excessively flattened or elongated for the variety, or is constricted or deformed so it will not cut three fairly uniform good quarters, or is so badly misshapen that the appearance is seriously affected.

§ 51.1316 *Serious damage.* "Serious damage" means any injury or defect which seriously affects the appearance, or edible or shipping quality.

(a) Russeting which in the aggregate exceeds the following shall be considered as serious damage:

(1) On all varieties, excessively rough russeting (russeting which shows "frogging" or slight cracking) when the aggregate area exceeds $\frac{3}{4}$ inch in diameter.

(2) On all varieties, thick russeting such as is characteristic of frost injury, 15 percent of the surface.

(3) On Anjou, smooth solid or smooth netlike russeting when the aggregate area exceeds two-thirds of the surface, except that, in addition, any amount of characteristic smooth russeting shall be permitted on that portion of the calyx end not visible for more than $\frac{1}{2}$ inch along the contour of the pear, when it is placed calyx end down on a flat surface. On Flemish Beauty smooth russeting shall be permitted on the entire surface.

(b) Any one of the following defects or combination thereof, the seriousness of which exceeds the maximum allowed for any one defect shall be considered as serious damage:

(1) Limbrubs which are more than slightly cracked, or excessively rough limbrubs or dark brown or black discoloration caused by limbrubs which exceeds an aggregate area of $\frac{3}{4}$ inch in diameter.

(2) Other limbrubs which affect an aggregate area of more than one-tenth of the surface.

(3) Hail marks or other similar depressions or scars which affect an aggregate area of more than $\frac{3}{4}$ inch in diameter, or which materially deform or disfigure the fruit.

(4) Cork spot, when more than two in number visible externally, or when the visible external injury affects an aggregate area of more than $\frac{1}{2}$ inch in diameter.

(5) Drought spot when more than two in number, or where the external injury affects an aggregate area of more than $\frac{3}{4}$ inch in diameter, or when the appearance of the flesh is seriously affected by corky tissue or brownish discoloration.

(6) Sunburn or sprayburn where the skin is blistered, cracked or shows any brownish color, or where the shape of the pear is materially flattened, or the flesh is softened or materially changed in color, except that sprayburn of a russet character shall be considered under the definition of russeting.

(7) Insects: (i) Worm holes. More than three healed codling moth stings, of which not more than two may be over $\frac{3}{32}$ inch in diameter, or other insect stings affecting the appearance to an equal extent.

(ii) Blister mite or canker worm injury which affects an aggregate area of more than $\frac{3}{4}$ inch in diameter or which materially deforms or disfigures the fruit.

(8) Disease: (i) Scab spots which are black, and which cover an aggregate area of more than $\frac{1}{4}$ inch in diameter, except that scab spots of a russet character shall be considered under the definition of russeting.

(ii) Sooty blotch which is thinly scattered over more than 15 percent of the surface, or dark heavily concentrated spots which affect an area of more than $\frac{3}{4}$ of an inch in diameter.

TOLERANCES

§ 51.1317 *Tolerances.* (a) In order to allow for variations incident to proper grading and handling, not more than a total of 10 percent of the pears in any container may be below the requirements of grade: *Provided*, That not more than 5 percent shall be seriously damaged by insects, and not more than 1 percent shall be allowed for decay or internal breakdown.

(b) When applying the foregoing tolerances to the combination grade no part of any tolerance shall be used to reduce the percentage of U. S. No. 1 pears required in the combination, but individual containers may have not more than 10 percent less than the percentage of U. S. No. 1 required: *Provided*, That the entire lot averages within the percentage specified.

CONDITION

§ 51.1318 *Condition after storage or transit.* Decay, scald or other deterioration which may have developed on pears after they have been in storage or transit shall be considered as affecting condition and not the grade.

STANDARD PACK

§ 51.1319 *Sizing.* (a) The numerical count, or the minimum size of the pears packed in closed containers shall be indicated on the package. The number of pears in the box shall not vary more than 3 from the number indicated on the box.

(b) When the numerical count is marked on western standard or special pear boxes the pears shall not vary more than $\frac{3}{8}$ inch in their transverse diameter for counts 120 or less; $\frac{1}{4}$ inch for counts 135 to 180 inclusive; and $\frac{3}{16}$ inch for counts 193 or more.

(c) When the numerical count is marked on western standard half boxes or special half boxes packed three tiers deep, the pears shall not vary more than $\frac{1}{4}$ inch for counts 90 or less, and $\frac{3}{16}$ inch for counts 100 or more.

(d) When the numerical count is marked on western standard half boxes or special half boxes packed two tiers deep, the pears shall not vary more than $\frac{3}{8}$ inch for counts 50 or less; $\frac{1}{4}$ inch for counts 55 to 60 inclusive; and $\frac{3}{16}$ inch for counts 65 or more.

(e) When the numerical count is not shown, the minimum size shall be plainly stamped, stenciled or otherwise marked on the container in terms of whole inches, whole and half inches, whole and quarter inches, or whole and eighth inches, as $2\frac{1}{2}$ inches minimum, $2\frac{1}{4}$ inches minimum, or $2\frac{5}{8}$ inches minimum, in accordance with the facts. It is suggested that both minimum and maximum sizes be marked on the container, as $2\frac{1}{4}$ to $2\frac{3}{4}$ inches, $2\frac{1}{2}$ to $2\frac{1}{4}$ inches, as such marking is especially desirable for pears marketed in the export trade.

(f) "Size" means the greatest transverse diameter of the pear taken at right angles to a line running from the stem to the blossom end.

§ 51.1320 *Packing.* (a) Each package shall be packed so that the pears in the shown face shall be reasonably representative in size and quality of the contents of the package.

(b) Pears packed in any container shall be tightly packed. All packages shall be well filled but the contents shall not show excessive or unnecessary bruising because of overfilled packages.

(c) Pears packed in boxes shall be arranged in containers according to the approved and recognized methods with the pears packed lengthwise. A bridge shall not be allowed in any standard pack. When wrapped, each pear shall be fairly well enclosed by its individual wrapper.

(d) Pears packed in round stave bushel baskets, tubs, or in barrels shall be ring faced.

§ 51.1321 *Tolerances for standard pack.* (a) In order to allow for variations incident to proper sizing, not more than 5 percent of the pears in any container may not meet the size requirements: *Provided*, That when the maximum and minimum sizes are both stated, an additional 10 percent tolerance shall be allowed for pears which are larger than the maximum size stated.

(b) In order to allow for variations incident to proper packing, not more than 10 percent of the containers in any lot may not meet these requirements, but no part of this tolerance shall be allowed for bridge packs, or for packs with different sizes and arrangements such as layers of 195 size and arrangement, and layers of 160 size and arrangement packed in the same box.

SUBPART—UNITED STATES STANDARDS FOR PEARS FOR CANNING

GENERAL

§ 51.1345 *General.* All percentages shall be calculated on the basis of weight.

GRADES

§ 51.1346 *U. S. No. 1.* U. S. No. 1 shall consist of pears of one variety which are mature, handpicked, firm, well formed, free from scald, hard end, black end, internal breakdown, decay, worms and worm holes and from damage caused by broken skins, limbrubs, sprayburn, sunburn, scab, russeting, bruises, hail, frost, drought spot, disease, insects, mechanical or other means.

(a) Unless otherwise specified, the pears shall not be further advanced than yellowish green.

(b) Tree-ripened pears and pears grown from late blooms shall not be considered as meeting the requirements of this grade. (See § 51.1349.)

§ 51.1347 *U. S. No. 2.* U. S. No. 2 shall consist of pears of one variety which are mature, handpicked, firm, not seriously deformed, free from scald, hard end, black end, internal breakdown, decay, worms and worm holes, and from serious damage by any other cause.

(a) Unless otherwise specified, the pears shall not be further advanced than yellowish green.

(b) Tree-ripened pears and pears grown from late blooms shall not be considered as meeting the requirements of this grade. (See § 51.1349.)

CULLS

§ 51.1348 *Culls.* Culls are pears which do not meet the requirements of either of the grades in §§ 51.1346 and 51.1347.

SIZE

§ 51.1349 *Size classification.* The diameter size may be fixed by agreement between buyer and seller. If desired, pears may be contracted on the basis of more than one size classification within one of the grades such as U. S. No. 1, $2\frac{1}{8}$ to $2\frac{3}{8}$ inches, U. S. No. 1, $2\frac{3}{8}$ inches and larger, or U. S. No. 1, $2\frac{1}{4}$ to $2\frac{3}{8}$ inches. Specifications also may be made with respect to the ratio of length to diameter such as U. S. No. 1, $2\frac{1}{8}$ to $2\frac{3}{8}$ inches, length $1\frac{1}{4}$ times the diameter, U. S. No. 1, $2\frac{3}{8}$ inches and larger, length $1\frac{1}{4}$ times the diameter. Similar specifications or simply a minimum size may be designated for U. S. No. 2 grade.

DEFINITIONS

§ 51.1350 *Mature.* "Mature" means that the pear has reached the stage of maturity which will insure the proper completion of the ripening process.

§ 51.1351 *Handpicked.* "Handpicked" means that the pears do not show evidence of having been on the ground.

§ 51.1352 *Firm.* "Firm" means that the pear is fairly solid and yields only very slightly to moderate pressure, and is not wilted, shriveled, rubbery or flabby.

§ 51.1353 *Well formed.* "Well formed" means that the pear has the shape characteristic of the variety, so that after paring, cutting in halves and coring, each half of the pear shall be well formed. Bartlett pears shall have at least a fairly well developed neck.

§ 51.1354 *Damage.* "Damage" means any injury or defect which materially affects the canning quality of the fruit. After paring, cutting in halves and coring, each half of the pear shall be well formed or the pear is considered damaged. Pears showing surface blemishes shall be considered damaged when the injury cannot be completely removed in the ordinary process of paring for commercial use.

§ 51.1355 *Pears grown from late blooms.* Such pears often have excessively long stems (commonly termed "rat tails"), or may be misshapen or slightly rough. Such pears do not ripen properly for ordinary canning use.

§ 51.1356 *Seriously deformed.* "Seriously deformed" means that the pear is so badly misshapen as to cause a loss during the usual commercial preparation for use of over 20 percent, by weight, of the pear in excess of that which would occur if the pear were well formed. Round or apple-shaped pears shall not be considered seriously deformed.

§ 51.1357 *Serious damage.* "Serious damage" means any injury or defect which cannot be removed during the usual commercial preparation for use without a loss of over 20 percent, by weight, of the pear in excess of that which would occur if the pear were not defective.

§ 51.1358 *Diameter.* "Diameter" means the greatest dimension of the pear taken at right angles to a line running from the stem to the blossom end.

SUBPART—UNITED STATES STANDARDS FOR FRESH PEAS

INTRODUCTION

§ 51.1375 *Introduction.* (a) The tolerances for the standards are on a container basis. However, individual containers in any lot may vary from the specified tolerances as stated below, provided the averages for the entire lot, based on sample inspection, are within the tolerances specified.

(b) For a tolerance of 10 percent, individual containers in any lot may have not more than one and one-half times the tolerance.

(c) For a tolerance of less than 10 percent, individual containers in any lot may have not more than double the tolerance.

GRADES

§ 51.1376 *U. S. No. 1.* U. S. No. 1 shall consist of pods of peas of similar varietal characteristics which are not overmature or excessively small, not badly misshapen or watersoaked, and which are fairly well filled, fresh, firm, free from decay, and from damage caused by black calyxes, freezing, splitting, hail, dirt, leaves, or other foreign matter, mildew, or other diseases, insects, or mechanical or other means. The peas shall be at least fairly tender, free from decay, and from damage caused by split skins, disease, insects or mechanical or other means.

(a) Peas may be specified as "U. S. No. 1 Green Calyxes" when they meet the requirements of U. S. No. 1 grade and an average of three-fourths or more, by weight, of the pods in any lot, but not less than one-half of the pods in each container, have calyxes which are of a fairly good green color.

§ 51.1377 *U. S. Fancy.* U. S. Fancy shall consist of pods of peas which are well filled and have an average of three-fourths or more by weight, of the pods in any lot, but not less than one-half of the pods in each container with calyxes which are of a fairly good green color, and which meet the requirements of U. S. No. 1 grade in all other respects.

TOLERANCES

§ 51.1378 *Tolerances.* In order to allow for variations incident to proper grading and handling, not more than 10 percent, by weight, of the pods of peas in any container may be below the requirements of the grade, but not more than one-half of this tolerance, or 5 percent, shall be allowed for defects causing serious damage, and not more than one-tenth of this tolerance, or 1 percent, shall be allowed for soft decay. When peas are specified as "U. S. No. 1 Green Calyxes" or "U. S. Fancy" no part of any tolerance shall be allowed to reduce for the lot as a whole, or for the individual container the percentage of pods which are required to have calyxes of a fairly good green color.

UNCLASSIFIED

§ 51.1379 *Unclassified.* Unclassified shall consist of peas which have not been classified in accordance with the foregoing grades. The term "unclassified" is not a grade within the meaning of these standards but is provided as a designation to show that no definite grade has been applied to the lot.

DEFINITIONS

§ 51.1380 *Similar varietal characteristics.* "Similar varietal characteristics" means that the pods of peas in any container are of the same general type.

§ 51.1381 *Overmature.* "Overmature" means that the pod has developed beyond the stage at which it is desirable as a fresh product. The pod is usually wrinkled and the green is faded, having a noticeably whitish or yellowish cast.

§ 51.1382 *Excessively small.* "Excessively small" means that the pod is so short that there is space for only two peas which are at least fairly well developed.

§ 51.1383 *Badly misshapen.* "Badly misshapen" means that the pod is badly constricted, crooked, or badly twisted.

§ 51.1384 *Fairly well filled.* "Fairly well filled" means that more than one-half of the pod contains peas which are at least fairly well developed.

§ 51.1385 *Well filled.* "Well filled" means that more than two-thirds of the pod contains peas which are at least fairly well developed.

§ 51.1386 *Damage.* "Damage" means any injury or defect which materially affects the appearance, edible or shipping quality.

§ 51.1387 *Serious damage.* "Serious damage" means any injury or defect which seriously affects the appearance, edible or shipping quality. Badly misshapen pods or pods seriously affected with downy mildew injury shall be considered as being seriously damaged.

SUBPART—UNITED STATES STANDARDS FOR PECANS IN THE SHELL

GENERAL

§ 51.1400 *General.* The pecan grading chart [1] to which reference is made

[1] The pecan grading chart was filed with these United States Standards for Pecans in the Shell and it is available for inspection in the Federal Register Division. Copies may be obtained upon request from the Fruit and Vegetable Branch, Production and Marketing Administration, United States Department of Agriculture, South Building, Washington 25, D. C.

in §§ 51.1408 and 51.1414 is the pecan grading chart which was issued in 1942 by the United States Department of Agriculture.

GRADES

§ 51.1401 *U. S. No. 1.* U. S. No. 1 consists of pecans in the shell which shells are fairly uniform in color, fairly well shaped and which are free from damage caused by stains or adhering hulls, split or broken shells, loose hulls or other foreign material or other means. The kernels shall be well cured, free from rancidity, mold, decay, insect injury, and from damage caused by shriveling, leanness, hollowness, discoloration, or other means. (See § 51.1404.)

(a) In order to allow for variations incident to proper grading and handling, the following tolerances shall be permitted:

(1) For external defects not more than 10 percent, by count, for pecans which fail to meet the requirements of the grade: *Provided*, That not more than three-tenths of this amount, or 3 percent, shall be allowed for pecans which are seriously damaged by stains or adhering hulls, or by split, broken or punctured shells.

(2) For internal defects (defects of the kernel) not more than 15 percent, by count, for pecans which fail to meet the requirements of the grade: *Provided*, That not more than two-fifths of this amount, or 6 percent, shall be allowed for kernels which are not well cured, rancid, moldy, decayed, injured by insects, or seriously damaged by shriveling, leanness, discoloration or other means.

§ 51.1402 *U. S. Commercial.* U. S. Commercial consists of pecans in the shell which shells are free from serious damage caused by stains or adhering hulls, split, broken or punctured shells, loose hulls or other foreign material or other means. At least 65 percent, by count, of the pecans in any lot shall have kernels which meet the requirements of U. S. No. 1 grade; and the remainder shall have kernels which are well cured, free from rancidity, mold, decay, insect injury, and from serious damage caused by shriveling, leanness, discoloration or other means. (See § 51.1404.)

(a) In order to allow for variations incident to proper grading and handling, the following tolerances shall be permitted:

(1) For external defects not more than 10 percent, by count, for pecans which fail to meet the requirements of the grade.

(2) For internal defects (defects of the kernel) not more than 15 percent, by count, for pecans which fail to meet the requirements of the grade: *Provided*, That not more than two-thirds of this amount, or 10 percent, shall be allowed for kernels which are very seriously damaged. No part of any tolerance shall be allowed to reduce for the lot the percentage of U. S. No. 1 kernels required in this grade.

UNCLASSIFIED

§ 51.1403 *Unclassified.* Unclassified consists of pecans in the shell which have not been classified in accordance with either of the foregoing grades. The term "unclassified" is not a grade within the meaning of these standards but is provided as a designation to show that no definite grade has been applied to the lot.

SIZE

§ 51.1404 *Size.* The size of pecans may be designated on the basis of the following table:

| Size designation | Number of nuts per pound | The 10 smallest nuts in a representative 100-nut sample must weigh at least:[1] | |
|---|---|---|---|
| | | Ounces | Equivalent in grams |
| Oversize | Not more than 52 | 2.50 | 71 |
| Extra large | Not more than 60 | 2.27 | 64 |
| Large | 61 to 73 | 1.75 | 50 |
| Medium | 74 to 90 | 1.50 | 43 |
| Small | 91 to 115 | 1.25 | 36 |

[1] When the sample for inspection consists of more than 100 nuts, the 10 percent, by count, which are smallest will be segregated and weighed. For example, if the sample consists of 200 nuts, as will generally be the case when a carload is being inspected, the 20 smallest nuts must weigh at least three times the amount shown for any size designation. In selecting the smallest nuts, those which are by observation the smallest in appearance are segregated. In doubtful cases which is the smallest among two or more nuts which appear to be about equal in size, the lightest in weight shall be used.

(a) In addition to having the requisite count per pound for any size designation shown in this table, the lot must comply with the restrictions as to the smallest nuts as indicated. No tolerance shall be allowed.

(b) In lieu of the size designations in the table in this section, the size of pecans in any lot may be described in accordance with the maximum number per pound or the range in number per pound without restrictions as to the smallest nuts in the lot. When this method of size specification is used, no tolerance shall be allowed. The size may also be described as an exact number per pound as 65, 80, etc. When this method is used, the actual number per pound may not vary by more than 12 percent from the specified number.

(c) The size may also be described in terms of the diameter of the smallest nuts, or range in diameters of the nuts in a lot stated in sixteenths of an inch. When so specified, not more than 12 percent, by count, of the pecans in any lot may be below the minimum diameter specified and not more than 12 percent may be above the maximum diameter specified.

APPLICATION OF TOLERANCES

§ 51.1405 *Application of tolerances.* The tolerances for these grades are on a lot basis and a composite sample customarily is taken for inspection purposes. However, any container or group of containers in which the pecans are found to be materially inferior to those in the majority of the containers shall be considered as a separate lot.

DEFINITIONS

§ 51.1406 *Fairly uniform in color.* "Fairly uniform in color" means that the shells do not show sufficient variation in color to materially detract from the general appearance of the lot. Natural markings (usually in dark streaks and heaviest near the ends) shall not be considered as detracting from the appearance of the lot.

§ 51.1407 *Fairly well shaped.* "Fairly well shaped" means that the pecan is not crescent-shaped nor otherwise materially misshapen.

§ 51.1408 *Damage.* "Damage" means any defect which materially affects the appearance, or the edible or shipping quality. Any one of the following defects, or any combination thereof, the seriousness of which exceeds the maximum allowed for any one defect, shall be considered as damage:

(a) Stains or adhering hulls, when stains of dark color or adhering hulls, caused by shuck worms or other means, affect an aggregate area of more than 5 percent of the surface of the shell.

(b) Split or broken shells, when the parts of the shell spread upon application of slight pressure near the split or crack.

(c) Shriveling, when materially affecting more than 5 percent of the kernel including both halves. The shriveling may be on one or both halves. In judging the percentage affected by shriveling the flat or inner sides of the kernel are disregarded. The maximum percentage of shriveling (5 percent including both halves) on two half-kernels not considered damaged is illustrated in the upper left hand corner of the pecan grading chart.

(d) Leanness, when either half of the kernel has more than a moderately lean or undeveloped appearance. A half-kernel and cross-section showing moderately lean or undeveloped appearance not considered damaged is illustrated in the center of the upper row of the pecan grading chart.

(e) Hollowness, when a cross section of either half of the kernel shows more than a moderate hollowness, or the half-kernel is not fairly firm and "meaty." A half-kernel and cross-section showing moderate hollowness not considered damaged is illustrated in the upper right hand corner of the pecan grading chart.

(f) Discoloration. (1) When either half of the kernel is darker than indicated for undamaged half-kernels in the lower left-hand corner of the pecan grading chart. The inner or flat side of the half-kernel is disregarded in judging color. Natural markings, including dark lines, specks or mottling shall not be considered as damage if the ground color is not too dark according to the chart.

(2) When more than one dark kernel spot is present on either half of the kernel, or one such spot when more than one-eighth inch in greatest dimension.

(3) When there is brownish or grayish material from the inside of the shell adhering to more than one-fourth of the surface, including both halves, which was adjacent to the shell.

(4) When there is reddish or brownish dust, from the inside of the shell, present in sufficient quantity to materially affect the appearance, or the edible quality.

(5) Discoloration which is readily noticeable in the interior of the kernel when it is broken.

§ 51.1409 *Well cured.* "Well cured" means that the kernel separates freely from the shell and from the corky partitions inside the shell, breaks at a definite point without splintering, shattering, or tearing the meat or loosening the skin, and appears to be in good shipping and storage condition as to moisture content.

§ 51.1410 *Rancidity.* "Rancidity" means that the kernel is distinctly rancid to the taste.

§ 51.1411 *Mold.* "Mold" means any mold growth which noticeably affects the exterior or interior of the kernel.

§ 51.1412 *Decay.* "Decay" means that the kernel is putrid or decomposed.

§ 51.1413 *Insect injury.* "Insect injury" means that the insect, web, or frass is present, or that the kernel shows other noticeable evidence of insect injury.

§ 51.1414 *Serious damage.* "Serious damage" means any defect which seriously affects the appearance, or the edible or shipping quality. Any one of the following defects, or any combination thereof, the seriousness of which exceeds the maximum allowed for any one defect, shall be considered as serious damage:

(a) Stains or adhering hulls, when stains of dark color or adhering hulls, caused by shuck worms or other means, affect an aggregate area of more than 10 percent of the surface of the shell.

(b) Split, broken, or punctured shells, when a fragment of the shell is broken off, when the kernel is plainly visible through a punctured, split, or cracked shell without the application of any pressure, or when a worm hole penetrates the shell wall.

(c) Shriveling, when materially affecting more than one-third of the kernel including both halves. In judging the percentage affected by shriveling the flat or inner sides of the kernel are disregarded. The maximum percentage of shriveling (one-third of the kernel including both halves) not considered seriously damaged is illustrated in the left side of the middle row of the pecan grading chart.

(d) Leanness, when either half of the kernel has a more lean or undeveloped appearance than shown on the right side of the middle row of the pecan grading chart.

(e) Discoloration. (1) When the color of either half of the kernel is as dark in color, or darker, than indicated as seriously damaged on the kernel in the center of the lower row of the pecan grading chart. The inner or flat side of the half-kernel is disregarded in judging color.

(2) When there are more than three dark kernel spots on either half of the kernel, or when such spots affect an aggregate area of more than 10 percent of the surface of the half-kernel which was adjacent to the shell.

(3) When there is brownish or grayish material from the inside of the shell adhering to more than one-half of the surface, including both halves, which was adjacent to the shell.

(4) When the interior of the kernel is so discolored that it is unacceptable as food.

§ 51.1415 *Very serious damage.* "Very serious damage" means any defect which very seriously affects the appearance, or the edible or shipping quality. Any one of the following defects shall be considered as very serious damage:

(a) Kernels which are distinctly rancid to the taste.

(b) Kernels which are noticeably affected by mold on the exterior or interior.

(c) Kernels which are decayed (putrid or decomposed).

(d) Kernels with insects, web, or frass present, or which show other noticeable evidence of insect injury.

(e) Kernels which are so shriveled that they have virtually no food value.

§ 51.1416 *Diameter.* "Diameter" means the smallest dimension at right angles to the longitudinal axis taken at the point of greatest circumference. The diameter shall be determined by passing, or attempting to pass, the pecan through slotted openings of sufficient length to permit the pecan to pass through in a lengthwise position.

SUBPART—UNITED STATES STANDARDS FOR SHELLED PECANS

GENERAL

§ 51.1430 *General.* The pecan grading chart to which reference is made in §§ 51.1442, 51.1450, 51.1453 is the pecan grading chart issued in 1952 by the United States Department of Agriculture. Such pecan grading chart is annexed hereto and made a part hereof.[1]

GRADES

§ 51.1431 *U. S. No. 1 Halves.* U. S. No. 1 Halves consists of pecan half-kernels which are well dried and clean, and which are free from pieces of shell and center wall, foreign material, chipped halves, broken kernels, particles and dust, noticeable shriveling, rancidity, mold, decay, and insect injury, and are free from damage caused by leanness, hollowness, discoloration, or other means. The pecan halves in any lot shall be fairly uniform in size and fairly uniform in color. (See § 51.1436.)

(a) *Tolerances.* In order to allow for variations incident to proper grading and handling, the following tolerances shall be permitted:

(1) One-fifth of 1 percent (0.20 percent), by weight, for pieces of shell, center wall and foreign material: *Provided*, That not more than one-fourth of this amount, or one-twentieth of 1 percent (0.05 percent), shall be allowed for pieces of shell and foreign material;

(2) 20 percent, by weight, for chipped halves;

(3) 12 percent, by weight, for broken kernels and particles and dust: *Provided*, That not more than one-fourth of this amount, or 3 percent, shall be allowed for broken kernels which are less than one-half of a complete half-kernel, including not more than one-half of 1 percent for particles and dust; and,

(4) 7 percent, by weight, for portions of kernels which fail to meet the remaining requirements of this grade, including therein not more than 4 percent for damage caused by internal discoloration and not more than 1 percent for rancidity, mold, decay, insect injury, or serious damage caused by shriveling, leanness, external discoloration, internal discoloration, or other means.

§ 51.1432 *U. S. Commercial Halves.* U. S. Commercial Halves consists of pecan half-kernels which are well dried and clean, and which are free from pieces of shell and center wall, foreign material, broken kernels, particles and dust, rancidity, mold, decay, and insect injury, and are free from serious damage caused by shriveling, leanness, external discoloration, internal discoloration, or other means. (See § 51.1436.)

(a) *Tolerances.* In order to allow for variations incident to proper grading and handling, the following tolerances shall be permitted:

(1) One-fifth of 1 percent (0.20 percent), by weight, for pieces of shell, center wall and foreign material: *Provided*, That not more than one-fourth of this amount, or one-twentieth of 1 percent (0.05 percent), shall be allowed for pieces of shell and foreign material;

(2) 15 percent, by weight, for broken kernels and particles and dust: *Provided*, That not more than one-third of this amount, or 5 percent, shall be allowed for broken kernels which are less than one-half of a complete half-kernel, including not more than one-half of 1 percent for particles and dust; and,

(3) 10 percent, by weight, for portions of kernels which fail to meet the remaining requirements of this grade, including therein not more than 3 percent for rancidity, mold, decay, insect injury, serious damage caused by internal discoloration, or those that are so shriveled that they have virtually no food value.

§ 51.1433 *U. S. No. 1 Pieces.* U. S. No. 1 Pieces consists of portions of pecan kernels which are well dried and clean, and which are free from pieces of shell and center wall, foreign material, noticeable shriveling, rancidity, mold, decay, and insect injury, and are free from damage caused by leanness, hollowness, discoloration, or other means. There are no restrictions in this grade in regard to the proportion of pecan halves which may be included in a lot designated as "Pieces" except that the halves shall meet the size requirements specified for the pieces. Unless a larger minimum size is specified, the minimum diameter of pieces specified in connection with this grade shall be two-sixteenths inch. (See § 51.1437.)

(a) *Tolerances.* In order to allow for variations incident to proper grading and handling, the following tolerances shall be permitted:

(1) One-tenth of 1 percent (0.10 percent), by weight, for pieces of shell and center wall, and foreign material; and,

[1] The pecan grading chart was filed with these United States Standards for Shelled Pecans and it is available for inspection in the Division of the Federal Register. Copies may be obtained upon request from the Fruit and Vegetable Branch, Production and Marketing Administration, United States Department of Agriculture, South Building, Washington 25, D. C.

(2) 7 percent, by weight, for portions of kernels which fail to meet the remaining requirements of this grade, including therein not more than 4 percent for damage caused by internal discoloration and not more than 1 percent for rancidity, mold, decay, insect injury, or serious damage caused by shriveling, external discoloration, internal discoloration, or other means.

§ 51.1434 *U. S. Commercial Pieces.* U. S. Commercial Pieces consists of portions of pecan kernels which are well dried and clean, and which are free from pieces of shell and center wall, foreign material, rancidity, mold, decay, insect injury, and are free from serious damage caused by shriveling, leanness, external discoloration, internal discoloration, or other means. There are no restrictions in this grade in regard to the proportion of pecan halves which may be included in a lot designated as "Pieces" except that the halves shall meet the size requirements specified for the pieces. Unless a larger minimum size is specified, the minimum diameter of pieces specified in connection with this grade shall be two-sixteenths inch. (See § 51.1437.)

(a) *Tolerances.* In order to allow for variations incident to proper grading and handling, the following tolerances shall be permitted:

(1) One-tenth of 1 percent (0.10 percent), by weight, for pieces of shell and center wall, and foreign material; and,

(2) 10 percent, by weight, for portions of kernels which fail to meet the remaining requirements of this grade, including therein not more than 3 percent for rancidity, mold, decay, insect injury, serious damage caused by internal discoloration, or those that are so shriveled that they have virtually no food value.

UNCLASSIFIED

§ 51.1435 *Unclassified.* Unclassified consists of shelled pecans which have not been classified in accordance with any of the foregoing grades. The term "unclassified" is not a grade within the meaning of these standards but is provided as a designation to show that no definite grade has been applied to the lot.

SIZE

§ 51.1436 *Size requirements for halves.* The size of pecan halves may be specified in accordance with the size designations shown in Table I:

TABLE I

| Size designation | Number of halves per pound [1] |
|---|---|
| Mammoth | 200–250 |
| Junior Mammoth | 251–300 |
| Jumbo | 301–350 |
| Extra Large | 351–450 |
| Large | 451–550 |
| Medium | 551–650 |
| Topper | 651–750 |
| Large Amber [2] | 700 or less |
| Regular Amber [2] | More than 400 |

[1] The number of halves per pound shall be determined on the basis of the weight of the pecan halves after the broken kernels, particles and dust, and foreign material have been removed.

[2] This designation is provided for use only in connection with the U. S. Commercial Grade.

(a) In lieu of the size designations specified in Table I, the size of pecan halves may be specified in terms of the number of halves per pound, as, for example, "400", or a range may be stated, as, for example, "600–700".

(b) Tolerance for counts per pound. In order to allow for variations incident to proper sizing, the following tolerance shall be permitted:

(1) When an exact number of halves per pound is specified, as, for example, "400", the actual number may vary from the specified number by not more than 5 percent.

(2) When the size designation shown in Table I are used to specify size, or when a range is specified, as, for example, "600–700", no tolerance for counts above or below those specified shall be allowed.

§ 51.1437 *Size requirements for pieces.* The size of pecan pieces may be specified in accordance with the size designations shown in Table II:

TABLE II

| Size designations | Maximum diameter (will pass through a sieve with round openings of the following diameters) | Minimum diameter (will not pass through a sieve with round openings of the following diameters) |
|---|---|---|
| | *Inch* | *Inch* |
| Extra Large | | 5/16 |
| Large | 9/16 | 5/16 |
| Medium | 5/16 | 4/16 |
| Small | 4/16 | 3/16 |
| Midget | 3/16 | 2/16 |
| Regular Amber [1] | | 4/16 |
| Small Amber [1] | 4/16 | 3/16 |

[1] This designation is provided for use only in connection with the U. S. Commercial Grade.

(a) In lieu of the size designations in Table II, the size of pieces may be specified in terms of minimum diameter, or as a range in terms of minimum and maximum diameters, expressed in sixteenths of an inch.

(b) Tolerances for size of pieces. In order to allow for variations incident to proper sizing, the following tolerances shall be permitted:

(1) When the size designations "Extra Large", "Large", "Medium", "Small" and "Regular Amber" are used to specify size, not more than 15 percent, by weight, of the pieces may fail to meet the size requirements specified in Table II, including therein not more than 2 percent for pieces which are less than two-sixteenths inch in diameter;

(2) When the size designations "Midget" or "Small Amber" are used to specify size, not more than 15 percent, by weight, of the pieces may fail to meet the size requirements specified in Table II, including therein not more than 5 percent for pieces which are less than two-sixteenths inch in diameter; and,

(3) When minimum diameters or ranges of diameters, other than those shown in Table II, are used to specify size, not more than 15 percent, by weight, of the pieces may fail to meet the size specified, including therein not more than 2 percent for pieces which are less than two-sixteenths inch in diameter: *Provided*, That when a minimum diameter of two-sixteenths inch is specified, not more than 5 percent of the pieces may be less than two-sixteenths inch in diameter.

APPLICATION OF TOLERANCES

§ 51.1438 *Application of tolerances.* The tolerances in these standards are on a lot basis, and a composite sample should be taken for inspection purposes. However, any container or group of containers, in which the pecans are found to be materially inferior to those in the majority of the containers, shall be considered a separate lot.

DEFINITIONS

§ 51.1439 *Well dried.* "Well dried" means that the portion of kernel is firm and crisp, not pliable or leathery.

§ 51.1440 *Clean.* "Clean" means that the appearance of the individual portion of kernel, or of the lot as a whole is not materially affected by adhering dust or dirt.

§ 51.1441 *Pieces of shell and center wall.* "Pieces of shell and center wall" means pieces of pecan shell, center wall and any other part of the pecan except the kernel. "Shell" means the hard outer covering of the nut exclusive of the softer, corky or papery material which occurs between the halves and within the grooves of the kernel.

§ 51.1442 *Chipped half.* "Chipped half" means a pecan half-kernel which shows more than slight chipping or skinning of the outer, curved surface or the edge, but which does not have more than one-eighth of the original half-kernel missing. The presence or absence of the portion joining both halves of the complete kernel should be disregarded. Two chipped halves, each of which has one-eighth chipped or broken off, are illustrated in the lower right-hand corner of the pecan grading chart referred to in § 51.1430.

§ 51.1443 *Broken kernels.* "Broken kernels" means portions of half-kernels each of which is less than seven-eighths of a complete half-kernel, but which will not pass through a round opening two-sixteenths inch in diameter.

§ 51.1444 *Particles and dust.* "Particles and dust" means fragments of kernels which will pass through a round opening two-sixteenths inch in diameter.

§ 51.1445 *Noticeable shriveling.* "Noticeable shriveling" means any shriveling which more than slightly affects the appearance of the individual portion of kernel. (Shriveling affecting the flat or inner side of the half-kernel shall be disregarded.)

§ 51.1446 *Rancidity.* "Rancidity" means that the portion of kernel is distinctly rancid to the taste.

§ 51.1447 *Mold.* "Mold" means any mold growth which noticeably affects the exterior or interior of the portion of kernel.

§ 51.1448 *Decay.* "Decay" means that the portion of kernel is putrid or decomposed.

§ 51.1449 *Insect injury.* "Insect injury" means that the insect, web, or frass is present or that the portion of kernel shows other noticeable evidence of insect injury.

§ 51.1450 *Damage.* "Damage" means any defect which materially affects the appearance, or the edible or shipping quality of the portion of kernel. Any one of the following defects, or any combination of defects, the seriousness of which exceeds the maximum allowed for any one defect, shall be considered as damage:

(a) Leanness, when a portion of kernel has more than a moderately lean or undeveloped appearance. A half-kernel and cross-section showing moderately lean or undeveloped appearance not considered damaged are illustrated in the center of the upper row of the pecan grading chart referred to in § 51.1430;

(b) Hollowness, when a cross-section of the portion of kernel shows more than a moderate hollowness, or the portion of kernel is not fairly firm and meaty. A half-kernel and cross-section showing moderate hollowness not considered damaged are illustrated in the upper right-hand corner of the pecan grading chart referred to in § 51.1430; and,

(c) Discoloration, when in excess of the maximum permitted for any of the following types (external discoloration affecting the flat or inner side of the half-kernel shall be disregarded):

(1) When the portion of kernel is darker than indicated for undamaged half-kernels in the lower left-hand corner of the pecan grading chart referred to in § 51.1430. Natural markings, including dark lines, specks, or mottling, shall not be considered as damage if the ground color is not too dark according to the chart;

(2) When there is more than one dark kernel spot on a portion of the kernel, or when any spot is more than one-eighth inch in greatest dimension;

(3) When there is brownish or grayish material from the inside of the shell adhering to more than 5 percent of the surface; and,

(4) When internal discoloration is readily noticeable.

§ 51.1451 *Fairly uniform in size.* "Fairly uniform in size" means that in a representative sample of 100 halves, from which broken kernels and particles and dust have been removed, the weight of the 10 largest halves shall not be greater than twice the weight of the 10 smallest halves.

§ 51.1452 *Fairly uniform in color.* "Fairly uniform in color" means that the variation in color of the pecan halves in a lot shall not be sufficient to materially detract from the appearance of the lot.

§ 51.1453 *Serious damage.* "Serious damage" means any defect which seriously affects the appearance, or the edible or shipping quality of the portion of kernel. Any one of the following defects, or any combination of defects, the seriousness of which exceeds the maximum allowed for any one defect, shall be considered as serious damage:

(a) Shriveling, when materially affecting more than one-third of the portion of kernel. The maximum percentage of shriveling (one-third of the half-kernel) not considered seriously damaged is illustrated in the left side of the middle row of the pecan grading chart, referred to in § 51.1430. (Shriveling affecting the flat or inner side of the half-kernel shall be disregarded);

(b) Leanness, when a portion of kernel has a more lean or undeveloped appearance than shown on the right side of the middle row of the pecan grading chart referred to in § 51.1430;

(c) External discoloration, when in excess of the maximum permitted for any of the following types (external discoloration affecting the flat or inner side of the half-kernel shall be disregarded):

(1) When the portion of kernel is as dark in color, or darker, than indicated as seriously damaged on the kernel in the center of the lower row of the pecan grading chart referred to in § 51.1430;

(2) When there are more than three dark kernel spots on a portion of kernel, or when such spots affect an aggregate area of more than 10 percent of the surface of the half-kernel or piece of kernel;

(3) When there is brownish or grayish material from the inside of the shell adhering to more than one-fourth of the surface; and,

(d) Internal discoloration, when dark discoloration extends more than one-third the length of the center ridge of the portion of kernel or more than one-third the length of a piece of kernel which is detached from the center ridge.

SUBPART—UNITED STATES STANDARDS FOR SWEET PEPPERS FOR PROCESSING

GRADES

§ 51.1465 *U. S. No. 1.* U. S. No. 1 shall consist of sweet peppers of one variety or similar varietal characteristics, which are fairly firm, fairly well shaped, well colored, free from mold, soft rot, worm holes, or other holes which penetrate through the wall of the pepper, except small, fresh holes or splits incident to proper handling. The peppers shall also be free from damage by any other cause.

§ 51.1466 *U. S. No. 2.* U. S. No. 2 shall consist of sweet peppers of one variety or similar varietal characteristics which are fairly well colored and free from serious damage by any cause.

CULLS

§ 51.1467 *Culls.* Sweet peppers which fail to meet the requirements of either of the foregoing grades shall be designated as culls.

SIZE

§ 51.1468 *Size.* There are no size requirements specified for the various grades. However, the minimum size may be fixed by agreement between buyer and seller and may be expressed in terms of diameter in whole inches, or in whole inches and fractions thereof.

DEFINITIONS

§ 51.1469 *Fairly firm.* "Fairly firm" means that the pepper is not soft, limp or excessively shriveled.

§ 51.1470 *Fairly well-shaped.* "Fairly well-shaped" means that the pepper is not of the type commonly known as "button" or is not decidedly crooked, constricted, or otherwise seriously deformed.

§ 51.1471 *Well colored.* "Well colored" means that at least 90 percent of the surface of the pepper has a characteristic medium or dark red color, and that green color does not predominate on the remainder of the surface of the pepper.

§ 51.1472 *Damage.* "Damage" means any injury or defect which materially affects the processing or edible quality of the pepper, or which cannot be removed in the ordinary process of trimming without a loss of more than 5 percent, by weight, of the pepper in excess of that which would occur if the pepper were perfect.

§ 51.1473 *Diameter.* "Diameter" means the greatest dimension of the pepper measured at right angles to a line running from the stem to the apex.

§ 51.1474 *Fairly well-colored.* "Fairly well-colored" means that at least three-fourths of the surface of the pepper has a characteristic medium or dark red color.

§ 51.1475 *Serious damage.* "Serious damage" means any injury or defect which seriously affects the processing or edible quality of the pepper, or which cannot be removed in the ordinary process of trimming without a loss of more than 20 percent, by weight, of the pepper in excess of that which would occur if the pepper were perfect.

SUBPART—UNITED STATES STANDARDS FOR PINEAPPLES

GRADES

§ 51.1485 *U. S. Fancy.* U. S. Fancy consists of pineapples of similar varietal characteristics, which are mature, firm, dry and well formed, which have well developed eyes, and which are free from decay and sunscald, and free from injury caused by bruising, sunburn, and gummosis, and free from damage caused by disease, insects, rodents or mechanical or other means. The butts shall be well trimmed, well cured, and free from damage caused by cracks. The tops shall be of characteristic color, single, straight, well attached to the fruit and free from crown slips. The length of the tops shall be not less than 5 inches nor more than 1½ times the length of the fruit. (See § 51.1490.)

(a) In order to allow for variations incident to proper grading and handling, other than for size and marking, not more than a total of 10 percent, by count, of the pineapples in any lot may fail to meet the requirements of the grade: *Provided*, That not more than one-half of this amount, or 5 percent, shall be allowed for pineapples which are seriously damaged, including therein not more than 1 percent for pineapples affected by decay.

§ 51.1486 *U. S. No. 1.* U. S. No. 1 consists of pineapples of similar varietal characteristics, which are mature, firm, dry and well formed, which have well developed eyes, and which are free from

decay and sunscald, and free from damage caused by bruising, sunburn, gummosis, disease, insects, rodents or mechanical or other means. The butts shall be well trimmed, fairly well cured and shall not be badly cracked. The tops shall be of characteristic color, single, reasonably straight, well attached to the fruit, and shall have not more than 5 crown slips, not more than 2 of which may be more than 2¾ inches in length. The length of the tops shall be not less than 4 inches nor more than twice the length of the fruit. (See § 51.1490.)

(a) In order to allow for variations incident to proper grading and handling, other than for size and marking, not more than a total of 10 percent, by count, of the pineapples in any lot may fail to meet the requirements of the grade: *Provided*, That not more than one-half of this amount, or 5 percent, shall be allowed for pineapples which are seriously damaged, including therein not more than 1 percent for pineapples affected by decay.

§ 51.1487 *U. S No. 2.* U. S. No. 2 consists of pineapples of similar varietal characteristics, which are mature, firm and fairly well formed, which have fairly well developed eyes, and which are free from decay and sunscald, and free from serious damage caused by bruising, sunburn, gummosis, disease, insects, rodents or mechanical or other means. The butts shall be fairly well cured. The tops shall be of characteristic color, well attached to the fruit, not completely curved over and shall consist of not more than 2 fairly well developed stems but may have any number of crown slips. (See § 51.1490.)

(a) In order to allow for variations incident to proper grading and handling, other than for size and marking, not more than a total of 10 percent, by count, of the pineapples in any lot may fail to meet the requirements of the grade: *Provided*, That not more than one-tenth of this amount, or 1 percent, shall be allowed for pineapples affected by decay.

UNCLASSIFIED

§ 51.1488 *Unclassified.* Unclassified consists of pineapples which have not been classified in accordance with any of the foregoing grades. The term "unclassified" is not a grade within the meaning of these standards but is provided as a designation to show that no definite grade has been applied to the lot.

APPLICATION OF TOLERANCES

§ 51.1489 *Application of tolerances.* (a) The contents of individual packages in the lot, based on sample inspection, are subject to the following limitations: *Provided*, That the averages for the entire lot are within the tolerances specified for the grade.

(1) For a tolerance of 10 percent or more, individual packages in any lot may contain not more than one and one-half times the tolerance specified.

(2) For a tolerance of less than 10 percent, individual packages in any lot may contain not more than double the tolerance specified, except that at least one decayed or otherwise defective fruit may be permitted in any package.

SIZE AND MARKING REQUIREMENTS

§ 51.1490 *Size and marking requirements.* (a) The pineapples in each container shall be fairly uniform in size and the count shall be plainly stamped, stenciled or otherwise marked on the container.

(b) In order to allow for variations incident to proper packing not more than 5 percent of the packages in any lot may fail to meet the requirements pertaining to size and marking.

DEFINITIONS

§ 51.1491 *Similar varietal characteristics.* "Similar varietal characteristics" means that the pineapples in any lot are similar in type and character of growth.

§ 51.1492 *Mature.* "Mature" means that the pineapple has reached the stage of development which will insure a proper completion of the ripening process.

§ 51.1493 *Firm.* "Firm" means that the fruit does not yield to slight pressure.

§ 51.1494 *Dry.* "Dry" means that the surface of the fruit is free from moisture other than that resulting from condensation.

§ 51.1495 *Well-formed.* "Well-formed" means that the fruit shows good shoulder development and is not lop-sided or distinctly pointed, and that the sides are not noticeably flattened.

§ 51.1496 *Well-developed eyes.* "Well-developed eyes" means eyes which have developed normally.

§ 51.1497 *Injury.* "Injury" means any defect which more than slightly affects the appearance or the edible or shipping quality of the fruit. Sunburn which will not more than slightly affect the appearance of the fruit when ripe, or gummosis which is very slight shall not be considered as injury.

§ 51.1498 *Damage.* "Damage" means any defect which materially affects the appearance, or the edible or shipping quality of the fruit. Sunburn which will not materially affect the appearance of the fruit when ripe, or gummosis which is slight or does not materially discolor the eyes shall not be considered as damage.

§ 51.1499 *Well-trimmed.* "Well-trimmed" means that the bracts on the stem next to the base of the fruit have been removed and the stem has been cut off so that the fruit will stand straight when placed butt end down on a flat surface.

§ 51.1500 *Well cured.* "Well cured" means that the cut portion of the butt has completely calloused over.

§ 51.1501 *Characteristic color.* "Characteristic color" means that at shipping points the tops are of good green color characteristic of well-grown pineapples, and in the receiving markets, are fairly good green color and relatively free from dryness and discoloration.

§ 51.1502 *Single top.* "Single top" means that the fruit does not have more than one prominent main stem at the crown of the fruit.

§ 51.1503 *Crown slips.* "Crown slips" means the small, secondary top growths at the crown of the fruit.

§ 51.1504 *Fairly well-cured.* "Fairly well-cured" means that the cut portion of the butt is free from bleeding.

§ 51.1505 *Fairly well-formed.* "Fairly well-formed" means that the fruit is not excessively lopsided or excessively flattened at the shoulders or sides.

§ 51.1506 *Fairly well-developed eyes.* "Fairly well-developed eyes" means eyes which show fairly normal development and are not badly misshapen.

§ 51.1507 *Serious damage.* "Serious damage" means any defect which seriously affects the appearance, or the edible or shipping quality of the fruit.

§ 51.1508 *Fairly uniform in size.* "Fairly uniform in size" means that for counts 18 or less in standard southwestern pineapple crates, the pineapples do not vary more than $\frac{5}{8}$ inch in diameter, and for counts over 18 in number the pineapples do not vary more than $\frac{1}{2}$ inch in diameter. Diameter shall be the greatest dimension measured at right angles to a line from top to butt.

SUBPART—UNITED STATES STANDARDS FOR PLUMS AND PRUNES (FRESH)

GRADES

§ 51.1520 *U. S. Fancy.* "U. S. Fancy" shall consist of plums or prunes of one variety which are well formed, mature but not overripe or soft or shriveled, and which are free from decay, sunscald, heat injury, sunburn, split pits and hail marks; and free from damage caused by broken skins, growth cracks, drought spots, gum spots, russeting, scars, dirt or other foreign material, disease, insects or mechanical or other means. Italian type prunes shall be well colored and, unless otherwise specified, the minimum size of such prunes shall be not less than $1\frac{1}{8}$ inches in diameter.

(a) In order to allow for variations incident to proper grading and packing, not more than a total of 10 percent, by count, of the fruit in any lot may fail to meet the requirements of this grade for defects other than color and size of Italian type prunes, but not more than 5 percent, by count, may be allowed for defects causing serious damage and not more than one-fifth of the latter amount, or 1 percent, may be allowed for decay. In addition, not more than 10 percent, by count, of the Italian type prunes in any lot may fail to meet the color requirements, and not more than 10 percent, by count, may fail to meet the size specification, but the combined tolerances for size, color and other defects shall not exceed 15 percent. (See § 51.1525.)

§ 51.1521 *U. S. No. 1.* "U. S. No. 1" shall consist of plums and prunes of one variety which are well formed, mature but not overripe or soft or shriveled and which are free from decay and sunscald, and from damage caused by broken skins, heat injury, growth cracks, sunburn, split pits, hail marks, drought spots, gum spots, russeting, scars, dirt or other foreign material, disease, insects or mechanical or other means. Italian type prunes shall be fairly well colored, and unless otherwise specified, the minimum size of such prunes shall be not less than $1\frac{1}{8}$ inches in diameter.

(a) In order to allow for variations incident to proper grading and packing, not more than a total of 10 percent, by count, of the fruit in any lot may fail to meet the requirements of this grade for defects other than color and size of Italian type prunes, but not more than 5 percent, by count, may be allowed for defects causing serious damage, and not more than one-fifth of the latter amount, or 1 percent, may be allowed for decay. In addition, not more than 10 percent, by count, of the Italian type prunes in any lot may fail to meet the color requirements, and not more than 10 percent, by count, may fail to meet the size specification, but the combined tolerance for size, color and other defects shall not exceed 15 percent. (See § 51.1525.)

§ 51.1522 *U. S. No. 2.* "U. S. No. 2" shall consist of plums or prunes of one variety which are not badly misshapen, and which are mature but not overripe or soft or shriveled; and which are free from decay, sunscald, and from serious damage caused by broken skins, heat injury, growth cracks, sunburn, split pits, hail marks, drought spots, gum spots, russeting, scars, dirt or other foreign material, disease, insects or mechanical or other means.

(a) There are no requirements in this grade for color or size.

(b) In order to allow for variations incident to proper grading and packing, not more than a total of 10 percent, by count, of the fruit in any lot may fail to meet the requirements of this grade. Of this tolerance, not more than one-half, or a total of 5 percent, by count, may be allowed for sunscald, decay or serious damage by insects or heat injury, but not more than one-fifth of the latter amount, or 1 percent, may be allowed for decay. If a minimum size is specified, not more than 10 percent, by count, of the fruit in any lot may fail to meet the size specified. (See § 51.1525.)

§ 51.1523 *U. S. Combination.* "U. S. Combination" shall consist of a combination of U. S. No. 1 and U. S. No. 2 plums or prunes: *Provided*, That at least 75 percent, by count, meet the requirements of U. S. No. 1 grade.

(a) In order to allow for variations incident to proper grading and packing, not more than a total of 10 percent, by count, of the fruit in any lot may fail to meet the requirements of this grade. Of this tolerance, not more than one-half, or a total of 5 percent, by count, may be allowed for sunscald, decay or serious damage by insects or heat injury, but not more than one-fifth of the latter amount, or 1 percent, may be allowed for decay. No part of any tolerance shall be allowed to reduce, for the lot as a whole, the percentage of U. S. No. 1 in the combination, but individual containers may have not more than a total of 10 percent less than the percentage of U. S. No. 1 specified: *Provided*, That the entire lot averages within the percentage specified. (See § 51.1525.)

UNCLASSIFIED

§ 51.1524 *Unclassified.* Unclassified shall consist of plums or prunes which have not been classified in accordance with any of the forgoing grades. The term "unclassified" is not a grade within the meaning of these standards but is provided as a designation to show that no definite grade has been applied to the lot.

APPLICATION OF TOLERANCES

§ 51.1525 *Application of tolerances.* (a) The contents of individual containers in the lot, based on sample inspection, are subject to the following limitations: *Provided*, The averages for the entire lot are within the tolerances specified:

(1) When a tolerance is 10 percent or more, individual containers in any lot shall have not more than one and one-half times the tolerance specified, except that at least one defective and one undersized fruit may be permitted in a container.

(2) When a tolerance is less than 10 percent, individual containers in any lot shall have not more than double the tolerance specified, except that at least one defective and one undersized fruit may be permitted in a container.

STANDARD PACK

§ 51.1526 *Standard pack.* The plums or prunes shall be of fairly uniform size and tightly packed according to the approved and recognized methods. The fruits in the top layer shall not be noticeably superior in quality or size to those in the remainder of the package.

(a) The size of plums or prunes packed in 4-basket crates shall be indicated as follows: 4 x 4, 4 x 5, 5 x 5, etc. in accordance with the arrangement in the top layer of the basket. These packs shall not be more than 3 layers deep. Arrangements such as 4–3 x 5 and 5–4 x 5 shall not be considered standard packs.

(b) The arrangement of the bottom layer shall be one row less one way, and may be one row less each way than the arrangement of the top layer. The arrangement of the middle layer may be the same as the top layer, or may be one row less one way than the arrangement of the top layer. Straight, offset, and diagonal packs in the layers are permitted. For example, a pack with 5 x 5 in the top layer may have 5 x 5 in the middle layer, and shall have 4 x 5 or 4–3 x 5 in the bottom layer; or it may have 4 x 5 or 4–3 x 5 in the middle layer, and shall have 4 x 5, 4–3 x 5, or 4 x 4 in the bottom layer.

(c) In layer-packed California peach or lug boxes, the count in the entire container shall be marked on the package.

(d) In double-faced and filled special lugs the number of rows, lengthwise of the lugs, shall be marked on the package to indicate size, as "nine row."

(e) In order to allow for variations incident to proper packing, not more than 10 percent, by count, of the containers in any lot may fail to meet the requirements for the Standard Pack.

DEFINITIONS

§ 51.1527 *Well-formed.* "Well-formed" means that the fruit has the shape characteristic of the variety. Doubles shall not be considered well-formed.

§ 51.1528 *Mature.* "Mature" means that the fruit has reached the stage of maturity which will insure a proper completion of the ripening process.

§ 51.1529 *Sunscald.* "Sunscald" means injury caused by the sun in which softening or collapse of the flesh is apparent.

§ 51.1530 *Damage.* "Damage" means any injury or defect which materially affects the appearance, or edible or shipping quality of the fruit. Internal growth cracks, cavities or gum spots are not considered as damage. Any one of the following defects, or any combination of defects, the seriousness of which exceeds the maximum allowed for any one defect, shall be considered as damage.

(a) Broken skins which are unhealed; except those caused by pulled stems where the skin is not torn beyond the stem basin. (Healed skin breaks shall be handled as scars.)

(b) Heat injury which is extensive or not light in color.

(c) External growth cracks, when there are more than one on a fruit, or when any growth crack is deep, not well healed, or more than one-fourth inch in length.

(d) Sunburn which has materially changed the normal color of the fruit, or has caused the skin to blister or crack.

(e) Split pit which causes a readily apparent crack at the stem end, or which affects the shape to the extent that the fruit is not well-formed.

(f) Hail marks, or other similar depressions or scars, which are not shallow or superficial, or which aggregate more than three-eighths inch in diameter, or when the skin has been broken.

(g) Drought spots or external gum spots which are more than one-fourth of an inch in diameter.

(h) Russeting which is not excessively rough, when aggregating more than 10 percent of the fruit surface; or excessively rough russeting when aggregating more than one-fourth inch in diameter.

SUBPART—UNITED STATES STANDARDS FOR POTATOES

GENERAL

§ 51.1540 *General.* (a) All percentages shall be calculated on the basis of weight.

(b) The tolerances for the standards are on a container basis. However, individual packages in any lot may vary from the specified tolerances as stated below, provided the averages for the entire lot, based on sample inspection, are within the tolerances specified.

(c) When the tolerance specified is 10 percent or more, individual packages in any lot may contain not more than one and one-half times the tolerance specified, except that at least one defective and one off-size specimen shall be permitted in a package.

(d) When the tolerance specified is less than 10 percent, individual packages in any lot may contain not more than double the tolerance specified, except

that for frozen potatoes or those affected by soft rot or wet breakdown, not more than one-tenth of the packages may contain more than double the tolerance but not more than four times the tolerance specified, and except that at least one defective and one off-sized specimen shall be permitted in a package.

GRADES

§ 51.1541 *U. S. Fancy.* U. S. Fancy shall consist of potatoes of one variety or similar varietal characteristics which are firm, mature, bright, well shaped, not frozen; which are free from freezing injury, blackheart, late blight, southern bacterial wilt, ring rot, shriveling, sprouting, soft rot or wet breakdown, hollow heart and internal discoloration, and free from injury caused by dirt or other foreign matter, sunburn, second growth, growth cracks, air cracks, cuts, external discoloration, scab, dry rot, rhizoctonia, other disease, wireworm, other insects or mechanical or other means.

(a) The diameter of each potato shall be not less than 2 inches.

(b) For long varieties such as Burbank, Russet Burbank, Early Ohio, White Rose, or other similar varieties, not less than 40 percent of the potatoes in any lot shall be 6 ounces or more in weight.

(c) For round or intermediate shaped varieties such as Irish Cobbler, Katahdin, Bliss Triumph, Green Mountain, or other similar varieties, not less than 60 percent of the potatoes in any lot shall be 2¼ inches or larger in diameter.

(d) The size of the potatoes may be stated in terms of minimum diameter or minimum weight, or of range in diameter or weight, or of a certain percentage over a certain size, following the grade name, but in no case shall potatoes be below the sizes specified for this grade. (See § 51.1546 (f).)

(e) Tolerance for defects: In order to allow for variations other than size, incident to proper grading and handling, not more than a total of 6 percent of the potatoes in any lot may fail to meet the requirements of the grade, but not more than 3 percent shall be allowed for potatoes affected by southern bacterial wilt, ring rot, or late blight, and including not more than 1 percent for potatoes which are frozen, or affected by soft rot or wet breakdown.

§ 51.1542 *U. S. Extra No. 1.* U. S. Extra No. 1 shall consist of potatoes of one variety or similar varietal characteristics which are fairly well shaped, fairly clean, not frozen; which are free from freezing injury, blackheart, late blight, southern bacterial wilt, ring rot, and soft rot or wet breakdown, and from damage caused by sunburn, second growth, growth cracks, air cracks, hollow heart, internal discoloration, external discoloration, cuts, shriveling, sprouting, scab, dry rot, rhizoctonia, other disease, wireworm, other insects or mechanical or other means. (See § 51.1547.)

(a) Unless otherwise specified, size of potatoes (see § 51.1546) shall be as follows:

(1) The diameter of each potato shall be not less than $1\frac{7}{8}$ inches.

(2) For long varieties such as Burbank, Russet Burbank, Early Ohio, White Rose, or other similar varieties, not less than 60 percent of the potatoes in the lot shall be 6 ounces or larger, of which not less than one-half, or 30 percent, shall be 10 ounces or more in weight.

(3) For round or intermediate shaped varieties, such as Irish Cobbler, Katahdin, Bliss Triumph, Green Mountain or other similar varieties, not less than 60 percent of the potatoes in the lot shall be 2¼ inches or larger, of which not less than one-half, or 30 percent, shall be 2¾ inches, or larger in diameter.

(4) Tolerance for defects: In order to allow for variations other than size, hollow heart, and internal discoloration, incident to proper grading and handling, not more than a total of 6 percent of the potatoes in any lot may fail to meet the requirements of the grade, but not more than 3 percent shall be allowed for potatoes affected by southern bacterial wilt, ring rot, or late blight, and including not more than 1 percent for potatoes which are frozen, or affected by soft rot or wet breakdown. In addition, not more than 5 percent may be damaged by hollow heart, and internal discoloration.

§ 51.1543 *U. S. No. 1.* U. S. No. 1 shall consist of potatoes of one variety or similar varietal characteristics which are fairly well shaped, not frozen; which are free from freezing injury, blackheart, late blight, southern bacterial wilt, ring rot, and soft rot or wet breakdown, and from damage caused by dirt or other foreign matter, sunburn, second growth, growth cracks, air cracks, hollow heart, internal discoloration, external discoloration, cuts, shriveling, sprouting, scab, dry rot, rhizoctonia, other disease, wireworm, other insects or mechanical or other means. (See § 51.1547.)

(a) Unless otherwise specified the diameter of each potato shall be not less than $1\frac{7}{8}$ inches. (See § 51.1546.)

(b) Tolerance for defects: In order to allow for variations other than size, hollow heart, and internal discoloration, incident to proper grading and handling, not more than a total of 6 percent of the potatoes in any lot may fail to meet the requirements of the grade, but not more than 3 percent shall be allowed for potatoes affected by southern bacterial wilt, ring rot, or late blight, and including not more than 1 percent for potatoes which are frozen, or affected by soft rot or wet breakdown. In addition, not more than 5 percent may be damaged by hollow heart, and internal discoloration.

§ 51.1544 *U. S. Commercial.* U. S. Commercial shall consist of potatoes which meet the requirements for U. S. No. 1 grade except that they shall be free from serious damage by dirt and except for the increased tolerance for defects specified below. (See § 51.1547.)

(a) Unless otherwise specified, the diameter of each potato shall be not less than $1\frac{7}{8}$ inches. (See § 51.1546.)

(b) Tolerance for defects: In order to allow for variations other than size and sprouting, incident to proper grading and handling, not more than a total of 20 percent of the potatoes in any lot may fail to meet the requirements of the grade, but not more than 5 percent may be seriously damaged by hollow heart and internal discoloration and not more than 6 percent may fail to meet the remaining requirements of U. S. No. 2 grade, but not more than one-half of this amount, or 3 percent, shall be allowed for potatoes affected by southern bacterial wilt, ring rot, or late blight and including not more than 1 percent for potatoes which are frozen, or affected by soft rot or wet breakdown. In addition, not more than 10 percent of the potatoes may have sprouts over ¾ inch long, but which are not seriously damaged by shriveling, provided, that if all of the 20 percent tolerance is not used for other defects, the unused part of the tolerance may also be used for potatoes having sprouts over ¾ inch long but which are not seriously damaged by shriveling.

§ 51.1545 *U. S. No. 2.* U. S. No. 2 shall consist of potatoes of one variety or similar varietal characteristics which are not seriously misshapen, or frozen; which are free from freezing injury, blackheart, late blight, southern bacterial wilt, ring rot, and soft rot or wet breakdown, and from serious damage caused by dirt or other foreign matter, sunburn, second growth, growth cracks, air cracks, hollow heart, internal discoloration, external discoloration, cuts, shriveling, scab, dry rot, other disease, wireworm, other insects or mechanical or other means. (See § 51.1547.)

(a) Unless otherwise specified the diameter of each potato shall be not less than 1½ inches. (See § 51.1546.)

(b) Tolerance for defects: In order to allow for variations other than size, hollow heart, and internal discoloration, incident to proper grading and handling not more than a total of 6 percent of the potatoes in any lot may fail to meet the requirements of the grade, but not more than 3 percent shall be allowed for potatoes affected by southern bacterial wilt, ring rot, or late blight, and including not more than 1 percent for potatoes which are frozen, or affected by soft rot or wet breakdown. In addition, not more than 5 percent may be seriously damaged by hollow heart and internal discoloration.

SIZE AND SKINNING CLASSIFICATION

§ 51.1546 *Size classification for all grades except U. S. Fancy.* (a) When the potatoes are designated as "U. S. No. 1," "U. S. Commercial," or "U. S. No. 2" without specifying a size classification, it is understood that the potatoes meet the minimum size specified in the grade but that no definite percentage of the potatoes is required to be larger than this minimum size.

(b) When potatoes meet the requirements of Size A or Size B as described in paragraphs (c) and (d) of this section, the size classification may be specified in connection with any of the U. S. grades except U. S. Fancy, as: "U. S. No. 1, Size A"; "U. S. Extra No. 1, Size A"; "U. S. Commercial, Size B"; "U. S. No. 1, Size B"; "U. S. No. 2, Size A"; or "U. S. No. 2, Size B"; in accordance with the facts. When Size A or Size B is used in connection with the grade, it is not permissible to specify any smaller sizes than those specified under these designations.

(c) Size A: (1) For long varieties such as Burbank, Russet Burbank, Early Ohio, White Rose, or other similar varieties, the diameter of each potato shall be not less than $1\frac{7}{8}$ inches and not less than 40 percent of the potatoes in the lot shall be 6 ounces or more in weight.

(2) For round or intermediate shaped varieties such as Irish Cobbler, Katahdin, Bliss Triumph, Green Mountain, or other similar varieties, the diameter of each potato shall be not less than $1\frac{7}{8}$ inches and not less than 60 percent of the potatoes in the lot shall be 2¼ inches or larger in diameter.

(d) Size B: For all varieties the size shall be from 1½ inches to not more than 2 inches in diameter.

(e) Other sizes: When any of the above size designations are not used in connection with U. S. Extra No. 1, U. S. No. 1, U. S. Commercial, or U. S. No. 2 grades, it is permissible to specify any other minimum size such as "1½ inches minimum," "2 inches minimum"; or both a minimum and a maximum size as "$1\frac{7}{8}$ inches to 3 inches," "6 to 10 ounces"; or to specify a certain percentage over a certain size as "25 percent or more 2¼ inches and larger," "50 percent or more 6 ounces and larger."

(f) Tolerance for size: (1) In order to allow for variations incident to proper sizing, not more than 3 percent of the potatoes in any lot may fail to meet the specified minimum size except that a tolerance of 5 percent shall be allowed for potatoes packed to meet a minimum size of 2¼ inches or more in diameter, or 6 ounces or larger in weight. In addition, not more than 15 percent may fail to meet any specified maximum size.

(2) When a percentage of the potatoes is specified to be of a certain size and larger, no part of any tolerance shall be used to reduce such a percentage for the lot as a whole, but individual containers may have not more than 15 percent less than the percentage required or specified, provided that the entire lot averages within the percentage specified. For example, a lot specified as 25 percent 2½ inches and larger may have containers with not less than 10 percent 2½ inches and larger provided the lot as a whole averages 25 percent 2½ inches and larger.

§ 51.1547 *Skinning classification.* (a) "Practically no skinning" means that not more than 5 percent of the potatoes in any lot have more than one-tenth of the skin missing or "feathered."

(b) "Slightly skinned" means that not more than 10 percent of the potatoes in any lot have more than one-fourth of the skin missing or "feathered."

(c) "Moderately skinned" means that not more than 10 percent of the potatoes in any lot have more than one-half of the skin missing or "feathered."

(d) "Badly skinned" means that more than 10 percent of the potatoes in any lot have more than one-half of the skin missing or "feathered."

UNCLASSIFIED

§ 51.1548 *Unclassified.* Unclassified shall consist of potatoes which have not been classified in accordance with any of the foregoing grades. The term "unclassified" is not a grade within the meaning of these standards but is provided as a designation to show that no definite grade has been applied to the lot.

DEFINITIONS

§ 51.1549 *Mature.* "Mature" means that the outer skin (epidermis) does not loosen or "feather" readily during ordinary handling and that practically no skin has been removed from the potatoes.

§ 51.1550 *Bright.* "Bright" means practically free from dirt or other foreign matter, and that the outer skin (epidermis) has the attractive color normal for the variety.

§ 51.1551 *Well shaped.* "Well shaped" means the normal shape for the variety and that the potato is not pointed, dumbbell-shaped, excessively elongated, or otherwise ill-formed.

§ 51.1552 *Soft rot or wet breakdown.* "Soft rot or wet breakdown" means any soft, mushy, or leaky condition of the tissue such as slimy soft rot, leak, or wet breakdown following freezing injury or sunscald.

§ 51.1553 *Internal discolcration.* "Internal discoloration" means discoloration such as is caused by net necrosis or any other type of necrosis, stem-end browning, internal brown spot, or other similar types of discoloration not visible externally, except blackheart.

§ 51.1554 *Injury.* "Injury" means any defect which more than slightly affects the edible or shipping quality, or the appearance of the individual potato or the general appearance of the potatoes in the container or which cannot be removed without a loss of more than 2 percent of the total weight of the potato including peel covering defective area.

§ 51.1555 *Diameter.* "Diameter" means the greatest dimension at right angles to the longitudinal axis. The long axis shall be used without regard to the position of the stem (rhizome).

§ 51.1556 *Fairly well shaped.* "Fairly well shaped" means that the appearance of the individual potato or the general appearance of the potatoes in the container is not materially injured by pointed, dumbbell-shaped or otherwise ill-formed potatoes.

§ 51.1557 *Fairly clean.* "Fairly clean" means that from the viewpoint of general apearance, the potatoes in the container are reasonably free from dirt or other foreign matter and that individual potatoes are not materially caked with dirt or materially stained.

§ 51.1558 *Damage.* "Damage" means any injury or defect which materially injures the edible or shipping quality, or the appearance of the individual potato or the general appearance of the potatoes in the container, or which cannot be removed without a loss of more than 5 percent of the total weight of the potato including peel covering defective area. Any one of the following defects or any combination of defects the seriousness of which exceeds the maximum allowed for any one defect, shall be considered as damage:

(a) Second growth or growth cracks which have developed to such an extent as to materially injure the appearance of the individual potato or the general appearance of the potatoes in the container.

(b) Air cracks which are deep, or shallow air cracks which materially injure the appearance of the individual potato or the general appearance of the potatoes in the container.

(c) External discoloration, when skinned areas on individual potatoes are materially affected by dark discoloration, or when the general appearance of the lot is materially affected by discoloration.

(d) Shriveling, when the potato is more than moderately shriveled, spongy, or flabby.

(e) Sprouting, when more than 10 percent of the potatoes have sprouts over three-fourths of an inch long.

(f) Surface scab which covers an area of more than 5 percent of the surface of the potato in the aggregate.

(g) Pitted scab which affects the appearance of the potato to a greater extent than the amount of surface scab permitted or causes a loss of more than 5 percent of the total weight of the potato including peel covering defective area.

(h) Rhizoctonia, when the general appearance of the potatoes in the container is materially injured or when individual potatoes are badly infected.

(i) Wireworm, grass root or similar injury, when any hole, on potatoes ranging in size from 6 to 8 ounces, is longer than ¾ inch or when the aggregate length of all holes is more than 1¼ inches. Smaller potatoes shall have lesser amounts and larger potatoes may have greater amounts, provided that the removal of the injury by proper trimming does not cause the appearance of such potatoes to be injured to a greater extent than that caused by the proper trimming of such injury permitted on a 6 to 8 ounce potato.

(j) Dirt, when the general appearance of the potatoes in the container is more than slightly dirty or stained, or when individual potatoes are badly caked with dirt or badly stained; or other foreign matter which materially affects the appearance of the potatoes.

§ 51.1559 *Serious damage.* "Serious damage" means any injury or defect which seriously injures the edible or shipping quality, or the appearance of the individual potato or the general appearance of the potatoes in the container, or which cannot be removed without a loss of more than 10 percent of the total weight of the potato including peel covering defective area. Any one of the following defects or any combination of defects the seriousness of which exceeds the maximum allowed for any one defect, shall be considered as serious damage:

(a) Dirt, when the general appearance of the potatoes in the container is seriously affected by tubers badly caked with dirt; or other foreign matter which seriously affects the appearance of the potatoes.

(b) External discoloration, when skinned areas on individual potatoes are seriously affected by very dark discoloration, or when the general appearance of the lot is seriously affected by discoloration.

(c) Fairly smooth cuts such as are made by the digger or by a knife to remove injury, when both ends are clipped, or when more than an estimated one-fourth of the potato is cut away, or, in the case of long varieties, when the remaining portion of the clipped potato weighs less than 6 ounces. Irregular types of cuts which seriously affect the appearance of the individual potato, or which cannot be removed without a loss of more than 10 percent of the total weight of the potato including peel covering defective area.

(d) Shriveling, when the potato is excessively shriveled, spongy or flabby.

(e) Surface scab which covers an area of more than 50 percent of the surface of the potato in the aggregate.

(f) Pitted scab which affects the appearance of the potato to a greater extent than the amount of surface scab permitted or causes a loss of more than 10 percent of the total weight of the potato including peel covering defective area.

(g) Wireworm, grass root or similar injury, when any hole, on potatoes ranging in size from 6 to 8 ounces, is longer than 1¼ inches or when the aggregate length of all holes is more than 2 inches. Smaller potatoes shall have lesser amounts and larger potatoes may have greater amounts, provided that the removal of the injury by proper trimming does not cause the appearance of such potatoes to be injured to a greater extent than that caused by the proper trimming of such injury permitted on a 6 to 8 ounce potato.

SUBPART—UNITED STATES CONSUMER STANDARDS FOR POTATOES

GRADES

§ 51.1575 *U. S. Grade A Small; U. S. Grade A Medium; U. S. Grade A Medium to Large; U. S. Grade A Large.* Potatoes of each of these grades shall be of one variety or similar varietal characteristics which are fairly well shaped, fairly clean, free from freezing injury, blackheart, late blight, and soft rot or wet breakdown, and from damage caused by sunburn, second growth, growth cracks, air cracks, hollow heart, internal discoloration, cuts, shriveling, sprouting, scab, dry rot, Rhizoctonia, other diseases, wireworm, other insects, or mechanical or other means. Potatoes of these grades shall also be mature: *Provided*, That potatoes which are not mature and the outer skin loosens or "feathers" readily under the usual handling practices need not meet this requirement if they are firm and are further designated as "Early" in connection with the grade, as for example "U. S. Grade A Medium-Early." Potatoes on the shown face shall be reasonably representative in size and quality of the contents of the container. (See § 51.1577.)

(a) *Tolerances.* Incident to proper grading and handling, except for the tolerances for size, not more than a total of 5 percent, by weight, of the potatoes in any lot may fail to meet the requirements of the grade, including not more than 1 percent for potatoes affected by soft rot or wet breakdown. (See § 51.1579.)

§ 51.1576 *U. S. Grade B Small; U. S. Grade B Medium; U. S. Grade B Medium to Large; U. S. Grade B Large.* Potatoes of each of these grades shall meet the requirements for U. S. Grade A Small; U. S. Grade A Medium; U. S. Grade A Medium to Large; and U. S. Grade A Large, except for the increased tolerance for defects specified below. (See § 51.1577.)

(a) *Tolerances.* Incident to proper grading and handling, except for the tolerances for size, not more than a total of 20 percent, by weight, of the potatoes in any lot may fail to meet the requirements of the grade, but not more than 5 percent shall be allowed for potatoes which are seriously damaged by any cause, including not more than 1 percent for potatoes affected by soft rot or wet breakdown. (See § 51.1579.)

SIZE

§ 51.1577 *Size range requirements.* In addition to the quality requirements specified for the above grades, potatoes shall also meet the requirements for minimum and maximum diameter or weight, and the tolerances as specified for the various grades in the table appearing in this section. Potatoes specified as meeting one of the grades may be of any size within its size range requirement, except that it is not permissible to specify a lot as "U. S. Grade A Medium to Large," or "U. S. Grade B Medium to Large," unless more than 15 percent, by weight, of the potatoes are larger than the maximum size required for U. S. Grade A Medium, or U. S. Grade B Medium, respectively. For example, a lot of round or intermediate-shaped potatoes to be specified as "U. S. Grade A Medium to Large" must have more than 15 percent, by weight, of potatoes from 3 to 4 inches in diameter.

| Grades | Size range requirements, round or intermediate shaped varieties | | Size range requirements, long varieties | | Tolerances for size | |
|---|---|---|---|---|---|---|
| | Minimum diameter | Maximum diameter | Minimum diam. or wt. | Maximum weight | Under size | Over size |
| | *Inches* | *Inches* | | *Ounces* | *Percent* | *Percent* |
| U. S. Grades A & B small | 1⅛ | 2¼ | 1½ inches | 4 | 3 | 15 |
| U. S. Grades A & B medium | 2¼ | 3 | 4 ounces | 10 | 5 | 15 |
| U. S. Grades A & B medium to large | 2¼ | 4 | 4 ounces | 16 | 5 | 15 |
| U. S. Grades A & B large | 3 | 4 | 10 ounces | 16 | 5 | 15 |

OFF-GRADE

§ 51.1578 *Off-Grade potatoes.* Potatoes which fail to meet the requirements of any of the foregoing grades shall be Off-Grade potatoes.

APPLICATION OF TOLERANCES

§ 51.1579 *Application of tolerances to individual containers.* (a) Based on sample inspection, the contents of individual containers in the lot are subject to the following limitations: *Provided*, That the averages for the entire lot are within the tolerances specified for the grade:

(1) When a tolerance is 10 percent or more, not more than one-tenth of the individual containers in any lot may contain more than one and one-half times the tolerance specified, except that at least one defective and one off-sized specimen may be permitted in a container.

(2) When a tolerance is less than 10 percent, not more than one-tenth of the individual containers in any lot may contain more than double the tolerance specified, but no package may contain more than four times the tolerance for soft rot or wet breakdown, except that at least one defective and one off-sized specimen may be permitted in a container.

DEFINITIONS

§ 51.1580 *Fairly well shaped.* "Fairly well shaped" means that the appearance of the individual potato or the general appearance of the potatoes in the container is not materially injured by pointed, dumbbell-shaped or otherwise ill-formed potatoes.

§ 51.1581 *Fairly clean.* "Fairly clean" means that from the viewpoint of general appearance, the potatoes in the container are reasonably free from dirt or other foreign matter, and that individual potatoes are not materially caked with dirt or materially stained.

§ 51.1582 *Soft rot or wet breakdown.* "Soft rot or wet breakdown" means any soft, mushy, or leaky condition of the tissue such as slimy soft rot, leak, or wet breakdown following freezing injury, scald, or other injury.

§ 51.1583 *Damage.* "Damage" means any injury or defect which materially injuries the edible or shipping quality, or the appearance of the individual potato or the general appearance of the potatoes in the container, or which cannot be removed without a loss of more than 5 percent of the total weight of the potato including peel covering defective area. Loss of outer skin (epidermis) shall not be considered as damage when the potatoes are designated as "Early" unless the skinned surface is materially affected by dark discoloration. Any one of the following defects, or any combination of defects, the seriousness of which exceeds the maximum allowed for any one defect, shall be considered as damage:

(a) Second growth or growth cracks which have developed to such an extent as to materially injure the appearance of the individual potato or the general appearance of the potatoes in the container.

(b) Air cracks which are deep, or shallow air cracks which materially injure the appearance of the individual potato or the general appearance of the potatoes in the container.

(c) Shriveling, when the potato is more than moderately shriveled, spongy, or flabby.

(d) Sprouting, when the sprouts are not dried and are more than one-half inch long.

(e) Surface scab which covers an area of more than 5 percent of the surface of the potato in the aggregate.

(f) Pitted scab which affects the appearance of the potato to a greater extent than the amount of surface scab permitted or causes a loss of more than 5 percent of the total weight of the potato including peel covering defective area.

(g) Rhizoctonia, when the general appearance of the potatoes in the container is materially injured or when individual potatoes are badly infected.

(h) Wireworm, grass root or similar injury, when any hole on potatoes ranging in size from 6 to 8 ounces is longer than three-fourths inch, or when the aggregate length of all holes is more than one and one-fourth inches; smaller potatoes shall have lesser amounts and larger potatoes may have greater amounts, provided, that the removal of the injury by proper trimming does not cause the appearance of such potatoes to be injured to a greater extent than that caused by the proper trimming of such injury permitted on a 6 to 8 ounce potato.

§ 51.1584 *Internal discoloration.* "Internal discoloration" means discoloration such as is caused by net necrosis or any other type of necrosis, stem-end browning, internal brown spot, or other similar types of discoloration not visible externally.

§ 51.1585 *Mature.* "Mature" means that the outer skin (epidermis) does not loosen or "feather" readily during the ordinary methods of handling.

§ 51.1586 *Serious damage.* "Serious damage" means any injury or defect which seriously injures the edible or shipping quality, or the appearance of the individual potato or the general appearance of the potatoes in the container, or which cannot be removed without a loss of more than 10 percent of the total weight of the potato including peel covering defective area. Any one of the following defects or any combination of defects the seriousness of which exceeds the maximum allowed for any one defect shall be considered as serious damage:

(a) Fairly smooth cuts such as are made by the digger, or by a knife to remove injury when both ends are clipped, or when more than an estimated one-fourth of the potato is cut away, or, in the case of long varieties, when the remaining portion of the clipped potato weighs less than 6 ounces; irregular types of cuts which seriously affect the appearance of the individual potato, or which cannot be removed without a loss of more than 10 percent of the total weight of the potato including peel covering defective area.

(b) Shriveling, when the potato is excessively shriveled, spongy, or flabby.

(c) Surface scab which covers an area of more than 50 percent of the surface of the potato in the aggregate.

(d) Pitted scab which affects the appearance of the potato to a greater extent than the amount of surface scab permitted or causes a loss of more than 10 percent of the total weight of the potato including peel covering defective area.

(e) Wireworm, grass root or similar injury, when any hole on potatoes ranging in size from 6 to 8 ounces is longer than one and one-fourth inches, or when the aggregate length of all holes is more than two inches; smaller potatoes shall have lesser amounts and larger potatoes may have greater amounts: *Provided*, That the removal of the injury by proper trimming, does not cause the appearance of such potatoes to be injured to a greater extent than that caused by the proper trimming of such injury permitted on a 6 to 8 ounce potato.

§ 51.1587 *Diameter.* "Diameter" means the greatest dimension at right angles to the longitudinal axis. The long axis shall be used without regard to the position of the stem (rhizome).

SUBPART—UNITED STATES STANDARDS FOR SWEETPOTATOES

GRADES

§ 51.1600 *U. S. Extra No. 1.* U. S. Extra No. 1 shall consist of sweetpotatoes of similar varietal characteristics which are firm, smooth, fairly clean, fairly well shaped, free from freezing injury, internal breakdown, black rot, other decay or wet breakdown except soil rot, and from damage caused by secondary rootlets, sprouts, cuts, bruises, scars, growth cracks, scurf, soil rot, or other diseases, wireworms, weevils or other insects, mechanical or other means.

(a) Unless otherwise specified, each sweetpotato shall be not less than 1¾ inches in diameter. In no case shall the sweetpotato be less than 3 inches or more than 10 inches in length, more than 3¼ inches in diameter, or weigh more than 18 ounces. (See § 51.1604.)

(b) Tolerance for defects: In order to allow for variations other than size, incident to proper grading and handling, not more than a total of 10 percent, by weight, of the sweetpotatoes in any lot may fail to meet the requirements of this grade, but not to exceed a total of 5 percent shall be allowed for defects causing serious damage, including not more than 2 percent for sweetpotatoes affected by soft rot or wet breakdown except soil rot.

§ 51.1601 *U. S. No. 1.* U. S. No. 1 shall consist of sweetpotatoes of one type which are firm, fairly smooth, fairly clean, not more than slightly misshapen, which are free from freezing injury, internal breakdown, black rot, other decay or wet breakdown except soil rot, and from damage caused by secondary rootlets, sprouts, cuts, bruises, scars, growth cracks, scurf, soil rot, or other diseases, wireworms, weevils or other insects, mechanical or other means.

(a) Unless otherwise specified, each sweetpotato shall be not less than 3 inches in length and 1¾ inches in diameter, and shall not exceed 10 inches in length. In no case shall the sweetpotato be more than 3¾ inches in diameter or weigh more than 20 ounces. (See § 51.1604.)

(b) Tolerance for defects: In order to allow for variations other than size, incident to proper grading and handling, not more than a total of 10 percent, by weight, of the sweetpotatoes in any lot may fail to meet the requirements of this grade, but not to exceed a total of 5 percent shall be allowed for defects causing serious damage, including not more than 2 percent for sweetpotatoes affected by soft rot or wet breakdown except soil rot.

§ 51.1602 *U. S. Commercial.* U. S. Commercial shall consist of sweetpotatoes which meet the requirements for U. S. No. 1 grade except for the increased tolerance for defects.

(a) Tolerance for defects: Not more than 25 percent, by weight, of the sweetpotatoes in any lot may fail to meet the requirements for U. S. No. 1 sweetpotatoes, other than for size, but not more than 5 percent shall be allowed for defects causing serious damage, including not more than 2 percent for sweetpotatoes affected by soft rot or wet breakdown except soil rot. (See § 51.1604.)

§ 51.1603 *U. S. No. 2.* U. S. No. 2 shall consist of sweetpotatoes of one type which are firm, and which are free from freezing injury, internal breakdown, black rot, other decay or wet breakdown except soil rot, and from serious damage caused by dirt or other foreign matter, cuts, bruises, scars, growth cracks, soil rot, or other diseases, wireworm, weevils or other insects, mechanical or other means.

(a) Unless otherwise specified, each sweetpotato shall be not less than 1½ inches in diameter and shall weigh not more than 36 ounces. (See § 51.1604.)

(b) Tolerance for defects: In order to allow for variations other than size, incident to proper grading and handling, not more than a total of 10 percent, by weight, of the sweetpotatoes in any lot may fail to meet the requirements of this grade, including not more than 2 percent for sweetpotatoes affected by soft rot or wet breakdown except soil rot.

§ 51.1604 *Tolerance for size.* In order to allow for variations incident to proper sizing, not more than a total of 10 percent, by weight, of the sweetpotatoes in any lot may not meet the specified size requirements but not more than one-half of this amount, or 5 percent, shall be allowed for sweetpotatoes which are smaller than the minimum diameter and minimum length specified.

UNCLASSIFIED

§ 51.1605 *Unclassified.* Unclassified shall consist of sweetpotatoes which have not been classified in accordance with any of the foregoing grades. The term "unclassified" is not a grade within the meaning of these standards but is provided as a designation to show that no

definite grade has been applied to the lot.

APPLICATION OF TOLERANCES

§ 51.1606 *Application of tolerances.* (a) The contents of individual containers in the lot, based on sample inspection, are subject to the following limitations, provided the averages for the entire lot are within the tolerances specified:

(1) When a tolerance is 10 percent or more, individual containers in any lot shall have not more than one and one-half times the tolerance specified, except that at least one defective and one off-sized specimen may be permitted in any container.

(2) When a tolerance is less than 10 percent, individual containers in any lot shall have not more than double the tolerance specified, except that at least one defective and one off-sized specimen may be permitted in any container.

DEFINITIONS

§ 51.1607 *Similar varietal characteristics.* "Similar varietal characteristics" means that the sweetpotatoes in the container have the same type of flesh and practically the same color of skins. For example, dry type sweetpotatoes shall not be mixed with those of the semimoist or moist type in the same container.

§ 51.1608 *Firm.* "Firm" means not flabby or shriveled.

§ 51.1609 *Smooth.* "Smooth" means that the sweetpotato is free from coarse veining or other defects which cause roughness to such an extent as to appreciably injure the appearance of the individual sweetpotato or the general appearance of the sweetpotatoes in the container.

§ 51.1610 *Fairly clean.* "Fairly clean" means that in general appearance the sweetpotatoes in the container are reasonably free from dirt or other foreign matter and that the individual sweetpotatoes are not materially caked with dirt.

§ 51.1611 *Fairly well shaped.* "Fairly well shaped" means that the sweetpotatoes are not so curved, crooked, constricted or otherwise misshapen that the appearance of the individual sweetpotato or the general appearance of the sweetpotatoes in the container is materially affected.

§ 51.1612 *Damage.* "Damage" means any injury or defect, not including misshapen sweetpotatoes, which materially affects the appearance, or the edible or keeping quality of the individual sweetpotato or the general appearance of the sweetpotatoes in the container, or which cannot be removed without a loss of more than 5 percent of the total weight of the sweetpotato including peel covering the defective area. Any one of the following defects or any combination of defects, the seriousness of which exceeds the maximum allowed for any one defect, shall be considered as damage:
